And what about health care? At a time when we are desperately searching for a cure for AIDS, when the infant mortality rate remains scandalously high, when immunization programs are already being cut back, this legislation would significantly limit the Federal Government's ability to act to improve our Nation's health. How many infants will die because of the passage of this bill?

I represent an area in California which is plagued by air and water pollution. There are days when children cannot play outside because the air is so polluted. There are signs on the beaches in my district warning people not to eat the fish they catch, and to refrain from swimming in the ocean because of high levels of toxic wastes which pollute the waters. These beaches have traditionally been the most heavily used recreational beaches in the country. Adoption of this bill will slow down the long overdue process of cleaning up our environment. It will further endanger the health and welfare of my constituents and everyone else who lives in an area suffering from air and water pollution.

David Broder in today's Los Angeles Times has provided us with an exceptionally thoughtful and accurate analysis of the shortcomings of Gramm-Rudman. I commend it to my colleagues and I insert it into the RECORD at this point:

BY ANY NAME, GRAMM-RUDMAN IS A SHAM

(By David S. Broder)

The label on the "Gramm-Rudman deficit-reduction plan" has a nice rhythm and rhyme to it. But a more accurate name for the measure that Congress is likely to embrace this week, as a way of dodging the blame for the runaway deficits, is the "Rudman-Gramm balanced-budget sham."

The rationale for reversing the names of the principal sponsors, Sens. Phil Gramm (R-Tex.) and Warren B. Rudman (R-N.H.), is that Gramm-Rudman is the opposite of what it purports to be.

In the name of predictability, a measured five-year progression toward zero deficits, it deliberately invites chaos. In the name of responsibility, it virtually guarantees that the deficit hot potato will be passed back and forth between President Reagan and Congress even more often than in the past five years.

In the name of fairness, it grants budgetary immunity to politically privileged programs and guarantees that programs whose beneficiaries are weaker will take a disproportionate share of the cuts.

Under the guise of toughness, it maintains the conspiracy of silence about the need for more revenues, and thus invites Reagan to maintain the anti-tax stance that is the principal cause of the deficits. The remarkable thing about Gramm-Rudman is that many of those who are voting for it know that it is a scam. Don't take my word for it. Listen to what Rep. Leon E. Panetta (D-Calif.), one of the conferees who crafted this marvel, told the New York Times: "The theme in what we did was to make this thing so irrational, so ugly that it works as a club."

The "club" is supposed to be the threat of implementing this "ugly . . . irrational" process: Rather than let the severe slashes in unprotected domestic and defense programs required by Gramm-Rudman go into effect next year, the sponsors say, the President and leaders of both parties in Congress will surely sit down and negotiate a more sensible set of budget compromises.

To which, the experience of the past five years screams: Fat chance. For five years Ronald Reagan has dug in to protect his sacred cows (strategic weapons and lower tax rates), and the Democrats have been

equally vigilant for theirs (Social Security and Medicare).

Gramm-Rudman does not require either to yield an inch. Instead, it posits that Reagan and the Democrats will join in an assault on other, unprotected, spending. They won't.

What they will do, instead, is try to outfox each other in a game of legislative-executive chicken. That game bears no resemblance to a sensible consideration of the merits of rival budgetary claims. Faced with the mindless Gramm-Rudman mandate to cut unprotected defense and domestic spending 50-50 across the board, Congress will be invited to appropriate even more lavishly than it does now—and Reagan to veto appropriations even more offhandedly.

Out of this mischief and chaos, the most basic policy of the government of the world's most powerful nation is somehow to emerge.

It is a fraud—and a fright. Any proposal to deal with the deficit crisis that addresses the budget process instead of the immediate and real choices on spending and taxes is a fake. Gramm-Rudman is a dangerous fake, because it invites—indeed, requires—irresponsible behavior at every stage by every one of the major players in the legislative and executive branches.

The case against Gramm-Rudman was conclusively made last month by Sen. Charles McC. Mathias Jr. (R-Md.), who is retiring next year and is free of the requirement for political posturing that persuades so many of his colleagues that they'd better vote for this travesty.

As he said, Gramm-Rudman "searches for a way to evade the hard choices that deficit reduction demands. It strives for a way to reach that goal without taking responsibility. It represents budget balancing by anonymous consent."

Mathias said that he shares the doubts raised about the constitutionality of Gramm-Rudman. The new process invests three sets of appointed civil servants—in the Office of Management and Budget, the Congressional Budget Office and the General Accounting Office—with the authority to require one elected official, the President, to impound funds lawfully appropriated by another set of elected officials in Congress. If that is what the Founders intended, it is a puzzle why we even bother with elections.

But beyond that, he said, "the measure before us raises another, equally troubling danger: the danger of abdication of constitutional responsibility. The proposal strives for a system that makes both legislators and the executive impotent spectators of the budget process. But it will fail, and it deserves to fail."

Mathias is right, and when the failure and the fraud of Gramm-Rudman become evident next year, I hope that the voters will deal with those who concocted and supported it.

Why is this legislation expected to pass today? Politics and fear, pure and simple. The majority of the Members of this and the other body are aware of the shortcomings of this bill. Yet, in an effort to sugarcoat a vote to raise the debt ceiling, and limit the political damage which inevitably results from such a vote, Members of this body are willing to enact one of the most dangerous and unfair bills to come before Congress in recent memory.

I urge those of my colleagues who intend to support this legislation to reconsider. This bill is not in the national interest. It is not fair. It will, in my opinion, be seen ultimately as unconscionable.

This bill delegates essential legislative power to the executive, refuses to deal as a legislative body with the hard choices we have been elected to make and, therefore, may very well be unconstitutional. It offers false hope to the American people who should be able to rely on responsible action by their elected officials and not on quick fixes which will not attain the desired result. Neither the Congress nor the President has dealt properly with this massive problem but this approach is at least as irresponsible as any approach we have seen.

Mr. OBEY. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. LAFALCE].

Mr. LAFALCE. Mr. Speaker, for the past several weeks the House conferees have been diligently working to improve the Gramm-Rudman amendment, which mandates a balanced budget by 1991. The Senate version of this bill was so inherently flawed that I doubted whether the House could remedy its many weaknesses. My suspicions were correct. Despite the efforts of the House to make this legislation more palatable, it was and remains an unacceptable approach to balancing the Federal budget.

When Gramm-Rudman first emerged on the scene without so much as a single legislative hearing, I noted that the bill was politically inspired, unfair, unrealistic, a threat to both our domestic and national security, economically irresponsible and probably unconstitutional. The compromise version has not obviated these criticisms. They remain valid and, as such, responsible legislators should reject this ill-advised gimmick.

The fundamental mission of government is to choose among conflicting priorities. Gramm-Rudman abandons this goal by divesting the Congress of all responsibility for making difficult decisions about spending and revenues, prefering to focus on procedures rather than substance. It represents, in the words of Senator CHARLES MATHIAS "budget balancing by anonymous consent." Indeed, Gramm-Rudman renders the budget, authorization, appropriations and reconciliation processes nugatory.

Supporters of Gramm-Rudman argue that it is simply an action-forcing device designed to make Congress confront the hard choices which it has hitherto refused to make. It assumes that if we make the consequences of inaction so repugnant that we will then act, finally. But if we do not, what then? We must live with a measure which even supporters of the compromise term "ugly" and "irrational." I am not willing to take such a risk, not when a responsible way for bringing the Federal budget into balance is available.

In fact, Gramm-Rudman may actually be more conducive to irresponsibility than otherwise. By permitting Congress to escape confronting the hard decisions, the bill virtually promotes irresponsibilty. After all, either the President will veto unacceptable legislation, or the invisible hand of Gramm-Rudman will enforce fiscal restraint, albeit while abdicating political responsibility.

Gramm-Rudman also purports to be equitable. Cuts must come equally from domestic spending and defense. The bill ignores, however, the basic fact that Government spending is not the primary cause of our budget deficits. We would not be in this predicament today had it not been for President Reagan's 1981 tax cut, which gutted the revenue base of the Federal Government. This year the deficit is expected to total approximately $200 billion; the 1981 tax cut is responsible for a loss of approximately $181.2 billion in tax revenue this year. Meaningful deficit reduction cannot ignore the revenue side of the equation. As David Broder has written, "Under the guise of toughness, it maintains the conspiracy of silence about the need for more revenues, and thus invites Reagan to maintain the antitax stance that is the principal cause of the deficits."

Mr. Speaker, we are about to put the Federal Government on automatic pilot for the next 5 years without any clear understanding of the hazards which we may encounter. Moreover, we are doing so in a way that radically transforms the role of Congress and the Executive in possibly an unconstitutional manner. We are, in effect, through this legislation moving toward a parliamentary system of government. Gramm-Rudman also creates the illusion that at the end of all this, we, as a nation, will have something to show for it. Yet, Congress can pretend that Gramm-Rudman does not exist by simply passing a bill which violates the deficit targets. Alternatively, if we encounter slow economic growth during the next 5 years, as is likely, all bets will be off, and the deficit targets will be discarded. Gramm-Rudman cannot succeed.

Mr. Speaker, we should stand and be counted in opposition to this ill-conceived effort. I urge my colleagues to reject the conference report.

Mr. OBEY. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Speaker, I rise in opposition of House Joint Resolution 372.

For the past 2 months conferees to House Joint Resolution 372 have been working intensely to reach agreement on revisions in the budget process that will address our dangerously high deficit. The task has been difficult and the choices less than pleasant. Nevertheless, I want to commend my colleagues who served on the conference committee for their diligence and countless hours of hard work. As a conferee, I witnessed the many meetings attended to try to correct a bad bill. The final product is more fair and humane than the original bill.

However, as we prepare to vote today, I am gravely concerned that we are betraying the Constitution of the United States, and the responsibilities it invests in elected Members of Congress. I believe the Gramm-Rudman proposal is blatantly unconstitutional; if we support this measure, we are

abdicating our duties and giving the President unprecedented, new powers and authorities.

Since taking office in 1981, the President has raised the Pentagon budget by 85 percent while cutting domestic programs 35 percent. This is the context in which we vote for Gramm-Rudman, and commit ourselves to reductions of $11 billion in March 1986, and steeper cuts in future years.

There is no question that the deficit hangs as a sword of Damocles over our entire economy. We must reduce spending, especially wasteful and unnecessary programs in the Pentagon and other areas. We must not, however, turn our backs on the millions of Americans who are dependent on basic governmental programs. Reductions in health and other domestic programs and inflation adjustments will, indeed, save the Government money. It will also, undoubtedly, harm millions of Americans, forcing them to live on the edge of poverty.

Social Security recipients will receive a 3.1-percent cost-of-living increase in their January checks. I think it is admirable that we have exempted Social Security from the sequestration procedure. Social Security is the bedrock of most older Americans' financial security. Our commitment must remain unshakable.

Social Security benefits are to private sector employees, as civil service retirement checks are to Federal retirees. It is fundamentally unfair and inconsistent to deny Federal retirees and survivors their 3.1-percent increase this January. The Federal work force has been singled out year after year for unfair budget cuts, and they should not be placed in further jeopardy in Gramm-Rudman.

Some people may assume that the Federal worker is overpaid and his or her pension is overgenerous, but this assumption is completely wrong. Federal workers are not overpaid. They will not receive a pay increase this year. Federal retirees' and survivors' benefits are comparable to those in the private sector. They depend on their monthly annuity checks to support themselves and their families. They feel the same financial constraints when inflation rises and need the same protections as Social Security recipients.

Estimates show that survivors of Federal retirees receive approximately $6,000 a year in annuity payments. An elimination of a 3.1-percent COLA will mean a permanent loss of $180 for them. Federal retirees, who receive an annuity of approximately $12,000 per year, will realize a permanent loss of $387.

Federal retirees have been planning for their 3.1-percent adjustment for months. Their January checks will be mailed in just 2 weeks, and it is unreasonable to cancel it at this late date.

Federal retirees have served this country proudly. They have provided necessary services in health care, Social Security, defense research, and aeronautic exploration. They have protected our borders and processed our tax returns. They should not be asked to absorb our budget cuts, while other sectors remain untouched.

Mr. Speaker, the Gramm-Rudman budget cutting resolution also would require reductions in Medicare, veterans health programs, community and migrant health programs, and the Indian health service. These Federal health programs could be cut by 1 percent across the board in 1986 and by 2 percent across the board in 1987 and beyond.

Over the last 5 years, individuals who depend on these vital health programs—the elderly, the disabled, veterans, and low-income Americans—have been hurt by significant budget cuts which have raised their out-of-pocket expenses and reduced their health care services. We cannot, in good conscience, require further harmful cuts in Federal health programs to assist those who are most in need and most at risk.

Medicare is a grim example of a vital program that has already been seriously eroded. Between 1981 and 1985, $13 billion was cut from Medicare. As a result of these cuts, senior citizens now spend an additional $3 billion annually in out-of-pocket health care costs. Today, the elderly devote the same portion of income, 15 percent, to health spending that they did before Medicare began.

Millions of seniors already cannot manage with the gaps in Medicare coverage. One-fourth of our seniors today live at or below 125 percent of the poverty level, and so cannot pay for uncovered health services, which are extremely expensive:

Medicare does not cover dental care, yet one-half of seniors have no natural teeth.

Medicare does not cover vision care; yet 20 million senior citizens need glasses.

Medicare does not cover prescriptions; yet the elderly spend $6.4 billion each year for prescription drugs, and many spend more than $100 each week.

Mr. Speaker, given the reductions already imposed on the elderly's health care program and given the gaps in Medicare coverage already facing seniors, we must not vote to allow the additional Gramm-Rudman cuts in Medicare and other Federal health care programs.

In addition, educational programs will be cut dramatically and the future of our youth's access to education is at stake.

We need to reduce the deficit created by this administration's cuts not by abdicating our responsibility. Gramm-Rudman is a sham and unconstitutional. The following letter by the chairman of the Judiciary addresses in detail the constitutional question:

COMMITTEE ON THE JUDICIARY,
Washington, DC, October 16, 1985.

Hon. DAN ROSTENKOWSKI,
U.S. House of Representatives,
Washington, DC.

DEAR DAN: Because of your appointment as a conferee on House Joint Resolution 372, Extension of the Public Debt Limit, I am writing to express my serious concerns regarding the constitutional issues raised by the Gramm-Rudman proposal set forth in this resolution. While only the courts can definitively interpret the Constitution, it is nevertheless our responsibility to examine these issues in considering this proposal.

The Gramm-Rudman proposal requires the President to cut statutory appropriations whenever the Office of Mangement and Budget (OMB) and the Congressional Budget Office (CBO) determine that the deficit in any of the covered years (1986-1991) exceeds the amount authorized by the proposal. The cuts ordered by the President would be made both to increases in automatic expenditures and to controllable expenditures, so that the target deficit figure would be met. The President's order would become effective 30 days after its issuance.

The power delegated to the President under this proposal is a lawmaking power, one that carries with it permanent legal consequences. As the Gramm-Rudman proposal itself states:

"Any automatic spending increases modified or suspended, or any amounts of budget authority, obligation limitation, other budgetary resources, or loan limitations sequestered by an order of the President under this Act are *permanently cancelled, and the legal rights, if any, of persons to receive such automatic spending increases shall be deemed to be extinguished to the extent that the operation of laws providing for such increases are modified or suspended by such an order.*" (Italics added.)

In the definition section of the proposal, the term "sequester" is defined as:

"[T]he *permanent cancellation* of budget authority, obligation limitations, other budgetary resources, or loan limitations, to the extent necessary to reduce each controllable expenditure by a uniform percentage." (Italics added.)

Gramm-Rudman thus leaves no doubt, either in its operative provisions or in its definitions, as to the consequences of the President's actions—the President is required to permanently cancel outlays of authorized and appropriated amounts which were enacted into law in accordance with constitutional procedures. Gramm-Rudman does purport to limit the President's freedom of action in making such cancellations. For example, the President is instructed that his actions may not "have the effect of eliminating any program, project, or activity of the Federal Government." Gramm-Rudman further provides that the President is not given new authority under its terms to: "alter the relative priorities in the Federal Budget that are established by law, and no person who is, or becomes, eligible for benefit under any provision of law shall be denied eligibility by reason of this section."

However, none of these limitations alters the fundamental fact that the proposal confers on the President the power to cancel the amounts of authorized and appropriated funds, thus terminating legal rights established under constitutionally enacted legislation. To a substantial but indeterminate degree, the President and his Office of Management and Budget will be able to exercise interpretative discretion in determining exactly what aspects of programs are to be cut back, and to what degree. These are matters traditionally—and constitutionally—within the Congress' lawmaking power.

The provisions of the Constitution are explicit on the procedures necessary to enact legislation. These procedures require the involvement of both Houses of Congress and the President:

"All legislative Powers herein granted shall be vested in a Congress of the United

States, which shall consist of a Senate and a House of Representatives." Art. I. § 1.

"Every Bill which shall have passed the House of Representatives and the Senate, shall, before it becomes a Law, be presented to the President of the United States; . . ." Art. I, § 7, cl. 2.

"Every Order Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary (except in a question of Adjournment) shall be presented to the President of the United States; and before the Same shall take Effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the Rules and Limitations prescribed in the Case of a Bill." Art. I, § 7, cl. 3.

Attempts to deviate from this lawmaking process have been unequivocally struck down by the Supreme Court. The most recent example is *I.N.S.* v. *Chadha*, 462 U.S. 919 (1983), where the Supreme Court ruled that "legislative vetoes" are unconstitutional. In *Chadha*, the Court stated that legislation can be enacted only one way—through the steps required by the Constitution: bicameralism (action by both Houses) and presentment to the President (who may sign the proposal or whose refusal to sign may be overridden by Congress).

Thus, in *Chadha*, the Supreme Court ruled that Congress cannot undo a law by anything short of a new law, and that all laws must be adopted through the constitutionally mandated procedures quoted above. The Court stated in the strongest terms that delegations of authority could not be so crafted as to avoid this constitutional procedure, which had been carefully devised to preserve not only the rights of the people but also the separation (and balance of power) among the branches of government.

The Gramm-Rudman proposal seeks to circumvent these constitutional requirements, as did legislative veto, except that Gramm-Rudman attempts to do so by delegating unconstitutional powers to the President, rather than to one or both Houses of Congress. Though its language merely directs the President to issue an "order" requiring a reduction in expenditures—a mandatory duty based on the projected economic conclusions of two bureaucratic agencies—the effect of these so-called orders is to repeal duly enacted statutes. The proposal attempts to authorize the President to undo a law by something less than a law—and is thus unconstitutional.

While under the Constitution Congress *can* delegate the authority to implement laws, it *cannot* delegate the authority to repeal laws. This is precisely what the Gramm-Rudman proposal purports to do.

However, the issue involved here is far more than a technical question of the procedures required by the Constitution, as to some extent was the case with legislative veto. The spending (in this case, "non-spending") authority delegated by the Gramm-Rudman amendment goes to the core of the concept of separation of powers and is one specifically addressed in the Constitution: "The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States; . . ." Constitution of the United States, Art. I, § 8, Clause 1.

"No money shall be drawn from the Treasury, but in consequence of appropriations made by law . . ." Article I, § 9, Clause 7.

The Framers of the Constitution were adamant that spending and taxing be in the hands of the legislative body which would make the decisions and set the priorities.[1]

This explicit assignment to Congress of spending authority was not made lightly. In fact, it reflected the framers' familiarity with the long and bitter battles of the English Parliament to win control over revenues and expenditures. It also reflected the framers' own experience in which spending and taxing decisions had been made for the colonies by the royal governors—the equivalent of the Executive Branch.

Congress can exercise this Constitutional authority, as any other lawmaking authority, only through enacting laws; and the enactment of laws requires bicameral consideration and presentment to the President. Any other method, however "convenient" and "efficient", is not constitutional.

As the Court stated in *Chadha:* "The fact that a given law or procedure is efficient, convenient, and useful in facilitating functions of government, standing along, will not save it if it is contrary to the Constitution. Convenience and efficiency are not the primary objectives—or the hallmarks—of democratic government. . . ." (462 U.S. at 944).

It is no idle concept that only through the power of the purse does Congress have any effective control of the Executive—as has been repeatedly demonstrated through our history, recently in the Nixon impoundment cases, and even more recently as Congress has prohibited or demanded the expenditure of authorized funds for various purposes. This power of the purse was given to Congress both so it could preserve its own prerogatives and so it could limit the otherwise potentially unlimited power of the President. It is troubling that Congress would so casually consider abdicating this power. (CBO's role under the provision does not alter the reality of this transfer of power in any way. In fact, there is the same constitutional defect in assigning lawmaking functions to this legislative branch agency.)

There are numerous policy reasons to question the wisdom of granting so much power to unelected officials at OMB and CBO, who would have a great deal of discretion in deciding whether the provisions of Gramm-Rudman would become effective, an event triggered by their joint budget estimates. Additional power is given to the President and OMB, an agency located within the Executive Office of the President, who would decide what is meant by a "relatively controllable" or an "automatic spending" increase, and thus, how programs are to be cut. However, the most basic reason to oppose the Gramm-Rudman provision in its current form is based solidly in the Constitution and its basic premise of separation of powers.

The Founders of this country intended that the Congress exercise its lawmaking authority to make spending and taxing decisions. The Founders no doubt knew the difficulty and discomfort that these decisions would produce. But these choices are among the most basic to be made by any government. It is for precisely this reason that these decisions were placed squarely in the Congress, which cannot constitutionally refuse to make them, however politically advantageous or expedient it may be to do so.

The Founders of this country intended, and required, that these decisions be made through a politically accountable process—through the enactment of a law under the procedures required by the Constitution.

In 1975, the Supreme Court stated, in *Buckley* v. *Valeo*, 424 U.S. 1, 124:

"[T] he principle of separation of powers was not simply an abstract generalization in the minds of the framers: it was woven into the document they drafted in Philadelphia in the summer of 1787."

Twenty-three years earlier, in 1952, the Supreme Court emphasized the role of the President as the executor of laws, not the maker of laws:

"In the framework of our Constitution, the President's power to see that the laws are faithfully executed refutes the idea that he is to be a lawmaker. The Constitution limits his functions in the lawmaking process to the recommending of laws he thinks wise and the vetoing of laws he thinks bad. And the Consitution is neither silent nor equivocal about who shall make laws which the President is to execute. *Youngstown Sheet and Tube* v. *Sawyer*, 343 U.S. 579, 587-89 (1952)

For many years prior to the Supreme Court decision that the legislative veto procedure was unconstitutional, I had opposed the procedure on the basis that it attempted to short cut the constitutionally mandated requirements for adoption or repeal of a law. I have the same concerns about the Gramm-Rudman approach, though these concerns are greater because Gramm-Rudman strikes at the core power to Congress: the power of the purse.

I urge that we not hide behind this procedural and constitutionally questionable proposal.

Sincerely,

PETER W. RODINO, JR.,
Chairman.

Mr. OBEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. Mr. Speaker, I wish to express my opposition to the Gramm-Rudman proposal of automatic, unbalanced spending cuts triggered by highly imperfect predictions of future economic conditions.

Gramm-Rudman is an irresponsible abdication of congressional authority. Our Constitution vests the power to authorize spending, set policy, appropriate funds and raise revenue solely in Congress. This power and responsibility should not be delegated to an automatic formula triggered by unelected technicians. For nearly 200 years, this basic principle has guided Congress and the country.

But Gramm-Rudman would fundamentally change that constitutional obligation. The calculations triggering the mechanistic cuts will come from forecasters and statisticians at the Congressional Budget Office [CBO], the General Accounting Office [GAO] and the Office of Management and Budget [OMB]—all service institutions not envisioned by our Founding Fathers and not representing the sovereignty of the American people.

[1] In fact, The Constitution explicitly requires that tax bills originate in the House, that body closest to the people. "All Bills for raising Revenue shall originate in the House of Representatives; but the Senate may propose or concur with Amendments as on other Bills." Constitution of the United States, Art. I, § 7, Clause 1.

The inflexible budget targets premandated under Gramm-Rudman future years, once triggered, preclude congressional choice and control. It will prevent Congress from adjusting its spending, and therefore philosophical, priorities in light of updated information. It will create, by formula, social and economic policy for out years 1986 through 1991.

How would such an unconstitutional and irrational outcome occur? If the President and Congress fail to meet pre-set deficit limits, automatic spending cuts or sequestration would take place.

Now these automatic cuts would not fall proportionately across the board, because Social Security and certain programs would be exempt, forcing larger cuts on the rest of the budget.

Gramm-Rudman purports to be fair and equitable in the formula cuts of the exposed, non-exempt portions of the budget. Fifty percent of the necessary cuts would come from military spending and 50 percent from the domestic budget. But this is distinctly not equitable. Why? Because, first, the exposed parts of the military budget and the domestic budget are not equal. Second, domestic programs have been cut approximately 30 percent over the past 5 years while military spending has increased 89 percent. These two factors, taken together, practically insure an ever widening discrepancy between domestic and military programs.

The preferential treatment for military spending over education, the environment, law enforcement, urban redevelopment, farm support, transportation and ameliorating poverty will continue. In fact, the preference for military spending will grow more intense under Gramm-Rudman.

Gramm-Rudman is also susceptible to deliberate Presidential manipulation. For example, the President could actually force the Gramm-Rudman process to trigger automatic cuts by simply vetoing regular appropriations and revenue bills sent to him by Congress, thus himself causing the preset deficit targets to be missed. This would give the President de facto power to legislate—another violation of the Constitution. If legislated deficit reductions cut more dollars from military than from domestic programs, for example, the President could veto the legislation and force the 50/50 formula cut embodied in Gramm-Rudman.

The House negotiators fought valiantly for the exemption of certain programs to protect the poorest of the poor and veterans, and I commend their efforts. Medicaid, Aid to Families with Dependent Children [AFDC], the Women, Infants and Children Nutrition Program [WIC], Supplemental Security Income [SSI], food stamps, child nutrition, and veterans' pension and compensation programs, as well as Social Security, are spared from automatic cuts under Gramm-Rudman.

Several other cuts are also softened—again by formula—to create partial exemptions. Cuts are limited to 1 percent for fiscal year 1986 and 2 percent thereafter in veterans' health, community and migrant health, Indian health and Medicare programs. This softening of cuts on health programs is good, but it causes more pressure, and larger cuts on nonexempted programs.

Here are just some of the programs that will not be targeted for draconian cuts under Gramm-Rudman: Low-income Housing and Energy Assistance for the Elderly, Meals on Wheels, Senior Companion and Foster Parent Programs, Student Financial Assistance, Education for the Handicapped, Medical Research Funding, Amtrak, Mass Transit Aid, Law Enforcement, the National Park Service, Toxic Waste Control, and hundreds of other programs which improve the quality of life for millions of Americans.

As an economist, Mr. Speaker, I have one additional very serious reservation about Gramm-Rudman: The likelihood that the formula cuts can actually accentuate the business cycle and worsen recession. The economy must grow at less than 1 percent per year—a very low rate of performance indeed, with rising unemployment almost inevitable—for Gramm-Rudman targets must be suspended. But the same amount of spending must be cut from the budget whether national economic growth is slightly more than 1 percent even as high as 5 or 6 percent.

But growth at these different rates have vastly different implications for the economy and therefore for the size of the deficit itself. The higher the growth rate, the smaller the deficit; the lower the growth rate the lower the deficit. So when the economy is fragile, Gramm-Rudman forces larger cuts than when it is robust. It forces smaller cuts when the economy is strong—just the opposite of what should be done. Gramm-Rudman should, but does not allow us to adjust the size of the cut to economic growth. Unless growth falls very, very low—below 1 percent—we will be locked into five equal deficit reduction steps. This is irrational and very bad management of the macroeconomy.

For the numerous reasons outlined above, I will express my opposition to Gramm-Rudman by adding my name to the suit filed by Representative MICHAEL SYNAR of Oklahoma, challenging the constitutionality of the Gramm-Rudman Act.

Mr. OBEY. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. WEISS].

Mr. WEISS. Mr. Speaker, I rise in opposition to the conference report.

I believe the Gramm-Rudman plan to mandate a balanced budget is one of the most irresponsible measures ever raised in the U.S. Congress. It was passed in the other body without being reviewed by a single committee. It envisions a completely unprecedented transfer of power from the Congress to the President. And it would force massive and devastating cuts in the same human needs programs that have already been targets of such cuts.

Under the revised plan developed by the conferees, neither the President's budget nor the congressional budget resolution would be permitted to contain a deficit that exceeds certain maximum limits: $172 billion in fiscal year 1986; $144 billion in fiscal year 1987; and $36 billion less in each succeeding fiscal year until the budget is balanced. If these limits are exceeded, the President would be required to make proportional reductions in most Federal programs to make up the difference. In either case, the scope and magnitude of the cuts would be enormous, and the result would be a step-by-step dismantling of most progressive achievements of the last 50 years.

Moreover, the tactics used to promote this plan are outrageous and deplorable. The Senate attached the Gramm-Rudman amendment to a measure to raise the debt ceiling above $2 trillion and threatened to let the U.S. Government default if the House didn't pass it. This strategy, which holds the millions of U.S. citizens who rely on Government benefit programs hostage to the Senate's demands, amounts to nothing short of legislative terrorism.

It is true that some changes have been worked out in conference that will moderate the impact of this ill-conceived plan. Importantly, the compromise plan accepts some of the positive changes called for in the House-passed alternative to the Gramm-Rudman plan. I voted for the House plan, not because I in any way endorse the concept of mandated cuts to achieve the illusory goal of a perfectly balanced budget, but because it was apparent that the Senate's much more dangerous plan would pass if an alternative was not offered.

Both the original and revised plans totally exempt Social Security from forced cuts. But as a result of pressure from the House of Representatives, the final plan also spares the following essential low-income programs from mandatory cutbacks: Medicaid, Aid to Families with Dependent Children [AFDC], the Women, Infants and Children Nutrition Program [WIC], Supplemental Security Income [SSI], food stamps, child nutrition, and veterans' compensation. In addition, a series of health programs that would have been subject to massive cuts in the original plan are partially protected, including Medicare, veterans' health, community and migrant health, and Indian health. Spending for these programs could only be cut by 1 percent in 1986 and 2 percent in the following years.

Moreover, the compromise slightly limits the amount of power that is transferred from Congress to the President. The Congressional Budget Office and the administration's Office of Management and Budget would develop budget estimates jointly, with the General Accounting Office acting as an arbiter between the two. Therefore, it will be more difficult for the administration to manipulate its estimates of deficit figures for political reasons. However, the bill continues to limit Congress' power over the purse in a manner that I believe is very likely unconstitutional and demonstrably unwise.

The compromise provides for automatic votes in Congress on a measure suspending the deficit limits and the automatic spend-

ing reduction process in the event of a recession. This would help avoid a situation in which the Government is forced to exacerbate an economic downturn by drastically reducing spending during a recession. The agreement also quickens the pace of deficit reductions so that the pain of major budget cuts would not be postponed until after the 1986 elections. Senate Republicans had conveniently crafted their original balanced budget plan so as to avoid the political fallout from drastic budget cuts until after the upcoming elections.

Finally, the conference agreement places a much larger share of the deficit reduction burden on defense programs, where a large part of the responsibility for the current deficit crisis rightfully lies. Under the newly fashioned agreement, total budget cuts would be absorbed equally by defense and nondefense programs.

I applaud the important efforts of those of my colleagues who helped moderate the extreme proposals of the Senate. But the changes they brought about, important as they are, cannot in any way justify the overwhelming harm to the American people that will result even under the revised plan. Therefore, I must cast my vote against this legislation.

The deficit problem is extremely serious. Deficits have grown far larger than at any point in our Nation's history, hovering around the $200 billion level throughout President Reagan's tenure. These astounding deficits have contributed to a doubling of the national debt in the last 5 years. In 1981, the Federal debt stood at $932 billion. This year, we face the necessity of raising the debt ceiling over the $2 trillion level.

A debt of this size poses a major threat to the future of our economy and the ability of the Government to meet the needs of its citizens. In the short run, ballooning deficits will raise interest rates and spark a new recession. In the long run, the economy will be crippled as resources are committed to servicing the debt rather than to production.

Already, 18 percent of Federal income tax revenues are devoted to servicing the national debt, up from only 11 percent in 1981. As this percentage continues to grow, the ability of the Federal Government to fulfill its obligations to the American public will also be threatened. Unless we take substantive action to reduce the deficit, programs that are essential to low- and moderate-income Americans will simply be wiped out.

It is obvious that strong medicine is needed to eliminate the deficit problem. But we cannot tolerate the Gramm-Rudman snake oil that attacks needed domestic programs almost indiscriminately and ignores the illness of our Tax Code, which is riddled with unfair loopholes.

The Gramm-Rudman plan is but a new incarnation of other longstanding proposals, such as the line-item veto and the balanced budget constitutional amendment, that promise to miraculously cure our deficit ills through a change in procedure, rather than a change in policy. By subjecting controllable portions of the budget to across-the-board cuts, it is thought that we will be able to achieve a balanced budget by 1991.

But the fatal flow of Gramm-Rudman and other deficit cure-alls is that they ignore the causes of the deficit crisis. The Gramm-Rudman plan will help focus the pain of deficit reduction on programs and people that are not responsible for the deficit. Not only is this a sure prescription for failure, but it is exceedingly unfair to a broad spectrum of American citizens.

What are the causes of our monstrous deficits? In 1980, candidate Ronald Reagan said, "The American people deserve a president who has the courage to give answers instead of making excuses. They also deserve one who doesn't look for scapegoats." Yet as President, Reagan has done nothing except blame others for the deficit crisis. He blames his predecessors. He blames Congress. He blames the budget process. He blames Democrats.

But there is no one who is more guilty than Ronald Reagan for the crisis in which we find ourselves. One need only refer to figures developed by the nonpartisan Congressional Budget Office to ascertain that the three major components of the current deficit are directly and unequivocably traceable to legislative changes enacted by the Reagan administration.

Between 1982 and 1987, tax and budget changes pushed through by President Reagan will have increased deficits by $557 billion above the levels we would have seen if we had kept 1981 policies intact. The single biggest contributing factor to this rise continues to be the President's tax giveaway to the wealthy and big business, which reduced revenues by $604 billion. A second factor is the continued stockpiling of wasteful and destablizing weaponry promoted by the President, which increased outlays by $175 billion. And the final factor is the increase in interest payments that resulted from the President's misguided policies, which raised outlays by $111 billion.

Even though these changes have been offset by $333 billion in domestic spending cutbacks, we have been left with deficit figures far greater in each recent year than we would have had if Reagan policies had not been enacted. In the most recent fiscal year, the deficit amounted to an astounding $212 billion. And most of that $212 billion deficit can be directly attributed to the tax and budget policies of Ronald Reagan.

Originally, you will recall, the President promised to balance the budget by 1984. Under the scenario put forth by the so-called supply-side economists, tax cuts would produce substantial new investment, leading to increased productivity that would fill the Treasury with new tax revenues. We now know beyond any shadow of a doubt that this plan was a failure. The new investment never occurred. The lost tax revenues were never replaced. And the economy is being driven forward by massive deficit spending, while the bills mount up for our children and their children.

Many felt that it was naive of the President to expect that he would be able to cut taxes, increase defense spending, and balance the budget all at once. But there is substantial and increasing evidence that the huge deficits we now have are not the result of administration bungling. Rather, these deficits have been purposefully inflated in an effort to convince the American public that we can no longer afford programs that serve human needs.

The Gramm-Rudman amendment is consistent with that strategy. While some of the details of the plan, notably its treatment of the defense budget, are not wholly to the President's liking, the overall plan provides a stringent and unavoidable mechanism for the step-by-step dismantling of most of the Federal Government. This is what President Reagan and his extremist allies desire—not only to "get government off our backs," not to "get rid of government."

If enacted, the effects of the Gramm-Rudman plan will swiftly prove devasting. Budget Director James C. Miller III has already stated that cuts in domestic spending of $50 billion will be needed to meet the fiscal year 1987 deficit target of $144 billion. And some estimates indicate that as many as 30 to 50 domestic programs would need to be completely eliminated in order to meet this goal.

While a handful of programs for the poor will be protected under the compromise before us today, many are not. For instance, operating subsidies for low-income housing will be subject to extreme and debilitating cuts. But perhaps the most noticeable and pernicious damage will be inflicted on the Government's key programs that aid average citizens. Support for education, mass transit, health care, pollution control, and law enforcement will all be exposed to a sharpened budget axe.

So long as we continue to target essential domestic programs that serve human needs for deficit reduction, rather than addressing the causes of the deficit crisis, we will merely undercut the value of fairness and increase human misery. The only serious response to the deficit crisis must involve strong efforts to cut unnecessary defense expenditures and to gain additional revenues by closing unfair loopholes in the Tax Code. And this means that the President must cease his obstinate and unthinking opposition to these changes and join in a truly substantive effort to reduce the deficit.

I stand ready to endorse a deficit reduction plan that accomplishes these goals. but I cannot and will not endorse the compromise Gramm-Rudman plan, which throws the burden of deficit reduction on individuals who are not responsible and cripples the ability of the Government to serve its citizens now and in the future.

If we hope to preserve the achievements of the past 50 years and to make new progress in the years to come, we must reject the Gramm-Rudman plan. And we must recommit ourselves to the concept of a government that does more than stockpile weapons of destruction—a government that does its best to meet the needs of all its citizens.

Mr. BOLAND. Mr. Speaker, I rise in opposition to this conference report and in opposition to the philosophy embodied in the Gramm-Rudman proposal.

I want to make it clear that I was a member of both Gramm-Rudman conferences. I have nothing but respect for all of the Members and staff of this body who served on those conferences, and for the herculean effort that they made to inject reason into an inherently unreasonable proposal. I want to particularly commend our chief negotiators, Mr. FOLEY, Mr. GEPHARDT, and Mr. PANETTA who represented the interests of this House with uncommon zeal and extraordinary effectiveness. I signed the conference report because I believed it reflected the best possible resolution of the differences between the House and Senate versions of Gramm-Rudman.

Now it is time to vote on the substance of this matter, however, and in many respects it is an historic time for Congress. If we approve Gramm-Rudman in any of its forms, we assume two things. First, that it is possible in December 1985 to set realistic deficit targets 5 years into the future, and second, that Congress cannot, and in fact should not, exercise any independent judgment on how to meet those targets. I reject both assumptions. If we pass Gramm-Rudman, we put the budget decisions of the Federal Government, which represent the most basic economic policy decisions of our Nation, on automatic pilot. That may please those who do not relish choosing between the various competitors for our budgetary resources, but it strikes me as a curious view of the responsibilities of the holders of public office.

Gramm-Rudman perpetuates the illusion that our budget deficit ills can be completely cured by cutting spending. That is a dangerous notion, and one which has no realistic basis. Congress has cut spending, and more needs to be cut, but I have seen no evidence which leads me to conclude that the kind of massive cuts required by Gramm-Rudman are supported by the American people. If we approve Gramm-Rudman and those cuts are made in the across the board, and therefore illogical method the bill requires, none of us will be able to hide behind a fig leaf which holds that the reductions were automatic and therefore beyond our control.

Congress was created to make decisions, not to devise ways to avoid them. In the budget area, those decisions must involve consideration of spending and of revenues. Perhaps we have consciously avoided some of the hard choices in the past on those matters. Let's not now compound our error by institutionalizing a way to avoid them in the future. Gramm-Rudman represents a collective throwing up of the hands by Congress and the President, an admission that we can't, or won't, do what we know needs to be done to solve our deficit problems. As such, it sends the worst possible message about our willingness to discharge our responsibilities under the Constitution. Let's not send that message. Let's send another message, one of resolve to make the tough choices on spending and on revenues that each one of us knows are inescapable if we are to avoid the economic catastrophe hearlded by our $200 billion budget deficits.

Mr. BEILENSON. Mr. Speaker, adopting the Gramm-Rudman scheme of automatic spending cuts is the wrong way to approach the deficit problem, and it's the wrong way to carry out our responsibilities as elected Members of Congress.

The compromise bill now before us is a considerable improvement over the original Gramm-Rudman amendment, but it's still a bad piece of legislation. I urge my colleagues to oppose this bill so that we can then vote for an unamended extension of the debt limit.

If we pass Gramm-Rudman, we will be admitting that we are not capable of making responsible budgetary decisions. We will be saying that we are not able to eliminate the deficit unless we are threatened with automatic budget cuts not of our own choosing. It's a sad commentary on Congress that we are willing to consider this reckless legislation, which could be devastating to programs we all care about, before we have even tried to develop a plan of spending cuts and tax increases that would balance the budget over 4 or 5 years in a more rational and equitable manner.

Think of how much more productively the last two and a half months would have been spent if Congress had used that time to draft a budget plan—a plan for the actual legislation that would be needed to eliminate the deficit in 4 or 5 years—instead of spending it concocting a scheme to force us to eventually come to terms with the necessary legislation in the future and to severely penalize most Federal programs if we don't. Every one of us knows what needs to be done to reduce the deficit, what is required to solve the problem, and yet here we are, voting not on a plan of actual spending cuts and tax increases, but instead on a promise to address the issue later under a very complicated process that seriously erodes congressional power and that may or may not actually work.

Some proponents of Gramm-Rudman believe that the threat of automatic spending cuts will force Congress to take whatever action is necessary to avoid those cuts. However, we will probably find that interest groups who would be hurt more by actions under our regular budget process than under the automatic cuts will do everything possible to force delay in congressional action. Then, when we become deadlocked in our efforts to reduce the deficit through carefully considered legislation, we will have to accept the automatic cuts that will occur without any control over the extent of the cuts or any understanding of their impact.

In addition, requiring Congress and the President to meet specific annual deficit targets is not the best way to eliminate the deficit. A rational plan to balance the budget in five years would probably call for smaller reductions in the earlier years and larger reductions in the later ones, after changes in programs have been phased in. Under this legislation we won't have the flexibility to adjust the targets in order to cut more in one year and less in another, unless a recession is projected; then, the requirements can be suspended entirely.

This legislation might be a little easier to accept if the automatic cuts fell relatively equitably, but they don't. OASDI, the two Social Security trust funds which now comprise 20 percent of the Federal budget, are exempt. And, all of the automatic cuts will come from the spending side of the ledger, leaving untouched all the spending that occurs through the Tax Code in the form of tax expenditures—spending which is growing at much greater rates each year than direct spending.

Social Security should not be exempt from the automatic cuts that will be required if Congress fails to achieve the maximum deficit level for a given fiscal year. The popularity of this program is an argument for keeping it in—not for taking it out. If Social Security cost-of-living increases were subject to the automatic cuts, Congress would have that much more of an incentive to reduce the deficit below the maximum deficit amount through its regular budget process in order to ensure that automatic cuts would be avoided.

Furthermore, as a matter of fairness, if other pension programs such as civilian and military retirement are subject to automatic cuts, then Social Security should be, too. Social Security is our Nation's most important social program and certainly there are good reasons for not tampering with it through a process as risky as Gramm-Rudman. But the fact that the conference didn't exempt other Federal pension programs on which a smaller number of people depend shows that the Social Security decision was made for political, rather than for humane, reasons.

There are even more compelling reasons for including tax expenditures in the automatic cuts. Spending which is authorized through the Tax Code, rather than through the appropriations process, should not be exempt from automatic reductions just because it is on the revenue side of the ledger. Fairness demands that if we are going to cut across the board, we ought to include in those cuts the Government support that benefits corporations and the well-to-do. And that means reducing the tax breaks which allow individuals and corporations to avoid paying their fair share of taxes. A process that threatens those who benefit from direct Federal spending ought to threaten those who benefit from tax expenditures, too.

Furthermore, because no revenue provisions are included in the automatic cuts, we are increasing the odds that there will be no revenue increases enacted through the regular budget process. If Congress passes a responsible deficit-reduction package that includes revenues, the President can simply veto it, and then, assuming the veto is sustained, the deficit will be reduced solely through the automatic cuts. If revenues were included in the automatic reductions, then the President would be forced to look more kindly upon any tax increase that Congress sent him, knowing that there

would be a tax increase of some sort if he refused to sign the bill.

Mr. Speaker, the reason we find ourselves in the position we're in right now, having to vote on a plan as grievously flawed as Gramm-Rudman, is because in recent years we have taken too much of the budget off of the negotiating table. If, in this year's deficit-reduction effort, we had agreed to at least some additional revenues and some type of adjustment in Social Security cost-of-living increases, we would have made far more progress in lowering the deficit than we are going to make this year. And, we probably would have avoided having to act on the dangerous and misguided scheme before us now.

I urge my colleagues to vote no on the pending legislation. Congress ought to put aside the talk and the promises and get to work on a fair and equitable plan of spending cuts and tax increases that will give us a balanced budget in 4 or 5 years. It is our responsibility, as Members of Congress, to use our good judgment to decide how to balance the budget—not have the budget balanced for us in a way that we cannot control.

Mr. GREEN. Mr. Speaker, it is with great reluctance, Mr. Speaker, that I rise today in support of the Gramm-Rudman-Hollings deficit reduction plan, which is attached as an amendment to the legislation allowing the Congress to lift the debt ceiling. It is a sad state of affairs when Members of Congress are forced to resort to automatic budget-cutting procedures instead of making the hard political choices necessary to restoring our fiscal health.

One of my goals since becoming a Member of Congress in 1978 has been to work with my colleagues to pass responsible Federal budgets. This year and last, however, the Congress as a whole shirked its responsibility by approving budgets which increased the defense budget unnecessarily, were fraught with loopholes, and which used fudged economic expectations. Therefore, as a member of the Committee on Appropriations, I have worked to redirect spending on individual appropriations bills away from defense, for example, and in support of responsible funding levels for mass transit, environmental protection, and other worthwhile Federal functions.

All year, I have worked closely with colleagues from both parties, and particularly with a group of moderate Republicans—the 92 Group—in an effort to redirect our budget policy. These choices were difficult, and were preceded by substantial debate, even among the group of us who are relatively like-minded on many policy and budget matters. However, earlier this year, our group presented a very realistic and equitable budget package—which was defeated in the House—and I was very disappointed with the unrealistic final budget package approved by the Congress—which I voted against.

Although I plan to vote for the Gramm-Rudman-Hollings package, which has the approval of both the Democratic and Republican leadership in the House. I want to voice the major objection I have to the plan. The fact of the matter is that the so-called across-the-board cuts envisioned by the Gramm-Rudman-Hollings amendment will not have across-the-board ramifications. I am happy that half of the necessary outlay reductions will be made in defense programs.

In addition, I fully believe that the Congress must ensure that many low-income spending programs such as Aid to Families with Dependent Children, Child Nutrition, Food Stamps, Supplemental Security Income, Veterans' Pensions and Compensation, and the WIC Program—which provides nutritious supplements for women, infants, and children—be funded at adequate levels.

I also recognize that the plan should be sensitive to our senior citizens. However, exempting these low-income plans from the deficit reduction process may very well cause major problems in formulating our future domestic spending levels.

Although fully half the spending cuts must be derived from the defense budget, the exemptions for the programs above tacitly endorse cutting immense amounts of funding for programs which are not exempt, such as student financial aid and compensatory education, housing programs such as subsidized public housing and elderly and handicapped housing, social services block grants, environmental programs, mass transit operating assistance, and drug enforcement.

If I may say so, Mr. Speaker, I believe that the cuts that these programs are going to face in 1986 will be as dramatic as any we have seen since 1981.

However, while I am far from enthusiastic about the Gramm-Rudman-Hollings approach to deficit reduction, and would rather see the Congress perform the necessary budget balancing in a more reasoned way, the fact is that the Congress has steadfastly refused to do so. Under the circumstances, then, I see little choice but to accept the Gramm-Rudman-Hollings approach to reaching the goal of the balanced budget, even though I believe that we do have the ability to make these decisions on annual basis if we seriously intend to do so.

As a member of the Appropriations Committee, which is ultimately responsible for funding discretionary spending programs, I am happy that the conference agreement makes changes in the existing budget process to speed up consideration of budget measures and to improve enforcement mechanisms. This should encourage the completion of congressional action on the budget resolution and all appropriations and reconciliation bills before the automatic spending reduction process is triggered.

It should be noted, however, that each of the appropriations bills passed this year by the House is both under budget and includes less spending than the previous year's bill—including the HUD-independent agencies bill, which originated in the subcommittee on which I am the ranking minority member.

Overall, Mr. Speaker, I have learned during my 8 years in the House that Members of Congress are often faced with some pretty miserable choices. This is one of those times. Although I have consistently fought to decrease wasteful defense spending and agricultural spending, I am not fond of having to vote for a bill which will do that at the expense of worthwhile programs such as environmental protection, housing, education, mass transit, and law enforcement.

The passage of Gramm-Rudman-Hollings will force the Congress to be more creative in its plans to reduce our Nation's Federal budget deficit in an equitable manner, and I look forward to working with my colleagues in this effort.

Mr. HAWKINS. Mr. Speaker, I rise today in strong opposition to the compromise version of Gramm-Rudman. I believe the basic premises of the original measure were flawed, and despite the time, effort and sincerity of the conferees to present us with what they consider to be an improved bill, I do not concur and cannot in good conscience support this legislation.

I feel like a member of the audience in the theater of the absurd. The President and a majority of this Congress have outstripped Broadway and Hollywood in presenting us with the ultimate dramatic tragedy of the season.

While we can argue over whether Gramm-Rudman may or may not be constitutional, or whether it will force Congress to abdicate its rightful role in policymaking and controlling the purse strings of the Federal Government, these issues skirt the real crux of the matter—namely—what will Gramm-Rudman force upon the people of this Nation and what will be the economic fallout of its deceptive, erroneous philosophy?

I am afraid some of my colleagues have gotten so caught up in the rhetoric about the deficit that an atmosphere of hysteria has been created which has so severely limited our policy options, as to practically curtail our ability to govern.

In the words of the Constitution, the Federal Government was formed to "establish Justice, insure domestic Tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity * * *." I ask my colleagues, how in heavens name can we even begin to accomplish those lofty ideals when we sit here today considering a measure which talks not about setting priorities for meeting the needs of the people of this country, but about setting meaningless targets for spending, which are based on pretentious economic assumptions and outright erroneous philosophy.

Let's not beat around the bush.

What separates us from others who support this proposal is that they believe that the deficit is the result of too much Government spending by which they really mean too much spending on domestic, civilian programs they don't like. We, on the other hand, know the deficit is the result of unbalanced economic policies that have tolerated unacceptably high levels of unem-

ployment, intolerably high real interest rates, and a severe mismatch between fiscal and monetary policy.

The primary causes of the $200 billion deficit are the combination of the 1981 Reagan Tax Act, concurrent enormous spending increases in the military budget and increased interest on the national debt.

However, I would be remiss were I not to also point out, that to some extent, part of the problem lies even deeper than the policies of the last 5 years.

Real growth rates have been extremely deficient for at least the last 15 years; only 2.8 percent from 1969–84, and then within that period only 2.1 percent from 1979–84.

This has resulted in staggering losses in production, employment, and revenues.

When we have industrial capacity no higher than 80 percent, and over 14 million people unemployed and underemployed in the words of my philosophical "soul-mate" on the other side of the aisle, Mr. KEMP, and I quote:

There is the cause of your deficit. We are operating at a half a trillion dollars below our capacity, $500 billion below our capacity.

Gramm-Rudman does absolutely nothing to address this problem. Actually, it will only make matters worse, because without any other stimulus other than the deficit itself, reducing it will neither balance the budget or encourage growth.

In addition to lack of adequate economic growth, productivity growth also continues to lag behind the average of previous expansion periods. Since the recession trough, productivity has increased by 2.2 percent compared with the 2.7-percent average in previous recoveries and jobs in manufacturing are only 56 percent of their prerecession levels.

And, let us not forget the enormous impact of monetary policy.

Despite the welcome drop in interest rates recently, both short term and long term interest rates remain higher today than in the 1960's and the 1970's, both in nominal terms and after adjustment for inflation. Interest rates have been too high for too long and they remain too high today.

Deficit reduction has merit and should be attempted in the proper fashion, with due consideration to what our priorities should be. However, deficit reduction should not be an end in itself. Our aim should be to create and foster the conditions necessary for sustained, economic growth with full-employment. Only by this, can we achieve lower deficits and maintain stable prices.

I am afraid under any version of Gramm-Rudman, there will be increased pressure to further cut programs that have already been crippled too much. The Budget Resolution for fiscal year 1986 exempted from further cuts several low-income programs—compensatory education, job training, Head Start, and others—on the bipartisan, bicameral consensus that these programs had already suffered disproportionately from the illogic of deficit-reduction-for-reduction-sake.

Any version of Gramm-Rudman will stifle innovative public policy. We face significant, pressing problems of poverty, illiteracy, and minority youth unemployment, among others. This bill will effectively shut the door on our ability to address these problems unless, and until, we either agree to dismantle our entire health care system, our retirement system, our national defense, or the President acquiesces to a fair and equitable tax adjustment.

We need to have the flexibility to set priorities based on merit and evaluation. Instead, if we adopt this proposal, we have implicitly admitted that the root of the deficit problem is too much spending for such effective programs as education, housing, highways, nutritional programs for babies, civilian research and development, and all those other things that the Government does to contribute to our present and future well-being. I adamantly refuse to accept that view of our duties.

I would rather we make a stand on principle than compromise by passing a bill a little less bad than the original and one that virtually everyone in this body privately admits is fatally flawed. In simply cannot support a process which embodies in it the abdication of our responsibility to do what we think is best for our country.

Mr. GONZALEZ. Mr. Speaker, the so-called Gramm-Rudman amendment makes a fine slogan, but it is irresponsible policy. It represents bad economics, bad political judgment and bad logic. It imposes fresh injustices, locks Congress and the President into a frozen, irreconcilable conflict and destroys the ability of either President or Congress to govern responsibly. It it works as advertised, the Federal Government will be crippled in its ability to respond to any national need, be that defense or provision of minimal shelter for the homeless, be it rescuing the farm economy or providing medical assistance to the destitute. This result would be a shameful abandonment of our country by its own Government. If the amendment does not work as advertised, it merely imposes one more chapter in the long fantasy that began with the first Gramm amendment in 1981, which ushered in the era voodoo economics.

Gramm-Rudman creates a situation in which impossible budget cuts are required, because it does not include in the deficit reduction formula any provision for increasing revenues. Yet no responsible economist believes the budget targets can be met without a revenue increase, and certainly not under the budget priorities of the White House. Under those priorities only about $400 billion in outlays would be subject to cuts. Yet the deficit is at $200 billion. Further, the exemptions provided in Gramm-Rudman—concessions to a sense of decency and common sense—even further narrow the range of programs subject to cuts, which perforce would have to be of a magnitude creating appalling, senseless and absolutely destructive results.

To achieve the outlay reductions called for in this amendment, and still maintain the conflicting priorities between it and the White House, vast reductions in outlays would be required. Many of those outlays are in fact contractual obligations, which still further narrows programs subject to reduction. To reach the deficit reduction goals the President would have to make insane recommendations, such as imposing huge cuts in law enforcement, closing down prisons, cutting out personnel who administer the tax laws, and shutting down essential medical research. He would be building ships but left with no crews to operate them. He would be granting pension increases to veterans, but shutting down the hospitals that care for those same disabled veterans. There is no end to the list of pernicious, illogical, irresponsible and destructive actions that would be required.

Gramm's bullet would hit military and Federal retiree cost of living increases, but exempt such increases provided for veterans and Social Security recipients. This represents a nod toward decency and fairness for some, but not others whose situations are identical. There is no way to justify this, in logic or in equity. It is blatant unfairness, a redoubling of the unfairness carried in the original Gramm budget cuts of 1981.

Gramm's bullet would make it impossible to maintain existing public housing stock in decent order, let alone build new public housing. This would happen in the face of enormous demand for affordable housing for the elderly and disabled, not to mention emergency shelter for the burgeoning population of homeless people. It would absolutely destroy the communiuty development block grant program, one of the few flexible tools that cities can use to address their most urgent needs. It would require the swift abandonment of subsidized housing programs, and lead to the turning out of hundreds of thousands of families who will have no place to go except the streets. It would undermine the operations of the secondary market institutions that are the backbone of the Nation's housing industry.

Gramm's bullet attacks essential operations of the Federal Government. The greatest cost in law enforcement, for example, is personnel. Because personnel costs are immediate outlay costs, they represent an easy way to trim outlays. Personnel will therefore absorb disproportionate cuts. The Internal Revenue Service is already in chaos, but would be subject to still further cuts. The courts are already overburdened, but would be reduced to a shambles. Social Security administration would be cut still more, despite the already clear inability of the agency to made timely and correct decisions on disability cases. The Department of Defense can hardly abandon ships, aircraft and missiles in mid-construction, and therefore would have to impose large reductions in personnel and readiness. Equipment would be idled for lack of maintenance, crews to operate it, or parts to maintain it. Training would languish for lack of parts, fuel and maintenance.

The list of pernicious results of Gramm's newest invention is endless. We already know that to reach its targets, and still

maintain the White House budget priorities, cuts would have to be proposed that are unacceptable and even irresponsible. The targets would require the President and Congress to say "no" to actions necessary to maintain a stable economy, such as providing assistance to the crippled farm economy, or to stabilize sectors that are suffering from devasting, even predatory foreign competition. And yet we stand ready to embrace this viper.

Some of my colleagues see this as a way to cut the President's endless military appetite. Those who want to dismantle domestic programs see it as a way to achieve their ends. The determined band of voodoo economists see it as a way to prevent tax increases. Each of these embraces the bill as a way to do in some ideological enemy. Yet it is more likely to make the present impasse deeper and more intractable. The President remains frozen in his ideology, impervious to the clear and overwhelming evidence that it is impossible to achieve the budget goals within his prescribed demands. Congress sees the impossibility of enacting the cuts he and the Gramm bill envision, and so will attack his budget priorities. All will shrink from the one course that appeals to sense, which is to weigh programs and needs, do what is necessary and just, and raise the revenues required to insure fiscal responsibility.

This bill in effect put into law the continuing fiscal dispute between the President and Congress. It allows both to claim victory, but neither to achieve the desired and required objective. It denies the need to make real decisions, when only real decisions will suffice. It denies logic, denies reality, denies even simply justice. It sacrifices the good of all to the blindness and irrationality of a program that either cannot work or can work only through the ruination of responsible and effective Government. It is, in the final analysis, a bill that imposes shame on all of us if it works, and even greater shame if it fails.

We know what happened to the fiscal condition of this Government when Gramm's first invention sailed through in 1981. Yet here we are again, pretending that none of it every happened, pretending that it can all be solved by doubling the dose of irresponsibility and tripling the dose of injustice, and quadrupling the dose of illogic.

Gramm has given everyone a slogan, but he has also administered everyone a poison. It is a mark of the low degree we have reached, that the President thinks he has finally killed the domestic programs he loathes; that some of my colleagues think they have killed the military spending they loathe; and that still others think they have killed the fiscal monster generated by Gramm's first poison pill. And so they swallow, thinking murder, but committing suicide instead.

Mr. WOLPE. Mr. Speaker, I rise in support of the Gramm-Rudman bill, though I do so with resignation—not enthusiasm.

Every criticism of this legislation made by its opponents is valid. It is really an abdication of both congressional and Presidential responsibility for setting national spending priorities. It is, in fact, a meat ax approach to deficit reduction which could ultimately result in considerable damage to programs that I consider very important, such as education, research and development, and environmental protection. And its recession trigger, in my view, is ill-conceived. We could end up with wholly counterproductive deep budget cuts or minimal increases in times of economic stagnation—possibly pushing us into a recession.

But, Mr. Speaker, as incredibly flawed as this new budget procedure is, I simply do not believe we have any viable or credible alternative. The simple fact is that Federal deficits are wildly out of control.

There are those who liken these deficits to a ticking time bomb that will soon explode in economic disaster. But we must understand that these deficits are much more like an insidious poison in our economic system that is already taking its toll.

These deficits are the largest contributors to our widening trade deficit, which is costing millions of American jobs. They are keeping real interest rates unreasonably high, preventing young families from owning their own homes and causing enormous distress to America's family farmers. And just the interest on the national debt will cost the American people $142 billion in 1986. Indeed, the bill we are now considering includes a provision to lift the limit on the public debt past $2 trillion—twice what our debt was just 5 years ago.

And while we moan and groan about the deficit crisis, and give all of our speeches talking about the importance of political will and political courage, the fact is that we have failed to confront the tough decisions—with respect to both spending and revenues—that are required to bring our Federal budget into balance. Somehow a way must be found to get the President to begin to operate within the real world: He must begin to understand that we simply cannot continue to increase Federal spending, cut taxes, and somehow end up with a balanced budget. Somehow we must get the Congress to end its own gamesmanship which time and again sees individual Members parade as fiscal conservatives in their districts, only to vote with impunity for every synfuels-type pork barrel project that comes down the pike. We need, in short, to force greater accountability on the part of both the President and the Congress: All parties must be made to understand the real costs and implications of their pleas for new spending or their opposition to new revenue.

As I stated at the outset, I believe that this is seriously flawed legislation. I have doubts that it will work precisely as its sponsors claim. But it is indifinitely preferable to the alternative, which is muddling through with a total lack of leadership from the President and a lack of consensus and courage in Congress. A continuation of the status quo will only result in a continuing string of $200 billion deficits as far as the eye can see, and ultimate economic disaster.

However imperfect, the legislation before us will require the President to submit a budget next February containing considerable deficit reduction. The President, like many Members of Congress, gives lip service to bringing down the deficit. But in the past 3 years, he has proposed budgets with deficits of $188 billion, $180 billion, and $179.9 billion. Gramm-Rudman will require the President to submit a 1987 budget in February with a deficit not to exceed $144 billion.

It is my hope that the imperfect measure before us will force both the President and the Congress to finally face up to the seriousness of this problem and make the hard choices necessary to put our fiscal house in order once and for all.

Mr. BENNETT. Mr. Speaker, this legislation endangers our country because it arbitrarily cuts defense much deeper than can be permitted in face of the defense obligations of our Government. Moreover, it does this in a way that makes no sense. For instance, the conference agreement requires that any reductions be made uniformly in each program, project, and activity. This means that each building in the military construction program will be cut by the appropriate percentage rather than by eliminating lower priority programs. DOD would be required to build 98 percent of each of 100 buildings rather than 98 out of 100 buildings. Similarly the Navy would be required to build some portion of each ship in the shipbuilding program.

Gramm-Rudman would require a disproportionate reduction in defense under the sequestration. The agreement requires that half of all reductions come from defense, yet defense is less than a third of the entire budget. This is clearly unwise in view of the international situation.

Mr. MARKEY. Mr. Speaker, tonight we are considering a so-called compromise on the two proposals to achieve a balanced Federal budget, the Gramm-Rudman amendment and the Democratic alternative passed by the House of Representatives.

Mr. Speaker, as far as I am concerned the compromise was achieved in crafting a reasonable alternative to the horror that is Gramm-Rudman.

I feel as strongly as anybody in this House that we need to balance the Federal deficit. But this is a task that must be undertaken with the utmost in care.

We must excise excess spending from the Federal budget with a scalpel, not with a meat cleaver. In our efforts, Gramm-Rudman is a meat cleaver, and the Democratic alternative a scalpel.

A vote for Gramm-Rudman will burn into the U.S. Government the policies of President Ronald Reagan. President Reagan has sold Congress down the river for 5 years, and there is no reason to believe that he will not do it again next year. All of the President's top advisers, from Caspar Weinberger to Admiral Poindexter have said that Gramm-Rudman will impose unacceptable cuts in the Defense budget. I remain unconvinced that when push comes to shove next year, the President will not

stoke the fire under the Defense budget, and more vital domestic programs will be pillaged and plundered.

I will not at this time consider seriously the dramatic and far-reaching effects that the implementation this legislation will have. The balance of power that the branches of this Government enjoy is fragile at best. This bill may possibly alter that balance far into the future.

The time has come to say enough is enough. We must retake the agenda, and we must do it with authority. The duty of our Government is not only to protect, but to serve. Unfortunately, it is unclear whether the tenant at 1600 Pennsylvania Avenue shares the latter part of that philosophy. I feel very strongly that if we pass this legislation and it is enacted for 6 years, this Government will no longer serve the people of this country, it will only protect them.

There is genuine feeling among many people in this country that special interests are coming close to forcing Members of Congress to vote certain ways. These people feel that no Member of Congress should be forced to vote a certain way at any time. Yet enacting this legislation will do that for years to come.

Voting for Gramm-Rudman will be a mistake. Enacting Gramm-Rudman will be a mistake. And these mistakes will live until the end of this century, and they will certainly haunt each and every person who votes to do so.

The time has come to make hard, hard choices. Let us act with a pride flush with compassion. Let us act with certainty. Vote no on Gramm-Rudman.

Mr. DIXON. Mr. Speaker, today I am voting in opposition to the Deficit Control Act, House Joint Resolution 372. My opposition results from the deficit reduction compromise included in the bill, which unfairly subjects cost-of-living adjustments to civilian and military retirees to cuts that would provide up to half of the funds needed to meet deficit targets, and because it is possible that between 30 to 50 domestic programs would have to be terminated to meet the deficit target for 1987 alone.

The deficit reduction provision House Joint Resolution 372, commonly referred to as Gramm-Rudman, came before the Congress for consideration in a manner very similar to the tax cut/budget reduction legislation of 1981, Gramm-Latta; no Senate hearings were held, no committee consideration was allowed, and Members had to react to the legislation without clear knowledge of what its provisions would actually entail.

It is inconceivable that the Congress would even consider legislation of this magnitude in this manner, given the disastrous effect Gramm-Latta has had on the Federal deficit. Indeed, under this legislation, spending authority is shifted from Congress and the President, as the Constitution intended, to three Federal agencies—the Congressional Budget Office, the Office of Management and Budget, and the General Accounting Office. Although many of the most serious flaws with the original legislation have been resolved in conference, Gramm-Rudman still contains several provisions which preclude my support.

Cuts in fiscal year 1986 are limited to $12 billion, regardless of the amount the deficit exceeds the limit. This means deeper cuts will have to be made in 1987 to make up the difference.

Without a tax increase, for which the legislation makes no provision, 30 to 50 domestic programs would have to be eliminated in order to meet the $144 deficit target for 1987 if the President insists on maintaining a 3-percent growth rate in defense. This situation is totally unacceptable.

Although Medicare cuts are limited to 2 percent annually—1 percent in fiscal year 1986—base payment rates to hospitals, doctors, and other providers of health services could be cut in order to meet this reduction percentage. Under the Democratic alternative, only increases in payment rates would have been subject to reduction or elimination.

Once the automatic spending cuts are triggered, COLA's will be automatically eliminated to fund up to half of the cuts that must be made during any budget year. Civilian and military retirees will be the first group of Americans subject to deficit reduction cuts at a much higher percentage than any other group of citizens.

While I acknowledge a significant need for action to bring a halt to rising Federal deficits, I object to the manner in which Congress has considered the legislation before us. It is precisely this method of operation that resulted in the deficit crisis we now face.

I commend the work of House conferees on the debt ceiling legislation for the job they have done in developing this compromise under less than ideal circumstances, particularly their success in exempting Social Security and eight programs serving low-income Americans and disabled veterans from sequestration.

However, for the reasons indicated, I am unable to support the Gramm-Rudman compromise and hope that a more responsible approach can be developed that seriously address the national deficit crisis.

Mr. KEMP. Mr. Speaker, for the record I reluctantly oppose the Gramm-Rudman-Hollings conference report because it has been turned into a bad economic policy and bad defense policy. Reduction in wasteful Government spending is a high priority, but imposing rigid and disproportionate reductions in our national security budget and centering all economic policy solely on deficit reduction would be a huge mistake and likely lead to unacceptable tax increases in 1986 or 1987.

The Federal deficit merits neither hysteria nor complacency. But this enforced deficit reduction mechanism will in my view undercut our national security, sacrifice progrowth tax and fiscal policies, impose draconian budget cuts in needed defense programs, and add enormous pressure on President Reagan to accept tax increases. In short, this plan threatens the entire Reagan revolution.

I have always believed, along with many others on both sides of the aisle, that noninflationary economic growth that is full employment and price stability is the major goal of economic policy. In this respect, President Reagan's economic policy has performed magnificently, producing 8½ million new jobs since the recovery. Congress must not skuttle this progrowth strategy.

It is true that we face huge deficits. But the deficit is not the real problem, it is the symptom of the problem. Deficits reflect an economy which has not reached its full potential, a jobless rate which is still far above full employment, a manufacturing base which is only at 80 percent of capacity and falling, a poverty level of some 30 million Americans, and Government spending which outpaces even the near record growth in revenues. These are the causes of budget deficits. And we must attack these causes directly and not simply deal with economic symptoms. A good balanced budget plan would limit Government spending, not deficits.

By focusing on symptoms, the conference report plays into the hands of the administration's critics who wish to nullify the origins of President Reagan's successful economic policies—the cuts in tax rates in 1981—not by proposing new taxes, but by coercing Mr. Reagan into doing so. The balanced budget plan, admit some of its supporters, would finally force Reagan to choose between tax increases or huge defense cutbacks. This would be an unwise trade-off because we need both a strong national defense and a strong economy.

President Reagan's pledge not to increase taxes is not the only issue at stake in this issue. The balanced budget plan would especially hurt defense. I originally conditioned my support for Gramm-Rudman on the absolute requirement that our national security requirements not be jeopardized. I said at the time that Gramm-Rudman was first introduced that "Defense spending must be deter..ined by our requirements to meet the threat, not by an artificial budget formula. The modest improvements in the military balance we have set in motion over the past 4 years will be for naught if prudent defense increases are not sustained. Simply said, our national security must be exempt from the automatic sequestering of this bill, as I'm confident it will be."

Unfortunately, in the final version, it wasn't. Under this conference plan, defense would bear 50 percent of the cuts, even though it is only one-third of the budget. And this plan, unlike the original Gramm-Rudman plan gives the President no flexibility to apportion the defense cuts after 1986—all defense programs and activities would be treated equally. Military bands, in other words, would bear the same cut as the strategic defense initiative. This is an enormous and unacceptable flaw that endangers crucial national security initiatives and actually protects waste, fraud, and abuse by denying the President any flexibility in determining budget priorities.

For the fiscal year 1986 budget, the Gramm-Rudman bill would mean even

greater cuts in a defense budget already inadequate to meet our long-term defense objectives. At present, the Senate has passed a defense budget which stays even with inflation. The House has frozen defense spending at last year's level, which is a real cut after inflation.

But on top of this already bad situation, the Gramm-Rudman bill would require a $12 billion cut in total spending beginning in March 1986, 50 percent of which is to come from defense and 50 percent from domestic programs. Therefore, we are looking at an additional $6 billion defense outlay cut, which will actually mean at least an $18 billion cut in defense budget authority, using the traditional rule of thumb about the relationship between defense outlays and budget authority.

With this additional cut, the fiscal year 1986 defense budget will likely be 4.3 percent below last year's budget. This means a real 8 percent defense cut when adjusted for inflation. This is just the beginning of a 5-year demobilization program. In fiscal year 1987, defense outlays would have to be cut by an additional $20 to $25 billion, making defense budget authority cuts of $60 to $75 billion. It's no surprise that many Democrats believe this is just the stick necessary to compel President Reagan to raise taxes.

In short, the President may be forced to preside over the largest peacetime defense cutback in history. A 10-percent cut in defense, as even House Armed Services Chairman LES ASPIN admits is likely under this budget, would require almost one-third of those in uniform to be fired. I don't believe that Ronald Reagan was elected to sacrifice our national defense needs to the dictates of a budget formula. And I will continue to work to see that Congress and the administration provide a defense budget based only on the security needs of our country and our allies.

While disastrous to defense, this version of Gramm-Rudman exempts almost two-thirds of the domestic Federal budget—including interest payments—from serious budget reduction. In all, over $413 billion is exempted. Another 13 percent of domestic spending, chiefly Medicare and other health programs, is subject to small cuts because they are protected by special rules. And another 7 percent of domestic spending would have cost-of-living adjustments eliminated. Only 20 percent of domestic spending remains that would be subject to full sequestration.

It's easy to see that the liberals will have little incentive to make reforms or reductions in the domestic budget, since most domestic spending programs are automatically protected under a sequestration order, while defense is fully exposed.

At the same time, since most spending has been exempted, the small remaining parts of the budget—some of which benefit average Americans or funds necessary functions of Government—will bear draconian budget reduction. Some have estimated that the small remaining controllable parts of the budget might have to bear 15- to 20-percent budget reductions, which would be devastating to some important programs. I have never favored this meat-ax approach to the budget.

Moreover, the liberals will have an incentive to increase social spending as rapidly as possible before a sequestration order occurs. The greater the social spending portion of the budget, the less it will be cut under a sequestration order, and the more that the defense budget will have to be cut. These perverse incentives could actually cause greater domestic spending and larger deficits.

I supported the original Gramm-Rudman bill and we owe both authors a great debt of gratitude. I believe that we should pledge ourselves to reach its deficit reduction targets, regardless of the outcome of this bill. Put quite simply, the conference plan has betrayed a simple and good idea. Whereas the original Gramm-Rudman envisioned relatively small across-the-board reductions in virtually every Government program, the conference plan shields almost two-thirds of domestic spending from full sequestering, thereby requiring draconian, and perhaps politically impossible cuts in the remaining parts of the budget.

Whereas the original Gramm-Rudman gave the President flexibility to cut wasteful programs and protect our national security, the conference report requires rigid line item reductions and endangers our national security. Whereas the original Gramm-Rudman protected defense contracts, the conference report would break 95 percent of existing defense contracts, causing costly and inefficient stretch-outs of major defense programs. Whereas the original Gramm-Rudman plan would begin budget cuts in fiscal year 1987, properly reasoning that the 1986 fiscal year had already begun, the conference report would require a $12 billion cut in fiscal year 1986, fully half of which would come off the defense budget.

There are no easy, painless formulas to do our work. Congress needs the courage to make vigorous spending cuts in the domestic budget right through to waste, fraud, and abuse in the defense budget. We must go forth with tax reform to spur economic growth, and monetary reform to lower interest rates—these too are important components of a comprehensive strategy for deficit reduction.

Reducing the deficit is obviously a very important goal, but it cannot be achieved by jeopardizing fundamental national security goals and good economic policy. Congress must set priorities and make the hard choices that are necessary to balance the budget. This will require careful, deliberate action in which all categories of spending receive full scrutiny. But I can not sacrifice our national security and our progrowth economic policy on the altar of a balanced budget through higher taxes.

The truly devastating consequences of the Gramm-Rudman conference bill will be all too evident by September of next year. But I hope we can avoid the mistake today and get down to the important business of reducing excessive Government spending and deficits.

There is after all only one way to balance the budget and that is to bring this economy to full employment of our human and physical resources.

We owe the American people nothing less than prosperity, growth and jobs for all Americans without inflation.

Mr. UDALL. Mr. Speaker, I rise today in opposition to the resolution that is before us. It is not easy to cast a "No" vote on this measure. Everyone recognizes that the deficit is a terrible problem, and no one wants to be seen opposing deficit reduction.

But I cannot, in good conscience, support this measure. I do not opppose deficit reduction. The deficit is a monumental problem. And it will take monumental steps to solve it. But this is the wrong step.

In today's Washington Post, David Broder calls this measure, the "Rudman-Gramm Balanced Budget Sham." And he may be right.

The Gramm-Rudman proposal does not cut one dollar of Federal spending. It does not raise one dollar in new revenue.

What does it do? It sets up an unconstitutional, unworkable and irresponsible procedure for deficit-reduction.

After today, Members can go home and say they voted for a balanced budget. But this proposal does not create a balanced budget. It creates a budgetary monster: An automatic sequestration process that will devour Federal programs without regard for public need or national purpose.

Our only hope is that Congress will tame this monster by acting on its own to balance the budget and meet the deficit reduction targets on its own. But I don't see that happening. I see nothing but budgetary chaos.

This measure sets up a fast track for the consideration of deficit-reduction measures. But fast tracks have a way of breaking down. Congress, for example, is given just 30 days to devise an alternative to any sequestration order and get that alternative signed into law. It won't work.

If we want to get a handle on the deficit, let's start by admitting that the President and Congress made a fundamental mistake when they undertook to cut tax rates by 25 percent and double defense spending in 5 years.

In the 5 years since the passage of the 1981 tax cuts, the national debt has doubled. The annual interest payment on the national debt has soared from $50 billion a year in 1980 to $137 billion this year. The great supply-side experiment was a budgetary bust. The chickens have come home to roost.

We have created a deficit monster. But the way to slay that monster is not be creating another legislative monster. We cannot avoid our constitutional responsibilities. They must be met head on by cutting spending and raising taxes, not by setting up dubious and unconstitutional procedures for deficit reduction.

I urge the defeat of this resolution.

Mr. MINETA. Mr. Speaker, I share with all my colleagues the strong desire for a reasonable and sound fiscal policy for this

Nation. In the last 5 years our annual budget deficits have grown wildly, and the total national debt has doubled.

We must bring sanity and reason to the Federal budget. We cannot allow our children and their children to be saddled with the burden of paying for our inability to bring spending and revenues into balance.

We have before us today a legislative package designed to bring that rationality and order to our system. Under this proposal, our annual budget deficits would be reduced to zero by fiscal 1991. Between now and that point, however, this legislation allows for an additional $531.9 billion to be added to our national debt, an increase to the total national debt of more than 25 percent.

Reluctantly, I cannot support this package. While I am sympathetic to the goals that bring us to this point, I do not believe the legislation before us is a sound or workable document.

However much we want to achieve the goal of a balanced budget, today's package does not accomplish the goals that we seek. A popular goal does not make bad legislation sound or workable, however much we wish to see something labeled "balanced budget" enacted.

I have several very specific problems with the legislation actually before us, beginning with the fact that none of us have the time to read it, let alone consider its profound significance and intricate detail. This document only became available in the last few hours, and I am confident that there are probably fewer than 100 people in the whole Nation who have had a chance to read this proposed legislation and truly evaluate its long term impact.

I have never before seen such a complex and significant bill rushed through the Congress in such a hurry. We will be moving so fast that from here this bill will go straight to the President's desk, without even waiting for the usual formal preparation of a clean copy of our actions, as required by law.

I believe that as representations of our constituents, we who sit in this Chamber should be held accountable for our actions. How do we defend—let alone explain—the most sweeping reform in Federal fiscal policy in the last century when neither we nor our constituents know what it is we are doing?

This is an unworkable proposal. When we face our next recession, we will find ourselves tied in knots and completely unable to respond to that economic emergency. Our constituents will look to us for help and assistance, and all we will be able to say is sorry, the law does not allow us to help.

Furthermore, I believe this bill might actually lead to increased spending in the short term. Knowing that late in the budget cycle all programs will face an across-the-board percentage reduction might well produce reduced spending, but I suspect it will lead to increased spending during the beginning of the budget cycle, as program advocates build in a cushion to absorb the budget balancing sequestrations that we know are to follow.

Another aspect of this bill that may well increase spending is the treatment of Defense programs. One technique that the Defense Department may well use to meet the annual spending targets is to stretch out the procurement of major weapons systems over a longer period of time. This may seem to provide savings, but those annual savings are an illusion. As all of us who have ever purchased a car or a home know, the longer the time you have to pay off your debts, the smaller the annual payment but the larger the ultimate cost.

In fact, I believe that the ability of the Defense Department to shield its programs coupled with the list of spending items exempted from cuts, will force the bulk of the supposedly across-the-board reductions to fall unequally and unfairly on programs such as Federal Aid to Education, toxic waste cleanups under Superfund, and improvements to our increasingly out of date and overburdened transportation system.

Moreover, I do believe this plan is unconstitutional and illegal. What we are being asked to do is to delegate to a group of unelected and unaccountable bureaucrats the right to not only disobey the laws of the land, but indeed to change those laws as they see fit. If the laws we pass are wrong, then we as legislators should be held responsible for having passed those laws, and take upon ourselves the burden of making the necessary corrections. I believe it is neither legal nor wise to avoid our constitutional responsibilities by granting to accountants downtown the right to override the law without the benefit of public review and comment.

Implicit in this bill is the belief that excessive spending is the only cause of our present deficits. This premise is incorrect. According to the President's own budget, the 1981 Tax Act is costing this Government $210.8 billion in lost revenues in 1986, and will cost an additional $250.9 billion in 1987. If we truly want to balance the budget, we must have some provision within the hundreds of pages before us that at least provide the opportunity to raise revenues, which in some instances may provide the only responsible way to meet urgent national and personal security needs.

Mr. Speaker, this bill is a sincere effort to balance the budget. We have before us the product of hundreds of hours of hard work by men and women dedicated to fiscal prudence and sound government. All of us have wished them well in their efforts, but as one of the 18 members of the conference committee on this bill who declined to sign the statement of managers, I know that this bill does not accomplish what it set out to do, and therefore I will vote against passage of this legislation.

Thank you very much.

Mr. BROYHILL. Mr. Speaker, I rise today in support of this legislation. Originally, this was a measure to increase the Federal debt ceiling to more than $2 trillion—a mind boggling amount. It still does that, but it now carries with it a mechanism to reduce the Federal budget deficit, and thus eliminate the need for future increases in the Federal debt ceiling.

I have heard the criticisms of the Gramm-Rudman balanced budget amendment. Some are valid. Across the board cutback orders may not be the most responsible way to make Federal budget policy, but Congress has proven incapable of addressing the budget deficit in a responsible manner.

As Mort Zuckerman, chairman and editor-in-chief of U.S. News & World Report, wrote recently, "the only way to assure coherent progress on the deficit is to make the alternative the legislative equivalent of backing into a buzz saw." I agree. Congress, particularly the Democratic Members of this body, will not move forward in cutting spending unless moving forward is less painful than staying put. The full text of Mr. Zuckerman's editorial follows:

I urge all of my colleagues to vote "aye" on this legislation. Gramm-Rudman is not pretty, but it is perhaps the only ladder we have to climb out of the fiscal rat hole the big spenders have dug for us and our children.

GRAMM-RUDMAN—SO BAD IT'S GOOD!

(By Mortimer B. Zuckerman)

During the next 10 days, Congress is expected to vote on a bill to redeem partially one of the sorriest, most irresponsible records of fiscal profligacy in the history of the Republic. Prior to that vote, congressional conferees will meet to resolve differences between the Senate and House versions of the bill, known as the Gramm-Rudman bill, that would mandate automatic reductions in the federal deficit. The bill is attached to a Treasury request to raise the national-debt limit above the staggering sum of 2 trillion dollars, a symbolic threshold whose crossing has set off a political battle. The new debt-ceiling request reflects years of failure to bring federal deficits under control. As Senator Bob Packwood put it, "When it comes to voting against our favorite programs, we just can't do it."

The pile-up of debts and deficits is, by common consent, the greatest obstacle to sustainable economic prosperity facing the United States. President Reagan may be remembered by our children more for the increases in their taxes to meet the interest payments on the debts piled up during his Presidency than for anything else. Americans understand that it is morally wrong to be stealing from our children tomorrow to pay for the government excesses of today. As Talleyrand once said of one of Napoleon's deeds, "It is more than a crime. It is a mistake!"

Besides the long-term cost, the deficit is a pocketbook issue today. Government interest payments on the debt have increased by some 77 billion dollars in 1985 over 1980, more than wiping out all the spending cuts in social programs made in 1981.

As a result, over two thirds of the voters think the deficit is a major problem facing the United States. This public pressure has finally forced the lawmakers to devise a creditable program of deficit reduction. The Gramm-Rudman bill is their response.

The bill is an automated deficit-reduction machine that would write into law annual deficit reductions of about 36 billion dollars

and mandates the President to make across-the-board spending cuts if the normal congressional budget process fails to meet statutory limits on the federal deficit. A balanced federal budget is mandated in 1991.

Just as with the budget of last summer, the House Democrats are playing partisan politics with the bill by trying to exempt more to their favorite programs from the automatic spending cuts. This violates the basic principle of the legislation that the pain of budget cuts must be shared as broadly as possible. This should be rejected.

Critics say the bill would put Congress into a fiscal straitjacket, reducing necessary responsiveness to a recession; would apply a meat ax to social and military programs; would give too much power to the President; and is crafted to clamp down only after the 1986 elections.

Well, ignore the sophisticates. The whole point of Gramm-Rudman is that it should be so Draconian as to force Congress to deal with the deficit in a rational way. The only way to assure coherent progress on the deficit is to make the alternative the legislative equivalent of backing into a buzz saw. As one congressman put it, "Nobody in his right mind would substitute this budget process for the real one." To paraphrase Churchill's comment on democracy, this deficit policy may be the worst approach, except when compared to anything else.

Congress needs external pressure to create artificially a crisis that would require dealing with the deficit before it overwhelms us. If ever a group needed a gun to the head, it is the Democrats in the House who have been playing politics with the deficit all year. If it takes trial and terror to get anything done on the deficit, we are for it, for the problem requires not economic solutions but political will.

This proposal is the best hope we have to reform an unworkable, costly, and dangerous budget process and to assure that we, as a nation, stop this immoral policy of mortgaging the future of our children.

Mr. BORSKI. Mr. Speaker, I rise in strong opposition to the Gramm-Rudman proposal. Gramm-Rudman purports to be a cure-all for the budget deficit. In reality, it will disrupt vital government services and cause severe hardship for middle-income Americans.

First, let's take a look at why we are facing these massive deficits. Let's take a look at the economic policies of Ronald Reagan. Under 5 years of President Reagan's leadership, we have seen military spending increase by 89 percent, domestic spending slashed by 34 percent, and the national debt doubled to a record-high of $2 trillion.

The Gramm-Rudman proposal gives President Reagan the perfect vehicle to achieve his ultimate goal: A total dismantling of the non-defense programs of the Federal Government. We know what the President wants to do—eliminate the programs most Americans believe are essential—mass transportation, medical research, student loans, Amtrak, Medicare, environmental protection, and law enforcement.

Gramm-Rudman's effect will be felt almost immediately. Cost-of living-adjustments [COLA's] for military, civilian, and railroad retirees due in January will be suspended, despite the fact that both the House and Senate voted last May to preserve the COLA's of Federal retirees. Gramm-Rudman reneges on that pledge.

This plan would also have a devastating effect on cities. My hometown of Philadelphia already faces the loss of $46 billion in annual revenue sharing funds. Now, Gramm-Rudman will open the way for President Reagan to seek additional cuts. Further cuts this year will mean reduced fire and police protection and road maintenance services. Philadelphians, already burdened by high local taxes, will be asked to shoulder unacceptable tax increases to pay for essential services.

Gramm-Rudman would necessitate severe cuts in programs vital to many Americans, but it would not require equal sacrifices from everyone. Amtrak and highway funding; education and student aid; unemployment compensation and job retraining; Medicare and health and safety in the workplace and other mainstream services that Americans depend on are the targets of Gramm-Rudman.

Government agencies would be forced to make massive reductions in personnel costs through layoffs, short workweeks or pay cuts. The courts, air traffic control, management of public lands, processing of Social Security and other benefits checks and the operation of the Veterans' Administration would be seriously disrupted.

Phase I of voodoo economics, implemented by the Reagan administration in 1981, got us into this fiscal mess. Phase II, under the guise of Gramm-Rudman, will not get us out. By adopting this simplistic scheme, we are abdicating our constitutional responsibility to formulate budget policy and substituting in its place mindless, across-the-board spending cuts.

The economy is staggering under the weight of red ink and we all recognize the urgency of controlling runaway deficits. However, that important goal cannot be accomplished without addressing the basic causes: massive increases in military spending, the skyrocketing cost of tax loopholes, and an unconscionable reduction in taxes paid by wealthy individuals and corporations. Deficits must be reduced through fair and adequate taxation and balanced spending policies that meet the basic needs and priorities of the American people.

The SPEAKER pro tempore. The time of the gentleman from Wisconsin [Mr. OBEY] has expired.

The gentleman from Illinois [Mr. ROSTENKOWSKI] has 4 minutes remaining.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield those 4 minutes to the gentleman from Texas [Mr. WRIGHT], the majority leader.

Mr. Speaker, I am asking the members of the Ways and Means Committee to please not leave the Chamber.

Mr. WRIGHT. Mr. Speaker, this bill is in a real sense an act of legislative desperation. The conferees on both sides who have struggled so valiantly deserve our commendation because they have done a very creditable job on an extremely difficult instrument.

This bill is drastic, it is painful. Let us know exactly what it does.

It seeks to place a political straitjacket on both the executive and the legislative branches of Government and force both branches to face unpleasant facts. To the degree that that may be necessary, it is the inevitable result of our fiscal excesses, particularly those of the last 5 years which have doubled the national debt.

In 1981, we deliberately chose to follow the siren call for tax cuts which reduced the Government's revenues by $135 billion a year.

No person, no family, no business, no country can indefinitely pursue a course of deliberately raising only $19 every time it spends $25, and yet that has been our course in the last 5 years. And it is not altogether the fault of an overspending Congress.

Yesterday at the White House, I heard the chairman of the Senate Appropriations Committee, Senator MARK HATFIELD, tell the President of the United States that every year for the last 5 years Congress has spent quite considerably less than the President himself has asked us to spend in aggregate. Senator HATFIELD explained that in those 5 years, we have cut discretionary domestic expenditures by 34 percent, and we have raised military spending by 89 percent.

Very soon we are going to have to renew the crumbling infrastructure of the country, roads and bridges, and water and sewer lines on which the Nation depends, and that will cost us some money. We face a real crisis in the rural economy of the United States. To correct that will cost money.

More Americans today live in poverty than did 5 years ago, and to attend to their needs will cost money. The average young American between the ages of 25 and 40 lives less well than his counterpart did 10 years ago.

What this says is that President Reagan is going to have to face one very hard fact, and face it clearly. If he insists on ever-increasing levels of military expenditures to finance an escalating arms race, he is going to have to come forward with the sources of revenue to pay for them on a pay-as-we-go basis. It is just that simple. We are not going to put it on the cuff any longer, and that is what this amounts to.

Hard choices will have to be made. No longer can we place on our children and our grandchildren the responsibility to pay for things that we will have used up and worn out before they reach tax-paying age.

So that is the choice, what Harry Truman faced in the Korean war when he did not add to the national debt, what Lyndon Johnson faced during the years of Vietnam when he

conducted that painful struggle and did not add appreciably to the national debt.

Here is what we say: To the extent that we need additional military spending, then it is going to have to be done on a pay-as-we-go basis. That is the choice, Mr. President, and that is the message of this vote tonight.

Mr. KOSTMAYER. Mr. Speaker, I rise today in support of the conference agreement on the Gramm-Rudman-Hollings amendment to the Debt Limit Act. Under the amendment, mandatory and declining targets are set for each of the next 5 years, ending with a balanced budget in fiscal year 1991. It establishes a process that would make automatic spending cuts if the deficit targets are not otherwise met.

I am supporting this amendment because a new budgetary process is needed to handle the phenomenal growth of Federal deficits since 1981. These massive deficits are inhibiting our country's ability to productively invest in the future, consuming two-thirds of the Nation's total net savings. Moreover, Ronald Reagan's successors will find it increasingly difficult to meet genuine national needs because of the huge interest obligations incurred during the past 5 years.

While I am supporting this amendment, I have serious reservations about it. My strongest reservation is the measure's treatment of the cost-of-living-adjustments [COLA's] for Federal retirees. COLA's for Federal civilian and military pensions and railroad retirement, tier II, benefits may be automatically reduced or eliminated if Congress exceeds the deficit targets in any year. Indeed, the conference agreements calls for the COLA's in these retirement programs due in Janaury to be suspended, pending resolution of the fiscal year 1986 budget target. I believe this is unfair of Federal retirees. It also undermines the primary objective of Federal pension plans which is to attract and retain qualified personnel while providing for the humane treatment of Federal employees who have completed their careers.

However, Federal retiree COLA's need not be eliminated under the Gramm-Rudman-Hollings budgetary process if the President and the Congress act responsibly. The automatic spending cuts, including the possible reduction of Federal retirement COLA's, are to be imposed to reach the deficit targets only if Congress fails to enact sufficient deficit reduction legislation. I hope that we in Congress will make the difficult decisions necessary to reduce the deficit so that the automatic elimination of Federal retiree COLA's can be avoided. I will be working toward this goal.

I realize my vote for the Gramm-Rudman-Hollings amendment will not be popular with many Federal retirees. However, after careful thought, I believe the new deficit control process offers the only real hope of Congress gaining control of the ballooning deficit, which is estimated at about $200 billion for the current fiscal year. I remain a strong supporter of Federal retirees and I will continue working for their interests in the upcoming battles under the new deficit control process.

Mr. PORTER. Mr. Speaker, this is a horrible bill. It may be unconstitutional, and I have a problem with that, but expedited appeal will let us know quickly. It is a Draconian admission of our inability to control expenditures, but we cannot doubt the truth of that admission. It will hurt many of the programs that are most effective, but for that very reason it will force us to decide what truly are our priorities and to tax, not borrow, for what we spend. It leaves us open to further charges that we pass tough rules only to ignore them, but perhaps it sets standards that we ultimately—this time—cannot ignore.

The principle, almost fatal, flaw of this legislation, however, is that it makes two classes of Americans—the "exempt" and the "at risk." I believe every American, when asked to respond to this fiscal rule, is willing to give something to bring about its resolution.

Under a static model of the budget $500 billion or so is "exempt" and $500 billion or so is "at risk." But from this $500 billion "at risk" must come $36 billion a year for 5 years or $180 billion in deficit reduction. Half of this $180 billion must come from the $300 billion of defense and half from the $200 billion of nonexempt, nondefense spending. So, statistically, one $90 billion of cuts will reduce defense by 30 percent and an additional $90 billion of cuts will reduce nonexempt, nondefense by 45 percent. Economic growth should of course, ameliorate this greatly. And the pressures from the prospect of such large cuts will undoubtedly force freezes or even cuts in the "exempt" spending categories.

But clearly the pressures will be enormous to raise $1 in revenues for every $1 we spend. The flaw is that all spending categories—with the exception, of course, of interest on the debt and cuts in Social Security—were not made "at risk." If they were, and the burdens fully and equitably shared, then the cuts would not be nearly so large in any area and the pressures on Congress to act responsibly would come from all quarters.

But what is our alternative to this difficult course? Clearly only more of the same—the same phony budget resolutions, the same "you get yours and I get mine" sellout of our children, the same huge deficits that every year cost each of them $10,000 in extra taxes, the same undeserved inheritance of red ink and reduced economic opportunity.

Yes, Mr. Speaker, this is horrible legislation, but the alternative is even more horrible.

Mr. DURBIN. Mr. Speaker, I rise today in support of the Gramm-Rudman Deficit Control Act with some misgivings.

I fully support the goal of the Gramm-Rudman proposal—to reduce our uncontrolled budget deficits to zero by 1991. In 1981, when President Reagan took office, the Federal deficit was an astounding $60 billion. That figure pales in comparison to the fiscal year 1985 deficit figure of $211 billion.

The costs of these monumental deficits are very evident in today's economy. The aritificially high interest rates they create have contributed significantly to our trade problems by favoring imports of foreign goods over exports of our own goods. In my own area of central and western Illinois, my constituents and I have seen firsthand the consequences of high deficits. A Fiat-Allis plant, bowing to foreign competition, closed its doors in Decatur in September of this year and cost 800 people jobs. The Caterpillar plant located in Springfield announced in October that it was forced to lay off an additional 900 workers because of difficulties in exporting its goods abroad.

There is something very disturbing about economic policies that permit a government to spend over $200 billion more than it yields in revenues. No one is sure of the long-range effects of deficits of this magnitude because this economy has never experienced them before. One thing is clear, however. In the absence of leadership from the administration to control the deficit, radical action was needed on the part of Congress to bring deficits back under control.

Any effort to bring the deficit under control requires that some unpleasant choices be made. The Gramm-Rudman proposal is no different. It requires that Congress and the President come up with a budget plan in each of the next 5 years that meets an annual deficit reduction target of $36 billion. At present, it is estimated that a $36 billion reduction in the deficit must be made in each year to reduce the deficit to zero by 1991.

The deficit reduction plan may be made up of spending cuts or tax increases or a combinaiton of both. If no budget agreement is reached between Congress and the President, then an across-the-board cut will automatically go into effect to achieve the deficit reduction target. Both the Office of Management and Budget and the Congressional Budget Office will estimate the size of the Federal deficit in each of the 5 years; the difference between that figure and the preestablished deficit target figure is the amount of savings that must be achieved.

The Gramm-Rudman plan will require that difficult choices be made because people do not wish to see their taxes raised or programs that benefit them cut back. While the plan does exempt certain low income programs and Social Security from the automatic cuts, it mandates reductions in many popular and beneficial programs.

My reason for supporting the Gramm-Rudman deficit reduction plan requiring these painful policy choice is to put us on a track to control the Federal deficit. I am not convinced that this is the best way to reduce the deficit, but the choice was between Gramm-Rudman and no deficit reduction plan at all. I believe the House made several improvements over the original plan passed by the Senate, including exempting low income programs and requiring that defense programs absorb their fair share of the spending reductions. I give

this measure my reluctant support because of the importance of taking timely action to reduce the deficit.

Mr. DARDEN. Mr. Speaker, this is an historic week for the U.S. House of Representatives. We finally are coming to grips with more than two decades of Federal deficit spending and setting a new fiscal course on which the Government will have to live within its means.

It will not be easy to live within the Gramm-Rudman provisions. But it can be done and must be done. We cannot continue to mortgage our children's futures by allowing this Government to answer every call for spending increases without regard for our ability to collect revenues through the tax system.

Although it is firm and direct in its prescription for cutting and eventually eliminating deficits, the revised Gramm-Rudman amendment is not without compassion. It safeguards from prospective across-the-board cuts the Federal programs which help our most needy citizens get the food and medical care they must have to survive.

This legislation also gives our Department of Defense discretion to adjust the fiscal 1986 budget in a way which causes the least disruption to our military readiness. For the future, it gives the Department of Defense and other agencies ample warning that the Federal budget will be increasingly tight, and that they will have to determine their priorities accordingly.

The passage of Gramm-Rudman will mean that Federal agencies—and this Congress—will have many tough financial decisions ahead. But the benefits of this legislation—including less upward pressure on interest rates—are many. Whatever sacrifices and hard decisions have to be made, they will be well worth the benefits we receive.

I am proud to cast my vote for the Gramm-Rudman amendment. I urge my colleagues on both sides of the aisle to join me in restoring fiscal responsibility to the Federal Government.

Mr. FOGLIETTA. Mr. Speaker, Gramm-Rudman is bad legislation and I am going to vote against it.

No one in this Chamber disagrees with the need to put the Federal Government on a sound fiscal footing, the Federal Government ought to be moving toward a balanced budget.

Gramm-Rudman, however, is not the way.

The fundamental problem with Gramm-Rudman, or with any formula for automatic spending cuts, is procedure dictates substance; sound judgment and common sense are abandoned.

Reports last week indicated the Pentagon, under Gramm-Rudman, may be able to afford only 108 rather than 130 military historians. Does anyone here really equate the luxury of scores of Pentagon historians with giving disadvantaged children a chance in life through Head Start?

I think not. Yet, the formula for automatic spending cuts proffered by Gramm-Rudman may allow the Pentagon to keep its historians while Head Start, a plus for so many children, is eliminated.

Proponents of Gramm-Rudman will say the version before us today is much improved. Social Security still would be exempt from its automatic cuts, and some very important social programs like the Women, Infant, Children Program and aid to families with dependent children also would be protected.

Questions of fairness remain, however. Federal pension programs for the most part would not be subject to automatic cuts. Federal employee pensions, though, for whatever reason, could be cut automatically.

Medicaid also would not be subject to automatic cuts, and properly so. But, other health programs, including Medicare and veterans' health programs, could be partially cut.

Mr. Speaker, in the 2 months since Gramm-Rudman was approved by the other body, we've "busted" open the Social Security trust funds, brought those who receive and depend on Government checks, whether they be individuals or businesses, to the brink of financial chaos, threatened our military readiness accounts, including the pay of our men and women in uniform, and put in jeopardy the programs which assist those most disadvantaged and in need in our society.

Let's now return to our rational and deliberative process. Let's make the tough decisions to put the Federal Government on the road to a balanced budget, but let's not abandon sound judgment and solid common sense to an unreasoning and unyielding formula.

I urge a "no" vote on Gramm-Rudman.

Mr. GAYDOS. Mr. Speaker, we have before us the compromise deficit reduction package that has been worked out by House and Senate conferees and, whether we call it Gramm-Rudman-Hollings or by some other name, it is still a bad piece of legislation.

This final compromise, which calls for annual reductions in the Federal deficit until we reach a balanced budget, proposes that savings equal to the reduction come from domestic and defense programs, with 50 percent from each.

In addition, the package exempts several domestic programs from any cuts—Social Security benefits, Medicaid, food stamps, and others for the poor and veterans—and sets limits on the amounts to be cut from other programs—Medicare and other health care programs for veterans, communities, migrants, and Indians.

While I have no quarrel with exempting or limiting cuts on those programs, it does mean that other domestic programs will be trimmed even more.

Just recently at the National League of Cities annual meeting in Seattle, mayors of big, small, and medium-sized cities rose to describe their problems as a result of the failure of the Federal Government to hold to its commitments.

Proposals before the Congress would end general revenue sharing next year—a loss of $4.6 billion that have helped American cities, towns, boroughs, and counties stay afloat and would make substantial cuts in other community service programs for urban development, mass transit, and others.

How did we get here? It's really quite simple. In 1981, after much cajoling by this administration, many of us supported a program of tax cuts with assurances that those cuts would stimulate the ecomony and result in sufficient growth to meet our national priorities and needs without creating a budget deficit.

As we have seen, in the few short years since we agreed to that tax cut program, this Nation's budget has increased to staggering proportions, bringing with it high interest rates and having a tragic impact on our national ability to compete abroad.

At the same time, we have not seen the broad, across-the-board economic growth those tax cuts were to stimulate and we have seen an administration close its eyes to the needs of those people who are least able to help themselves and to those industries that have formed the backbone of the American economy, and to our cities and towns.

In order to combat the increasingly huge deficit over the past few years, the Congress has made great efforts to reduce Federal spending, often cutting sizable holes in the safety net we created to help the poor, the ill, the elderly, and the unemployed.

Now we are being told that in order to control this still rampaging deficit, we must adopt a plan that would set limits on the annual budget deficit until such time as we achieve a balanced budget. And, again, the burden of meeting those goals will fall on those least likely to argue their case in these hallowed halls.

If we look closely at the compromise package, whether we call it Gramm-Rudman-Hollings or something else, we see that we must continue to enlarge some of the holes in the Federal safety net.

So, even as we say we want to help disadvantaged children and youth get the education they need to become productive citizens, we are preparing to chop more than a million dollars from Head Start and other public school compensatory education programs, slice more millions from already underfunded higher education student aid programs, and trim dollars from programs aimed at helping certain institutions of higher education, such as community colleges, provide student services.

At the same time we recognize that many of our unemployed are in that position because of the overwhelming flow of foreign goods into this country that have forced businesses to close their doors or relocate off shore, we can contemplate cuts of at least $217 million in the Joint Training Partnership Act, trade adjustment assistance, and vocational education—all aimed at training unemployed for new jobs.

It is my guess that those who propose and support these cuts, like the present administration, believe that State and local governments will be able to pick up the slack and fill in the gaps created.

Well, that may happen in some areas, but it won't happen in my district and, judging from the comments in Seattle at the National League of Cities meeting, it won't be happening in a lot of cities. It's not that those governments don't care, it's just that they don't have the resources.

The Federal Government is the primary taxing authority in the country. It gets its share of the available tax dollars first and then States and local governments get theirs. And, even though the Federal Government is cutting back on services, it isn't going to cut its share of taxes. Accepting that, where will our cities get the resources? Certainly raising State and local taxes is not the most feasible alternative.

As it is, too many cities, boroughs, and towns in my district already have problems trying to provide the most basic of services, such as policy and fire protection. There is no way they will be able to develop new sources of revenue to meet any new demands.

The deficit reduction proposals we have before us may lead us to a balanced budget eventually, but only at the expense of many already feeling the pain of budget cuts and program reductions.

In all honesty, Mr. Speaker, I cannot support any of the budget deficit proposals before the House unless and until we are prepared to ask others to make some sacrifices, too.

Mr. BORSKI. Mr. Speaker, I rise in strong opposition to the Gramm-Rudman proposal. Gramm-Rudman purports to be a cure-all for the budget deficit. In reality, it will mandate massive cuts in many essential programs, disrupt vital Government services, and inflict severe hardship on middle-income Americans.

First, let's take a look at why we are facing these massive deficits. Let's take a look at the economic policies of Ronald Reagan. Under 5 years of President Reagan's leadership, we have seen military spending increase by 85 percent, domestic spending slashed by 35 percent, and the national debt doubled to a record high of $2 trillion.

The Gramm-Rudman proposal gives President Reagan the perfect vehicle to achieve his ultimate goal: a total dismantling of the nondefense programs of the Federal Government. We know what the President wants to do—eliminate the programs most Americans believe are essential—mass transportation, medical research, student loans, Amtrak, Medicare, environmental protection, and law enforcement.

Gramm-Rudman's effects will be felt almost immediately. Cost-of-living adjustments [COLA's] for military, railroad, and civil service retirees due in January will be suspended, despite the fact that both the House and Senate voted last May to preserve these COLA's. Gramm-Rudman reneges on that pledge. It also threatens the paychecks and job security of current Federal workers.

As the son of a letter carrier, I am particularly aware of what this means. I know how important Federal workers are to the whole range of Government services, and how important their retirement benefits are to them. It is unconscionable to treat Federal retirement pensions like a political football to be tossed aside at will. As Government employees, these people made significant contributions to their country, but now Gramm-Rudman breaks the commitment which their Government, their employer, made to them.

Current Federal workers receive the same callous treatment. After having been promised pay increases in 1987 and 1988, they now find their pay, and even their jobs, on the cutting block. These people have had to fight to maintain their standard of living every year President Reagan has been in office. Instead of recognizing their valuable contribution to effective government, we are now subjecting them to more uncertainty, and to the likelihood of pay cuts and layoffs.

Our economy is staggering under the weight of red ink and we all recognize the urgency of controlling runaway deficits. However, that important goal cannot be accomplished without addressing the basic causes: massive increases in military spending, the skyrocketing cost of tax loopholes, and an unconscionable reduction on the taxes paid by wealthy individuals and corporations. Deficits must be reduced through fair and adequate taxation and balanced spending policies, not on the backs of Federal workers and retirees.

Mr. HUGHES. Mr. Speaker, this is a week in which the House of Representatives has been confronted with several major, far reaching and highly complex measures affecting Federal budget and tax matters.

One is a tax bill numbering some 1,379 pages.

The other is the Gramm-Rudman-Hollings deficit reduction package that will trigger cuts across a broad range of Federal programs amounting to $36 billion per year.

The one feature each of these bills has in common is that there is probably no one Member of this body who is thoroughly familiar with the intricate details of both measures. Certainly, with these bills being available to the Members for just a matter of hours, there are very few who can reasonably be expected to be knowledgeable about the contents of both.

At this point, with the holidays comning and many Members anxious to deal with a growing backlog of work and appointments in their districts, I am wondering if we are really able to carry out our duties in a responsible fashion by cramming final action on both tax reform and deficit reduction into the same week. Frankly, such haste only invites serious errors and omissions, and makes possible the adoption of provisions that may come back and haunt us.

I have just learned, for example, that the tax bill includes a provision that adversely affects the tax treatment of Federal pensions—except for Members of Congress and their staffs.

No Member has to serve here very long before he or she realizes that such a provision is going to bring on an avalanche of criticism, and it will be richly deserved, because we have no business carving out special treatment for ourselves or our staffs vis-a-vis other Federal employees.

Are there other such provisions in the tax bill? I don't know, and I really have no way of knowing. There is an old saying that sunlight is the best antiseptic, but this bill has not yet seen enough daylight, in my judgment. I cannot help but think that the integrity of the entire process will be improved if this bill is put off until the next session.

I did vote to defeat the rule under which the tax bill was to be considered. We were promised by the leadership, over and over again, that we would have an opportunity to consider an amendment that would earmark for deficit reduction any new revenues that were brought in from those profitable corporations or wealthy individuals which are currently paying no taxes.

I do not share the belief that tax reform must be absolutely revenue neutral. I, for one, believe that with Gramm-Rudman in effect, we will need the option of rebuilding the revenue base as the only alternative to potentially disastrous cuts in spending, including spending for national defense.

I think that the concerns expressed by other Members, about the rule's preclusion of deficit reduction and other amendments, are valid.

On balance, the tax bill is probably a very good bill. It was a difficult job for the members of the Ways and Means Committee to hammer out the necessary compromises, and I don't envy their task. By the same token, it is entirely possible that a more open floor procedure could improve the final product.

At the same time, I do not believe that the tax package or the economic health of the Nation will suffer much if we put off this measure for another month when we can consider it in a more orderly and informed fashion.

The Gramm-Rudman-Hollings deficit reduction package is a different story. For many, including myself, increasing the national debt to over $2 trillion has great importance to those of us who have been greatly concerned by uncontrolled Federal borrowing. It symbolizes our inability to come to grips with deficit reduction.

Unfortunately, there is no greater indication of our failure to deal with the deficit on the merits than Gramm-Rudman-Hollings. This measure seems to say that the process is to blame when, in fact, both the administration and the Congress have seen this day coming for many years. We have had numerous opportunities to make the hard choices, but have not done so.

I don't blame many Members for becoming frustrated, and turning to Gramm-Rudman as a way out of our dilemma. But just because Gramm-Rudman may be a way out, it doesn't mean it's the right way out.

In reality, Gramm-Rudman, as crafted, is just one more exercise in ducking our responsibility. It grants to unelected Federal employees the responsibility for making

cuts, within certain guidelines, in the event that Congress fails to do so.

Frankly, it's a little bit like programming a robot to perform a tonsillectomy. We better pray that the patient lies down on the bed facing the right direction.

What would happen to defense under Gramm-Rudman? The package mandates that one-half of deficit reducing budget cuts come from defense. If that approach is allowed to run its course, we might very well find ourselves with a national defense that is substantially weaker than before we started our military buildup some 6 years ago.

It certainly would decimate programs, such as law enforcement, where budget cuts can be absorbed only through manpower reductions. Look, for example, at the budget of the Bureau of Prisons. Of a total budget of $606 million for fiscal 1986, $546 million—or over 90 percent—is for salaries. The balance is for basic operation and maintenance of prisons—food, clothing, utilities and repairs—where there really is very little slack to be taken up.

I ask my colleagues, how do we deal with budget cutbacks in this one area—which I have selected only for purposes of illustration—except by firing guards and putting prisoners back out on the street? What is the alternative? Is this wisest place to effect a savings?

At the same time, I don't think we would notice a major change in the quality of life here in America if we had a few less space shuttles. But that certainly would not be true of less dollars for cancer research. Yet those two programs are on a par under Gramm-Rudman.

Spending for the National Endowment for Democracy—a questionable waste of taxpayer money—would be exposed to the same jeopardy as spending for drug enforcement or the FBI.

Gramm-Rudman would not distinguish in any way between cuts in aid for U.S. disaster victims and aid to Bolivia.

Export-Import Bank loans, which principally benefit the Boeing Corp., would be placed on the same footing loans to students who might not have any other way to get to college.

These are choices that require great thought and reflection, not to mention good old-fashioned compromise. This is what we were elected to do. By adopting Gramm-Rudman, we are basically stating that we are not up to the task we were elected for.

We ought to, instead, be adopting an amendment to the Rules of the House of Representatives that would mandate balanced budgets. It would be self-enforcing because any one Member could object to the consideration of a budget in which spending exceeded revenues by more than a specified amount.

But most importantly, it would keep responsibility for budgeting here in the Congress, where it belongs, and force the Members to collectively face up to the hard choices, to determine the priorities and identify the programs that can be deferred, and to consider the adequacy of revenue base—and then be accountable to the voters for those choices based upon a yea or nay recorded vote.

There are very few goals more important to the economic health of the Nation than bringing an end to Federal deficit spending, but Gramm-Rudman-Hollings is not the right way to do it.

Mrs. HOLT. Mr. Speaker, I suppose I am swimming against the tide when I vote against this legislation designed to force a balanced Federal budget in 5 years.

It may be the most irresponsible piece of legislation I have seen in 13 years on Capitol Hill; I know that a majority of Members are very fearful of its consequences, and I know that they have political fears about voting against anything that promises to balance the budget.

The bill would establish a specific deficit ceiling for each year. If Congress fails to achieve the target with spending cuts and/or tax increases, mandatory spending cuts are imposed over a range of programs. The cuts are automatic.

Nobody knows the amount of spending cuts or tax increases that would be required in any year to achieve the target deficit, because the size of the deficit is affected by economic conditions, by the amount of revenues generated by the economy.

With a strong economy, the deficit targets could probably be achieved without much pain. With a weak economy, the cuts and/or tax increases required could be huge.

It is my guess that this legislation would force tax increases at some stage, and they would probably be imposed at a time when the result would be causing additional damage to a weak economy.

I see this legislation forcing budget gridlock between the President and Congress with no escape from the fiscal straitjacket mandated by Gramm-Rudman.

I am often called a conservative, and I can tell you that my conservative instincts impel me to vote against this radical document. I think it is an unworkable device to balance the budget, and its consequences are unforeseeable.

In this morning's Washington Post, the respected columnist David Broder described the bill as "a fraud—and a fright. Any proposal to deal with the deficit crisis that addresses the budget process instead of the immediate and real choices on spending and taxes is a fake."

This legislation substitutes a rigid formula for careful and prudent decisions on the merits of individual Government programs. It is an abdication of Congress' responsibility for fiscal policy. I predict that the consequences will be so dreadful at some stage that Congress will need to suspend the implementation of the legislation.

The Gramm-Rudman approach is a formula for fiscal chaos, and I will not be a party to it.

The SPEAKER pro tempore. All time has expired.

Mr. ROSTENKOWSKI. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. OBEY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device and there were—yeas 271, nays 154, not voting 9, as follows:

[Roll No. 454]

NOT VOTING—9

Brooks	McKinney	Price
Chappie	Nelson	Schneider
Crockett	Pashayan	Vander Jagt

□ 2210

The Clerk announced the following pairs:

On this vote:

Mr. Nelson of Florida for, with Mr. Brooks against.

Mrs. Schneider for, with Mr. Crockett against.

Mr. FORD of Tennessee and Mr. MARTIN of New York changed their votes from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mrs. SCHNEIDER. Mr. Speaker, on rollcall 454 I was unavoidably detained and arrived on the House floor shortly after the announcement of the vote. Had I been able to cast my vote, I would have voted "yea."

THE AGRICULTURAL PATENT REFORM ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia [Mr. BOUCHER] is recognized for 10 minutes.

Mr. BOUCHER. Mr. Speaker, today I am introducing, along with our colleagues Mr. DEWINE, Mr. FOLEY, Mr. ALEXANDER, Mr. FISH, Mr. HUGHES, Mr. MOOREHEAD, Mr. GLICKMAN, Mr. COLEMAN of Missouri, Mr. MAZZOLI, Mr. MORRISON of Washington, and Mr. KINDNESS, the Agricultural Patent Reform Act, legislation to restore to manufacturers of pesticides, animal drugs, veterinary biologics, and industrial chemicals up to 5 years of patent life which they may lose as a result of federally mandated health and safety testing and certification procedures.

The primary goal of our bill is equity. An inventor of an agricultural product should be given the same treatment as the inventor of any other product under Federal patent law. However, as a result of federally mandated health and safety testing and certification procedures, many inventors of pesticides, animal drugs, veterinary biologics, and industrial chemicals receive only a fraction of the 17-year patent life for their product.

We do not question the need for a federally mandated review and approval process for products, which may affect the health and safety of workers and consumers and environmental quality. However, we believe that the process should not serve as a disincentive to the development of new, innovative products as it does today. Restoring a part of the patent life lost as a result of the federally mandated review and approval process will serve to enhance the quality of new products.

Recent agrichemical discoveries have resulted in dramatic savings for the farmer and the consumer, and significant environmental benefits. Synthetic pyrethroids, for example, a newly developed family of quick-knock-down, short-residue insecticides used to protect vegetables, grains, fruits, and other products, can increase average crop yields by as much as 35 percent. Equally important, these insecticides are cost-competitive replacements for older chemicals such as DDT, aldrin, and other persistent chlorinated hydrocarbons which pose a risk to the environment.

Left uncorrected, patent term loss will continue to serve as a disincentive to the development of environmentally benign products. Patent term restoration will help usher in the next generation of economically and environmentally attractive agrichemicals.

Our bill is identical to S. 1093, introduced by Senator MATHIAS earlier this year, which is supported by the American Farm Bureau Federation, the National Farm Organization, the National Farmers Union, and other farm organizations.

The Agriculture Patent Reform Act restores up to 5 years of patent life that the following products may lose as a result of federally mandated health and safety testing—pesticides, animal drugs, veterinary biologics, or industrial chemicals.

The amount of time restored to a patent for a given product is the sum of the time spent on long-term health and safety testing, plus the time spent by the appropriate regulatory review agency in reviewing the application for commercial marketing of the product, with a maximum of 5 years.

There are several limitations:

A 3-year cap is placed on restoration for products undergoing regulatory review at the time of enactment.

No restoration is provided for products already on the market.

No restoration is provided for products whose patents have already expired.

Product sponsor must act with due diligence in pursuing commercial marketing. Time lost as a result of failure to act with due diligence is not subject to restoration.

Restoration will not be provided for the time a product sponsor spends completing a commercial marketing application which was not supported by sufficient data.

Restoration is provided only for time spent doing long-term—greater than 6 months—health and safety studies. No restoration is provided for short-time health and safety tests or for economic or marketing analyses.

No restoration will be granted to more than one patent per product.

No restoration will be granted for products which have already been commercially marketed, even if they have a new patent and undergo a new regulatory review. The only exception is for a product which is based on recombitant DNA technology.

Only one-half restoration is provided for products whose commercial marketing application is filed more than 10 years after the patent application is filed.

Mr. Speaker, I urge our colleagues to join in this effort to restore the patent life of pesticides, animal drugs, veterinary biologics, and industrial chemicals, enhance agricultural production and protect human health and the environment.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. HOPKINS (at the request of Mr. MICHEL), for today until 1:30 p.m., on account of official district business.

Mr. MCKINNEY (at the request of Mr. MICHEL), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. RUDD) to revise and extend their remarks and include extraneous material:)

Mr. SWINDALL, for 60 minutes, today.
Mr. COUGHLIN, for 5 minutes, today.
Mr. RUDD, for 5 minutes, today.
Mr. HOPKINS, for 5 minutes, today.

(The following Members (at the request of Mr. YOUNG of Missouri) to revise and extend their remarks and include extraneous material:)

Mr. BROWN of California, for 5 minutes, today.
Mr. LAFALCE, for 5 minutes, today.
Mr. GLICKMAN, for 5 minutes, today.
Mr. ALEXANDER, for 5 minutes, today.
Mr. NELSON of Florida, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. BOUCHER, for 10 minutes, today.
Mr. LIPINSKI, for 15 minutes, on December 12.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. WEISS, prior to the vote on Senate Joint Resolution 238, in the House, today.

Mr. GEKAS, following passage of Senate Joint Resolution 238, in the House, today.

Mr. LEWIS of Florida, following passage of Senate Joint Resolution 238, in the House, today.

Mr. MORRISON of Washington, following the vote on Senate Joint Resolution 238, in the House today.

(The following Members (at the request of Mr. RUDD) and to include extraneous matter:)

Mr. ARCHER.
Mr. BROOMFIELD in two instances.
Mr. BLILEY.
Mr. GILMAN in three instances.
Mr. DANNEMEYER.
Mr. SILJANDER in two instances.
Mr. SENSENBRENNER.
Mr. GOODLING in two instances.
Mr. ZSCHAU.
Mr. GREEN.
Mr. LEWIS of Florida.
Mr. DORNAN of California.
Mr. DELAY.
Mr. MICHEL in two instances.
Mr. HENRY.

(The following Members (at the request of Mr. YOUNG of Missouri) and to include extraneous matter:)

Mr. FASCELL.
Mr. DARDEN.
Mr. CHAPMAN.
Mr. SHELBY.
Mr. GARCIA in five instances.
Mr. EDWARDS of California.
Mr. STOKES in two instances.
Mr. LANTOS in two instances.
Mr. GUARINI.
Mr. SMITH of Florida in five instances.
Mr. MICA.
Mr. DASCHLE in five instances.
Ms. MIKULSKI.
Mr. HUBBARD in two instances.
Mr. SKELTON.
Mr. NOWAK.
Mr. FAUNTROY.
Mr. RANGEL.
Mrs. BURTON of California.
Mr. MAZZOLI.
Mr. AUCOIN.
Mr. WAXMAN.
Mr. LEHMAN of California.
Mr. BERMAN.

SENATE JOINT RESOLUTION

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 243. Joint resolution urging the Nobel Prize Committee to rescind its award to Dr. Chazov; to the Committee on Foreign Affairs.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2965. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1986, and for other purposes;

H.R. 3003. An act to authorize the Secretary of the Interior to convey certain land located in the State of Maryland to the Maryland National Capital Park and Planning Commission;

H.J. Res. 372. Joint resolution increasing the statutory limit on the public debt; and

H.J. Res. 473. Joint resolution waiving the printing on parchment of the enrollment of H.J. Res. 372.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and joint resolution of the Senate of the following titles:

S. 1116. An act to amend the act of October 15, 1982, entitled "An Act to designate the Mary McLeod Bethune Council House in Washington, District of Columbia, as a national historic site, and for other purposes"; and

S.J. Res. 238. Joint resolution relating to the approval and implementation of the proposed agreement for nuclear cooperation between the United States and the People's Republic of China.

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and joint resolutions of the House of the following title:

H.J. Res. 473. Joint resolution waiving the printing on parchment of the enrollment of H.J. Res. 372;

H.J. Res. 424. Joint resolution to designate the year of 1986 as the "Year of the Flag";

H.R. 1789. An act relating to the authorization of appropriations for certain components of the National Wildlife Refuge System; and

H.R. 3003. To authorize the Secretary of the Interior to convey certain land located in the State of Maryland to the Maryland National Capital Park and Planning Commission.

ADJOURNMENT

Mr. HOYER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 17 minutes p.m.), the House adjourned until tomorrow, Thursday, December 12, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2379. A letter from the Deputy Under Secretary of Health and Human Services for Intergovernmental Affairs, and, the Director, Federal Interagency Task Force on the Homeless, transmitting a report on the activities and accomplishments of the Federal Interagency Task Force on the Homeless; to the Committee on Banking, Finance and Urban Affairs.

2380. A letter from the Secretary of Labor, transmitting the annual report on the enforcement activities under the Fair Labor Standards Act for the period of October 1, 1984 through September 30, 1984, pursuant to 29 U.S.C. 204(d)(1); to the Committee on Education and Labor.

2381. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notice of a proposed manufacturing license agreement with Japan for significant combat equipment, pursuant to 22 U.S.C. 2776(d); to the Committee on Foreign Affairs.

2382. A letter from the Director, Defense Security Assistance Agency, transmitting notice of intent to offer to sell certain defense articles and services to Egypt in the amount of $68 million, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2383. A letter from the Director, Defense Security Assistance Agency, transmitting notice of intent to offer to sell certain defense articles and services to Saudi Arabia in the amount of $500 million, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2384. A letter from the Chairman, U.S. Advisory Commission on Public Diplomacy, transmitting a review of activities of the United States Information Agency, pursuant to Reorganization Plan No. 2 of 1977, section 8(b); to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAWKINS: Committee on Education and Labor. Report pursuant to section 302(b) of the Congressional Budget Act of 1974 (Rept. 99-434). Referred to the Committee of the Whole House on the State of the Union.

Mr. RODINO: Committee on the Judiciary. Report on investigation of the role of the Department of Justice in the withholding of Environmental Protection Agency documents from Congress in 1982-83 (Rept. 99-435). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOUCHER (for himself, Mr. DEWINE, Mr. FOLEY, Mr. ALEXANDER, Mr. FISH, Mr. HUGHES, Mr. MOORHEAD, Mr. GLICKMAN, Mr. COLEMAN of Missouri, Mr. MAZZOLI, Mr. MORRISON of Washington, and Mr. KINDNESS):

H.R. 3897. A bill to amend the patent law to restore the term of the patent grant in the case of certain products for the time of the regulatory review period preventing the marketing of the product claimed in a patent; to the Committee on the Judiciary.

By Mrs. BOXER (for herself, Mr. BRYANT, Mr. MILLER of California, Mr. SIKORSKI, Mr. FAZIO, Mrs. SCHROEDER, Mr. BOSCO, Mr. COELHO, Mr. LEVINE of California, and Mr. BATES):

H.R. 3898. A bill entitled the "Military Whistleblowers Protection Act"; to the Committee on Armed Services.

By Mr. BROWN of California (for himself, Mr. ROE, Mr. AKAKA, and Mr. ROBINSON):

H.R. 3899. A bill to establish a hydrogen research and development program; to the Committee on Science and Technology.

By Mr. DORNAN of California:

H.R. 3900. A bill directing the President to take certain actions with respect to any country which engages in certain hostile actions against property of the United States or U.S. officers or employees assigned to duty abroad; to the Committee on Foreign Affairs.

H.R. 3901. A bill authorizing continuing appropriations for the Lithuania legation; to the Committee on Foreign Affairs.

H.R. 3902. A bill to provide for the reimbursement of State and local governments for providing certain protection with respect to certain foreign diplomatic missions located in the United States and with respect to certain foreign officials; to the Committee on Foreign Affairs.

H.R. 3903. A bill to provide for the exclusion from the United States of aliens affiliated with terrorist organizations, to require investigations of registered agents of such organizations, and for other purposes; to the Committee on the Judiciary.

H.R. 3904. A bill to amend section 602 of the Federal Aviation Act of 1958 to prohibit any Federal officer or employee from imposing certain age restrictions on individuals seeking to serve as pilots of aircraft, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 3905. A bill to amend section 312(c) of the Federal Aviation Act of 1958, relating to research and development, to require the Secretary of Transportation to assure the development of a collision avoidance system for use on all civil and military aircraft of the United States in the interest of air safety; jointly, to the Committee on Public Works and Transportation, and Science and Technology.

By Mr. GEJDENSON (for himself, Mr. MARKEY, Mr. MATSUI, Mr. MOAKLEY, Mrs. KENNELLY, Mr. HERTEL of Michigan, Ms. KAPTUR, Mr. WEAVER, Mr. LUNDINE, Mr. HEFTEL of Hawaii, Mr. MOODY, Mr. ROE, Mr. TORRES, Mr. MCKINNEY, Mr. ST GERMAIN, Mr. SPRATT, Mr. SEIBERLING, Mr. STRANG, Mr. DE LUGO, Mr. MORRISON of Connecticut, Ms. SNOWE, Mr. MCKERNAN, and Mr. STUDDS):

H.R. 3906. A bill to provide for the assessment by the U.S. Geological Survey of the quality of the Nation's ground water and surface water resources; to the Committee on Interior and Insular Affairs.

By Mr. GIBBONS:

H.R. 3907. A bill to provide for the appointment of two additional bankruptcy judges for the middle district of Florida; to the Committee on the Judiciary.

By Mr. MAZZOLI:

H.R. 3908. A bill to establish the Social Security Administration as an independent agency, which shall be headed by a Social Security Board, and which shall be responsible for the administration of the old-age, survivors, and disability insurance program under title II of the Social Security Act and the supplemental security income program under title XVI of such Act, and to provide for off-budget treatment of the old-age, survivors, and disability insurance program beginning with fiscal year 1987; to the Committee on Ways and Means.

By Mr. WAXMAN:

H.R. 3909. A bill to amend the Federal Food, Drug, and Cosmetic Act to require the appointment of the Commissioner of Food and Drugs to be subject to Senate confirmation; to the Committee on Energy and Commerce.

By Mr. ZSCHAU:

H.R. 3910. A bill to amend title II of the State Department Basic Authorities Act of 1956 to impose the same restrictions and conditions on foreign missions of Soviet Bloc countries as are imposed on the foreign mission of the Soviet Union; to the Committee on Foreign Affairs.

By Mr. GILMAN:

H.R. 3911. A bill to amend sections 3307(d) and 8335(b) of title 5, United States Code, with respect to the age limits for appointment and mandatory retirement of law enforcement officers engaged in detention activities; to the Committee on Post Office and Civil Service.

H.R. 3912. A bill to amend the Internal Revenue Code of 1954 to eliminate the age requirement for eligibility for the one-time exclusion of gain from the sale of a principal residence; to the Committee on Ways and Means.

H.R. 3913. A bill to regulate commerce and to prohibit unfair or deceptive acts or practices in commerce, and for other purposes; jointly, to the Committees on Energy and Commerce, and the Judiciary.

By Mr. GLICKMAN:

H.R. 3914. A bill to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel; to the Committee on the Judiciary.

By Mr. KASICH:

H.R. 3915. A bill to regulate travel in the United States of citizens from the Soviet Union and eastern bloc countries; to the Committee on Foreign Affairs.

By Mr. YOUNG of Florida (for himself and Mr. DARDEN):

H.R. 3916. A bill to set minimum standards for the administration of polygraph examinations, to encourage the States and local governments to establish programs regulating the administration of polygraph examinations in accordance with such standards, and for other purposes; to the Committee on Education and Labor.

By Mr. DORNAN of California:

H.J. Res. 474. Joint resolution expressing the determination of the United States with respect to claims by United States nationals for property seized by the Cuban Government; to the Committee on Foreign Affairs.

By Mr. GUARINI (for himself and Mr. BONIOR of Michigan):

H.J. Res. 475. Joint resolution designating the month of May 1986 as "Better Hearing and Speech Month;" to the Committee on Post Office and Civil Service.

By Mr. FOLEY:

H. Con. Res. 246. Concurrent resolution correcting the enrollment of House Joint Resolution 372; considered and agreed to.

By Mr. VENTO:

H. Con. Res. 247. Concurrent resolution requesting the President to return the enrolled bill (H.R. 3003) relating to the conveyance of certain land located in the State of Maryland to the Maryland National Capital Park and Planning Commission and providing for its reenrollment with technical corrections; considered and agreed to.

By Mr. DORNAN of California:

H. Con. Res. 248. Concurrent resolution expressing the sense of the Congress with respect to Americans who are missing in action in Southeast Asia; to the Committee on Foreign Affairs.

H. Con. Res. 249. Concurrent resolution expressing the sense of the Congress with respect to the strategic importance of Israel to the United States; to the Committee on Foreign Affairs.

H. Con. Res. 250. Concurrent resolution expressing the sense of the Congress with respect to the Baltic States and with respect to Soviet claims of citizenship over certain United States citizens; to the Committee on Foreign Affairs.

H. Con. Res. 251. Concurrent resolution expressing the sense of the Congress with respect to the Baltic States and with respect to Soviet claims of citizenship over certain United States citizens; to the Committee on Foreign Affairs.

H. Con. Res. 252. Concurrent resolution expressing the sense of the Congress with respect to the Baltic States; to the Committee on Foreign Affairs.

H. Con. Res. 253. Concurrent resolution expressing the sense of the Congress that the International Olympic Committee should allow Taiwan to participate in the 1988 winter Olympic games under its own name, flag, and national anthem; to the Committee on Foreign Affairs.

H. Con. Res. 254. Concurrent resolution to seek the resurrection of churches and religious freedom in the Ukraine; to the Committee on Foreign Affairs.

H. Con. Res. 255. Concurrent resolution relative to rights of Ukrainian citizens; to the Committee on Foreign Affairs.

H. Con. Res. 256. Concurrent resolution expressing the sense of the Congress that the United States, Mexico, and Canada should establish a common economic bond of energy cooperation; to the Committee on Foreign Affairs.

H. Con. Res. 257. Concurrent resolution expressing the sense of Congress that the President should communicate immediately to the Government of the Soviet Union that the United States insists that the Soviet Union remove its military combat troops from Cuba, with all deliberate speed; to the Committee on Foreign Affairs.

H. Con. Res. 258. Concurrent resolution urging a moratorium on the commercial killing of whales; to the Committee on Foreign Affairs.

H. Res. 339. Resolution to express the sense of the House of Representatives that the leaders of the Soviet Union should permit the emigration of Jews and other individuals wishing to emigrate from the Soviet Union, should remove restrictions in the Soviet Union on the practice of religion and the observation of cultural traditions, should remove restrictions surrounding individuals who undertake scientific and intellectual endeavors, and should stop the official harassment of individuals who wish to emigrate, practice their religion, or observe their cultural traditions; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII,

286. The SPEAKER presented a memorial of the House of Representatives of the Commonwealth of Pennsylvania, relative to the summit with the U.S.S.R.; which was referred to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1089: Mr. DYSON, Mr. DE LUGO, Mr. MATSUI, and Mr. TOWNS.

H.R. 1294: Mr. BOUCHER and Mr. TALLON.

H.R. 1840: Mr. HAMILTON and Mr. CHAPMAN.

H.R. 2295: Mr. TORRICELLI.

H.R. 2440: Mr. DUNCAN.

H.R. 2535: Mr. MCKERNAN, Mr. WISE, Mr. FLORIO, and Mr. KEMP.

H.R. 2591: Mr. PARRIS.

H.R. 2697: Mr. LOEFFLER.

H.R. 2795: Mr. SWEENEY.

H.R. 2809: Ms. MIKULSKI, Mr. NOWAK, Mr. PRICE, and Mr. VOLKMER.

H.R. 2810: Mrs. BOXER.

H.R. 2957: Mr. SCHEUER.

H.R. 2958: Mr. SCHEUER.

H.R. 3099: Mrs. COLLINS, Mr. WEAVER, and Ms. OAKAR.

H.R. 3136: Mr. HEFTEL of Hawaii.

H.R. 3232: Mr. DUNCAN.

H.R. 3252: Mr. MORRISON of Washington, Mr. LIGHTFOOT, Mr. KINDNESS, Mr. KOLBE, Mr. PORTER, Mr. DREIER of California, Mr. RUDD, Mr. BARTON of Texas, Mr. BADHAM, and Mr. LEWIS of Florida.

H.R. 3305: Mr. OWENS, Mr. CROCKETT, Mr. FUQUA, and Mr. FAZIO.

H.R. 3349: Mr. PURSELL, Mr. COURTER, Mr. GALLO, Mr. CAMPBELL, and Mr. MRAZEK.

H.R. 3439: Mr. BEREUTER, Mr. HUGHES, Mrs. COLLINS, Mr. ZSCHAU, and Mr. MORRISON of Connecticut.

H.R. 3473: Mr. RAY, Mr. WHITTAKER, Mr. GRAY of Illinois, Mr. JENKINS, Mr. DARDEN, Mr. HAYES, Mr. FOWLER, Mr. EVANS of Illinois, Mr. THOMAS of Georgia, Mr. BARNARD, Mr. TALLON, and Mr. HATCHER.

H.R. 3512: Mr. LUKEN.

H.R. 3643: Mr. DASCHLE and Mr. ECKART of Ohio.

H.R. 3690: Mr. SAVAGE, Mr. EDWARDS of California, Mr. EVANS of Illinois, Mr. LEVINE of California, Mr. MRAZEK, Mr. WEAVER, Mr. ACKERMAN, Ms. KAPTUR, Mr. WILSON, Mr. BEDELL, Mr. TORRICELLI, Mr. MOODY, Mr. BUSTAMANTE, Mr. DE LUGO, Mr. DOWNEY of New York, and Mr. MORRISON of Connecticut.

H.R. 3777: Mr. JONES of North Carolina.

H.J. Res. 226: Mr. DENNY SMITH.

H.J. Res. 376: Mr. OLIN.

H.J. Res. 379: Mr. YOUNG of Florida, Mr. FAZIO, Mr. FEIGHAN, Mr. BROOKS, Mr. VOLKMER, Ms. SNOWE, Mr. VENTO, Mr. FUQUA, Mr. LEVINE of California, Mrs. BOXER, Mr. BIAGGI, Mr. SUNIA, Mr. LANTOS, Mr. LEACH of Iowa, Mr. LEHMAN of Florida, Mr. LEWIS of California, Mr. NIELSON of Utah, Mr. MCEWEN, Mr. BORSKI, Mr. AUCOIN, Mr. MATSUI, Ms. KAPTUR, Mr. BROWN of California, Mr. FISH, Mr. MOORHEAD, Mr. HYDE, Mr. LUNGREN, Mr. MCCOLLUM, Mr. DEWINE, and Mr. BROWN of Colorado.

H.J. Res. 429: Mr. O'BRIEN, Mr. KOSTMAYER, Mr. TORRICELLI, Mr. COOPER, Mr. FOGLIETTA, Mr. HAYES, Mr. DWYER of New Jersey, Mr. JACOBS, Mr. LAFALCE, Mr. FAZIO, Mr. MATSUI, Mr. WEISS, Mr. STAGGERS, Mr. RAHALL, Mr. WORTLEY, Mr. SCHEUER, Mr. DAUB, Mr. MCKERNAN, Mr. BRYANT, Mr. DE LA GARZA, Mr. DERRICK, Mr. LANTOS, Mr. MURPHY, Mr. OWENS, Mr. DYMALLY, Mrs. BENTLEY, Mr. GUNDERSON, Mr. HOWARD, Mrs. BOXER, and Mr. GINGRICH.

H. Res. 268: Mr. PURSELL.

H. Res. 323: Mr. BRYANT.

PETITIONS, ETC.

Under clause 1 of rule XXII,

261. The SPEAKER presented a petition of the city council of New Orleans, LA, relative to the Summit with the U.S.S.R.; which was referred to the Committee on Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1524

By Mr. YOUNG of Florida:

—(1) Section 1: On page 2, lines 4 and 5, strike out "Employee Polygraph Protection Act" and insert in lieu thereof "Polygraph Reform Act".

—(2) Section 2: On page 2, line 6, renumber "SEC. 2" as "SEC. 3", add the following new section, and renumber all other sections accordingly:

SEC. 2. PURPOSE.

(a) The Congress finds that:

(1) the improper use of polygraph examinations in work situations in industries engaged in interstate commerce or in the production of goods for interstate commerce imposes a substantial burden on interstate commerce in terms of loss of employment and employment opportunities, and

(2) the free flow of goods and services in interstate commerce is burdened by theft, dishonesty and breaches of trust by dishonest employees and by crimes and unsafe acts committed against employees, customers and the public.

(b) It is hereby declared to be the purpose of this Act to establish minimum federal standards for the use of polygraphs in employment, to provide relief for the improper use of polygraphs and to provide for federal oversight of the administration of such standards.

—(3) Section 2: On page 2, line 6, renumber "SEC. 2" as "SEC. 3", add the following new section and renumber all other sections accordingly:

SEC. 2. FINDINGS.

(a) The Congress finds that:

(1) the improper use of polygraph examinations in work situations in industries engaged in interstate commerce or in the production of goods for interstate commerce imposes a substantial burden on interstate commerce in terms of loss of employment and employment opportunities, and

(2) the free flow of goods and services in interstate commerce is burdened by theft, dishonesty and breaches of trust by dishonest employees and by crimes and unsafe acts committed against employees, customers and the public.

—(4) Section 2: Beginning on page 2, line 6, through page 4, line 4, strike out the words "lie detector" wherever they appear and insert in lieu thereof the word "polygraph".

—(5) Section 3: Beginning on page 4, line 4, through line 11 on page 4, strike out the words "lie detector" wherever they appear and insert in lieu thereof the word "polygraph".

—(6) Strike out the words "lie detector" wherever they appear in the bill and insert in lieu thereof the word "polygraph".

—(7) Section 2 is amended by striking out all beginning on page 2, line 6, through page 4, line 3, and inserting in lieu thereof the following new sections:

SEC. 4. PROHIBITION OF POLYGRAPH TESTING EXCEPT IN ACCORDANCE WITH THE STANDARDS OF THIS ACT.

No employer shall take any action affecting the employment status of an employee or prospective employee of the employer if such action is based on the results of a polygraph examination of such employee or prospective employee that has not been administered in accordance with section 5 of this Act.

SEC. 5. POLYGRAPH EXAMINEES' BILL OF RIGHTS.

(a) Each prospective examinee shall be required to sign a notification prior to the beginning of each polygraph examination which contains the following information:

(1) That he or she is consenting voluntarily to take the examination;

(2) That the polygraph examiner shall not inquire into any of the following areas during preemployment or periodic examinations:

(i) Religious beliefs or affiliations;

(ii) Beliefs or opinions regarding racial matters;

(iii) Political beliefs or affiliations;

(iv) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(v) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(3) That he or she may terminate the examination at any time;

(4) That, upon written request, he or she shall, for a reasonable fee, be provided with a written copy of any opinions or conclusions rendered as a result of the examination;

(5) That the polygraph examiner is prohibited from asking the examinee any question during the examination that is not in writing and has not been reviewed with the examinee prior to the examination;

(6) That he or she has specific legal rights and remedies if the polygraph examination has not been conducted in accordance with the provisions of this Act; and,

(7) That, upon written request, he or she may receive a copy of the notification.

(b) A polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered in accordance with section 6 of this Act and signed by the polygraph examiner with respect to the examinee's polygraph examination.

(c) No action may be taken by an employer regarding the employment status of an employee or an applicant for employment that is based solely on opinions or conclusions of a polygraph examiner reached by analysis of a polygraph chart produced during the examination of the employee or applicant for employment.

—(8) Section 2 is amended by striking out all beginning on page 2, line 6, through page 4, line 3, and inserting in lieu thereof the following new sections:

SEC. 4. PROHIBITION OF POLYGRAPH TESTING EXCEPT IN ACCORDANCE WITH THE STANDARDS OF THIS ACT.

No employer shall take any action affecting the employment status of an employee or prospective employee of the employer if such action is based on the results of a polygraph examination of such employee or prospective employee that has not been administered in accordance with sections 5 and 6 of this Act.

SEC. 5. POLYGRAPH EXAMINEES' BILL OF RIGHTS.

(a) Each prospective examinee shall be required to sign a notification prior to the beginning of each polygraph examination which contains the following information:

(1) That he or she is consenting voluntarily to take the examination;

(2) That the polygraph examiner shall not inquire into any of the following areas during preemployment or periodic examinations:

(i) Religious beliefs or affiliations;

(ii) Beliefs or opinions regarding racial matters;

(iii) Political beliefs or affiliations;

(iv) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(v) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(3) That he or she may terminate the examination at any time;

(4) That, upon written request, he or she shall, for a reasonable fee, be provided with a written copy of any opinions or conclusions rendered as a result of the examination;

(5) That the polygraph examiner is prohibited from asking the examinee any question during the examination that is not in writing and has not been reviewed with the examinee prior to the examination;

(6) that he or she has specific legal rights and remedies if the polygraph examination has not been conducted in accordance with the provisions of this Act; and

(7) that, upon written request, he or she may receive a copy of the notification.

(b) A polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered in accordance with section 6 of this Act and signed by the polygraph examiner with respect to the examinee's polygraph examination.

(c) No action may be taken by an employer regarding the employment status of an employee or an applicant for employment that is based soley on opinions or conclusions of a polygraph examiner reached by analysis of a polygraph chart produced during the examination of the employee or applicant for employment.

SEC. 6. MINIMUM STANDARDS FOR POLYGRAPH EXAMINATIONS.

(a) No polygraph examination shall be conducted by a person other than one who—

(1) is at least 21 years of age;

(2) is a citizen of the United States;

(3) is a person of good moral character; and,

(4) has complied with all required laws, rules and regulations enacted by the appropriate state and other polygraph licensing and regulatory authorities in the state in which the examination is to be conducted; and

(5)(A) has successfully completed a formal training course regarding the use of polygraphs that has been approved by the Secretary of Labor; and,

(B) has completed a polygraph examiner internship of at least six months in duration under the direct supervision of a polygraph examiner who has met the requirements of this section.

Notwithstanding the provisions of paragraph (5) of this section, a person shall be permitted to conduct a polygraph examination in accordance with the provisions of this Act if such person has met the requirements of subsections (1-4) of this section and—

(i) on the date of enactment of this Act such person holds a valid polygraph examiner's license issued by a State licensing authority, or

(ii) within a period of five years immediately preceding the date of enactment of this Act has conducted not less than 200 polygraph examinations, and, within one year of the date of enactment of this Act, has satisfactorily completed a formal training course in the administration of polygraph examinations approved by the Secretary of Labor.

(b) All examiners meeting the requirements of subsection (a) of this section shall be required every 24 months to complete not less than 24 hours of continuing education approved by the Secretary of Labor regarding the use of polygraphs.

(c) A polygraph examiner shall not ask a question during a polygraph examination unless such question is in writing and has been reviewed with the examinee prior to such examination.

(d) A polygraph examiner shall not inquire into any of the following areas during preemployment or periodic employment examinations—

(1) Religious beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Political beliefs or affiliations;

(4) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(5) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(e) A polygraph examiner shall not perform more than 12 polygraph examinations in any one 24 hour period.

(f) A polygraph examiner shall use an instrument which records continuously, visually, permanently, and simultaneously indications of any changes in such individual's cardiovascular, respiratory, and galvanic skin response patterns as minimum instrumentation standards, and bases his or her evaluation or opinion of such individual's trustfulness or untruthfulness at least upon changes in the individual's physiological activity or reactivity in the cardiovascular, respiratory and galvanic skin response patterns of such individual. Such person may use an instrument which, in addition, also records other physiological patterns and may consider the additional physiological patterns in making his or her evaluation and rendering his or her opinion.

(g) All conclusions or opinions of the polygraph examiner arising from the polygraph examination shall:

(1) be in writing and shall be based solely on polygraph chart analysis;

(2) contain no information other than admissions and information relevant to the purpose and stated objectives of the examination, and to relevant issues and interpretation of the chart data; and,

(3) contain no recommendation regarding the prospective or continued employment of an examinee.

(h) A polygraph examiner shall preserve and keep on file for a minimum of two years after administering a polygraph examination all opinions, reports, charts, questions lists, and all other records relating to the polygraph examination.

—(9) Section 2 is amended by striking out all beginning on page 2, line 6, through page

4, line 3, and inserting in lieu thereof the following new sections:

SEC. 4. PROHIBITION OF POLYGRAPH TESTING EXCEPT IN ACCORDANCE WITH THE STANDARDS OF THIS ACT.

No employer shall take any action affecting the employment status of an employee or prospective employee of the employer if such action is based on the results of a polygraph examination of such employee or prospective employee that has not been administered in accordance with section 5 of this Act.

SEC. 5. POLYGRAPH EXAMINEES' BILL OF RIGHTS.

(a) Each prospective examinee shall be required to sign a notification prior to the beginning of each polygraph examination which contains the following information:

(1) That he or she is consenting voluntarily to take the examination;

(2) That the polygraph examiner shall not inquire into any of the following areas during preemployment of periodic examinations:

(i) Religious beliefs or affiliations;

(ii) Beliefs or opinions regarding racial matters;

(iii) Political beliefs or affiliations;

(iv) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(v) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(3) That he or she may terminate the examination at any time;

(4) That, upon written request, he or she shall, for a reasonable fee, be provided with a written copy of any opinions or conclusions rendered as a result of the examination;

(5) That the polygraph examiner is prohibited from asking the examinee any question during the examination that is not in writing and has not been reviewed with the examinee prior to the examination;

(6) That he or she has specific legal rights and remedies if the polygraph examination has not been conducted in accordance with the provisions of this Act; and,

(7) That, upon written request, he or she may receive a copy of the notification.

(b) A polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered in accordance with section 6 of this Act and signed by the polygraph examiner with respect to the examinee's polygraph examination.

—(10) Beginning on page 2, line 6, through page 4, line 3, strike out the words "prospective employee" wherever they appear and insert in lieu thereof "applicant for employment".

—(11) On page 5, lines 1 and 2, strike out "sections 9 and 10 of the Federal Trade Commission Act (15 U.S.C. 49, 50)" and insert in lieu thereof "section 11 of the Fair Labor Standards Act (29 U.S.C. 211)".

—(12) On page 4, lines 7 and 8, strike out "prospective employee" and insert in lieu thereof "applicant for employment".

—(13) On page 4, line 4, renumber "SEC. 3" as "SEC. 4", insert the following new section 3, and renumber all other sections accordingly:

SEC. 3. NO WAIVER OF RIGHTS.

The rights and procedures provided for under this Act shall not be abrogated by any contract or waiver and a polygraph examiner shall be prohibited from requesting that an examinee execute any such contract or waiver.

—(14) On page 4, line 23, add the following after the word "Act" and before the period at the end of the sentence: "in accordance with section 11 of the Fair Labor Standards Act (29 U.S.C. 211)".

Beginning on page 4, line 24, strike out all through page 5, line 2.

—(15) On page 4, line 23, add the following after the word "Act" and before the period at the end of the sentence: "in accordance with section 11 of the Fair Labor Standards Act (29 U.S.C. 211)".

On page 5, lines 1 and 2, strike out "sections 9 and 10 of the Federal Trade Commission Act (15 U.S.C. 49, 50)" and insert in lieu thereof "section 11 of the Fair Labor Standards Act (29 U.S.C. 211)".

—(16) Beginning on page 5, line 12, strike out all after the words "required by" through line 16 and insert in lieu thereof the following: "section 16 of the Fair Labor Standards Act (29 U.S.C. 216) with respect to civil penalties assessed under subsection (a) of this section."

—(17) On page 4, line 4, renumber "SEC. 3" as "SEC. 4", add the following new section, and renumber all other sections accordingly:

Notwithstanding any other provision of law, the prohibitions of section 2 of this Act shall not apply to any State or political subdivision thereof, which enacts comprehensive standards regulating the use of polygraphs and provides for the enforcement of those standards.

—(18) On page 4, line 4, renumber "SEC. 3" as "SEC. 4", add the following new section, and renumber all other sections of the bill accordingly:

Notwithstanding any other provision of law, the prohibitions of section 2 of this Act shall not apply to any State, or political subdivision thereof, which enacts comprehensive standards regulating the use of polygraphs which are at least as effective as the standards contained in sections 3 and 4 of this Act, and provides for the enforcement of those standards.

On page 4, line 4, renumber "SEC. 3" as "SEC. 5", add the following new sections and renumber all other sections of the bill accordingly:

SEC. 3. POLYGRAPH EXAMINEES' BILL OF RIGHTS.

(a) Each prospective examinee shall be required to sign a notification prior to the beginning of each polygraph examination which contains the following information:

(1) That he or she is consenting voluntarily to take the examination;

(2) That the polygraphs examiner shall not inquire into any of the following areas during preemployment or periodic examinations:

(i) Religious beliefs or affiliations;

(ii) Beliefs or opinions regarding racial matters;

(iii) Political beliefs or affiliations;

(iv) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hosptial, day nursery or similar child care facility or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(v) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(3) That he or she may terminate the examination at any time;

(4) That, upon written request, he or she, shall, for a reasonable fee, be provided with a written copy of any opinions or conclusions rendered as a result of the examination;

(5) That the polygraph examiner is prohibited from asking the examinee any question during the examination that is not in writing and has not been reviewed with the examinee prior to the examination.

(6) That he or she has specific legal rights and remedies if the polygraph examination has not been conducted in accordance with the provisions of this Act; and,

(7) That, upon written request, he or she may receive a copy of the notification.

(b) A polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered in accordance with section 6 of this Act, and signed by the polygraph examiner with respect to the examinee's polygraph examination.

(c) No action may be taken by an employer regarding the employment status of an employee or an applicant for employment that is based solely on opinions or conclusions of a polygraph examiner reached by analysis of a polygraph chart produced during the examination of the employee or applicant for employment.

SEC. 4. MINIMUM STANDARDS FOR POLYGRAPH EXAMINATIONS.

(a) No polygraph examination shall be conducted by a person other than one who—

(1) Is at least 21 years of age;

(2) Is a citizen of the United States;

(3) Is a person of good moral character; and,

(4) has complied with all required laws, rules and regulations enacted by the appropriate state and other polygraph licensing and regulatory authorities in the state in which the examination is to be conducted; and

(5)(A) has successfully completed a formal training course regarding the use of polygraphs that has been approved by the Secretary of Labor; and,

(B) has completed a polygraph examiner internship of at least six months in duration under the direct supervision of a polygraph examiner who has met the requirements of this section.

Notwithstanding the provisions of paragraph (5) of this section, a person shall be permitted to conduct a polygraph examination in accordance with the provisions of this Act if such person has met the requirements of subsections (1-4) of this section and—

(i) on the date of enactment of this Act such person holds a valid polygraph examiner's license issued by a State licensing authority, or

(ii) within a period of five years immediately preceding the date of enactment of this Act has conducted not less than 200 polygraph examinations, and, within one year of the date of enactment of this Act, has satisfactorily completed a formal training course in the administration of polygraph examinations approved by the Secretary of Labor.

(b) All examiners meeting the requirements of subsection (a) of this section shall be required every 24 months to complete not less than 24 hours of continuing educa-

tion approved by the Secretary of Labor regarding the use of polygraphs.

(c) A polygraph examiner shall not ask a question during a polygraph examination unless such question is in writing and has been reviewed with the examinee prior to such examination.

(d) A polygraph examiner shall not inquire into any of the following areas during preemployment or periodic employment examinations—

(1) Religious beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Politics beliefs or affiliations;

(4) Sexual preferences or activities, unless necessary to determine the emloyee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(5) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(e) A polygraph examiner shall not perform more than 12 polygraph examinations in any one 24 hour period.

(f) A polygraph examiner shall use an instrument which records continuously, visually, permanently, and simultaneously indications of and changes in such individual's cardiovascular, respiratory, and galvanic skin response patterns as minimum instrumentation standards, and bases his or her evaluation or opinion of such individual's truthfulness or untruthfulness at least upon changes in the individual's physiological activity or reactivity in the cardiovascular, respiratory and galvanic skin response patterns of such individual. Such person may use an instrument which, in addition, also records other physiological patterns and may consider the additional physiological patterns in making his or her evaluation and rendering his or her opinion.

(g) All conclusions or opinions of the polygraph examiner arising from the polygraph examination shall:

(1) be in writing and shall be based solely on polygraph chart analysis;

(2) contain no information other than admissions and information relevant to the purpose and stated objectives of the examination, and to relevant issues and interpretation of the chart data; and,

(3) contain no recommendation regarding the prospective or continued employment of an examinee.

(h) A polygraph examiner shall preserve and keep on file for a minimum of two years after administering a polygraph examination all opinions, reports, charts, questions, lists, and all other records relating to the polygraph examination.

—(19) On page 4, line 4, renumber "SEC. 3" as "SEC. 4", add the following new section, and renumber all other sections of the bill accordingly:

Notwithstanding any other provision of law, the prohibition of section 2 of this Act shall not apply to any State, or political subdivision thereof, which enacts comprehensive standards regulating the use of polygraphs which are at least as effective as the standards contained in sections 3 and 4 of this Act, and provides for the enforcement of those standards.

On page 4, line 4, renumber "SEC. 3" as "SEC. 5", add the following new sections, and renumber all other sections of the bill accordingly:

SEC. 3. POLYGRAPH EXAMINEES' BILL OF RIGHTS.

(a) Each prospective examinee shall be required to sign a notification prior to the beginning of each polygraph examination which contains the following information:

(1) That he or she is consenting voluntarily to take the examination;

(2) That the polygraph examiner shall not inquire into any of the following areas during preemployment or periodic examinations:

(i) Religious beliefs or affiliations;

(ii) Beliefs or opinions regarding racial matters;

(iii) Political beliefs or affiliations;

(iv) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(v) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(3) That he or she may terminate the examination at any time;

(4) That, upon written request, he or she shall, for a reasonable fee, be provided with a written copy of any opinions or conclusions rendered as a result of the examination;

(5) That the polygraph examiner is prohibited from asking the examinee any question during the examination that is not in writing and has not been reviewed with the examinee prior to the examination;

(6) That he or she has specific legal rights and remedies if the polygraph examination has not been conducted in accordance with the provisions of this Act; and,

(7) That, upon written request, he or she may receive a copy of the notification.

(b) A polygraph examiner shall, upon written request from the examinee, provide the examine with a copy of all opinions or conclusions rendered in accordance with section 6 of this Act and signed by the polygraph examiner with respect to the examinee's polygraph examination.

SEC. 4. MINIMUM STANDARD FOR POLYGRAPH EXAMINATIONS.

(A) No polygraph examination shall be conducted by a person other than one who—

(1) Is at least 21 years of age;

(2) Is a citizen of the United States;

(3) Is a person of good moral character; and,

(4) has complied with all required laws, rules and regulations enacted by the appropriate state and other polygraph licensing and regulatory authorities in the state in which the examination is to be conducted; and

(5)(A) has successfully completed a formal training course regarding the use of polygraphs that has been approved by the Secretary of Labor; and,

(B) has completed a polygraph examiner internship of at least six months in duration under the direct supervision of a polygraph examiner who has met the requirements of this section.

Notwithstanding the provisions of paragraph (5) of this section, a person shall be permitted to conduct a polygraph examination in accordance with the provisions of this Act if such person has met the requirements of subsections (1-4) of this section and—

(i) on the date of enactment of this Act such person holds a valid polygraph examiner's license issued by a State licensing authority, or

(ii) within a period of five years immediately preceding the date of enactment of this Act has conducted not less than 200 polygraph examinations, and, within one year of the date of enactment of this Act, has satisfactorily completed a formal training course in the administration of polygraph examinations approved by the Secretary of Labor.

(b) All examiners meeting the requirements of subsection (a) of this section shall be required every 24 months to complete not less than 24 hours of continuing education approved by the Secretary of Labor regarding the use of polygraphs.

(c) A polygraph examiner shall not ask a question during a polygraph examination unless such question is in writing and has been reviewed with the examinee prior to such examination.

(d) A polygraph examiner shall not inquire into any of the following areas during preemployment or periodic employment examinations—

(1) Religious beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Political beliefs or affiliations;

(4) Sexual preferences or activities; unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(5) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(e) A polygraph examiner shall not perform more than 12 polygraph examinations in any one 24 hour period.

(f) A polygraph examiner shall use an instrument which records continuously, visually, permanently, and simultaneously indications of and changes in such individual's cardiovascular, respiratory, and galvanic skin response patterns as minimum instrumentation standards, and bases his or her evaluation or opinion of such individual's truthfulness or untruthfulness at least upon changes in the individual's physiological activity or reactivity in the cardiovascular, respiratory and galvanic skin response patterns of such individual. Such person may use an instrument which, in addition, also records other physiological patterns and may consider the additional physiological patterns in making his or her evaluation and rendering his or her opinion.

(g) All conclusions or opinions of the polygraph examiner arising from the polygraph examination shall:

(1) be in writing and shall be based solely on polygraph chart analysis;

(2) contain no information other than admissions and information relevant to the purpose and stated objectives of the examination, and to relevant issues and interpretation of the chart data; and,

(3) contain no recommendation regarding the prospective or continued employment of an examinee.

(h) A polygraph examiner shall preserve and keep on file for a minimum of two years after administering a polygraph examination all opinions, reports, charts, questions lists, and all other records relating to the polygraph examination.

—(20) On page 8, line 16, add the following new subsection:

(e) No polygraph examination shall be performed pursuant to this section and no adminsitrative action shall be taken with respect to individual who is exempted from the prohibitions of section 2 of this Act by this section unless such examination is performed pursuant to sections 7 and 8 of this Act and the examiner has met the requirements of section 8 of this Act.

On page 8, renumber "SEC. 7" as "SEC. 9"; on page 9, renumber "SEC. 8" as "SEC. 10", and add the following new sections:

SEC. 7. POLYGRAPH EXAMINEES' BILL OF RIGHTS.

(a) Each prospective examinee shall be required to sign a notification prior to the beginning of each polygraph examination which contains the following information:

(1) That he or she is consenting voluntarily to take the examination;

(2) That the polygraph examiner shall not inquire into any of the following areas during preemployment or periodic examinations:

(i) Religious beliefs or affiliations;

(ii) Beliefs or opinions regarding racial matters;

(iii) Political beliefs or affiliations;

(iv) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(v) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(3) That he or she may terminate the examination at any time;

(4) That, upon written request, he or she shall, for a reasonable fee, be provided with a written copy of any opinions or conclusions rendered as a result of the examination;

(5) That the polygraph examiner is prohibited from asking the examinee any question during the examination that is not in writing and has not been reviewed with the examinee prior to the examination;

(6) That he or she has specific legal rights and remedies if the polygraph examination has not been conducted in accordance with the provisions of this Act; and,

(7) That, upon written request, he or she may receive a copy of the notification.

(b) A polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered in accordance with section 6 of this Act and signed by the polygraph examiner with respect to the examinee's polygraph examination.

(c) No action may be taken by an employer regarding the employment status of an employee or an applicant for employment that is based solely on opinions or conclusions of a polygraph examiner reached by analysis of a polygraph chart produced during the examination of the employee or applicant for employment.

SEC. 8. MINIMUM STANDARDS FOR POLYGRAPH EXAMINATIONS.

(a) No polygraph examination shall be conducted by a person other than one who—

(1) Is at least 21 years of age;

(2) Is a citizen of the United States;

(3) Is a person of good moral character; and,

(4) Has complied with all required laws, rules and regulations enacted by the appropriate state and other polygraph licensing and regulatory authorities in the state in which the examination is to be conducted; and

(5)(A) has successfully completed a formal training course regarding the use of polygraphs that has been approved by the Secretary of Labor; and,

(B) has completed a polygraph examiner internship of at least six months in duration under the direct supervision of a polygraph examiner who has met the requirements of this section.

Notwithstanding the provisions of paragraph (5) of this section; a person shall be permitted to conduct a polygraph examination in accordance with the provisions of this Act if such person has met the requirements of subsections (1-4) of this section and—

(i) on the date of enactment of this Act such person holds a valid polygraph examiner's license issued by a State licensing authority, or

(ii) within a period of five years immediately preceding the date of enactment of this Act has conducted not less than 200 polygraph examinations, and, within one year of the date of enactment of this Act, has satisfactorily completed a formal training course in the administration of polygraph examinations approved by the Secretary of Labor.

(b) All examiners meeting the requirements of subsection (a) of this section shall be required every 24 months to complete not less than 24 hours of continuing education approved by the Secretary of Labor regarding the use of polygraphs.

(c) A polygraph examiner shall not ask a question during a polygraph examination unless such question is in writing and has been reviewed with the examinee prior to such examination.

(d) A polygraph examiner shall not inquire into any of the following areas during preemployment or periodic employment examinations—

(1) Religious beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Political beliefs or affiliations;

(4) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(b) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(e) A polygraph examiner shall not perform more than 12 polygraph examinations in any one 24 hour period.

(f) A polygraph examiner shall use an instrument which records continuously, visually, permanently, and simultaneously indications of and changes in such individual's cardiovascular, respiratory, and galvanic skin response patterns as minimum instrumentation standards, and bases his or her evaluation or opinion of such individual's truthfulness or untruthfulness at least upon changes in the individual's physiological activity or reactivity in the cardiovascular, respiratory and galvanic skin response patterns of such individual. Such person may use an instrument which, in addition, also records other physiological patterns and may consider the additional physiological patterns in making his or her evaluation and rendering his or her opinion.

(g) All conclusions or opinions of the polygraph examiner arising from the polygraph examination shall:

(1) be in writing and shall be based solely on polygraph chart analysis;

(2) contain no information other than admissions and information relevant to the purpose and stated objectives of the examination, and to relevant issues and interpretation of the chart data; and,

(3) contain no recommendation regarding the prospective or continued employment of an examinee.

(h) A polygraph examiner shall preserve and keep on file for a minumum of two years after administering a polygraph examination all opinions, reports, charts, questions lists, and all other records relating to the polygraph examination.

On page 8, line 16, add the following new subsection:

(e) No polygraph examination shall be performed pursuant to this section and no administrative action shall be taken with respect to individual who is exempted from the prohibitions of section 2 of this Act by this section unless such examination is performed pursuant to sections 7 and 8 of this Act and the examiner has met the requirements of section 8 of this Act.

On page 8, renumber "SEC. 7" as "SEC. 9"; on page 9, renumber "SEC. 8" as "SEC. 10", and add the following new sections:

SEC. 7. POLYGRAPH EXAMINEES' BILL OF RIGHTS.

(a) Each prospective examinee shall be required to sign a notification prior to the beginning of each polygraph examination which contains the following information:

(1) That he or she is consenting voluntarily to take the examination;

(2) That the polygraph examiner shall not inquire into any of the following areas during preemployment or periodic examinations:

(i) Religious beliefs or affiliations;

(ii) Beliefs or opinions regarding racial matters;

(iii) Political beliefs or affiliations;

(iv) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(v) Beliefs, affiliations, or opinions regarding unions or labor organizations

(3) That he or she may terminate the examination at any time;

(4) That, upon written request, he or she shall, for a reasonable fee, be provided with a written copy of any opinions ro conclusions rendered as a result of the examination;

(5) That the polygraph examiner is prohibited from asking the examinee any question during the examination that is not in writing and has not been reviewed with the examinee prior to the examination;

(6) That he or she has specific legal rights and remedies if the polygraph examination has not been conducted in accordance with the provisions of this Act; and,

(7) That, upon written request, he or she may receive a copy of the notification.

(b) A polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered in accordance with section 6 of this Act and signed by the poly-

graph examiner with respect to the examinee's polygraph examination.

SEC. 8. MINIMUM STANDARDS FOR POLYGRAPH EXAMINATIONS.

(a) No polygraph examination shall be conducted by a person other than one who—

(1) Is at least 21 years of age;

(2) Is a citizen of the United States;

(3) Is a person of good moral character; and,

(4) has complied with all required laws, rules and regulations enacted by the appropriate state and other polygraph licensing and regulatory authorities in the state in which the examination is to be conducted; and

(5)(A) has successfully completed a formal training course regarding the use of polygraphs that has been approved by the Secretary of Labor; and,

(B) has completed a polygraph examiner internship of at least six months in duration under the direct supervision of a polygraph examiner who has met the requirements of this section.

Notwithstanding the provisions of paragraph (5) of this section, a person shall be permitted to conduct a polygraph examination in accordance with the provisions of this Act if such person has met the requirements of subsections (1-4) of this section and—

(i) on the date of enactment of this Act such person holds a valid polygraph examiner's license issued by a State licensing authority, or

(ii) within a period of five years immediately preceding the date of enactment of this Act has conducted not less than 200 polygraph examinations, and, within one year of the date of enactment of this Act, has satisfactorily completed a formal training course in the administration of polygraph examinations approved by the Secretary of Labor.

(b) All examiners meeting the requirements of subsection (a) of this section shall be required every 24 months to complete not less than 24 hours of continuing education approved by the Secretary of Labor regarding the use of polygraphs.

(c) A polygraph examiner shall not ask a question during a polygraph examination unless such question is in writing and has been reviewed with the examinee prior to such examination.

(d) A polygraph examiner shall not inquire into any of the following areas during the preemployment of periodic employment examinations—

(1) Religous beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Political beliefs or affiliations;

(4) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(5) Beliefs, affiliations, or opinions regarding unions or labor organizations.

(e) A polygraph examiner shall not perform more than 12 polygraph examinations in any one 24 hour period.

(f) A polygraph examiner shall use an instrument which records continuously, visually, permanently, and simultaneously indications of and changes in such individual's cardiovascular, respiratory, and galvanic skin response patterns as minimum instrumentation standards, and bases his or her evaluation or opinion of such individual's truthfulness or untruthfulness at least upon changes in the individual's physiological activity or reactivity in the cardiovascular, respiratory and galvanic skin response patterns of such individual. Such person may use an instrument which, in addition, also records other physiological patterns and may consider the additional physiological patterns in making his or her evaluation and rendering his or her opinion.

(g) All conclusions or opinions of the polygraph examiner arising from the polygraph examination shall:

(1) be in writing and shall be based solely on polygraph chart analysis;

(2) contain no information other than admissions and information relevant to the purpose and stated objectives of the examination, and to relevant issues and interpretation of the chart data; and,

(3) contain no recommendation regarding the prospective or continued employment of an examinee.

(h) A polygraph examiner shall preserve and keep on file for a minimum of two years after administering a polygraph examination all opinions, reports, charts, questions lists, and all other records relating to the polygraph examination.

—(22) Beginning on page 8, line 18, strike all through line 24 and insert in lieu thereof the following new subsection:

(1) The term "polygraph examination" includes—

(a) any examination involving the use of any polygraph, deceptograph, voice stress analyzer, psychological stress evaluator, or any other similar device (whether mechanical, electrical, or chemical) which is used, or the results of which are used, for the purpose of detecting deception or verifying the truth of statements; and,

(b) any interview or examination of any employee or prospective employee that uses or is conducted with the intention of using any instrumentation defined in this Act, regardless of nomenclature or terms used in reporting to an employer the findings, opinions or statements made in or results of such interview or examination.

—(23) On page 8, line 18, strike all through line 24 of that page, insert in lieu thereof the following new subsections, and renumber the remaining subsections accordingly:

(1) The term "polygraph examination" includes—

(a) any examination involving the use of any polygraph, deceptograph, voice stress analyzer, psychological stress evaluator, or any other similar device (whether mechanical, electrical, or chemical) which is used, or the results of which are used, for the purpose of detecting deception or verifying the truth of statements; and,

(b) any interview or examination of any employee or prospective employee that uses or is conducted with the intention of using any instrumentation defined in this Act, regardless of nomenclature or terms used in reporting to an employer the findings, opinions or statements made in or results of such interview or examination.

(2) The term "polygraph examiner" includes any person who conducts a polygraph examination as defined in subsection (1) of this section.

—(24) Beginning page 8, line 16, add the following new subsection:

(e) DISCLOSURE OF INFORMATION.—A person shall not disclose information obtained during a polygraph examination except as provided in this subsection.

(1) A polygraph examiner, polygraph trainee or employee of a polygraph examiner may disclose information acquired from a polygraph examination to:

(A) The examinee or any other person specifically designated in writing by the examinee; and

(B) The person, firm, corporation, partnership, business entity, or governmental agency that requested the examination.

(2) A person or an employee of the person for whom a polygraph examination is conducted may disclose information from the examination to a person described in subsection (1) of this section.

—(25) Beginning page 5, line 17, strike all through page 6, line 13 and insert in lieu thereof the following:

(b) REMEDIAL ACTIONS.—An employee or applicant for employment seeking remedial relief from a violation of this Act shall be provided such relief in accordance with the power, remedies and procedures provided in sections 11(b), 16 and 17 of the Fair Labor Standards Act of 1938 (29 U.S.C. 211(b). 216 and 217). Amounts owing to a person as a result of a violation of this Act shall be deemed to be unpaid minimum wages or unpaid overtime compensation for purposes of sections 16 and 17 of the Fair Labor Standards Act of 1938 (29 U.S.C. 216, 217). The remedies provided by this Act shall be exclusive and shall not be construed to permit a cause of action against any other party.

—(26) Beginning on page 5, line 17, strike all through page 6, line 13 and insert in lieu thereof the following:

(b) REMEDIAL ACTIONS.—An employee or applicant for employment seeking remedial relief from a violation of this Act shall be provided such relief in accordance with the powers, remedies and procedures provided in sections 11(b), 16 and 17 of the Fair Labor Standards Act of 1938 (29 U.S.C. 211(b). 216 adn 217). Amounts owing to a person as a result of a violation of this Act shall be deemed to be unpaid minimum wages or unpaid overtime compensation for purposes of sections 16 and 17 of the Fair Labor Standards Act of 1938 (29 U.S.C. 216, 217).

—(27) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR CHILD CARE FACILITIES.—This Act shall not prohibit the use of a polygraph test on an employee or a prospective employee of a child care facility or such other institution of service in which the well-being of children is entrusted to the care of such employees of such institutions of service.

—(28) On page 8, line 16, add the following subsection:

(e) EXEMPTION FOR HOSPITAL FACILITIES.—This Act shall not prohibit the use of a polygraph test on an employee or prospective employee of a hospital, sanitarium or such other institution of service in which the well-being of the infirm is entrusted to the care of such employees of such institutions of service.

—(29) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR NURSING HOME FACILITIES.—This Act shall not prohibit the use of a polygraph test on an employee or prospective employee of a nursing home, rest home, or such other institution of service in which the well-being of the aged or handicapped are entrusted to the care of such employees of such institutions of service.

—(30) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR HOSPICE FACILITIES.—This Act shall not prohibit the use of a polygraph test on an employee or prospective employee of a hospice or such other institution of service in which the care of the terminally ill is entrusted to the care of employees of private nursing services.

—(31) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PRIVATE NURSING SERVICES.—This Act shall not prohibit the use of a polygraph test on an employee or prospective employee of a private nursing service in which the well-being of the infirm or aged is entrusted to the care of such employees of such institutions of service.

—(32) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PSYCHIATRIC FACILITIES.—This Act shall not prohibit the use of a polygraph test on prospective or current employees of psychiatric facilities or such other institutions of service in which the well-being of the mentally infirm is entrusted to the care of such employees of such institutions of service.

—(33) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR DRUG TREATMENT CENTERS.—This Act shall not prohibit the use of a polygraph test on an employee or prospective employee of a drug treatment center or such other institution of service in which the well-being of individuals addicted to alcohol and/or controlled substances is entrusted to the care of such employees of such institutions of service.

—(34) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR OUTPATIENT CLINICS.—This Act shall not prohibit the use of a polygraph test on an employee or a prospective employee of an out-patient clinic in which the well-being of the injured and/or infirm is entrusted to the care of such employees.

—(35) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PRIVATE NURSERY SCHOOL FACILITIES.—This Act shall not prohibit the use of a polygraph test on an employee or prospective employee of a private nursery school facility or such other institution of service in which the well-being and teaching of children is entrusted to the care of such employees of such institutions of service.

—(36) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PRIVATE ELEMENTARY SCHOOLS.—This Act shall not prohibit the use of a polygraph test on an employee or prospective employee of a private elementary school or such other private institution of learning in which the teaching and care of young children is entrusted to employees of such institutions of learning.

—(37) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PRIVATE SECONDARY SCHOOLS.—This Act shall not prohibit the use of a polygraph test on employee or prospective employee of a private secondary school or such other private institution of learning in which the teaching and care of minors is entrusted to employees of such institutions of learning.

—(38) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PREEMPLOYMENT SCREENING BY JEWELERS.—This Act shall not prohibit the use of a polygraph examination for purposes of pre-employment screening of prospective employees of establishments engaged in the wholesale or retail trade of jewelry.

—(39) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PREEMPLOYMENT SCREENING BY RETAIL DRUG STORES.—This Act shall not prohibit the use of a polygraph examination for purposes of pre-employment screening of prospective employees of establishments engaged in the sale or handling of controlled substances listed in Schedule I, II, III, or IV pursaunt to Section 202 of the Controlled Substances Act (21 U.S.C. 812).

—(40) Section 7. Definitions: Page 9, beginning on line 2, strike out all that follows through line 4 and insert in lieu thereof "or entity that employs 500 or more full-time employees."

—(41) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR CHILD CARE FACILITIES.—This Act shall not prohibit the use of a polygraph test on a prospective employee of a child care facility or such other institution of service in which the well-being of children in entrusted to the care of such employees of such institutions of service.

—(42) On page 8, line 16, add the following subsection:

(e) EXEMPTION FOR HOSPITAL FACILITIES.—This Act shall not prohibit the use of a polygraph test on a prospective employee of a hospital, sanitarium or such other institution of service in which the well-being of the infirm is entrusted to the care of such employees of such institutions of service.

—(43) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR NURSING HOME FACILITIES.—This Act shall not prohibit the use of a polygraph test on a prospective employee of a nursing home, rest home, or such other institution of service in which the well-being of the aged or handicapped are entrusted to the care of such employees of such institutions of service.

—(44) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR HOSPICE FACILITIES.—This Act shall not prohibit the use of a polygraph test on a prospective employee of a hospice or such other institution of service in which the care of the terminally ill is entrusted to the care of such employees of such institutions of service.

—(45) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PRIVATE NURSING SERVICES.—This Act shall not prohibit the use of a polygraph test on a prospective employee of a private nursing service in which the well-being of the infirm or aged is entrusted to the care of such employees of such institutions of services.

—(46) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PSYCHIATRIC FACILITIES.—This Act shall not prohibit the use of a polygraph test on a prospective employee of psychiatric facility or such other institution of service in which the well-being of the mentally infirm is entrusted to the care of such employees of such institutions of service.

—(47) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR DRUG TREATMENT CENTERS.—This Act shall not prohibit the use of a polygraph test on a prospective employee of a drug treatment center or such other institution of service in which the well-being of individuals addicted to alcohol and/or controlled substances is entrusted to the care of such employees of such institutions of service.

—(48) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR OUT-PATIENT CLINICS.—This Act shall not prohibit the use of a polygraph test on a prospective employee of an out-patient clinic in which the well-being of the injured and/or infirm is entrusted to the care of such employees.

—(49) On page 8, line 16, add the following new subsection:

(e) EXEMPTION FOR PRIVATE NURSERY SCHOOL FACILITIES.—This Act shall not prohibit the use of a polygraph test on a prospective employee of a private nursery school facility or such other institution of service in which the well-being and teaching of children is entrusted to the care of such employees of such institutions of service.

—(50) Section 5. Enforcement Provisions: Page 5, line 6, strike out "$10,000" and insert in lieu thereof "$100".

—(51) Section 5. Enforcement Provisions: Page 5, beginning on line 3, strike out section 5 and all that follows through line 13 on page 6, and redesignate the succeeding sections (and references thereto) accordingly.

—(52) Section 5. Enforcement Provisions: Page 5, beginning on line 17, strike out all that follows through line 22.

—(53) Section 5. Enforcement Provisions: Page 5, beginning on line 23, strike out all that follows through line 13 on page 6.

—(54) Section 5. Enforcement Provisions: Page 5, beginning on line 17, strike out all that follows through line 13 on page 6, and insert in lieu thereof the following:

(b) EXCLUSIVE REMEDY.—The remedies provided by this Act shall be exclusive and shall not be construed to permit a cause of action against any other party.

Page 9, line 10, strike out "six" and insert in lieu thereof "eighteen".

—(74) Section 8. Effective Date: Page 9, line 9, strike out "on" and insert in lieu thereof "thirty-six months after".

Page 9, line 10, strike out "six" and insert in lieu thereof "forty-two".

—(75) Section 7. Definitions: Page 8, line 18, insert the following new definition and redesignates the subsequent definitions accordingly:

(1) The term "employee" means a person that is employed by an employer in full-time employment for not less than 2000 hours during the course of a calendar year.

—(76) Section 7. Definitions: Page 8, line 18, insert the following new definition and redesignates the subsequent definitions accordingly:

(1) The term "prospective employee" means a person who is being considered for a position by an employer which will involve not less than 2,000 hours full-time employment during the course of a calendar year.

—(77) Section 7. Definitions: Page 9, beginning on line 2, strike out all that follows through line 4 and insert in lieu thereof, "or entity that employs 100 or more full-time employees."

—(78) Section 9. Separability of Provisions: Page 9, beginning on line 12 insert the following new section:

SEC. 9. SEPARABILITY OF PROVISIONS.

If any provision of this Act, or the application thereof to any person or circumstances, is held invalid, the remainder of this Act, and the application of such provision to other persons or circumstances, shall not be affected thereby.

—(79) Section 5. Enforcement Provisions: Page 6, line 11, after "shall" insert the word "not."

—(80) Section 5. Enforcement Provisions: Page 6, line 13, strike out ", including attorneys' fees" and insert in lieu thereof a period.

—(81) Section 7. Definitions: Page 8, line 18, insert the following new definition and redesignate the subsequent definitions accordingly:

(1) The term "employee" means a person that is employed by an employer in full-time employment for not less than 2,000 hours during the course of a calendar year, not including overtime.

—(82) Section 7. Definitions: Page 8, line 18, insert the following new definition and redesignate the subsequent definitions accordingly:

(1) The term "prospective employee" means a person who is being considered for a position by an employer which will involve not less than 2,000 hours full-time employment during the course of a calendar year, not including overtime.

—(83) Section 7. Definitions: Page 8, line 18, insert the following new definition and redesignate the subsequent definitions accordingly:

(1) The term "employee" means a person that is employed by an employer in full-time employment for not less than 2,250 hours during the course of a calendar year.

—(84) Section 7. Definitions: Page 8, line 18, insert the following new definition and redesignate the subsequent definitions accordingly:

(1) The term "prospective employee" means a person who is being considered for a position by an employer which will involve not less than 2,250 hours full-time employment during the course of a calendar year.

(85) Section 4. Authority of the Secretary of Labor: Page 4, line 14, after "(1)" insert the following: "in accordance with chapter 5 of Title 5 of the United States Code,".

(86) Section 4. Authority of the Secretary of Labor: Page 4, lines 3 and 4, strike out "and require the keeping of records necessary or".

—(87) Section 4. Authority of the Secretary of Labor: Page 4, beginning on line 24, strike out all that follows through line 2 on page 5.

—(88) Section 3. Notice of Protection: Page 4, line 11, insert after the period the following new sentence: "Failure by an employer to post or otherwise display such notice in accordance with this Section shall be considered to be a de minimis violation and shall not be subject to the enforcement provisions of Section 5 of this Act."

—(89) Section 5. Enforcement Provisions: Page 5, line 17, insert the following new subsection and designate each subsequent subsection (and any references thereto) accordingly:

(b) DE MINIMIS VIOLATIONS.—Failure to comply with the provisions of Section 3 of this Act shall be considered to be a de minimis violation and shall not be subject to the provisions of this Section.

—(90) Section 2. Prohibitions on Lie Detector Use: Page 2, line 8, after the word "commerce" insert the following: ", if done with the specific intent to deprive a person of his or her fair opportunity to employment".

—(91) Section 2. Prohibitions on Lie Detector Use: Page 3, line 3, strike out "or indirectly,".

—(92) Section 2. Prohibitions on Lie Detector Use: Page 4, line 1, strike out ", on".

Page 4, line 2, strike out "behalf of himself or others,".

—(93) On page 6, line 19, strike the period at the end of the sentence and insert in lieu thereof a semicolon, and add the following proviso: *"Provided,* That a polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered as a result of any polygraph examination conducted under this subsection; and provided further that no action may be taken by an employer regarding the employment status of an employee or an applicant for employment that is based solely on opinions or conclusions of a polygraph examiner reached by analysis of a polygraph chart produced during the examination of the employee or applicant for employment."

—(94) On page 6, line 19, strike the period at the end of the sentence and insert in lieu thereof a semicolon, and add the following proviso: *"Provided,* That a polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered as a result of any polygraph examination conducted under this subsection."

—(95) On page 6, line 19, strike the period at the end of the sentence and insert in lieu thereof a semicolon, and add the following proviso: *"Provided,* That no action may be taken by an employer regarding the employment status of an employee or an applicant for employment that is based solely on opinions or conclusions of a polygraph examiner reached by analysis of a polygraph chart produced during the examination of the employee or applicant for employment."

—(96) On page 6, line 19, strike the period at the end of the sentence and insert in lieu thereof a semicolon, and add the following proviso:

Provided, That in conducting a polygraph examination under this subsection, a polygraph examiner shall not inquire into any of the following areas—

(1) Religious beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Political beliefs or affiliations;

(4) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(5) Beliefs, affiliations, or opinions regarding unions or labor organizations.

—(97) On page 6, line 19, strike the period at the end of the sentence and insert in lieu thereof a semicolon, and add the following proviso:

Provided, That a polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered as a result of any polygraph examination conducted under this subsection; and provided further that no action may be taken by an employer regarding the employment status of an employee or an applicant for employment that is based solely an opinions or conclusions of a polygraph examiner reached by analysis

of a polygraph chart produced during the examination of the employee or applicant for employment; and provided further that in conducting a polygraph examination under this subsection, a polygraph examiner shall not inquire into any of the following areas—

(1) Religious beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Political beliefs or affiliations;

(4) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(5) Beliefs, affiliations, or opinions regarding unions or labor organizations.

—(98) On page 6, line 19, strike the period at the end of the sentence and insert in lieu thereof a semicolon, and add the following proviso:

Provided, That no action may be taken by an employer regarding the employment status of an employee or an applicant for employment that is based solely on opinions or conclusions of a polygraph examiner reached by analysis of a polygraph chart produced during the examination of the employee or applicant for employment; and provided further that in conducting a polygraph examination under this subsection, a polygraph examiner shall not inquire into any of the following areas—

(1) Religious beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Political beliefs or affiliations;

(4) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(5) Beliefs, affiliations, or opinions regarding unions or labor organizations.

—(99) On page 6, line 19, strike the period at the end of the sentence and insert in lieu thereof a semicolon, and add the following proviso:

Provided, That, a polygraph examiner shall, upon written request from the examinee, provide the examinee with a copy of all opinions or conclusions rendered as a result of any polygraph examination conducted under this subsection; and provided further that in conducting a polygraph examination under this subsection, a polygraph examiner shall not inquire into any of the following areas—

(1) Religious beliefs or affiliations;

(2) Beliefs or opinions regarding racial matters;

(3) Political beliefs or affiliations;

(4) Sexual preferences or activities, unless necessary to determine the employee's or prospective employee's qualifications to be employed by a nursing home, rest home, sanitarium, hospital, day nursery or similar child care facility, or such other institution or service in which the well-being of children, the aged, handicapped or infirm are entrusted to the care of such employees of such institutions or services; or

(5) Beliefs, affiliations, or opinions regarding unions or labor organizations.

—(100) On page 6, line 19, strike the period at the end of the sentence and insert in lieu thereof a semicolon, and add the following proviso:

Provided, That all conclusions or opinions of the polygraph examiner arising from a polygraph examination conducted under this section shall:

(1) be in writing and shall be based solely on polygraph chart analysis;

(2) contain no information other than admissions and information relevant to the purpose and stated objectives of the examination, and to relevant issues and interpretation of the chart data; and,

(3) contain no recommendation regarding the prospective or continued employment of an examine.

EXTENSIONS OF REMARKS

AS FARMS GROW FEW, TOWNS GO TO SEED

HON. THOMAS A. DASCHLE
OF SOUTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. DASCHLE. Mr. Speaker, there are many who might believe that the financial crisis facing the agricultural economy effects only farmers and ranchers. As we are realizing throughout South Dakota and the Midwest, that is not the case. The economic fabric of entire communities is reeling from the blows of the agriculture crisis.

A recent Chicago Tribune article written by Christopher Drew documented the disastrous effects of the agricultural crisis on one small South Dakota community, Gregory, SD. Stores are boarding up their windows, the school system has lost both students and teachers, and city sales tax collections have dropped by 15 percent in the first 6 months of this year.

Many of my colleagues have joined me in urging a new course for our agricultural policy. In doing so we have not only stated the case of the family farmer, but also highlighted the effect of his demise on rural States throughout the Midwest. There are literally thousands of Gregorys throughout the Midwest, all of whom are looking to this Congress and the administration for the solution to the agriculture crisis. The time for providing that solution is long overdue.

I insert the Chicago Tribune article in the RECORD.

[From the Chicago Tribune, Oct. 20, 1985]

AS FARMS GROW FEW, TOWNS GO TO SEED

(By Christopher Drew)

GREGORY, SD.—Back in the 1960s, this little farm town had three car dealers, four farm equipment stores and so many shoppers that it invited people to park in a line down the center of Main Street.

Even so, "if you came looking for a space at 10 o'clock on a Saturday morning, you were out of luck," recalled Ronald Sievers, the owner of Skip's Clothing, a men's shop.

Youngsters among Gregory's 1,500 residents might find that hard to believe.

The equipment dealers and the center-line parking strip disappeared in the 1970s, along with Main Street's traffic light, as a long-term consolidation in agriculture began to sap the town's vitality. Since then, the worst slump in the farm economy since the 1930s has accelerated the losses.

And with no end to the crisis in sight, people here and in many other Midwestern towns are preparing for a desperate struggle to keep their communities from withering away.

Gregory's three-block main shopping district already has taken on a drab, dog-eared look. Six storefronts are vacant, and Skip's hit by a sharp decline in sales and high debt from an expansion a few years ago, is about to become an unlucky No. 7.

The town's last auto dealership, Tilton Ford, may close if the wife of its recently deceased owner can't find a buyer. A Cheverolet showroom with dwindling sales shut its doors in similar circumstances last year, shortly after Jelinek Chrysler decided to quite selling new cars and focus only on repairs.

Local government also is starting to feel the crunch.

The merchants' problems translated into a 15 percent drop in city sales-tax collections in the first half of 1985. Falling property values and a growing exodus of townspeople and area farmers seem certain to cut into county tax revenues and force renewed cutbacks in schools and community services, a dismal process that already has started in a number of smaller Midwestern towns.

"I hate to be a pessimist," said Ken Dooley, who manages Gregory's farm-supply cooperative, "but I'm afraid this town is going downhill pretty fast."

Mike Schwinler, who is trying to decide whether to rebuild his five-and-dime store that burned on Main Street in June, added: "My heart tells me to reopen, but my pocketbook is telling me it's not so sure."

Schwinler's concerns go straight to the heart of what is causing so much despair in rural communities these days as the economic crisis adds fuel to a decades-old trend toward fewer and larger farms.

"The history on my store was very good," he said, with sales bolstered by the hundreds of midsize grain and livestock farmers in this picturesque area near the Missouri River, which divides the state's southeastern grasslands from the Black Hills to the west.

And as far as a place to live, he declared, the small-town atmosphere, with its emphasis on traditional virtues, "is paradise to me."

But, Schwinler said, "I'm afraid, the way things are going, that in 10 years we might have just 25 farmers farming all of Gregory County, and I might be left with just 25 customers."

Many economists and rural sociologists say that's not as much of an exaggeration as it sounds.

Kenneth Stone, as economist at Iowa State University, has found that Iowa's 830 towns and fewer than 2,500 people suffered heavy losses of retail sales over the last 15 years. The worst declines, up to 14 percent in the smallest locales, occurred last year.

Stone blamed much of the dropoff on the shrinking population in rural trade areas, due largely to the mechanization of farming, and on the growth of shopping malls in nearby cities. Noting that Main Street remains the hub of activity in most small towns, he said the sales slide has had a "very debilitating" effect on life in the communities.

In a much broader study of changes in 27 rural Nebraska counties since World War II, economic consultant Larry Swanson also found a direct link between a steady decline in the number of farmers and a loss of vibrancy in nearby towns.

Looking ahead to 1990, Swanson projected that a loss of one-third of the remaining farms—which many economists say is possible—would result in an additional 25 percent decline in the counties' total population, a 39 percent drop in school enrollment and the failure of one out of three retail stores.

Swanson, who grew up in a small Nebraska town, also said that the recent slide in the farm economy, characterized by falling commodity prices and massive farmer debt loads, has upset "a delicate transition process" among generations of farmers and rural shopkeepers.

This process began in the mid-1970's, as the generation that got its start after World War II neared retirement, he said. At the time, a surge in farm exports helped draw some of these people's children and grandchildren home, and this contributed to a small but widely noted resurgence in populatin in Midwest."

People 65 and older now make up 30 to 40 percent of most towns' populations. Consequently, he said, "There is just not the same feeling when you go into those communities. There is not the same level of activity."

To reverse such damaging trends, Swanson and a number of other experts are calling for a major shift away from farm and many farm towns.

But younger generations started to leave again after exports collapsed in the early 1980s. One dismaying result, according to Swanson, has been "the growth of the retirement-village phenomenon in the tax policies that encourage farm consolidation and what he calls the "depopulation" of rural America.

But that seems unlikely. Other economists and Reagan administration officials argue just as earnestly that letting more farmers fail would help solve chronic overproduction problems and free more resources for use in stronger parts of the economy.

Not long ago, most of the largely conservative populace in towns like Gregory would have tended to agree with the need for such strict adherence to free-market philosophy.

But that view is starting to sound hollow to many here, as civic boosters grapple with the vexing problem of how to replenish the town's aging leadership ranks.

Mayor Bob Slade lamented that deaths and retirements were the "common denominator" behind most of the farm-equipment and auto dealership closings. A family hardware store closed on Main Street after the founder's grandson, Gregg Drees, decided he could "probably make better money" managing a chain-owned grocery on the edge of town.

Part of the problem is a tradition of fierce retail competition dating almost to Gregory's founding near the turn of the century on land released from a Sioux Indian reservation.

Having multiple outlets for most types of goods was a powerful drawing card that enabled the town to keep growing as the country's population sank in the 1950s and 1960s.

But some believe that the profit-sapping rivalry among drugstores, restaurants and

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.
Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

numerous hardware outlets probably helped isolate Gregory from the "rural renaissance" of the 1970s and contributed to a slide in its population to 1,500 from 1,750 during the decade.

Now, the competition is forcing most businesses to hold frequent promotions, ranging from an anniversary sale at Partner's Clothing and Dry Goods to Mexican nights at Olson's Bar. And the economic stress is starting to take its toll on townspeople as well as farmers.

"As the tensions have mounted on people, alcohol abuse, child abuse, those kind of things, have increased," said Steven Ziebarth, pastor of the United Methodist Church.

Still, nobody expects the town to dry up completely, and a strong current of community spirit remains evident in the large crowds that turn out for high school sports and band events and in a recent commitment by business leaders to try to diversify the economy.

But Gregory's remote location makes its chances for attracting industry bleak. And some fear that a 1986 reassessment of declining local property values, coupled with a likely increase in tax-payment delinquencies by troubled farmers, could bring on a new era of cutbacks in schools and community services.

Declining enrollments led to consolidation of many rural schools and public-works cutbacks in the 1950s and 1960s. But after a number of less tumultuous years, schools recently closed in some smaller towns in Kansas, and one town in Missouri even had to close its jail.

So far, however, Gregory has gotten by with relatively minor cuts, such as letting 3 of the school system's 43 teachers go. But, said School Supt. David Gellerman, "If they were to come out and reassess the land at lower levels, that would really hurt us."

CAUTIOUS OPTIMISM FOR GUATEMALA

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GARCIA. Mr. Speaker, this past Sunday, Guatemala held a runoff election between its two Presidential candidates. I want to congratulate the winner, Mr. Marco Vincio Cerezo Arévalo on his hard fought victory. I wish him well.

I am submitting for the RECORD two excellent articles on Mr. Cerezo and the election process from yesterday's New York Times, so that my colleagues may become better acquainted with the new Guatemalan President and his nation.

[From the New York Times, Dec. 10, 1985]

HE'S POISON TO GENERALS—MARCO VINICIO CEREZO

GUATEMALA, Dec. 9.—Marco Vinicio Cerezo Arévalo, who emerged today as the overwhelming civilian winner of Guatemala's presidential election, carries the hopes of his countrymen as no leader has in more than three decades.

Mr. Cerezo is an independent-minded liberal in a country long dominated by rightist military officers. In an environment of ruthless terror, he has not only survived, but has built the most effective nationwide political organization the country has seen in years.

At least three attempts have been made to kill Mr. Cerezo, all during the Government of Gen. Fernando Romeo Lucas Garcia under whose rule death squads claimed thousands of lives.

In one attack, in January 1980, Mr. Cerezo—the name is pronounced seh-RAY-soh—and his bodyguards fought a 10-minute gun battle with snipers who opened fire as he stepped from his party office. Two people were killed, one of them a luckless pedestrian, and Mr. Cerezo later counted 37 bullet holes in the armored jeep behind which he took cover.

ENEMIES STORM HOTEL

Another assassination attempt came when a large squad of uniformed policemen stormed a hotel where Mr. Cerezo was staying in downtown Guatemala City. The third was a bazooka assault against his father's home, where he was temporarily living. Mr. Cerezo estimates he has lived in 25 different houses in the last five years.

After the first attempt on his life, Mr. Cerezo sent his wife and four children out of the country. They have lived on the outskirts of Washington since 1980.

Political terror during the Lucas Government took the lives of the country's two leading civilian politicians, former Foreign Minister Alberto Fuentes Mohr and Manuel Colom Argueta, a former Mayor of the capital, and many Guatemalans believe that if either had lived Mr. Cerezo might not have reached the presidency.

"That is partly true, since those men were older and more widely known that I was," Mr. Cerezo said recently. "But bear in mind that if Guatemala was a normal country, both of them would have been elected and would have served out their terms by now, and I would probably be running this year in any case."

Although he has been a leading activist in the Christian Democratic Party since his student days, Mr. Cerezo acknowledges that he is not bound by party orthodoxy. Diplomats and others here place him in the party's left wing, and he says he was attracted to the Christian Democrats "in part because they don't have a rigid political doctrine."

As a former secretary of organization for the Christian Democrats, Mr. Cerezo has traveled widely in every region of Guatemala. Although five years ago he was barely known to the public, today he is the key figure in what will inevitably be a slow and torturous trek toward democracy.

Mr. Cerezo was born in the capital on Dec. 26, 1942. His father, Marco Vinicio Cerezo Sierra, was a lawyer who went on to become a member of the Guatemalan Supreme Court. An uncle, Celso Cerezo, was the youngest member of Guatemala's first freely elected Congress in the 1940's, winning election at the age of 21. A grandfather was a political activist who was poisoned at the age of 36, apparently for opposing the dictator Jorge Ubico, and a great-grandfather was wounded while fighting to overthrow an earlier dictator, Manuel Estrada Cabrera, in 1921.

Guatemala lived through 10 years of democracy between 1944 and 1954, until a coup planned by American officials re-established military rule. At the time, the United States feared the leftward drift of the elected Guatemalan Government.

COUP "A CRUCIAL MOMENT"

Mr. Cerezo said in an interview that the coup, which took place when he was not yet 12 years old, was "a crucial moment in my life."

"I remember sitting in a tree watching the rebel planes fly over," he said. "I thought to myself that this was going to mean very bad times for our family and for Guatemala. That was when I decided it was the right thing to dedicate myself to the cause of democracy."

After the coup, Mr. Cerezo's father was dismissed from his post on the Supreme Court and spent several months in jail.

Mr. Cerezo began his rise to prominence while he was in law school at the University of San Carlos here. At one protest demonstration he attended, a female law student, Raquel Blandon, burned a copy of a controversial electoral law in front of the National Palace. As police moved in, Mr. Cerezo helped rescue her. They became friends and were married in 1965.

According to Mr. Cerezo's associates, his wife is a brilliant thinkers, eclipsing Mr. Cerezo himself. Enemies say she is a leftist who strongly influences her husband.

When one of Mr. Cerezo's friends asked him recently what he would do on his first day in office, he replied with a broad smile, "Celebrate!" But he remains acutely aware of the dangers he faces as a civilian trying to alter the course of his country's history while archconservative businessmen, large landowners and military officers strive to maintain the status quo. He has carried a pistol for years, and says he will wear it throughout his presidency.

"The only way they are going to get me out of the palace is to carry me out dead," he said.

CENTRIST WINS BIG IN GUATEMALA VOTE

GUATEMALA, Dec. 9.—The Christian Democratic leader, Marco Vinicio Cerezo Arevalo, swept to election today as Guatemala's first civilian president in 15 years.

Final results announced by the Supreme Electoral Tribunal gave Mr. Cerezo 68 percent of the valid votes to 32 percent for his opponent, Jorge Carpio Nicolle of the National Union of the Center.

Mr. Cerezo was officially reported to have polled 1,133,517 votes, more than any other candidate in Guatemalan history. An estimated 73 percent of eligible voters went to the polls.

In an extraordinary scene, Mr. Carpio congratulated Mr. Cerezo and offered to work with him "for the good of Guatemala."

Guatemala's last three presidential elections have been won by military officers amid rancor and charges of electoral fraud. But today, Mr. Carpio asserted, "Guatemala has found its way."

AN END TO THE PAST

"What is important is that we have put an end to a past we could no longer continue," Mr. Carpio said. "We have to end violence in Guatemala."

Alfonso Cabrera Hidalgo, a close associate of Mr. Cerezo's who is Secretary General of the Christian Democrats, appeared on national television as the results became clear to appeal to Guatemalans to "give us a hand" in the coming months. He said the country has suffered "a deterioration of our moral values" in past years.

Unemployment and poverty are widespread, wealth is highly concentrated, and tens of thousands of families have been affected by political violence that has continued for more than 30 years.

Opposition leaders have been the most publicized victims of political terror in Guatemala, but they are hardly the most numerous. Thousands were trade union activ-

ists, liberal businessmen and students and faculty from the University of San Carlos.

In the countryside, Government troops are engaged in a counterinsurgency campaign that has taken many thousands of lives since it began a quarter of a century ago. Human rights groups have alleged that the army has been responsible for massacres in many Indian villages, and since military rule began in 1954, Guatemala has been portrayed in some quarters as one of the Western world's worst human rights violators.

A FREE ELECTION

The departing military Government, however, favored no candidate in Sunday's election and allowed a free hand to the Supreme Electoral Tribunal, which was selected by a committee of Bar Association leaders and law school deans. The chief of state, Gen. Oscar Mejia Victores, has pledged to support the transition to civilian rule.

"We must congratulate General Victores for keeping his word and respecting the will of the people," Mr. Cerezo said.

European and American election observers also praised the fairness of the election and predicted that foreign aid for Guatemala would increase after Mr. Cerezo takes office next month.

A leading Christian Democratic spokesman, Luis Martínez Montt, said today that the new Government's task would be "to reconstruct what others have destroyed."

RIVALS STAND TOGETHER

Mr. Carpio, the new opposition leader, said his party would maintain "a constructive, vigorous and critical opposition" to the new Christian Democratic Government.

"We will applaud when you are right and criticize when you make mistakes," he said. "God save Guatemala, and may Guatemala be beginning a period of a series of democratic regimes."

Mr. Cerezo, standing at his side, beamed and nodded his head while listening to his rival's statements.

"At this moment, I am extremely proud of the democratic leaders of Guatemala," Mr. Cerezo told the emotional crowd at the headquarters of the Supreme Electoral Tribunal. "We are forgetting the competition and beginning to work for the good of Guatemala."

THE 94TH TACTICAL AIRLIFT WING

HON. GEORGE (BUDDY) DARDEN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. DARDEN. Mr. Speaker, I would like to bring to the attention of my colleagues the achievements of the outstanding flying team of the 94th Tactical Airlift Wing, U.S. Air Force Reserve, at Dobbins Air Force Base, GA.

This reserve wing won overall team honors in the super bowl of international military airlift—the 1985 Volant Rodeo competition at Pope Air Force Base, NC. The event featured 33 airlift teams, including U.S. Air Force units from all over the world, U.S. Air Force Reserve and Air National Guard units, and teams from several other nations, including West Germany, Italy, Canada, Australia, Portugal, and Brazil. These units were selected to take part in Volant Rodeo competition after demonstrating their outstanding abilities at local competitions.

Brig. Gen. William W. Basnett, commander of the 94th Tactical Airlift Wing, informs me that this is the first time a Reserve unit has won the Volant Rodeo in its 7-year history.

The 94th Tactical Airlift Wing scored 6,229 of a possible 7,040 points. The team was consistent in placing in the top positions of each category and won the overall competition by 1.5 points.

Aircrews were tested on three low-level routes, precise time-over-target, air drops of personnel, heavy equipment and container delivery system. Maintenance was evaluated three times each day on aircraft preflight and aircraft refueling techniques.

The strength of the maintenance program was a major contributor to the unit's success in the Volant Rodeo, as it contributed 1,693 of the 1,700 points available.

Additional contest evaluations included short-field landings, engine running on and off-load joint airdrop inspection, and security police action.

The 94th Tactical Airlift Wing's winning team included Lt. Col. Edwin B. Jelks III, team chief; Maj. Tom R. Brown, aircraft commander; Maj. Chuck M. Burch, pilot; Capt. Norman S. Bell, Jr., navigator; M. Sgt. Raymond J. Parsons, flight engineer; T. Sgt. Perry A. Deaton and S. Sgt. Blaine L. Bermel, loadmasters.

Sr. M. Sgt. Edward J. Hamrich and T. Sgt. Thomas M. Lynch served as the joint airdrop inspection team, while the engine running on/off load crew was comprised of T. Sgt. Robert L. Cone, T. Sgt. Joe L. Albertson, T. Sgt. David W. Freeman and M. Sgt. Walter Langford.

Maintenance squadron personnel included Maj. Clair D. Repple, team chief; M. Sgt. James E. McMichen, organizational maintenance; M. Sgt. Jimmie Stanton, crew chief of aircraft No. 630; M. Sgt. Willis F. Micheal, organizational maintenance; M. Sgt. Homer R. Baird, environmental shop; T. Sgt. Wendell W. Womack, hydraulic shop; T. Sgt. Michael C. Thomas, electric shop; T. Sgt. James P. Bailey, propeller shop; T. Sgt. John W. Dorton, jet engine shop; and T. Sgt. Lawrence D. Rhadans, navigator/doppler systems.

The 94th Tactical Airlift Wing, by the way, is one of the largest wings in the Air Force Reserve, with about 4,000 reservists assigned to its units in Georgia, Alabama, Florida, and Ohio. The 94th is the first Reserve unit to receive new C-130H aircraft direct from the factory. In its 36-year history, the 94th has flown a variety of aircraft, including the B-26, C-119, C-124 and C-7.

Our Nation's ability to react swiftly and decisively in an emergency depends on the readiness of units such as the 94th Tactical Airlift Wing and on the skills demonstrated by that unit in the Volant Rodeo. I am sure my colleagues join me in congratulating General Basnett and the other outstanding men and women of this unit on their superior contribution to our military readiness.

THE U.S. CONSTITUTION WAS NEVER COLORBLIND

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. EDWARDS of California. Mr. Speaker, in its continuing efforts to dismantle our Nation's cherished civil rights laws and reverse the progress we have made over the past 20 years, the Reagan administration argues that our Constitution was intended to be strictly colorblind. To consider race when fashioning remedies for historic discrimination perverts this principle, Attorney General Edwin Meese III and Assistant Attorney General Wm. Bradford Reynolds claim.

Recently, Benjamin L. Hooks, executive director of the NAACP, forcefully rebutted this misguided interpretation of the Constitution. Our Constitution has never been strictly colorblind, Hooks said, and to claim so ignores the history of our Nation. The administration's argument for colorblindness serves to conceal its true intent, to turn the civil rights clock back 20 years, to a time when racial discrimination was an accepted part of our society. Mr. Speaker, Mr. Hooks' letter provides valuable insight for all our colleagues, and I am pleased to share it here today.

[From the New York Times, Nov. 27, 1985]

To the Editor: A crisis of historic proportions confronts the civil rights movement at this very moment. President Reagan has before him a proposal to negate one of the most important civil rights measures enacted since the Emancipation Proclamation.

I refer to the executive order signed by President Lyndon Johnson in 1965 which mandated that Federal contractors promote the hiring and advancement of blacks, Hispanics and women in reasonable proportion to their numbers in each local labor market. For 20 years, each Administration, under Presidents Nixon, Ford and Carter, has carried out that policy with significant results—results that have enabled hundreds of thousands of minorities and women to enter the labor market and move up the ladder.

Now the right-wing Neanderthals led by Attorney General Meese and his cohort, Brad Reynolds, and buttressed by such arch-conservatives as Pat Buchanan and Clarence Pendleton, are pressing the President to sign a new order which would reverse those two decades of progress in the workplace. Standing against these latter-day Bilbos and Eastlands are numbers of decent Republicans, including Senate majority leader Robert Dole, Labor Secretary Bill Brock and House Republican leader Robert Michel, as well as many other leaders and Congressmen from both parties. Many national business associations, including the National Association of Manufacturers, are also opposed to this retrogressive proposal which seeks to wipe out affirmative action "once and for all times."

The two premises of the Meese-Reynolds-Pendleton axis are that racial and sexual discrimination no longer exist in America and that the intent of the Founding Fathers was that the Constitution be colorblind. In respect to the latter, the "superpa-

triots" appear to be totally ignorant of our own history.

The Constitution was never color-blind: indeed, it legitimized slavery in half the nation and counted each black slave as only three-fifths of a human being for census purposes. Many of the framers of the Constitution were themselves slaveholders. It was not until 1870, with the ratification of the 13th, 14th and 15th Amendments, that the historic oppression and injustice of slavery was reserved in principle by the Constitution.

The 14th Amendment, rather than ignoring race, set out to rectify the wrongs of the past in order to benefit black Americans. Except for the brief period of Reconstruction, all informed Americans know that blacks suffered for the next hundred years as second-class citizens, deprived of most rights and subject to lynchings, beatings and constant fear. We all know too that real change began to take effect only 20 years ago—too short a time period to undo three centuries of slavery and segregation.

This brings us to the other "big lie" being foisted upon us by the right-wing clique pressing the President to sign the new order: that America is "now free from racial discrimination." One need only look around to perceive the total absurdity of this premise. More than half of black Americans endure lives of desperation and deprivation. Doors only recently opened are being slammed shut by these newly empowered bigots who desire to "return to the good old days" when society was run totally by and for white males at the expense of everyone else.

The President postponed this crucial policy decision until after the summit meeting with the Soviet leaders. We have a short time to marshal the forces of decency and fairness in America to persuade the President that he should not—indeed, must not—agree to this proposed new policy which would turn the clock back and cause grave suffering for millions of Americans already handicapped by so many decades of bigotry and injustice.

It is our fervent hope that Americans who still believe in the goals of integration and equal opportunity will make known to the White House their opposition to the proposed changes. We hope also that leaders in New York City—including those in public life, religion, trade unions, business and the professions—will convey their opposition to the President.

Too many decent Americans of every race and gender have fought and sacrificed too much to permit such a shameful retreat. The struggle before us is, quite literally, for America's soul.—Benjamin L. Hooks.

NATIONAL GROUND WATER CONTAMINATION RESEARCH ACT

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GEJDENSON. Mr. Speaker, I am very proud to be introducing today, along with 22 other Members of Congress, the National Ground Water Contamination Research Act. This is landmark legislation that will help give us the answers we need to solve the problem of toxic contamination of ground water. This bill will expand the U.S. Geological Survey's [USGS] research effort to determine how much ground water is contaminated in the United States, and how that contamination occurs.

Toxic contamination of ground water is one of the most serious and complicated environmental problems facing the Nation. Ground water contamination has been detected in every State. In my home State of Connecticut, over 1,000 water wells have been closed because of contamination. Approximately one-half of the people in the United States depend on ground water for their drinking water supply. We must act swiftly before even more contamination of ground water occurs.

Despite the seriousness of the ground water contamination problem only minimal resources are currently being devoted to ground water research. Fundamental questions about ground water remain unanswered. No one knows how much ground water is contaminated. How toxic substances move through ground water is also still largely a mystery. We must have answers to these and other questions before we are able to solve the ground water contamination problem.

The National Ground Water Contamination Research Act directs USGS to expand its Toxic Substances Hydrology Program. A major goal of this program is to increase understanding of the movement of toxic substances through ground water. The bill also requires USGS to determine how much ground water is contaminated in the United States. In addition, the bill provides matching Federal funds to the States, and State water resources institutes to conduct their own ground water research and monitoring.

Industry, environmentalists, agricultural organizations, the States, and local governments all agree that an expansion of ground water research is needed now. The National Ground Water Contamination Research Act will provide us with the information we need to begin to solve the problem of ground water contamination.

JEFFREY JONES AND DIAMOND WIN NATIONAL HONOR

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. SHELBY. Mr. Speaker, I would like to pay tribute to Jeffrey Jones and his dog, Diamond of Selma, AL, who recently won Purina Dog Chow's "Search for the Great American Dog Contest."

Following is an article written by Alvin Benn of the Advertiser that I would like to share with my colleagues in the House of Representatives:

Selma's Jeffery Jones and his dog, Diamond, took the $25,000 top prize Tuesday when they were selected winners of Purina Dog Chow's "Search for the Great American Dog Contest."

"He's the best American dog in the world," the 7-year-old boy said after the announcement was made at a New York City hotel.

Jeffery and Diamond, a 4-year-old Corgi, were picked from five finalists and became the second consecutive Alabama team to win the national honor.

Anne Zachry of Lanett and her dog, Buddy, won in 1984.

In addition to the $25,000 top prize, Jeffery and Diamond will appear on eight million bags of Purina Dog Chow in 1986 and receive a year's supply of the product.

They also will be seen Thursday on national television during the annual Macy's Thanksgiving Day Parade in New York City.

Jeffery and Diamond will be accompanied by "Hill Street Blues" co-star Betty Thomas on the Purina float.

"We were just thrilled to death when they announced our names," the boy's mother, Cherry Jones, said during a telephone interview. "We were hoping to win, but had no idea it would be us."

About 30,000 voters throughout the country cast ballots for their favorites by calling specified telephone numbers.

Purina spokeswoman Katy Bollard said Jeffery and Diamond received about 7,000 in a close contest. She would not release the totals received by other teams.

Mrs. Jones said some of the $25,000 will be used to buy gifts for Jeffery, but most of it will be invested to pay for his college education.

Jeffery said he has a few things in mind. "I want a four-wheeler, toys and a pool table," he said.

Mrs. Jones said they plan to buy a bone for Diamond, "who let out a couple of barks when it was announced they had won."

The Jones family has been on a three-week whirlwind campaign throughout Alabama to raise telephone votes.

Mrs. Jones has taken her son for interviews on television and radio stations in Montgomery and Birmingham, and several newspaper articles have been written about them.

Gov. George C. Wallace added his support this past Friday when he said he would vote for the pair and encouraged other Alabamians to do the same.

Selma Mayor Joe Smitherman, who welcome Jeffery and Diamond to a City Council meeting two weeks ago, saluted the two Tuesday after learning of their victory.

"It's one of the greatest things to happen to Selma lately," he said. "It's getting us national publicity and Jeffery is very deserving."

I am proud to share this story with my colleagues. Purina has selected an outstanding duo for this honor. I certainly wish Jeffery and Diamond all the best in their future endeavors.

HUMAN RIGHTS DAY

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. FASCELL. Mr. Speaker, yesterday marked the 37th anniversary of the adoption by the U.N. General Assembly of the Universal Declaration of Human Rights. This historical document established standards by which civilized nations agreed to

treat their citizenry. The universal declaration is an international bill of rights for all mankind. In the long struggle to promote respect for human rights and fundamental freedoms, the Universal Declaration of Human Rights stands out as a splendid pioneering effort whose importance is reaffirmed annually. In recognition of the significance of this agreement, December 10 is commemorated around the world as "Human Rights Day."

It is therefore particularly fitting, Mr. Speaker, that the good news about events in Argentina, a country that has suffered more than its share of human rights abuses, reached us yesterday. On December 9, a civilian court in Buenos Aires convicted and sentenced an ex-President, army Gen. Jorge Videla, and junta member Adm. Emilio Massera to life imprisonment for their role in the so-called secret war of the 1970's and early 1980's on left-wing guerrillas in which at least 9,000 Argentines disappeard. Three other ex-junta members were also convicted and received jail terms ranging from 4½ to 17 years.

This judgment marks the first time in recent history that Latin American military rulers have been held accountable and sentenced by a civilian court for serious crimes. It also marks the end of a tragic chapter in Argentine history. The Congress should be most heartened to see the civilian government of President Raul Alfonsin bringing to justice the perpetrators of such heinous human rights abuses against the Argentine people. And it is gratifying that such action occurred on the eve of Human Rights Day. Let us hope that this welcome development is the start of a trend toward respect for human rights that will spread throughout Latin America.

DEMOCRACY WORKS IN ARGENTINA

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GARCIA. Mr. Speaker, both the Washington Post and the New York Times ran editorials today on the trials of former military leaders in Argentina. As the Times editorial states, this marks the "return of justice and self-respect to Argentina." The Post echoes this sentiment by saying that, "Argentina's democracy is providing a memorable demonstration of moral courage and strength."

I have little to add to those accolades except that I totally agree with them. President Alfonsin and the people of Argentina deserve our praise and support.

I am submitting the editorials for my colleague's perusal.

[From the New York Times, Dec. 11, 1985]

JUSTICE REBORN IN ARGENTINA

Formal justice played little role in Jorge Videla's dictatorship in Argentina. Those who offended his regime were abducted, tortured or murdered. In the new Argentina of President Raúl Alfonsin, justice is back. After a fair trial, Mr. Videla, along with Adm. Emilio Massera, was sentenced to spend the rest of his life in prison. Three other military collaborators drew lesser sentences.

During a seven-year dictatorship, General Videla and his military accomplices demoralized and bankrupted Argentina. Then, the army that had fought a dirty war against its own population launched a foolish war against Britain that ended in humiliating defeat. Mr. Alfonsin, the elected civilian successor to three military juntas, boldly ordered those junta leaders to trial for sowing "terror, pain and death throughout Argentine society."

That was a remarkably brave step. Even in retreat, the military apparatus of conspiracy and repression frightened the country. Of all the elected Presidents since World War II, the army had permitted only the ex-soldier Juan Perón to complete a full term. And he too was overthrown before completing his second mandate. When Mr. Alfonsin assumed office two years ago this week, the structures of military power were intact. In similar situations, other democrats have equated survival with deference to the generals.

Mr. Alfonsin understood that democracy would have to be audacious to survive. When military courts stalled the junta trials, they were transferred to civilian jurisdiction. He moved boldly on other fronts as well, challenging the unelected and antidemocratic labor bosses of the Peronist opposition and applying successful shock treatment to an economy previously thought incurable.

There have been some wobbles, too, including a 45-day state of siege that ended this week. And more tests lie ahead in the four remaining years of Mr. Alfonsin's term: further trials and appeals and a second-stage economic strategy among them. Still, those practical challenges seem more manageable because of what underlies the sentencing of Mr. Videla and four of his military collaborators: the return of justice and self-respect to Argentina.

[From the Washington Post, Dec. 11, 1985]

VERDICT ON THE JUNTA

The Argentine court's verdict is a ringing assertion of the rule of law and the standards of public morality. It found five defendants guilty of crimes committed when they were running the country and sentenced two of them, including a former president of the country, to life imprisonment. The acquittal of four other defendants is generating further controversy in Argentina; in seven years, from 1976 to 1983, some 9,000 people disappeared, most of them murdered in military prisons. But the court showed discrimination in assessing the evidence against each of these men as individuals, and the salutary influence of this example of justice will reach far beyond Argentina.

The generals and admirals claimed, by way of defending themselves, that they were saving the country from communism and from revolution at the hands of urban guerrillas and subversives. The urban guerrillas and subversives were not a figment of the generals' imagination. They killed dozens of people in the early and middle 1970s. And they succeeded in bringing revolution of a sort to Argentina—one that carried to power their enemies in the military, who embarked on a hysterical and vengeful campaign against not only radical gunmen but, as time passed, against almost anyone who held any opinion that the generals and admirals took to be unorthodox. To defend even the most rudimentary concept of civil rights brought a person into dire jeopardy. The junta thought of all opposition as communism, and to stamp it out they engaged in endless brutality, torture and murder. Among the great achievements of this long trial is a full and accurate public record of all that happened.

One of the enduring inanities of politics is the assertion that, whatever its defects in principle, authoritarian government is at least strong and efficient. Is it? In Argentina, over seven years, the junta mindlessly ran down a national economy that is potentially one of the world's richest. It rolled up the gigantic foreign debts with which the country is now struggling. It spent lavishly on its own armed forces and started a war in the Falklands in which it was rapidly defeated.

In heartening contrast, there is the current democratic government under President Alfonsin. It has led the country into a series of necessary but drastic economic reforms of a sort that the junta always dodged on grounds that they would be unpopular. The current government has now given its predecessors a fair trial with scrupulous regard to its own high standards of justice; under the junta's standards, all of these men would have been shot in a barracks basement without so much as a magistrate's hearing. Argentina's democracy is providing a memorable demonstration of moral courage and strength.

HUMAN RIGHTS DENIED FAMILY

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. ARCHER. Mr. Speaker, Remos Aizenshtein and his family applied for visas in the summer of 1979. They became refuseniks several months later. Highly trained, Remos graduated from the Kharkov Polytechnical Institute as a turbine engineer. He used his skills on the job until 1968 when he switched to another automated field. From 1974 until 1979, he had a good position in the Institute of Automatic Control Systems for the gas industry. However, this ended shortly after he requested permission to emigrate. Remos lost his job and subsequently could only find employment as a lathe operator, then construction worker, and currently as an elevator technician.

His wife, Nina, also worked as a mechanical engineer in the chemical industry. She lost her position on applying as well, but she has not been able to find employment since.

Their son, Alexander, studied mathematics but became a musician. He now leads a vocal ensemble. His wife, Galia, is a construction engineer.

Their daughter, Irina, also studied music. After applying for visas, she had to leave the Ural Conservatory of Music where she was enrolled in the school for graduate studies. At the present time, she works as a music teacher in a nursery school.

This is a highly respectable close-knit family who feel they have already made

substantial contributions to Soviet society in the form of devotion and conscientiousness in their various jobs. Moreover, both Remos' father and Nina's father died in the service of their country in World War II. Friends and family feel the Aizenshteins have earned their freedom and the right to emigrate. We must remember this family and the many more that are denied their human rights.

RESIDENTIAL MORTGAGE BONDS

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. BLILEY. Mr. Speaker, I rise today to comment upon certain provisions of the Ways and Means Committee's tax bill that would have a highly negative impact on the young families and low-income residents as well as on the economic activity of the Commonwealth of Virginia.

Specifically, I am quite concerned with the extremely complicated provisions dealing with residential and multifamily mortgage bonds which would cause great harm to the tens of thousands of low and moderate-income Virginians who rely on the privately provided proceeds of these bonds for homeownership opportunities or for safe, sanitary, and decent rental housing. Also, I am convinced that the important amount of jobs, tax revenues, and economic activity generated by these bonds would be greatly diminished by this portion of the committee's proposal.

These housing bonds provide financing for about half of all houses purchased by young Virginians and for most moderate and lower priced apartments in Virginia. According to conservative estimates, the volume cap proposed by the Ways and Means Committee could cut in half the production of this low and moderate housing in the very first year. A realistic cap for housing—and one that is separate from industrial development bonds—is essential if Virginia is to continue to raise the private funds needed to produce this housing.

Further, I feel that this vital and well monitored and controlled private-public housing partnership should be subject to the same sunset provisions that the Committee seeks to extend to activities supported by bonds issued by other Government instrumentalities. Why must we be forced to revisit this issue every few years?

Last, any legislation, and especially any as important as this, should have an effective date that coincides with its enactment date. The December 31, 1985, effective date that Ways and Means recommends for its housing proposal would, in my opinion, effectively stop the sale of all housing bonds as of January 1, 1986.

As these mortgage bonds already have served well over 75,000 families and generated over $3 billion in taxable economic activity in Virginia, I strongly urge that consideration be given to altering the Ways and Means Committee's plan so as to increase the fairness of its proposals affecting lower and moderate income homebuyers and apartment renters.

NATIONAL STEEL IMPORT STABILIZATION PROGRAM

HON. JIM CHAPMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. CHAPMAN. Mr. Speaker, 1 year ago when the President put in place a National Steel Import Stabilization Program, he did so because foreign steel producers had captured more than 26 percent of our total domestic steel market—and a great deal of that steel had been subsidized and dumped on our shores by our foreign trading partners.

The negative effects of this unfairly traded steel have impacted our country. In the past decade, shipments by domestic steel producers have dramatically declined, operating capacity at mills has been drastically cut and hundreds of thousands of jobs have been lost or relocated off our shores.

Clearly we had a great need for the President's Steel Program. It was a program aimed at limiting the amount of steel imported into the United States for 5 years, in order to give our domestic steel industry the breathing space it needed to get its steelmaking house in order. But as much as I supported this program, I cannot now sit back and pretend it is doing the job. It is not.

In October 1985, 1 year after the program began, figures published by the U.S. Trade Representatives showed that the foreign steel import penetration rate reached a record level of 30 percent—4 percent more than the import penetration rate when the National Steel Program went into effect, and 11.5 percent more than the program's target.

Clearly, this program as implemented has not controlled the surge in steel imports which we experienced in 1984.

Mr. Speaker, in October, I introduced a bill, H.R. 3459, that follows in the President's footsteps of restraining steel imports in order to give our domestic steel industry the chance to get back on its feet. Notice I said restrain, not eliminate. My bill will not stop a fair trading country from exporting steel into the United States. It will instead, establish a policy whereby each nation that is not now covered by a voluntary restraint agreement will be subject to a mandatory restraint based on 70 percent of the amount of steel it exported into the United States during the period from October 1983 to October 1984.

What my bill will do is slow the crippling rate of subsidized steel coming into America, and allow our domestic industry a chance to compete on a level playing field.

Our national security, the steel industry, and millions of Americans deserve no less than swift, effective action on the part of the President and the Congress.

THE U.N. FINALLY SPEAKS OUT AGAINST TERRORISM: A HOPEFUL SIGN

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. BROOMFIELD. Mr. Speaker, rarely do I have the opportunity to praise the United Nations for a particular action. I want to commend that body, however, for its recent antiterrorist resolution. This is an encouraging first step in the international fight against mindless terrorism.

Yesterday, the United Nations General Assembly approved by consensus a resolution that condemned terrorist acts as criminal. For the first time, that international body has taken a firm stand against terrorism.

Over the years, little progress has been made at the U.N. on the subject of terrorism. There was unending debate over the definition of terrorism and the feasibility of taking international action against that international problem. Many nations represented at the U.N. have in the past tried to justify terrorism by saying that it was an expression of frustration on the part of those who struggled for self-determination.

Recent terrorist events have changed the thinking of many. With the rapid spread and the increasingly violent nature of terrorism, over 70 nations have been directly affected. Thousands have been killed or wounded. All nations now realize how vulnerable they are to the marauding terrorist bands who often take the lives of the innocent with glee.

No nation is now exempt from the increasingly professional and suicidal operations of state-sponsored international terrorists.

The bloody terrorist incidents of recent months have shown the world that there is no possible justification for taking the lives of innocent human beings. The people of the world now realize that terrorists are international criminals, not heroes engaged in a romantic struggle. They are international brigands who should be prosecuted to the maximum extent of the law. No country should grant them sanctuary.

The nations of the world now realize that international cooperation is imperative in order to stop the increasing violence of terrorism. In the recent Foreign Assistance authorization bill, Congress called for more international cooperation in the battle against terrorism. The legislation calls upon the administration to establish an International Coordinating Committee on Terrorism. The group would be a permanent forum for promoting international cooperation in this important international effort. Given the changing attitudes at the U.N. and around the world toward the terrorism question, I strongly encourage the administration to move ahead and establish this badly needed International Coordinating Committee.

With these concerns in mind, I commend the following Washington Times article on the U.N. resolution condemning terrorism to my colleagues in the Congress.

[From the Washington Times, Dec. 10, 1985]

U.N. OK's ANTITERROR RESOLUTION—ITS FIRST

(By Narayan Keshavan)

NEW YORK.—The U.N. General Assembly yesterday approved by consensus a resolution that condemned terrorist acts as "criminal"—the first time the world body has unequivocally passed such a resolution condemning terrorism.

The resolution was hailed by U.S. Ambassador to the United Nations Vernon A. Walters, who said it was "a symbol of new times."

"Every country has felt this in its flesh," Gen. Walters said.

The U.N. text loosely defined terrorism as "acts . . . in all its forms which endanger or take innocent lives, jeopardize fundamental freedoms and seriously impair the dignity of human beings."

Yesterday's vote in the General Assembly came after the assembly's legal committee on Friday overwhelmingly approved it by a vote of 118 to 1, with Cuba voting against it.

A Western diplomat, speaking privately after yesterday's vote, said he understood other members of the 101-member Non-Aligned Movement had been furious with Cuba, which apparently found its isolation in committees "not so splendid."

After the assembly adopted the anti-terrorism resolution yesterday, there was a sharp exchange of words between the Israeli delegate and other Middle Eastern representatives.

Israeli Ambassador Benjamin Netanyahu charged that terrorists have continued to murder people "because for years they have gotten away with murder."

"Some of the states that voted for the resolution are the worst offenders," Mr. Netanyahu said. "They don't prosecute terrorist, they defend them. They don't prevent hijackings, they encourage them. They don't extradite terrorists, they give them villas and cash bonuses."

Mr. Netanyahu deplored the attempt to legitimize terrorism by linking it to "a struggle for self-determination."

Israel had abstained on the voting in the committee because the resolution referred to self-determination. However, Israel yesterday joined other member nations in unanimously approving the resolution.

The resolution's preamble reaffirms the "inalienable right to self-determination and independence of all peoples under colonial and racist regimes and other forms of alien domination" and upholds "the legitimacy of their struggle, in particular the struggle of national liberation movements."

However, the paragraph says the struggle must be "in accordance with the purposes and principles of the [U.N.] Charter."

Zehdi Labib Terzi, the observer from the Palestine Liberation Organization, praised the resolution and claimed that his organization was against terrorism. He then urged the international community to force Israel to halt "its terrorist activity against the people in the occupied territories."

It was "ironic," as one Western diplomat put it, to hear Iran, Syria, Libya, the PLO and Iraq—all at one time or another suspected of backing terrorism—speak out against acts of terror.

Israel's Mr. Netanyahu stated that he could not but chuckle when hearing statements from delegates of those nations who are "pioneers of terrorism."

INTRODUCTION OF A BILL TO REQUIRE SENATE CONFIRMATION OF THE COMMISSIONER OF THE FOOD AND DRUG ADMINISTRATION

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. WAXMAN. Mr. Speaker, I am today introducing a bill, H.R. 3909, that would require Senate confirmation of the Commissioner of the Food and Drug Administration. This is a long overdue measure that I hope my colleagues will be quick to support.

The head of every major Federal health and safety agency is currently subject to Presidential appointment and Senate confirmation with one and only one exception: FDA. This includes the heads of the Federal Aviation Administration [FAA], the Environmental Protection Agency [EPA], the Occupational Health and Safety Administration [OSHA], the National Highway Traffic Safety Administration [NHTSA], the Consumer Product Safety Commission [CPSC], and the Nuclear Regulatory Commission [NRC].

Senate confirmation is required at these agencies whether they are independent or within larger executive departments. In fact, at the independent agencies, confirmation is required of all commissioners, not just the chairman.

Nor is Senate confirmation a function of size or authority. The FDA is larger both in budget and staff than agencies like the CPSC and the NRC and its premarket approval authority renders it far more powerful than agencies like NHTSA or OSHA.

Moreover, other Government bodies involved in health usually are staffed by appointees who must undergo Senate confirmation. For example, both the Surgeon General and the Director of the National Institutes of Health require such confirmation.

In short, there is no good reason to exempt the FDA Commissioner from accountability to the Congress. I urge my colleagues to support this bill.

PERSONAL EXPLANATION

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. DANNEMEYER. Mr. Speaker, due to a longstanding commitment in California, I was not available for the session on Monday, December 9, 1985, and subsequently missed four noncontroversial votes. Had I been present for that session I would have voted "aye" on the following four bills:

House Concurrent Resolution 239, to commend the Governments of Ireland and United Kingdom for reaching an agreement on a peaceful solution for Northern Ireland;

H.R. 3773, the Stevenson-Wydler Act amendments relating to the transfer of technology;

H.R. 1083, the low-level radioactive waste amendments to ensure a certain amount of disposal capacity for radioactive waste generators and to clarify Federal and State responsibilities for this waste management; and

H.R. 1538, the amendments to veterans health care to authorize a 3.4-percent cost-of-living adjustment in disability and indemnity compensation retroactive to December 1, 1985.

MIGUEL PULIDO AND FAMILY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. DORNAN of California. Mr. Speaker, Miguel Pulido came to the United States from his native country of Mexico in 1960. He came seeking a better life. In the following year, 1961, he brought his wife Maria Soledad, and his children, Miguel Jr., Jose, Luis, and his sole daughter Marisol, to join him in his adopted country. His wife passed away in 1975.

Miguel Pulido began his employment in the United States as a farm worker. He then progressed to the position of a journeyman mechanic. As an employee of the Ace Muffler Shop in the city of Santa Ana, CA, he impressed his employer so much that he offered to sell him the business. After purchasing the business and the property, he developed a highly successful business with the unity and hard work of all his family. During this period all his children managed to receive a college education.

Miguel Pulido and his family are prime examples of outstanding citizens. They have accomplished this through their religious faith and their involvement in all phases of their community.

This prime example of American success and the free enterprise system culminated Thursday morning, November 21, 1985, at the Los Angeles Convention Center, when Miguel Pulido and his family were sworn in as new American citizens. Another American dream has come true.

DEAN BUTTERFIELD

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GOODLING. Mr. Speaker, often the accomplishments of certain behind-the-

scenes, hard-working individuals are overlooked in this large Nation of ours. It happens in business, in society in general, and of course it also happens in Government.

In this one instance, however, I would like to make sure the hard work, dedication, and perserverance of a single Government employee is not overlooked. This one man, Mr. Dean Butterfield, will retire effective December 15, after 30 years of Government service, most recently as coproduction Director at the Army Material Command at Rock Island, IL.

One company in my district summarized Mr. Butterfield's work:

He was the key to every action not just the big ones; not just the small ones; his cooperation was worthy of emulation. Where our interest diverged, he pursued the Government's interest with dedication and tenacity. The conflicting interests were most always adjusted without combat.

I would hope his is a model that every Government employee will emulate. I thank him for his effort and hard work and I wish him a healthy and relaxing retirement.

KINGDOM OF MOROCCO OVERCOMING ECONOMIC DIFFICULTIES

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. SILJANDER. Mr. Speaker, the Government of the Kingdom of Morocco is currently engaged in a difficult struggle, the outcome of which could determine the stability and prosperity of that country, indeed the entire North African region, for years to come.

I am not referring to military conflict, but rather to Morocco's courageous effort to pull itself out from under the tremendous debt burden which it is currently carrying.

In light of the human tragedies which exist everywhere in the Third World today, where many governments cannot even feed their people, much less provide an adequate economic structure in which they can prosper, it is heartening to watch Morocco's progress as it struggles to implement the painful economic reform measures necessary to put its economy back on track.

Morocco began its reform program over 2 years ago, before the United States had really focused on the problems of debt and declining economic growth in the Third World. It is slowly overcoming the serious difficulties that slowed its economy during the early 1980's, and now prospects for its future look increasingly bright.

The reform package instituted by His Majesty, King Hassan's government, has gradually moved the country away from a protectionist orientation to a relatively open market economy. Measures such as tighter controls on domestic spending, a more flexible exchange rate and deregulation of the financial sector have all contributed to bringing the economy under control. The Moroccan Government has also enthusiastically supported greater private sector participation in the economy and has begun steps to dismantle the burdensome public sector. The United States Commerce Department states that if these steps are continued and combined with progress on debt arrears to its international lenders, Morocco will have set in place the foundation for healthy and sustained economic growth.

Mr. Speaker, this would be a tremendous achievement on the part of Morocco, and one which I believe deserves the fullest support and encouragement of the United States. Both the Congress and the administration have been pushing structural economic reform as an answer to the economic ills of the Third World, particularly in Africa, where natural disaster and misdirected government policies have had such horrendous results. Morocco is following our advice and making progress in achieving economic recovery; moreover, it is setting an important example for other developing countries to follow.

We are all aware of the longstanding ties between this country and the Kingdom of Morocco. Not only is it one of our oldest friends—in fact, the first to recognize (de facto) the new United States of America—it also continues to provide the United States with valuable support and cooperation internationally.

The military cooperation and base access agreements which we have with Morocco are important to the defense of NATO as well as contingency planning for Africa and the Middle East. Not only military, but diplomatic, cooperation with Morroco has continued throughout the years, despite occasional differences on how to handle certain problems, such as Colonel Qadhafi.

Mr. Speaker, I wish to congratulate the Kingdom of Morroco and the government of His Majesty King Hassan II for their courage in confronting the difficult problems of economic reform, and to thank them for their long record of friendship and service to the people of the United States. We do not, perhaps, acknowledge as often as we should the contribution made to United States national security by such old and longstanding friends as Morocco, but the fact is that the people of the United States do appreciate that contribution greatly. We thank the Government and people of Morroco, and for my part, I would encourage the United States Government to consider carefully if it is doing all it can to help Morroco in its efforts to achieve economic recovery and prosperity for its people.

LANE EVANS: VVA LEGISLATOR OF THE YEAR

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. BONIOR of Michigan. Mr. Speaker, it is my honor to congratulate Congressman LANE EVANS on being named "National Legislator of the Year" by the Vietnam Veterans of America.

Since coming to Congress in 1982, LANE EVANS has been an instrumental figure in Vietnam veteran legislation. During his first term in Congress, LANE EVANS authorized legislation to extend the highly successful Vet Center storefront counseling program, which the Reagan administration had targeted for elimination. LANE's distinguished efforts resulted in a 4-year extension of the program, and the opening of 52 new centers nationwide.

As chairman of the Vietnam Veterans in Congress, LANE has made judicial review of VA decisions a top priority. LANE is also leading efforts to resolve the high unemployment levels among Vietnam veterans and strongly supported the successful extension of the Emergency Veterans Job Training Program.

I am glad to see that LANE EVANS has been recognized for his outstanding leadership and dedication by the Vietnam Veterans of America.

HONDURAN ELECTIONS SHOW VALUE OF DEMOCRACY

HON. MICHAEL A. ANDREWS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. ANDREWS. Mr. Speaker, 3 weeks ago, my distinguished colleague from Connecticut, NANCY JOHNSON, and I led a Presidentially appointed delegation of official observers to Honduras, where we viewed the second democratic election in that country's recent history. Although Honduras was ruled by a military government from 1972 to 1981, our experiences among the citizens of Honduras showed us the enduring nature of democracy.

As my colleagues know, Honduras is one of the poorest nations in Central America. With a population of about 4.3 million people, it is approximately the size of Ohio in geographical area. Bordering both Nicaragua and El Salvador, Honduras is important strategically to the United States. It is the seventh largest recipient of United States foreign aid, and ranks second, behind only India, in the number of Peace Corps volunteers working within it.

Because the November 24 election marked the first time one civilian government would turn over power to another since the military takeover, many delegations from across the globe joined our group in observing the election. In addition to myself and Representative JOHNSON, our delegation included Representative LOUIS (WOODY) JENKINS of Louisiana, chairman of Friends of the Americas: Hon. Richard T. McCormack, U.S. Permanent Representative to the Organization of American States; Hon. Raymond F. Burghardt, Special Assistant to the President and Senior Director for Latin American Affairs, National Security Council; Dr. Susan Kaufman Purcell, director of the Latin Ameri-

can Program, Council on Foreign Relations; Diego R. Suarez, president, Inter-American Transport Equipment Co. (Vanguard); William C. Doherty, Jr., executive director, American Institute for Free Labor Development; Lynn Bouchey, president, Council for Inter-American Security; Dr. Georges Fauriol, senior fellow and director, Latin American Programs, Center for Strategic and International Studies; Diana D. Denman, vice chairman, Republican Party of Texas; and Jasper Hawkins, Hawkins & Linsey Architects. This bipartisan group of Americans deserves special commendation for their public service.

Throughout the day of the voting, our group worked in small teams to observe the balloting at dozens of locations. Although the electoral system is confusing by our standards, the people of Honduras were obviously very committed to the democratic process. Over 80 percent of the population turned out to vote, a phenomenal turnout compared to that in most American elections. Many peasants and farm workers walked several miles across dusty roads to the polling places, then stood in line for 2 or 3 hours to cast their ballots.

What our delegation observed in Honduras is an extremely promising sign of progress for democracy in our hemisphere. While it was not particularly issue-oriented, the election was highly competitive and marked by great enthusiasm and commitment. Like its neighbors El Salvador and Guatemala, the fragile democracy of Honduras is prospering, and it is the people's determination that is encouraging its growth.

There is still much to be done in Central America. The future policies of Honduras, as well as that nation's internal politics, will affect the United States for years to come. As we in Congress consider the needs of this important region, we must bear in mind two important questions. Is it important that democracy flourish in a small, undeveloped nation like Honduras? Is their stability really important to the security of the United States? I believe that the answer to both of these questions is a strong and unequivocal yes.

WAYS AND MEANS TAX BILL DOES NOT CONTAIN COMPROMISE ON DEDUCTIBILITY OF STATE AND LOCAL TAXES

HON. F. JAMES SENSENBRENNER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. SENSENBRENNER. Mr. Speaker, I'm glad to see that my colleagues agree with me that the Ways and Means tax package, H.R. 3838, needs further review, as evidenced by the rule vote today. What has been heralded as the "saved" deductibility of State and local taxes is not what it seems. I want to underscore that H.R. 3838 does contain a compromise on the deductibility of State and local taxes.

This bill gives everyone a $2,000 personal exemption, while at the same time it requires all itemizers to reduce their deductions by $500 for each personal exemption. In other words, those who itemize State and local taxes as part of their deductions, must give back $500 of their deduction for each family member. For example, a family of four would have to give back $2,000 of personal exemptions.

In essence, this is the same as allowing only a partial deduction for State and local taxes. In fact, the National Association on State Budget Officers estimates that "we may lose as many as 40 percent of those who itemize. There will be a much smaller number of people itemizing and benefiting by deductions." The end result is a shift of the tax burden from those taxpayers who take a standard deduction to those who itemize. For example, in my home State of Wisconsin, a working couple with two dependents earning $30,000 per year and itemizing, would experience a tax increase of 2.6 percent. On the other hand, a similar nonitemizing couple would experience a windfall decrease in their tax liability of 22.8 percent. (See attached chart 1.)

Of course these figures vary with the State and various income brackets. In addition, this plan could encourage flight to the Sun Belt States. For example, a two-wage earner couple in Milwaukee, WI, earning $100,000 per year would pay $1,162 more under the Ways and Means plan. While the same couple living in Memphis, TN, would pay only $395 more per year. (See attached chart 2.)

In conclusion, I urge my colleagues to further examine what impact any new tax plan would have on the deductibility of State and local taxes, as well as how it would affect their constituents who itemize.

CHART I.—WISCONSIN RESIDENTS—ANNUAL INCOME OF $30,000

	Current	Ways and Means
Single-no dependents, itemizers	$3,937	$3,981 (+1.1 percent), paying $44 more in taxes.
Single-no dependents, standard deduction.	5,467	$5,119 (−8.5 percent), paying $468 less in taxes.
2 earner/no dependents, 65 percent/35 percent income split itemizers.	2,796	$2,895 (+3.5 percent), paying $99 more in taxes.
2 earner/no dependents, 65 percent/35 percent split standard deduction.	3,782	$3,199 (−15.4 percent), paying $583 less in taxes.
2 earner/2 dependents, itemizers	2,173	$2,229 (+2.6 percent), paying $56 more in taxes.
2 earner/2 dependents, standard deduction.	3,081	$2,379 (−22.8 percent), paying $702 less in taxes.

Source: Wisconsin Department of Revenue.

CHART II.—HOW A 2-EARNER COUPLE, EARNING $100,000 A YEAR, WOULD FARE UNDER THE WAYS AND MEANS TAX PLAN

	Current law (49 percent bracket)	Ways and Means (38 percent bracket)
Milwaukee, WI (population 621,000).	$5,388	$6,550—tax increase of $1,162.
New York (population 7,860,000).	6,211	$7,549—tax increase of $1,338.
Newark, NJ (population 646,000).	3,208	$3,899—tax increase of $691.
Charlotte, NC (population 632,000).	3,008	$4,264—tax increase of $1,256.
Atlanta, GA (population 428,000)	3,344	$4,065—tax increase of $721.

CHART II.—HOW A 2-EARNER COUPLE, EARNING $100,000 A YEAR, WOULD FARE UNDER THE WAYS AND MEANS TAX PLAN—Continued

	Current law (49 percent bracket)	Ways and Means (38 percent bracket)
Memphis, TN (population 324,000).	1,830	$2,225—tax increase of $395.

TIME FOR DEMOCRACY IN PANAMA

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. FASCELL. Mr. Speaker, despite continuing conflicts in the region, the past 2 years have been an exciting and promising time for democracy in Central America. Elections have been held, new governments have been installed, and democratic institutions—however fragile—have begun to function. Until recently, Nicaragua was the only exception to this generally encouraging pattern. Unfortunately, another country has not taken a step back from democracy: Panama.

On September 27, the President of Panama, Nicolas Ardito Barletta, was forced out of office by the Panamanian military. This "coup" followed the assassination of Dr. Hugo Spadafora, a well-known Panamanian in whose death the military was alleged to be implicated, and which President Barletta had pleged to investigate. Panama is now being governed by its fifth President in 3 years, the previous Presidents having also been forced out by the military under various guises, such as "diplomatic illness."

This repeated interference by the military in the political development of Panama is extremely troubling. As President Barletta notes, "national stability based only on a strong military influential or determinant in Government affairs is no stability." I believe it is time for the military to return to their constitutional role, and to let the Panamanian people determine their country's future through the democratic process.

The United States has substantial security interests in Panama. However, we also have a strong interest in the development of democratic institutions in that country, and in efforts to safeguard human rights. We have tried to support the restoration of democracy through a variety of means, including an assistance program which grew fivefold between fiscal year 1983 and fiscal year 1985. However, I believe that the recent events in Panama are a cause for reflection on the nature of United States policy toward that country, and on the need to search for new ways to encourage effective democracy and respect for human rights in Panama.

THE ENDURING FRIENDSHIP BETWEEN ISRAEL AND THE UNITED STATES

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GARCIA. Mr. Speaker, the Pollard spy case has cast a shadow over United States-Israeli relations, but as Kenneth Bialkin states today in his article in the New York Times, it is by no means cause for alarm.

While leaders on both sides of the alliance are concerned about Mr. Pollard's activities, I remain convinced that our Nations' friendship will weather the storm. Mr. Bialkin clearly and accurately describes the situation. I am submitting his essay for the RECORD and ask that my colleagues take a moment to read his thoughtful assessment of the situation.

[From the New York Times, Dec. 11, 1985]

AFTER THE ISRAELI SPY CASE

(By Kenneth J. Bialkin)

The arrest of Jonathan Jay Pollard, an American Government employee charged with selling unauthorized information to Israel, was a sobering and unpleasant event. Israel's American friends are sorry and even angry about what happened. Our support for Israel and its people will not change. Our belief in Israel's essential mission and our pride in its achievements are not diminished, but Israel must not test that support by actions that may harm the United States.

Israel has apologized to the United States and has said that it is a violation of Israel's policy to engage in espionage in the United States. Jerusalem has stated its intention to investigate the breach of its policies, punish those who engaged in unauthorized conduct, terminate the unit involved in the activity and provide assistance to American investigators. The United States has accepted this apology and indicated that the friendship and mutual cooperation of the two allies will continue.

This is just as it should be. The two countries' fundamental relationships must remain intact. Their national and geopolitical objectives have not changed. Now, as before there is no reason for conflict. Our common commitment to freedom and democratic values as well as our common resistance to terrorism, fundamentalist authoritarianism and the spread of Soviet hegemony provide a solid basis for the true friendship and moral support that each extends to the other. Israel can expect its extensive economic and military aid from the United States to continue, and the United States will continue to benefit from Israel's sharing of military and scientific intelligence.

Nevertheless, Israel's many American friends remain confused and shaken by recent events. They wonder why Israel would risk harming its relationships in the United States and are hopeful that Israel's leaders fully appreciate the importance of not permitting this kind of activity to be repeated.

Every nation has legitimate needs for intelligence—as much as it can get—and Israel has particularly pressing needs because it is a small nation surrounded by peoples who wish it harm. But even such need does not justify resorting to illegal and illegitimate conduct against a main friend. Actions that compromise United States security are simply not acceptable.

Unfortunately, there will be those who will use this episode for their own purposes—to undermine support for Israel and challenge American Jews. But the good sense of the American people must not be diverted by such efforts.

American Jews do not believe that their support for Israel and Zionism is in any way inconsistent with their commitment to America—and it is not.

Jews are second to none in their commitment to American society. After centuries of persecution in Europe and elsewhere, here in America they participate in the democratic process on an equal basis and enjoy a freedom and prosperity that was denied to them in many other lands. They have fought and died in all our wars. Thousands of Jews serve in the United States Government, including in the most trusted and sensitive services. Only the mischievous or the anti-Semitic would doubt that the loyalty and dedication of American Jews match that of other Americans.

What can be done to preserve good feeling between the two countries? The bruise will heal, but slowly and not without setbacks. The criminal-justice process remains to be served, and it may in itself produce strains involving the rights of defendants, prospective defendants and witnesses. Israel's willingness to permit American law enforcement personnel to meet with its intelligence operatives to determine the nature and extent of their activities in this case is without precedent and is a further effort to make amends.

Both Israel and the United States are trying to handle the case with mutual good will and patience. The leaders on both sides have so far shown admirable restraint and understanding, and they must continue to do so. Only that way can they hope to protect both their national interests and the traditional friendship of their countries.

SOUTH AFRICA

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. SILJANDER. Mr. Speaker, although events in South Africa have moved off the front pages of our newspapers, what is going on there remains of extreme importance to the people of the United States. We should never forget that this country has important strategic interests in southern Africa. Beyond that, there are questions of the human rights of all residents of the region, and how those rights are best to be protected.

It seems uncontestable to me, Mr. Speaker, that substantial progress is being made in South Africa. However much we may dislike the institution of apartheid, and however disagreeable may be the tone of voice of official South African spokesmen, it is really irrefutable that enormous changes are taking place in that troubled land. The question is, How best can this progress of change be encouraged and nourished?

My own view is that encouragement is the proper course, rather than threats. I am pleased to call your attention today to similar sentiments expressed by a member of the British Parliament, the Honorable Julian Amery. In discussing the improvements in South Africa, Mr. Amery concludes that the United States policy of constructive engagement "* * * has greatly encouraged President Botha's internal reforms and rolled back Soviet influence in Mozambique and Angola."

I agree with Mr. Amery's analysis, and insert his entire essay, from the London Daily Telegraph of November 7, at this point in the RECORD.

[From the Daily Telegraph, Nov. 7, 1985]

HOW THE CITY COULD SOLVE SOUTH AFRICA'S PROBLEMS

(By Julian Amery)

South Africa looks to be a major political issue in the new session of Parliament. Strong emotions and British interests are involved. Where does the Government's duty lie?

It has a clear responsibility towards British investors in South Africa, British traders with South Africa, British manufacturers dependent on South African raw materials, and towards the wider British public which benefits from the taxes paid by them.

It has a responsibility to keep the Cape route open and to see that Soviet penetration into southern Africa is contained and, if possible, rolled back.

Beyond that it has a special responsibility to the two million English-speaking South Africans. At least a million of them have the right of abode in Britain.

Hitherto, the South African régime has discharged these responsibilities for us. It has provided stability, a private enterprise economy and a pro-Western external policy. Can it continue to do so?

In recent years, deep changes have been taking place in South Africa which could threaten that régime's existence.

Economic expansion has led to the steady rise in material and cultural standards of the blacks. There has grown up an élite of doctors, dentists, teachers, clergymen, skilled workers, managers and businessmen. Increased opportunities have bred increased expectations and this has led to a demand for political rights. Some have achieved these as ministers or officials in the autonomous or independent "homelands" or as councillors in local government. But there are still no political rights at national level.

Meanwhile, all South Africa's neighbours have become independent black-ruled states: Mozambique, Angola, Zimbabwe, the three former British Protectorates, and the four independent "homelands". These together are major trading partners for the republic. A good relationship with them could offer great opportunities. Nevertheless, Soviet penetration of Angola and Mozambique and of the African National Congress and South West Africa Peoples Organisation movements also present a serious political threat.

President Botha, when Minister of Defence, was for 12 years responsible for external and internal security. The job taught him the urgent need to defuse the growing pressures at home and abroad and to prevent them combining against the white régime. The need to do business with neighbouring black leaders led him to scrap much of the "petty apartheid". To retain it would

have been as offensive to his black visitors as to the rising South African black élite.

More serious reforms followed. Black and multi-racial trade unions were legalised. The Immorality Act was repealed. Africans were enabled to buy long leases of their urban homes. Job reservation was virtually abolished. Blacks could open business premises in white areas. Black municipal authorities were set up in the black townships. All this is a far cry from Dr. Verwoed's vision.

But Botha's decisive reform was to bring the coloured and Asian communities—some four million—into the political process and to appoint their representatives to the Cabinet. This abandoned the principal of white supremacy. It also split the Nationalist party and won substantial English-speaking support for the Government.

The exclusion of the blacks from this reform naturally fuelled their resentment. But what put a match to the fire were indications that the President was exploring with moderate black leaders, ways of bringing the blacks into the political process through some federal or confederal system—which would end white domination but perpetuate white leadership. This, the radical black and coloured leaders were determined to resist at all cost. The economic recession and heavy unemployment enabled them to launch a campaign of violence in the townships. Thanks to communist organising techniques and the encouragement given by anti-apartheid movements, especially in the United States, this still continues. Although ostensibly an anti-apartheid campaign it is, in practise, as much a social as a racial confrontation. Black and coloured revolutionaries are fighting black and coloured moderates. Black and Asian property are their main targets.

As Chief Buthelezi has explained none of this amounts to a revolution. The current agitation will be repressed but the question remains: is it possible to devise a stable South African society, pro-Western and based on free enterprise, but which would give the blacks a genuine share in the political process on terms acceptable to the other communities?

Only the South Africans themselves can realize this ideal but the British stake in South Africa is so great that we have a right to try and help them find it.

The South African business community, closely linked to London, has traditionally held "progressive" views and maintained contact with non-white leaders of all kinds, moderate and extreme. But it has kept and been kept out of political power. Has the time come when it should seek to participate more actively in government? This could be uncomfortable. It is easier to talk "progress" from the boardroom than to sit round the Cabinet table and decide what to do next week.

And if it did come forward, would President Botha and the Afrikaaner Nationalist caucus accept it as a full partner? There are good reasons why they should. Greater business participation would give renewed confidence to the City and to Wall Street and so strengthen the rand. It might help promote a constructive dialogue with moderate black leaders. Not least it could rally English-speaking support for the Government in the constituencies.

British business could help in the process. Could the British Government?

Mrs. Thatcher has, rightly, set her face against economic sanctions. They could only encourage the hardliners, black and white. But in the interests of European and Commonwealth solidarity she has agreed, reluctantly, to what she herself has called "tiny, very tiny" gestures of disapproval.

Is it not time now to turn over the page and drop the stick in favour of the carrot?

Instead of discussing punitive measures, should we not explore with the South African leaders what further reforms they could risk which would justify us in lifting existing sanctions? The Gleneagles agreement on sport? The ineffective oil embargo? Eventually even the arms embargo?

Above all, should we not join more openly with the United States administration in the policy of "constructive engagement." Far from failing, that policy has greatly encouraged President Botha's internal reforms and rolled back Soviet influence in Mozambique and Angola. President Reagan was right to remind Congress that "the Soviets are waiting in the wings." It would be a tragedy if we allowed our increasingly irrelevant differences with South Africa to divert our attention and energies from the central issue in the world.

NATIONAL FALLEN FIREFIGHTERS MEMORIAL

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GOODLING. Mr. Speaker, my colleagues and their constituents should take note of a memorial only 2 hours from Washington which celebrates the brave men and women who are often unknown and unsung heros to everyone small town and big city in our Nation: our local firefighters. On October 14, 1981, the people of the United States dedicated a monument at the National Emergency Training Center in Emmitsburg, MD, known as the National Fallen Firefighters Memorial.

This monument pays tribute to America's firefighters, who have been the bulwark of the Nation's civil defense effort since the founding days of our country. Throughout our history, patriotic Americans have risked their lives to defend their communities against fire and disasters. Therefore, it is only fitting to remember those who have given their lives unselfishly in service to their fellow man.

Annually, tribute is paid to those fighters who have fallen in the past year. Most recently, on October 13, 1985, over 500 individuals gathered with 30 families of the deceased present at this special occasion. In all, 117 new names were added to the list of those who have been commemorated at the memorial.

The National Fallen Firefighters Memorial is an established tribute to those who have served their fellow citizens well. These men and women have given their lives so that others may live. This testimonial to their dedication should be a common visiting stop for us all.

BERTHA GILKEY: ADVOCATE FOR PUBLIC HOUSING RESIDENTS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. STOKES. Mr. Speaker, I would like to take this opportunity to share with my colleagues some information about Ms. Bertha Gilkey and the leadership and motivation she has provided for thousands of public housing residents. Ms. Gilkey is often called the "angel of public housing" because of her expertise at helping public housing tenants manage their property. She is an advocate for tenant rights and an inspiration to many public housing tenants.

For several years, Ms. Gilkey has worked with public housing tenant groups across the Nation. Her primary objective has been to help these resident groups secure contracts from city and county agencies to manage their own properties. Her philosophy is that tenant groups are better suited than city and county bureaucracies to identify and satisfy the needs of public housing residents.

Recently, Ms. Gilkey came to Cleveland and worked with the tenants of the Lakeview Terrace Estates to achieve this goal. As a result of her inspiration and assistance, the tenants of this public housing development just signed a contract to manage their own property and to establish innovative programs which will meet their needs.

Cleveland is one of several cities in which Ms. Gilkey has worked with tenant groups to ensure a better living environment. Because of her, the tenants of the Lakeview Terrace Estates in Cleveland are enthusiastic about the future for their public housing development.

Mr. Speaker, at this time, I would like to insert in the RECORD an article which appeared in the Cleveland Plain Dealer on Ms. Bertha Gilkey.

[From the Cleveland Plain Dealer, Nov. 11, 1985]

TENANTS' PATRON LED BATTLE

PUBLIC HOUSING FOR AND BY PEOPLE BEGINS IN CLEVELAND

(By Maxine L. Lynch)

Bertha Gilkey is a human spark plug.

Gilkey, 36, called "the angel of public housing" and "the mother of tenant management" by public-housing residents, has almost single-handedly ignited many thousands of America's 4,000,000 public-housing tenants into freeing themselves from what some view as bureacratic slavery: the inability of public-housing tenants to control their living conditions.

The broad-shouldered, 5-foot-6, 129-pound woman has walked commandingly into federal housing agencies in Cleveland; New York; Chicago; Jersey City, N.J.; Louisville, Ky.; and St. Louis to fight for tenant rights.

Her message is that public-housing residents, with the proper training and resources, can care for themselves better than bureaucracies.

Her personality—a combination of a fiery temper, enthusiasm, persistence, will power,

guts and shrewdness—has helped her conquer housing agencies' resistance to tenant management, and to instill a sense of dignity and pride in tenants.

Without Gilkey, Ohio's first tenant-management contract, signed last week by the Cuyahoga Metropolitan Housing Authority and tenants at CMHA's Lakeview Terrace Estates, would not exist, said Lena Jackson, president of the Lakeview Terrace Resident Management Firm.

CMHA was approached by Lakeview residents about the possibility of tenant management almost two years ago, not long after Lakeview residents heard Gilkey tell them tenant management could help remove some of the moral and physical indignities public-housing tenants suffer daily.

Through tenant management, residents can rid their estates of drug pushers, vandals and thieves, she said.

"Public-housing tenants can take control of their lives. That means by management and by getting involved in each and every program that . . . provides services for them," Gilkey said.

Gilkey's firm, Urban Women Inc., will comanage the estate with the Lakeview residents.

The plans Gilkey has for making Lakeview an exemplary development run by tenants reflect her zeal for initiating new ideas and enterprises.

"We just don't want folks to think we are going to collect rent and evict people," Gilkey said. "Our goal is to combine good management with social programs to make our community a whole community and to provide a better quality of life for residents at Lakeview."

The first task Gilkey and the seven-member tenant-management board at Lakeview face is security. In addition to having a paid security staff, they will train tenants as monitors to watch the lobby of each building at all times. They are to take a 120-hour peace officer training course at Case Western Reserve University.

Gilkey wants to set up a child-care center. "We have a lot of young mothers who want to go back to school, or work, but they don't have day care," Gilkey said. She said she planned to set up a day-care center for children 6 weeks to 6 years old.

She said she was working to get a curriculum established at Cuyahoga Community College so members of Lakeview's management firm can obtain two-year degrees in property management.

"We will also be looking at ways to encourage residents to set up their own business," she said.

Gilkey's success as a public-housing consultant is due partly to her being a second-generation public-housing tenant.

She is the second of 15 children. Her mother grew up in Cochran Gardens, a St. Louis public-housing estate, where Gilkey helped in the formation of one of the first tenant-management firms in the country.

"I don't look at public housing as a temporary place (for poor people) to live," she said. "It has become our home, our neighborhood, and that is why I do what I do. My mother grew up in Cochran. I grew up in Cochran, and my children have grown up in Cochran."

She has two children, Yvette, 18, and Antione, 17.

Gilkey got involved in fighting for better services for public-housing tenants by volunteering as a building captain at her estate.

By the time she was 18, she had participated in a rent strike. At 27, Gilkey has become president of the Cochran resident council and had won the fight to wrest the 797-unit housing complex from the St. Louis public-housing agency.

During the mid-70s, when the U.S. Department of Housing and Urban Development became committed to the concept of tenant management, they looked at Gilkey's tenant-management firm as the model for at least a half-dozen such firms that received $14 million in HUD funds.

Gilkey learned to be tough.

While negotiating the contract with CMHA, she could be blunt; her remarks would often be cutting and cold.

"We have a lot of people receiving huge salaries who are not producing or delivering any service for the residents in public housing," she once told residents at Lakeview. "That is what I call poverty pimps.

"We've got to get the poverty pimps out of public housing."

Gilkey has developed a worldwide reputation as an expert in tenant management. She has conducted tenant-training workshops in England and Israel and is about to go to Sweden and Holland to conduct similar workshops. She recently returned from a trip to Budapest.

Last summer, she went to Nairobi, Kenya, where she conducted as workshop on tenant management from the perspective of a feminist who has grown up in public housing. The audience was made up of 2,100 women from all over the world, who were attending the United Nation's Womens Conference.

Gilkey said she earns about $6,000 a year, after expenses, from her consulting. "I will never be a rich consultant," she said.

Gilkey has won many honors, but she said her greatest reward has been her work.

"It is my goal to educate and train tenants all over the country and all over the world to take control of their own destiny and their own lives," Gilkey said.

A SALUTE TO THE MOTHER'S BAND AND SHOW

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. FAUNTROY. Mr. Speaker, I want to bring to the attention of my colleagues, the Mother's Band and Show, a musical family who has touched the lives of many people here in the Washington metropolitan area.

A firm believer that the family that plays together stays together, Mrs. Betty Green is the organizer, leader, and bass player for the band. Three of her children are in the band, two daughters Robin and Vonnye, and her son Spencer. The remaining band members are well-known musicians: Greg Boyer on trumpet, Ed Anderson on drums, Rich Williams on guitar, Horace Brock on keyboards, Lloyd Pinchback on saxophone, and vocalists Tye Campbell and Willie Jolley.

Founded in May 1977, the Mother's Band and Show has played over 300 benefit shows including performances for the District of Columbia Police Department, the Lorton Reformatory, Boys Village, Old Soldiers Home, Job Corps, the Edgemead Correction Center for Boys, and the Youth World Community.

The gift of music which this family willingly gives to senior citizens, the sick and shut-in, and those incarcerated is not without sacrifice. Mrs. Green and her husband have remained committed to keeping their family together and spreading the message of love through song.

The Mother's Band and Show is a family affair and audiences of all ages are inspired by their music. I extend to each member of the band my sincere best wishes for continued success.

ESPIONAGE PREVENTION ACT OF 1985

HON. ED ZSCHAU

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. ZSCHAU. Mr. Speaker, this year, 1985, has been the year of the spy. In the past few months we have had an unprecedented number of arrests for espionage. While we can take some comfort in the fact that so many spies are being caught, there is much more we must do to protect our Nation's secrets.

For this reason, I am introducing today H.R. 3910 that would make it more difficult for Soviet bloc intelligence agents to gain access to American secrets. This legislation would do so in two ways.

First, it would place the same travel restrictions on the diplomats of Soviet satellite countries in the United States as currently apply to diplomats from the Soviet Union. Diplomats of the Soviet Union are prevented from traveling more than 25 miles from their mission without permission of the State Department. Further, they are prohibited from entering certain areas that are critical to national security such as Silicon Valley in my congressional district. This bill would place these travel restrictions on diplomatic personnel and their families from East Germany, Bulgaria, Poland, Hungary, Romania, Czechoslovakia, Mongolia, Cuba, and Vietnam.

Restricting the travel of Soviet bloc diplomats in the United States is necessary because so many Soviet bloc intelligence agents operate in this country under diplomatic cover. Moreover, as FBI Director William Webster recently testified in the other body, there is full cooperation between the Soviet intelligence services and the intelligence services of its satellite countries.

An example of this complicity is the case of James Harper, Jr., who is now serving a life sentence for illegally collecting secrets from Silicon Valley defense firms and passing them to Polish spies. The secrets he sold were passed directly to the Soviet KGB. In fact, Yuriy Andropov, who was director of the KGB at the time, gave commendations to the Polish intelligence officers who got the information. This case clearly demonstrates that it is necessary to restrict the activity of diplomat-spies from Soviet satellite countries as well as their Soviet spymasters.

Ladislav Bittman, who defected from the Czechoslovakian intelligence service in 1968, testified before the Senate Permanent Subcommitte on Investigations that—

The satellite services . . . are mainly directed and exploited by the KGB. Soviet intelligence is informed of every major aspect of their activities; the Russian advisors (called liaison officers), influence the planning of major operations and assess the results. No important decision is made without them.

This bill, in addition, would authorize the Secretary of State to apply travel restrictions to members of trade delegations visiting the United States. Many of these trade delegations from Soviet bloc countries include spies that are sent to collect information on American technology. Although all of this information cannot be protected, we should at least have some way of limiting access by restricting the travel of these delegations.

This legislation is similar to the bipartisan bill that was recently introduced by Senators ROTH and NUNN. I urge my colleagues to join with me in supporting this important measure. The text of the bill follows:

H.R. 3910

A bill to amend title II of the State Department Basic Authorities Act of 1956 to impose the same restrictions and conditions on foreign missions of Soviet Bloc countries as are imposed on the foreign mission of the Soviet Union

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TRAVEL RESTRICTIONS ON THE MEMBERS OF FOREIGN MISSIONS OF SOVIET BLOC COUNTRIES.

Title II of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4301 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 215. TRAVEL RESTRICTIONS ON THE MEMBERS OF FOREIGN MISSIONS OF SOVIET BLOC COUNTRIES.

"(a) IMPOSITION.—The Secretary of State shall impose on the members (and the family of such members) of the foreign mission of a Soviet Bloc country the terms, limitations, restrictions, and conditions which are essentially equivalent to those imposed pursuant to this title on the members (and the family of such members) of the foreign mission of the Soviet Union.

"(b) WAIVER.—The Secretary may waive subsection (a) in specific cirumstances if the Secretary determines that to do so is in the national interests of the United States. The Secretary shall report each waiver of subsection (a) to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate not later than 10 days after such waiver is granted.

"(c) REPORTS.—(1) Not later than 30 days after the date of the enactment of this section, the Secretary shall submit a report on the plans of the Secretary for implementing this section, and not later than six months after the date of the enactment of this section, the Secretary shall submit a report on the actions taken to implement such plans.

"(2) The reports referred to in paragraph (1) shall be submitted to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate.

"(d) DEFINITIONS.—For the purposes of this section—

"(1) the term 'family' means the members of the family of a member of a foreign mission described in paragraph (3) who form part of the household of that member if they are not nationals or permanent resident aliens of the United States;

"(2) the term 'members of the foreign mission' means—

"(A) the head of a foreign mission and the members of the diplomatic staff of a foreign mission,

"(B) members of the administrative and technical staff of a foreign mission, and

"(C) members of the service staff of a foreign mission,

as such terms are defined in Article 1 of the Vienna Convention on Diplomatic Relations (23 UST 3227); and

"(3) the term 'Soviet Bloc country' means Bulgaria, Cuba, Czechoslovakia, the German Democratic Republic, Hungary, Mongolia, Poland, Romania, and Vietnam.".

SEC. 2. GOVERNMENT-DIRECTED TRADE ACTIVITIES INCLUDED IN THE DEFINITION OF FOREIGN MISSION.

(a) AMENDMENT OF DEFINITION.—Section 202(a)(4) of Title II of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4302(a)(4)) is amended by inserting "(including government-directed activities involving international trade)" after "governmental activities".

(b) REPORT.—Not later than six months after the date of the enactment of this Act, the Secretary of State shall submit to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate a report describing in detail the restrictions which apply to the foreign missions of government-directed activities involving international trade as a result of the amendment made by subsection (a).

IN THE NAME OF JUSTICE

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GARCIA. Mr. Speaker, I am inserting in the RECORD a memorandum from the Lawyer's Committee for Civil Rights Under Law on the military occupation of Baragwanath Hospital in Soweto, South Africa. This situation was first brought to my attention by the New York State Nurses Association.

The problem with all such tragedies is that there is precious little that we can do to help these people other than expressing our outrage. What we can do, and what I hope this body will do, is to pass even stronger sanctions that will force the South African Government to pay attention to our concerns with apartheid or to suffer the consequences.

As South African writer Nadine Gordimer has said, "sanctions, against all historical evidence, do seem to work in the case of South Africa." For the moment sanctions are our best bet. It is our only leverage.

What we must not do is shrink away from our responsibility to the people of South Africa. We must not hide behind the mantle of plodding, unproductive negotiations. In the case of South Africa, this technique has not worked. Again, to quote Ms. Gordimer:

If you are in search of clarity within yourself as well as in others * * *, where better to test yourself and them than in the thickest murk (of South Africa)?

A new sanctions bill would clarify where we are in that "thickest murk."

I want to thank the New York State Nurse's Association for bringing this matter to my attention.

The memorandum follows:

LAWYERS' COMMITTEE FOR CIVIL RIGHTS UNDER LAW—MEMORANDUM

Re The Military Occupation of Baragwanath Hospital, Soweto, South Africa.

From: The Southern Africa Project of the Lawyers' Committee For Civil Rights Under Law.

Date: November 20, 1985.

The Southern Africa Project has received very disturbing information concerning the situation at Baragwanath Hospital in Soweto, near Johannesburg. The hospital has been occupied by members of the South African Defense Force (SADF) and the South African Police (SAP). With a 3,000 bed capacity, Baragwanath is the largest hospital in Sub-Saharan Africa, and serves a black population of nearly two million in the Johannesburg area. The following information came to the Southern Africa Project by telephone from the World Council of Churches in Geneva, Switzerland. The Council had been contacted on Monday, November 18, by members of the medical staff at Baragwanath Hospital and were told that:

On Monday, November 18, 942 nurses and over 1,000 non-classified [service] workers were dismissed;

Prior to their dismissal, both groups had attempted to negotiate with the Superintendant of that hospital concerning their grievances. These included the complaint by the non-classified workers that they had not had a pay raise since 1973 (many of them had worked for the hospital for 15 years at $150 a month);

When both the nurses and service workers tried to organize meetings, the meetings were banned by the South African Police under the State of Emergency regulations;

People at the meetings were beaten up by the police and army, some of them badly;

The army and the police are creating chaos in the hospital by running around fully armed; they were ordering workers at gun-point to resign and patients at gun-point to vacate their beds;

Nurses and patients have been beaten up by the police and the army;

The nurses are seeking a court interdiction to overturn the dismissals. Attorney Ismail Ayob is acting on their behalf and the application is to be heard in the Supreme Court (Witwatersrand Local Division) in Johannesburg; and

Complete press censorship has been imposed, with the declaration of Baragwanath Hospital as an "operational area". In violating this censorship order, the staff members who contacted the Council in Geneva were placing themselves at considerable personal risk. They nonetheless urged the Council to widely publicize the situation.

In addition to the above information from the World Council of Churches, the Southern Africa Project has been informed by the

legal representatives of the dismissed nurses that their application will be heard in the Johannesburg court tomorrow afternoon (November 21). The applicants are arguing that the authorities were not in compliance with the Nursing Act in summarily dismissing them. They are seeking to be reinstated by court order. The dismissed nurses constitute the entire trainee nursing staff of Baragwanath hospital. We are further informed that the hospital functions have been cut back to emergency cases only. Baragwanath is the only hospital serving the needs of Johannesburg's black population.

HONORING HELEN SMADES

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. LEHMAN of California. Mr. Speaker, I rise today to pay tribute to a long and dear friend, Helen Smades, who will soon complete her tenure as president of the Fresno County and City Chamber of Commerce. Helen leaves behind her a strong and viable Chamber of Commerce for the Fresno area, one that has made great strides toward promoting both economic and cultural growth in the San Joaquin Valley.

Never one to rest, Helen used her presidency of the chamber to improve and enhance the quality of life in Fresno and the surrounding area. During her tenure she was instrumental in the establishment of the Fresno Visitor's Bureau to encourage tourism in the area. Helen used her organizational skills and business acumen to develop and implement a small business hotline, designed to encourage businesses and business people to look to the Fresno area as a potential site for expansion or creation of new opportunities. She worked hard to broaden the chamber's base through active recruitment of minority business participation and through better outreach to the business community at large. In addition, she strived to make the community more aware of the chamber of commerce itself, and worked to see the chamber become more active in community and regional affairs.

When Helen turns the presidency of the Fresno County and City Chamber of Commerce over to new leaders in January, she will have left for them a more vibrant, active, and aware chamber than that which she inherited. I am proud of the accomplishments my friend Helen Smades has made during her tenure, and look forward to her continued active participation in the growth of the Fresno area for many years to come.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, December 12, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 13

11:00 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
Business meeting, to consider pending private immigration relief bills.
SD-226

DECEMBER 17

9:00 a.m.
Judiciary
To hold oversight hearings on the creation of new bankruptcy judgeships.
SD-226

10:00 a.m.
Labor and Human Resources
To hold hearings on the nominations of Wendell L. Willkie II, of the District of Columbia, to be General Counsel, and Bruce M. Carnes, of Virginia, to be Deputy Under Secretary for Planning, Budget and Evaluation, both of the Department of Education.
SD-430

DECEMBER 18

10:00 a.m.
Foreign Relations
To hold hearings on issues relating to the preparation for the February 1986 Philippine Presidential election.
SD-419

DECEMBER 19

9:30 a.m.
Labor and Human Resources
Aging Subcommittee
To hold hearings to examine the participation of older workers in the Job Training Partnership Act (Public Law 97-300).
SD-628

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
Business meeting, to resume markup of proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

JANUARY 28

9:30 a.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings on regulatory activities of the Office of Management and Budget.
SD-342

CANCELLATIONS

DECEMBER 12

4:00 p.m.
Select on Intelligence
Closed briefing on intelligence matters.
SH-219

HOUSE OF REPRESENTATIVES—*Thursday, December 12, 1985*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

You have commanded, O God, that if we profess to love You we should love our neighbors as well. Help us to appreciate the height and depth of Your creation, the wonders and variety of Your good Earth. Since all life has been given by Your hand, may we see in other people the mark of Your spirit and together form that bond of understanding that better reflects Your purpose in us. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. CHANDLER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. CHANDLER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 274, nays 111, answered "present" 3, not voting 46, as follows:

PRESERVING AUTHORITY OF SUPREME COURT POLICE TO PROVIDE PROTECTIVE SERVICES FOR JUSTICES AND COURT PERSONNEL

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the bill (H.R. 3914) to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. LEHMAN of California). Is there objection to the request of the gentleman from Kansas?

Mr. KINDNESS. Mr. Speaker, reserving the right to object, and I shall

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

51-059 O-87-10 (Pt. 26)

not object, I do so in order to yield to the gentleman from Kansas [Mr. GLICKMAN] so that he may explain the nature of the bill, H.R. 3914.

Mr. GLICKMAN. I thank the gentleman for yielding.

Mr. Speaker, in 1982, the Committee on the Judiciary reported a bill granting the Supreme Court Police authority to provide protective services to the Chief Justice, the Associate Justices, official guests of the Supreme Court and officers and employees of the Court. That bill was enacted as Public Law 97-390. The protective authority provided for in that law will expire on December 29, 1985, and this bill will authorize the Supreme Court to exercise these functions for an additional 3 years. The bill also provides for the continuance of the present statutory requirement that the Court will annually report to the Congress the amount of costs incurred by the Marshal of the Court in carrying out these functions.

The Chief Justice, the Honorable Warren E. Burger, requested the continuation of this authority in a communication dated November 25, 1985. In his letter, the Chief Justice stated that the continuance of this authority is necessitated by the increased need for off-premises protection of Justices and Court employees. At our hearings in 1982 it was pointed out that protection was needed for employees traveling to the Court's parking lot in the evening hours. In our report in 1982, the committee noted that in the previous year an employee was murdered and another robbed within walking distance of the Court grounds in the previous year.

I urge the favorable consideration of the bill.

Mr. KINDNESS. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Michigan [Mr. CONYERS].

Mr. CONYERS. I thank the gentleman for yielding.

Mr. Speaker, I would like to just ask, are the Justices of the Supreme Court afforded personal protection, or is this protection that only applies to them during their working hours at the Supreme Court?

Mr. KINDNESS. If I might respond to the gentleman, the reports rendered by the Marshal of the Court, Mr. Alfred Wong, during the period that this protective service has been available show that in total, for 1983, 1984, and 1985, the miles used for trips involving this protective service amounted to only 2,725 miles, 2,690 miles in 1984 and 1985, none in 1983. So this is really just the localized protection, to and from the airport, and that localized area.

Mr. CONYERS. I thank the gentleman.

If the gentleman will yield further, I am not concerned about the costs of this. I think protecting our Supreme Court members is a rather reasonable function of the Federal Government, but does this apply to them off duty and in their homes? Do they have any protection?

Mr. KINDNESS. I yield to the gentleman from Kansas [Mr. GLICKMAN] to respond to the gentleman's question.

Mr. GLICKMAN. In answer to the gentleman's question, it has not been used that way in the past. It could be used that way on a need basis, if they felt their security were jeopardized.

Mr. CONYERS. I thank the gentleman.

It the gentleman will yield further, the reason I raised this is that the Members may all remember that the Chief Justice of the Supreme Court, when newspapermen visited him at his home one night, had to answer with a revolver, going to the door. That was a little bit unseemly, and I do not like to think of my Chief Justice having to be barricaded in his home on Capitol Hill. If he needs protection or feels the need for protection, which apparently he did, it should be provided by this service, not by his having to carry a revolver, which he may or may not be appropriately licensed for, or anything else. And that is why I raised the question. I hope the gentleman will respond.

Mr. KINDNESS. The gentleman makes a very good point. There may be, from time to time, the perception of the need for this service beyond the Supreme Court Building premises and trips to and from the airport or other means of transportation. However, I think the Supreme Court and the Chief Justice are sensitive to the possibility of severe public criticism if they had protective service beyond that which appears to be reasonably necessary. I think there is a balance in the use of this service that is appropriate, from what I can tell. I would not disagree with the gentleman from Michigan at all, however, about the apparent perception of need for protection at the home premises of the Justices.

Mr. GLICKMAN. If the gentleman will yield further, I would just make one point. I agree with the gentleman. It is clear to me that this bill does provide on a needs basis that kind of personal protection if requested by members of the Court.

Mr. CONYERS. I thank the gentleman from Kansas.

Mr. KINDNESS. Mr. Speaker, I urge the agreement to the unanimous-consent request, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The Clerk read the bill, as follows:

H.R. 3914

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That the Act entitled "An Act relating to the policing of the building and grounds of the Supreme Court of the United States", as approved August 18, 1949 (40 U.S.C. § 13f), and as amended, is further amended by amending section 9(c) of such Act to read as follows:

"(c) The Marshal of the Supreme Court shall report annually to the Congress on March 1 regarding the administrative cost of carrying out his duties under subsection (a)(2). Duties under subsection (a)(2)(A) of this section with respect to an official guest of the Supreme Court in any part of the United States (other than the District of Columbia, Maryland, and Virginia) shall be authorized in writing by the Chief Justice of the United States or an Associate Justice of the Supreme Court, if such duties require the carrying of firearms under subsection (a)(5) of this section. The authority provided under subsection (a)(2) shall expire on December 29, 1988.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TAX REFORM

(Mr. SCHUMER asked and was given permission to address the House for 1 minute.)

Mr. SCHUMER. Mr. President, yesterday the House defeated the rule on the tax reform bill with 14 votes from the other side.

Mr. President, today is our last chance for tax reform. If we do not get reform today, we will not have it next month, next year or within the foreseeable future.

Mr. President, today is our last chance to take 20 million poor people off the tax rolls.

Mr. President, today is our last chance to reduce tax rates on the middle class and restore progressivity to our tax system.

And, Mr. President, today is our last chance to make those wealthy individuals and corporations which paid no tax in the past pay their fair share of taxes in the future.

Mr. President, we in this Chamber have marveled at your ability to pull 50 votes out of thin air for measures far less worthy than this one. You can surely do it now, if you want tax reform.

Mr. President, today is our last chance, and if you want tax reform, you must act now.

OVERESTIMATES IN DEPARTMENT OF DEFENSE

Mr. MONSON. Mr. Speaker, earlier this year, I was shocked to learn that the Secretary of Defense, Caspar Weinberger, had squirreled away $4 billion in the Department of Defense, saving it perhaps for a rainy day. I was even more shocked when a GAO audit

reported that that figure was not $4 billion but it was $41 billion, some of which has now been reprogrammed, but there still remains somewhere in between $13 billion and $23 billion that can be used in offsetting our deficit.

Earlier this week, I introduced legislation that will require all agencies to report the effects of inflation on their budgets. That is what caused the overestimates in the Department of Defense. This will be done on an annual basis and will give us the chance to make the decisions that we need to make concerning our budget so that we can avoid these problems from reoccurring in the future.

I also joined with my fellow CPA and colleague from New York, Congressman DIOGUARDI, to sponsor a bill that will eliminate the ability of the Defense Department to inflate their budget by overestimating the cost of inflation in the future through cost plus inflation budget estimates.

I urge my colleagues to join me in sponsoring this legislation so that we can eliminate these abuses from the budgeting process.

FINANCIAL DISCLOSURE

(Mr. ST GERMAIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ST GERMAIN. Mr. Speaker, the question of appropriate public disclosure for purposes of determining conflict of interest for Members of Congress has been addressed by the Congress. Leaders of one of our national political parties, however, apparently believe that the existing financial disclosure procedure is insufficient. Through an expensive media campaign, the Republican Party is saying that it prefers an alternative disclosure mechanism.

In a bipartisan spirit of cooperation and accommodation, I today have introduced legislation to require all candidates for congressional office to submit for publication in the CONGRESSIONAL RECORD a copy of their most recent Federal income tax form.

I invite all Republican leaders and Members who endorse the teachings of the national Republican Campaign Committee to cosponsor this legislation. Rhode Island voters will be watching and kept informed of their decisions.

Let me further state that my Federal tax returns have been accurately prepared by my accountant. These returns are not being audited or questioned, except for certain deductions related to limited partnership investments made years ago.

Like every other Member of Congress, I have made the appropriate financial desclosure statements required by the House of Representatives. These statements are on file for public inspection in the Rhode Island Secretary of State's office.

If, in the wisdom of the Congress, the American public is not being well served by the present system of disclosure, the legislation I am introducing today provides us with an opportunity for change. Upon its enactment, I shall naturally comply.

PERMISSION FOR COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS TO SIT TODAY DURING 5-MINUTE RULE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that the Committee on Banking, Finance and Urban Affairs be allowed to sit today under the 5-minute rule during proceedings of the House, to mark up H.R. 3667, the Competitive Tied Fund Act, and H.R. 3498, the Competitive Exchange Rate Act of 1985.

The gentleman from Ohio, the Honorable CHALMERS P. WYLIE, the ranking minority member on the Committee on Banking, Finance and Urban Affairs, concurs with this request.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

THE TAX BILL

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, we in this House are elected by the people to render an independent judgment on proposed laws. After 3 months of public and private warnings to the executive branch, we exercised our judgment yesterday and rejected the Ways and Means tax bill. This House found that 1,379-page bill too complex, too confused, too special-interest laden, and too likely to cause a recession in 1986.

The White House Press Office has been suggesting that the President is angry at House Republicans for rejecting this 1,379-page collection of tax changes.

Let me suggest three principles:

First, the House, which has recently suffered through the mistake on taxing interest on savings, the mistake on computing interest on real estate sales, the mistake on contemporaneous travel expense recordkeeping, has learned from these three mistakes to be very cautious about a 1,379-page tax bill.

Second, the House Republicans have been, are and will remain the strongest supporters of President Reagan's values and beliefs. It is our independent judgment that the Ways and Means tax bill fails to meet the President's values and goals.

Third, when the President's strongest allies vote nearly 12 to 1 against a bill being proposed, it would be far wiser to ask how his staff failed to hear our discontent with a bad tax bill. It is the administration's staff, not the House Republican leadership, which has failed to help the President on this occasion.

MILITARY PROCUREMENT REFORM

(Mr. LEVINE of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVINE of California. Mr. Speaker, this year the Congress for the first time enacted some clear legislation in the area of military procurement reform.

One of the provisions of law enacted without dissent by this body was a requirement that the Pentagon provide to the Congress by December 1, 1985, test results on the Bradley infantry fighting vehicle. Those test results were not provided to the Congress on time, but the Pentagon assured us that we would have the information as soon as it was available, that it needed more information, and further assured my staff that Congress would get the information when it was available and that the Pentagon would not go public or to the press until Congress first had the results.

Yet this morning, Mr. Speaker, some of those results were on television, although Congress has still not seen the results that the law requires that the Pentagon provide. This raises serious questions, Mr. Speaker, about the attitude of the Pentagon with regard to procurement reform, the accountability of the Pentagon to Congress, even after meaningful significant procurement reform legislation has been enacted.

□ 1040

LET US NOT RESORT TO THE BLACK MAGIC OF TAX INCREASES

(Mr. GROTBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GROTBERG. Mr. Speaker, I would like to congratulate my distinguished colleagues for their vote on the Gramm-Rudman-Hollings deficit reduction amendment to the debt ceiling bill. Often lost in the shuffle of the debate on the deficit reduction plan was the main purpose of the bill—to raise the debt ceiling above $2 trillion. That is an intolerable, inconceivably high number. It is all too easy to become blinded by the parade of

Zeroes that we so easily discuss while debating the finances of this Nation. We can no longer afford to be so flippant with our spending, and while the effect of the Gramm-Rudman-Hollings plan is leading us down an uncertain and untested road, it was a necessity born of this country's inability to restrain its lust for lavish spending. We have forcibly restrained ourselves for the time being. I hope and pray that when the time comes to meet the targets we have set, we will have the courage to make tough decisions rather than bail ourselves out through the black magic of tax increases.

TOO GOOD AND TOO IMPORTANT TO BE LEFT BEHIND

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, I rise to express my grave disappointment that we were unable yesterday to adopt the rule on the tax reform bill, and that only 14 Members from the other side of the aisle were willing to support their President's No. 1 legislative objective and give the House a chance to consider even their alternative tax bill.

The tax reform bill reported out by the Ways and Means Committee is a good bill. It is genuine tax reform; it does close loopholes used by the wealthy and by corporations to avoid their fair share of taxes; it does make the Tax Code more fair; it will reduce taxes for most Americans.

Mr. Speaker, this bill is too good and too important to be left behind as we rush out of town.

RELIGIOUS LIBERTY

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, at this festive Christmas season, we sometimes forget that this Nation is truly blessed in the freedom we enjoy to express our religious convictions. There are nations, some but a few hundred miles from our southern borders where such freedom is no longer allowed.

Only a few weeks ago, the Catholic primate of Nicaragua, Cardinal Obando, had his new publication, Iglesias, seized by the Communist rulers of his nation. The cardinal had been an arch foe of General Somoza, for his repression of the people.

But the new rulers of Nicaragua follow the party line. Religion, all religion, is dangerous to the Leninist state. They can allow nothing to remind men that they have a value beyond their value to the state.

The blessings of our freedom demand that we go the extra mile and help others achieve the liberty to express their religious convictions without state interference. Christmas is a blessing and a challenge. May we all enjoy the blessing and meet the challenge.

TAX REFORM IS AN IMPORTANT, SUBSTANTIAL IMPROVEMENT

(Mr. FOWLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOWLER. Mr. Speaker, the tax bill reported by the Ways and Means Committee yesterday and endorsed by the President of the United States is a substantial improvement over current law and ought to be welcomed by hard-working Americans across this land.

Passage of it is terribly important; it will not be the end of tax reform. It will not even be the beginning of the end but hopefully, it will be the end of the beginning of a process that began in 1981 where we borrowed to give tax breaks to all Americans, and have seen the deficits grow as a result of it.

Our Nation's fiscal policy demands a comprehensive solution. This bill preserves the progressivity of tax rates; it lowers rates, and it strengthens a minimum tax to ensure that all Americans pay their fair share in our Nation's Tax Code.

I urge the adoption of the bill. It is an important, substantial improvement toward the reform process for all Americans.

PARADOXICAL DAYS

(Mr. SHAW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAW. Mr. Speaker, yesterday will go down as one of the most paradoxical days perhaps in the history of this House. According to the scoreboard, the Democrat rule that was crafted for the passage of the Democrat tax bill went down, and it went down with great support from both parties. Later in the day, a Republican initiative the Gramm-Rudman bill, passed this House, and it did so with Democrats and Republicans joining hands and voting together.

We woke up this morning to find that the scoreboard perhaps was not correct, and I think that the media was very quick to pounce on the fact that the Democrat tax bill that was supported by a Republican President was indeed a defeat for the Republican Party.

I think if you look at the truth, the American people are the ones that lost on the tax bill yesterday and they lost because they would have lost whether the rule passed or did not pass. The American people want a bipartisan tax bill. They do not want a Republican tax bill, and they do not want a Democrat tax bill.

I would call on members of the Ways and Means Committee not to have caucuses in the Democrat Party and the Republican Party to separately draw bills but to get together and make some of the hard decisions and draw a new bill that brings to this House real reform and simplicity. That is what the President wants; that is what the American people want. Let us do it in the House and not in the other body.

WE CAN GET BACK ON THE TRACK AND DO TAX REFORM

(Mrs. KENNELLY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. KENNELLY. Mr. Speaker, yesterday we saw 164 Republicans vote against tax reform. We saw only 14 Republicans able to bring themselves to vote for tax reform. Today, we are told that they wanted to get the attention of the President. Well, let me tell you, they got his attention.

We are told they are furious at Mr. Baker. We understand that; sometimes we get furious with our leadership. I can even understand that Republicans do not want to deal with tax reform; it is complicated. Also, it is not a perfect bill; no bill this big is perfect. But, Mr. Speaker, I can tell you one thing: This bill is better than present law. This bill is going to take 6 million people off the rolls. Working people. This bill is going to reduce the rates for all Americans. This bill, most importantly, is fairer because those that are not paying are going to pay.

Mr. Speaker, the Republicans have now vented their frustrations. Mr. Speaker, the Republicans had a very successful cabal, but now we can get back on the track and do tax reform.

GOD WILLING, WE WILL GET THEM HOME

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, the other night I was sitting in our apartment in our den, feeling sorry for myself. It was the night of the ball; my wife was home caring for a sick daughter and grandson. I was just listening to the stereo. Along came the old tune, "I'll Be Home for Christmas," I became somewhat embarrassed thinking about our hostages, far away from home.

Let me suggest this: I think we have to add a new consideration. You cannot trade a criminal for a hostage.

A hostage is innocent. A criminal who killed 6 people, injured 85, damaged property, stole an aircraft, he is not on a comparable plane with an innocent hostage. You cannot evenly trade one for the other. So we need something new; we need a fresh factor in the equation.

I continue to believe, as I did as a child, that more things are wrought between Heaven and Earth than we conceive of. So I am suggesting that all of our temples and the churches put their prayers on the line. I do not expect any charismatic miracle envisioning the heavenly chariot thundering across the skies with Michael the Archangel reaching down and plucking the hostages out of their cage, but I do think that it is possible that one of us in this Chamber would get divine inspiration of an idea that might work, that might provide an alternate consideration for their release.

So let us storm the Gates of Heaven; let us disturb the stars with our prayers. God willing, we just might get them home.

□ 1050

THE TAX BILL, A TRULY BIPARTISAN EFFORT

(Mr. MATSUI asked and was given permission to address the House for 1 minute.)

Mr. MATSUI. Mr. Speaker, I rise to correct the RECORD on a story that was heard here yesterday on the floor as we discussed the tax bill. Some speakers gave the impression that the bill we were discussing was written under cover of darkness by a group of Democrats controlled by a despotic chairman. If that were true, we would be confronting today a very different bill than the one we have before us.

In fact, the bill was the end of a long bipartisan process that began within the Committee on Ways and Means more than 12 months ago. It included two intensive tax retreats where Members consulted with academic experts, public hearings where nearly 500 witnesses testified, and a lengthy markup process that tried the patience and stamina of every member of this committee.

The markups were preceded by a dozen task forces where specific issues were discussed and hammered out. The Republicans on the committee were invited to attend and participate in each and every one of these events, and they attended and participated with a great deal of vigor. They did not win all their points in the task forces and in the meetings, but they did not lose every time either. The mere fact that 80 percent of the Republican alternative is identical to the committee plan proves that point.

Mr. Speaker, the problem now is not the process, as the Republicans stated yesterday; it has now become politics, and I think we should have this bill on the floor for a vote.

LEGISLATION TO SUSPEND MFN STATUS FOR ROMANIA FOR 6 MONTHS

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, on Sunday Secretary of State George Shultz and Counselor Ed Derwinski will be in Bucharest to advise the Romanian authorities that MFN [most favored nation] renewal next year may be in jeopardy unless Romania improves its observance of fundamental human rights.

The President's semiannual report to the Commission on Security and Cooperation in Europe, on which I serve as a commissioner, makes it clear that Romania's human rights record continues to be poor.

There is a growing sensitivity on the part of many Members of Congress and the American people that religious repression and violation of human rights have not improved in Romania. If the conference of MFN is to be meaningful from a human rights perspective, only performance serves as a genuine barometer. Paper guarantees, personal assurances, and public pronouncements by Romanian officials are indeed useful, but the record must correspond with the rhetoric. If that is not the case, I would suggest we are only kidding ourselves and doing a grave injustice to those Romanians who suffer beatings, imprisonment, interrogation, job loss, and other forms of harassment.

Mr. Speaker, H.R. 3599 introduced by Mr. HALL of Ohio, Mr. WOLF, and I would suspend MFN for 6 months, and represents a modest, interim approach, and my fondest hope is that this measure and companion legislation in the Senate, S. 1817, will send a clear, nonambiguous signal to the Romanian authorities. We ask that the authorities respect the dignity and conscience of the people. We ask that the Romanian Government be the defender of human rights. We ask only that their actions match their words.

I believe that H.R. 3599 represents a constructive approach, and, I assure you, one to which Mr. HALL of Ohio and Mr. WOLF and I are deeply committed. I hope my colleagues will join the more than 60 Members who have cosponsored this legislation.

MEMBERS SHOULD HAVE THE COURAGE TO DEBATE TAX BILL

(Mr. JENKINS asked and was given permission to address the House for 1 minute.)

Mr. JENKINS. Mr. Speaker, I am saddened, but it is not because we differ on a tax bill. There are differences about a tax bill that we can reasonably have from both sides of the aisle. What I am saddened about is the fact that we do not have the courage to even debate a tax bill. I think we ought to have the courage to at least debate a tax bill at the time we have the responsibility of voting for or against one.

We can easily talk about tax reform when we do not have to vote. It is like balancing the budget. We can make wonderful speeches about balancing the budget as long as we are not called upon to vote on the issue. We can make great speeches on leveling out the tax burden as long as we do not have to vote on it.

That is what we did yesterday. The rule gave the Republicans the opportunity to put in any substitute they wanted before this body and debate it, and maybe we would support it. But the American people lost yesterday. They lost something more than a tax bill. They lost something that is a part of the very fiber of this Nation, and that is that in this people's House we ought to be free to debate serious issues, and yesterday that was cut off.

I tell all my colleagues that if we resurrect this bill, it will certainly take more from the other side than the baker's dozen plus one that we received yesterday. We will need some bipartisan help, and if you want to offer your substitute—and I may support it—at least give me the opportunity to debate it. If you want a flat tax, put that in your substitute and let us debate it. If you want something else, if you want to protect some industry, I may very well agree with you. Put it in your tax bill. Let us listen, and we may agree with you, but do not cut us off and say to the American people that tax reform is not worthy of debate.

Mr. Speaker, we should not be told that tax reform is not even important enough to discuss it.

THE FIRST STEP TOWARD FISCAL RESPONSIBILITY

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, last night this body finally responded to the American people who have been telling us for too long that we have conducted the fiscal affairs of this country with a seemingly unlimited penchant for taxing, spending, and borrowing, and the people have asked for a limit. They have asked us to make hard choices, and last night, when we passed the Gramm-Rudman legislation, we defined a limit on one of the three legs of the triad of fiscal irresponsibility, a limit on borrowing. That limit will force us either to make

hard choices or to face the sequestrae that so many people were so concerned about in last night's debate.

The alternative now, Mr. Speaker, is for us to get organized, to get disciplined, and to form the plan, set the priorities, define spending cuts and put America's fiscal house in order. For that task we will need a force of commitment. I intend, Mr. Speaker, to do my part and I hope the rest of the Members will join me in that effort.

TAX REFORM SUSPENDED, DEFENSE CONTRACTORS AGAIN OFF THE HOOK

(Mrs. BOXER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOXER. Mr. Speaker, it is a really sad day for the American people because there may be no tax reform this year. And let me tell you the sadness of that.

While American families continue to pay and pay and pay, the biggest defense contractors will continue to pay nothing while profits soar. This is due to the "completed-contracting" loophole which the Rostenkowski tax reform bill would have closed.

General Electric, the sixth-largest defense contractor, today announces a $6 billion merger with RCA. That is $6 billion for a merger. And how much did they pay in taxes in the years from 1981 to 1983? Zero. Less than zero—a minus 4.3-percent effective tax rate.

And how about General Dynamics, the company that makes headlines for cheating and lying on its billings? General Dynamics makes 90 percent of its profits from the taxpayers. And what did they pay in taxes from 1981 to 1983? Nothing. Less than nothing—a minus 7.6-percent effective tax rate.

Mr. Speaker, we could have changed all that, but we could not even debate the tax bill, and the defense welfare queens are once again off the hook.

THE WASHINGTON POST ERRS, MADE A "BEAUT"

(Mrs. ROUKEMA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. ROUKEMA. Mr. Speaker, it is really unfortunate when the press makes an error, and I regret to have to stand up here today and inform my colleagues that the Washington Post, although they are usually completely accurate, has made a "beaut" today and I want to bring it to the attention of this House.

The Washington Post quotes me as depicting a meeting in the Oval Office yesterday with the President being "perplexed and confused" on the tax issue and the vote on the rule.

This is simply not the case. It was not the situation, I did not say it, and I know my colleagues can all appreciate my feelings for all of us have been misquoted by the press.

I called the Washington Post today and asked them for an apology for the President. The President was direct and to the point in the meeting yesterday. He wanted to know how his Republicans could desert him on an issue as important as this was to him. I told the President I agreed with him.

I commend the President for his leadership on tax reform, and I am glad to see that he is continuing his efforts today.

But, Mr. Speaker, articles like this totally confuse the issue. They give out erroneous information. The Washington Post clearly owes the President of the United States an apology and me a retraction.

PLANE EXPLODES AT GANDER, NEWFOUNDLAND, 250 AMERICAN SERVICEMEN LOST

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, my friend Congressman DON SUNDQUIST of Tennessee and I represent Fort Campbell. Congressman SUNDQUIST will follow me in speaking today.

As the Congressman from Fort Campbell, KY, I'm shocked and deeply saddened to learn early this morning that more than 250 Fort Campbell soldiers who were en route home for the Christmas holidays were killed today in a 6:18 a.m. plane explosion at Gander, Newfoundland.

A DC-8 U.S. military charter carrying more than 250 Fort Campbell soldiers exploded this morning after takeoff from Gander International Airport.

All aboard were killed.

The American soldiers were members of the 3d Battalion, 502d Infantry, 101st Air Assault (Airmobile) Division and had been on duty in the Sinai Peninsula for 5 months as part of a peacekeeping force.

The plane originated in the Middle East.

News accounts this morning quote witnesses as saying the plane exploded, lighting up the sky.

Mr. Speaker, my colleagues, was this another act of terrorism caused by the PLO or the PLF? We don't know yet.

I know I speak for all 435 Members of the House of Representatives in expressing our sympathy to the families of these more than 250 American soldiers whose lives were tragically ended this morning.

□ 1100

TRAGIC LOSS OF 250 AMERICAN SOLDIERS IN NEWFOUNDLAND

(Mr. SUNDQUIST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SUNDQUIST. Mr. Speaker, I join with my distinguished colleague, the gentleman from Kentucky, in commenting on the tragic loss of American soldiers in Newfoundland.

At a time when most of us are thinking of the holiday spirit and all the exciting things that are going on in December, we were saddened to hear the report of the plane crash. We are reminded again of those who pay the price for the freedom we enjoy in this country; so our hearts are heavy and we are shocked and we are saddened as we learned of the crash that caused the deaths of over 250 American troops who were returning to Fort Campbell, KY. These soldiers, part of the 502d Infantry Division of the 101st Airborne Division, were returning home to their families for the holiday season after completion of their 6-month tour of duty as part of a peacekeeping force in the Sinai Desert.

Many of these brave soldiers lived in my district and none of us can begin to comprehend the magnitude and the shock and the grief that has encompassed the community of Fort Campbell.

This peacekeeping force is the most significant component of the 101st Airborne Division's activities worldwide. All of us who represent that area have been extremely proud of their accomplishments.

Mr. Speaker, keeping the peace in the world is among the most noble duties of our Armed Forces. These soldiers have performed that duty magnificently in the Sinai. I am sure the membership of this body will join my distinguished colleague and me in prayers for the families and friends of these 250 peacekeepers.

TOUGHER DRUNK DRIVING LAWS

(Mr. OBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBEY. Mr. Speaker, it is outrageous that last night the Senate conferees on the transportation portion of the continuing resolution won their argument to make permanent a provision which was sneaked into the law last year which reduces highway aids to States that do not have drinking ages of 21. We had no vote on that issue before it became law last year and apparently we will once again have no vote on that issue this year.

It is ironic for States like mine that have tougher laws on drunk driving than some States with 21 drinking ages. Studies in fact show that what makes highways safe is not what the age for drinking is, but how tough your drunk driving laws are.

It is simply wrong for the Federal Government to dictate highway transportation policy to States without the facts to prove what they are asserting and without a vote.

I wonder, for instance, whether those who so zealously insist on raising the drinking age to 21 would also vote to forbid the enforcement of draft registration requirements to persons who are under the age of 21.

THE 1985 CONGRESSIONAL CALL TO CONSCIENCE VIGIL

(Mr. COUGHLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COUGHLIN. Mr. Speaker, I rise today to speak out once again on behalf of Jews in the Soviet Union as part of the 1985 Congressional Call to Conscience Vigil. As chairman of the 1984 vigil, I know both the immense value of this effort and the amount of work involved, and I would like to thank and congratulate this year's chairman, SANDER LEVIN, for the job he has done.

Mr. Speaker, the figures on Soviet Jewish emigration for the year 1985 continue to tell a tragic tale. Compared to a high of 51,320 Jews allowed to leave the U.S.S.R. in 1979, the 1985 figures through the end of November total only 1,047. Meanwhile, an intensive campaign to destroy Jewish culture—even more despicable and far-reaching than previous efforts—has landed seven Jewish activists and Hebrew teachers in Soviet jails and labor camps since September 1984. These "Prisoners of Conscience," who have joined many other Soviet Jews in the gulag, have first been victimized by a hostile and cruel state administration and an utterly warped judicial system, and then by a barbaric penal system. In one case, that of Hebrew teacher Yosef Berenshtein, inmates incarcerated with him recently beat and virtually blinded him, while his guards did nothing.

For those Jews who seek to leave the U.S.S.R., the Soviets have deliberately made every step in the emigration process extremely difficult. Instant dismissal from work and loss of other privileges is common. Nevertheless, some 350,000 Jews are estimated to have begun the emigration process. Of that number, more than 15,000 have had their requests denied by Soviet authorities. About 1,000 of these "refuseniks" have been waiting more than 5 years to leave.

Now the statistics I have referred to are gravely disconcerting. The incident I have described, but one example of Soviet maltreatment, is harrowing. Imagine if you can the impact such circumstances have on the over 2 million Jews who live in the Soviet Union today.

Just this past October, I traveled to the U.S.S.R. as part of a House delegation on space cooperation. We toured some of the Soviet's most advanced laboratories and space facilities, and met with senior officials there to explore the possibility of another joint United States-Soviet space mission—a followup to the 1975 Apollo-Soyuz mission.

But while there, I also took the opportunity to arrange secret meetings with Soviet Jews. Calling from phone booths in subway stations, I made arrangements to meet with some of the many long-term refuseniks, individuals who in some cases have been waiting over 10 years to leave. Among those I visited were Vladimir and Maria Slepak, Vladimir Prestin, Elena Dubienskaya, Arkady Mai, Helen Seidel, Ludmila Volvovsky, Aleksandr Lerner, Victor Brailovsky, and many others.

While no two told the same story, each recounted a tragic and frightening series of events. Vladimir Slepak spoke in somber yet high tones of his exile to Siberia—"near the place where was born Ghenghis Khan," as he put it—for unfurling a banner from the balcony of his apartment demanding freedom. Arkady Mai and Helen Seidel spoke of the frequent visits and threats by KGB agents, who harassed the seminars on Judaica that they ran. Ludmila Volvovsky, her voice cracking as she spoke, told one of the most touching and tragic stories I have heard, about her husband Leonid who, as we talked, was awaiting trial on charges of "anti-Soviet agitation and propaganda." The true reason for his persecution, she explained, was that he taught Hebrew in the city of Gorky. She had traveled hundreds of miles from Gorky, in fact, to inform me of his situation and give me a letter about him to deliver to President Reagan, which I did on my return. When the meeting ended after 11 p.m. that night, she wrapped herself warmly for the night-long train ride back to Gorky. Not long after my departure from Moscow, Leonid Volvovsky was found guilty and sentenced to 3 years in prison.

Contrasting starkly with the discussions I had with Soviet Jews were those I participated in with Soviet officials as part of our delegation's activities. Our talks included a nearly 3-hour session with Andrei Gromyko. These conversations, held in the unbelievable gilded opulence of the Kremlin palace, demonstrated quite clearly how the "classless society" is truly governed. As might be supposed, the Soviets' responses to our points on the gamut of human rights issues in the U.S.S.R. during these meetings was characterized by the same kind of duplicity and cynicism that we saw in their government-to-people relations.

Mr. Speaker, among the items that went with me on my trip was a videotape camera. With it, I recorded many of my conversations with Jews in the Soviet Union. Fortunately, these tapes were extricated from the U.S.S.R. safely. They are important for a number of reasons. First, they add faced to the names—warmth, tragedy, and bitterness to the stories. Second, they serve to document the severity of the persecution that these fine people have experienced. Finally, and most importantly, they reinforce the hope of those in the U.S.S.R. who seek to leave, by helping to ensure that their plight is not forgotten.

We must continue to keep the cause of Soviet Jewry before us in the days ahead, through such measures as the congressional call, through our diplomatic exchanges with Soviet officials, and through support for community involvement. The Soviets must know that we will never let them sweep this issue under the carpet. And that we will do our part to maintain the sense of hope that I found in all of the refuseniks with whom I met. With the possibility of improved United States-Soviet relations looming before us in the wake of the recent summit, we must take advantage of every opportunity to improve the situation of Soviet Jewry in the days ahead.

SUBSTITUTE FOR EMPLOYEE POLYGRAPH PROTECTION ACT OF 1985 WILL BE OFFERED

(Mr. DARDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DARDEN. Mr. Speaker, the polygraph—commonly known as the lie detector—can be a valuable tool for businesses in the hiring of personnel for positions of trust. Unfortunately, its potential can be abused to the detriment of an individual's right to privacy.

Today, I will be offering a substitute to H.R. 1524, the Employee Polygraph Protection Act of 1985, to help our States protect the rights of the person taking the polygraph examination while also assuring businesses the right to use the polygraph in a constructive way. This substitute would set minimum standards for polygraph testing and encourage the States to establish their own polygraph oversight programs.

Unfortunately, abuses of the polygraph have taken place. But, unlike other legislation which has been offered, this substitute would not permit

those abuses to become the rationale for a veritable ban on polygraph use in the private sector.

I urge my colleagues to consider the many benefits of polygraph examinations to the business community and to vote for this substitute.

PRESIDENT REAGAN HAS BECOME ONE OF LONELIEST MEN IN WASHINGTON

(Mr. RUSSO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUSSO. Mr. Speaker, yesterday, President Reagan became one of the loneliest men in Washington.

In 1981, when the President supported a tax bill that bestowed lavish benefits on wealthy individuals in this country and the most profitable corporations in this country, every Republican wanted to be his friend. They wanted his picture in their newsletters and they wanted Air Force One on their runways; but yesterday when the President threw his weight behind the cause of tax reform that would have provided middle-income and working people with real tax reductions, a chance to help small business, while taking 6 million of the poor off the Federal income tax rolls, and a chance to approve a strong minimum tax that would ensure that every individual and every corporation in this country pay their fair share of taxes, he became a solitary warrior leading a thinning army.

Only 14—only 14 of 182 Republicans were even willing to debate these issues on the floor of the House.

So, Mr. Speaker, I take this opportunity to urge my Republican colleagues to reconsider yesterday's vote. Tax reform is too important an issue to be left buried in the pages of the CONGRESSIONAL RECORD. It needs and deserves everyone's support.

A MORE FAIR COMMITTEE REPRESENTATION

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, despite the eloquent pleas of my friends on the Democratic side of the aisle who suddenly have seen the righteousness of President Reagan's election and reelection, there are some facts that should be brought to bear on this discussion.

One of the major reasons those of us who oppose, and oppose vigorously, the will that was brought forward by the Ways and Means Committee goes back to the institutional problems of this House. The Ways the Means Committee does not represent, percentagewise, this House of Representatives. The representation there, almost 2 to 1 Democrat to Republican, does not represent the percentages in this House.

I suppose we are to think that those who granted us this wonderful representation will at the time that we go to conference make sure that Republicans are properly represented so that we can make those changes in the bill which we have been told by Democrats that they recognize the President wants.

Well, Mr. Speaker, I recall last year working for a month on the immigration bill to try to work out the differences, and I can tell you that the representation from the House was not reflective of the attitudes of the House of Representatives.

There are some institutional problems here that have come back late this year to cause us problems with tax reform that many of us have been committed to for a long period of time.

So let us not stand up here self-righteously and say, "Republicans, trust us. We have done good for you in the past. All you have to do is wait until we get into conference and we will assure that your voices will be heard."

We have heard that song before, Mr. Speaker. We, unfortunately, do not wish to dance to it again.

HIDING BEHIND THE RULE ON TAX REFORM

(Mr. RANGEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RANGEL. I thank the Speaker for this opportunity, especially to direct myself to the problems that we have with this institution. If there is a problem, it is that it allows Members to seek comfort behind the rule, a procedural rule, when they seek not to deal with a piece of legislation substantively.

How dare anyone refer to the composition of a committee and indicate that they never had an opportunity to participate, when we have a record in the Ways and Means room to show that every substantial task force not only had Republicans on it, but had Republicans participating.

I am not saying that the leader of the Republican Party and the President of the United States should be able to pick up the phone and promise a Member of Congress some goody back home to get his vote. You have been elected here to do what you think is in the best interests of your constituents and the people of the United States. But how dare people go to the press and complain that they did not like the rule? The rule is merely a procedure to give the Members of the House of Representatives an opportunity to vote yes or to vote no. If you do not like what the gentleman from Illinois [Mr. ROSTENKOWSKI] and the Republicans and the Democrats and the Ways and Means Committee have done, do not vote for it.

But why, for God's sake, will you turn your backs on the Republican alternative? Is not the gentleman from Tennessee [Mr. DUNCAN], the ranking member, someone that is in communication with your party? Do you have to go to the Hill for direction as to what you want to do in tax reform?

What you have done is not killed the Democratic bill, but you have killed the opportunity for Members of the House of Representatives to vote up or down, Democrat or Republican, but most importantly, to vote for the right thing and that is equity and fairness in our tax system.

DRINKING AGE IS A PREROGATIVE OF THE STATES

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, shortly we will have to pass a continuing resolution to keep the Government running, but I want to put on record my objection to the inclusion of language mandating a nationwide 21-year-old drinking age.

Determining appropriate ages for drinking is traditionally a prerogative of each of the 50 States.

Let us give this issue the full consideration it deserves in the appropriate authorizing committee and in the full House of Representatives. Let us give this issue the consideration it really deserves. That is the least we can do before violating a traditional right of each of our 50 States.

RECONSIDER VOTE ON TAX REFORM

(Mr. WOLPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLPE. Mr. Speaker, I hope that those of our colleagues who yesterday voted to block even the consideration of tax reform will reconsider that action. No one ever said that tax reform would be an easy subject to address in this institution for many of us. There are none of us who are immune from enormous special interest pressure. There are none of us who view the vote on tax reform as an easy vote.

But likewise, I do not think there is anyone in this body who will pretend that the present tax system is fair, that it is enhancing the confidence of the American people in our political system.

It is also abundantly clear that the Ways and Means Committee bill, whatever its imperfections, represents a vast improvement over the present system. It does, in fact, provide significant tax reductions for middle-income Americans. It provides tax relief for those corporations in America that pay enormously high effective tax rates. It removes from the tax rolls 6 million of our poorest working Americans. And it provides a tough minimum tax on corporations and wealthy individuals, so that all Americans will for the first time begin to pay their fair share of the tax load.

Please, let us understand the urgency of this question for America. What is at stake here is not only the tax system, it is indeed the credibility and institutional effectiveness of this body. I urge my colleagues to permit the debate on tax reform to go forward.

□ 1115

TAX REFORM

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, I think it is interesting to hear tax reform referred to as being better than the present system and we ought to allow the process to go forward.

The bill we are being asked to consider on the floor gives benefits to 300 millionaires, including the Gallo wine family to the tune of $80 million.

The bill we are being asked to consider on the floor that helps working Americans makes unemployment compensation fully taxable. What does that say to the people out there who are suffering the pains of unemployment in this country?

The bill that we are asked to consider on the floor has all kinds of special interest garbage in it, provisions that were put in simply to get people to vote for this particular bill. That is the only way they could sell it on the House floor.

This is not a bill that is reform, this is a bill that is deform. To bring this bill to this House and ask it to be considered, I think, is an act of injustice to millions of Americans who are going to pay higher taxes. As a result of the provisions in this bill, in 1986, most Americans will pay higher taxes because they do not put in the tax rate changes until July, but we end the deductions as of January.

So higher taxes, taxation of unemployment benefits, payoffs to millionaires, that is what is really in the tax bill. It ought not be considered here.

TAX REFORM

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, when most people talk about taxes, they agree on three things:

First, that the present tax system is a disgrace;

Second, that the middle class pays most of the Nation's bills; and

Third, that the rich and the major corporations do not pay their fair share of taxes.

The Ways and Means tax reform bill corrects many of these inequities. It is not perfect, but it is critically needed. It gives many of us a lot of pain; whether it is oil and gas, or timber, or coal, or steel, or Federal employees, the list goes on—that causes pain. But we owe it to the country to let this process continue.

The tax reform bill is supported by the President of the United States, by most House Democrats, by hundreds of small- and medium-size businesses, and most importantly, by the average guy on the street.

Yet only less than 7 percent of House Republicans supported this bill.

Let us send a message in a bipartisan ways to those beltway lobbyists and big businesses that Congress is for tax reform. Let us not allow tax reform to die.

Mr. President, the ball is in your court.

TAX REFORM

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, and the lobbying teams for the White House that occasionally sit in the gallery and listen to what we have to say here, if this rule is brought back again, with all of the switching that is going on, back and forth, from one side to the other, and loses again, which is very possible, then the President has really been misserved.

I think that the two most important things we come to in this, the world's greatest deliberative body, to do is to defend our country from foes and to set taxes and appropriate money in order to do those things for our fellow citizens that cannot be done by the States.

How we form our Tax Codes, how fair it is, how simple it is and how it stimulates growth in this country which creates jobs that middle-class American dream is the most important things we have to do here.

I ask you, Mr. Speaker, why rush through a process now when we all want to turn to the most important thing in our lives, our families at Christmas time, with a horribly flawed piece of work, as hard as everybody worked on it. It is so wrong, and those of us that not only like the President personally, as you do, Mr. Speaker, but also like his politics and campaigned in 16 States, as I did, to bring him to a position of leadership, we are asking for a breather here, not to push a process that in the end may make the President look bad for supporting the type of reform that he was not for. This is not the President's tax reform. It is not even close and quite frankly doesn't deserve further consideration by the House.

TRADE REFORM

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, far be it for me to distract the House from its current pursuits. We have been preoccupied these last several weeks with balancing the budget and reforming taxes to sustain our economic recovery. Both are necessary.

To improve productivity and competitiveness on the economic front, however, there is one more essential piece of the puzzle: trade legislation. That should be first up on this floor after the new year.

The U.S. trade deficit with Japan hit a monthly high of $4 billion last month, November, this despite the drop in the value of the dollar. The main reason for the worsening situation was a 45-percent surge in automobile shipments following the restrictions on imported cars to the United States earlier this year.

The U.S. trade deficit with Japan has grown to record levels of over $35 billion already this year. Imported autos now account for over one-third of all automobiles sold in the U.S. market. We are losing 25,000 jobs a month in manufacturing America. Our trade deficit continues to spiral.

We need strong trade legislation and we need it now.

TAX REFORM

(Mr. WEBER asked and was given permission to address the House for 1 minute.)

Mr. WEBER. Mr. Speaker, in the course of this entire tax reform issue, the vote that was more generally bipartisan than any other, despite what has been publicized, was yesterdays' vote against the rule to bring up the tax reform bill. Granted, the overwhelming majority of Republicans voted to kill that rule, but also 59 Democrats voted to kill that rule.

There are serious substantive reasons why many of us do not think that we should bring up that tax reform bill at this point. It is a 1,379-page document that most Members of Congress have not had the chance to analyze.

In addition to that, there are several economic analysts, including some in

the administration, who have used the word "recession" to tell us of their fears of the impact of this bill.

Yesterday's vote by many of us was a vote saying to the President, saying to our leadership in the Congress we are fearful that the unintended impact of this bill may be detrimental to our country, detrimental to our districts. Do not bring it up again now. Let us study this thing now and think about it again next year.

TAX REFORM

(Mr. GARCIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARCIA. Mr. President, on December 8, 1941, in this well, the President of the United States spoke to Congress and called the bombing of Pearl Harbor a day that will live in infamy. I believe December 11, 1985, is also a day of infamy.

Yesterday, we turned back the clock. Eight million Americans were going to get off the tax rolls. This includes some 6 million Americans with incomes between $10,000 and $15,000 a year, who would finally get tax relief.

Big business told us, "Don't let those people have tax breaks, give the breaks to us." And as if the failure of the tax bill was not bad enough, yesterday, we passed Gramm-Rudman, which is in reality Gramm-Latta II. The difference is Gramm got married to somebody else.

Wait until you get back home, and the senior citizens in your district, and all of the people who are dependent on Government programs, ask you why you voted for Gramm-Rudman. You will have a tough time explaining it.

Let the chips fall where they may. I am proud of my vote. I voted against the original Gramm-Latta. I voted against Gramm-Rudman yesterday, and I am certain that the people will be with those of us who did.

TAX REFORM

(Ms. FIEDLER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FIEDLER. Mr. Speaker, yesterday going through some of the analysis that has been done on the tax bill, I came across a provision that I think will be of interest to various Members of the House of Representatives, particularly those Members that were deeply concerned about retaining the State tax deductability.

I think it is very important for the Members to understand that if their constituents itemize their tax bill, and if they take the State tax deduction, that they will lose the $2,000 personal deduction. Did you know that? Were you aware of the fact that in order to retain the State tax deductability for States like California, New York, and Wisconsin, and some of the others where it is extremely important because they are high-tax States, that the minute that they itemize that State tax obligation that they will automatically lose their $2,000 deduction?

Before I inquired of the Ways and Means staff, I was not fully aware of that, but I thought you ought to know about it.

TAX REFORM

(Mr. MOODY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOODY. Mr. Speaker, I do not agree very often with the policies of Ronald Reagan, but when he is right, he is right.

The President of the United States asked this body to consider comprehensive tax reform. The package produced by the Ways and Means Committee is somewhat different than the President's, but it does embody the same philosophy of closing abuses and loopholes, broadening the base and drastically reducing rates. It brings relief to the middle class, it closes defense contractor abuses.

Typically, this truly historic opportunity for tax reform was ambushed yesterday on the way to the floor; 164 out of 178 Republicans voted against even considering or debating the bill, despite the rule permitting a Republican substitute, any substitute they wished.

It is now or perhaps never for tax reform. Like all great improvements in public policy, bipartisan support will be necessary.

I urge my Republican colleagues to join us in the effort to at least debate and consider tax reform and move the process forward.

HOUSE JOINT RESOLUTION 192, MAN'S INHUMANITY TO MAN IS ILL-ADVISED LEGISLATION

(Mr. DICKINSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKINSON. Mr. Speaker, it is my understanding that the next item on the agenda will be House Joint Resolution 192, the National Day of Man's Inhumanity to Man, so-called. But let me say that this sounds good, but it has to do with an act that happened in Turkey over 70 years ago.

Now, Turkey is a friend of the United States. They are important to us strategically. They are a member of NATO. We have bases there and we have other installations there.

This is a gratuitous insult to the people of Turkey over something, an incident that this present administration for the last several years has had nothing to do with. For us to do this at the present time is definitely, very definitely against the interests of the United States.

I do not know who we are trying to placate here, and I am not impuning anyone's motives in offering the resolution. But I am saying it is against the interests of the United States for us to bring up and pass this resolution.

It is no pluses, it is all minuses, and I would hope when it comes up that this House, as we did on the Suspension Calendar, would overwhelmingly defeat it.

UNAUTHORIZED DEFENSE APPROPRIATIONS

(Mr. BUSTAMANTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUSTAMANTE. Mr. Speaker, later on today, we will be considering the continuing resolution which will keep our Government running for the rest of this fiscal year. At this time, I want to share a concern with you for another ill-begotten bill from the other body. The same body that brought you the Gramm-Rudman balanced budget proposal which will make serious cuts to our defense, is bringing you a defense appropriations bill with $7.2 billion in unauthorized add-ons.

What do these cuts mean? They mean that our defense programs will be subject to deficit reduction cuts. We will have to cut, in addition, authorized defense programs which this body voted for, to accommodate the unauthorized $7.2 billion add-on.

Mr. Speaker, this body cannot allow the other body to make short shrift of the deliberative authorization process which sets the priorities for the needs of our national defense again. I urge this body to oppose the other body's efforts to undermine the vitality of the authorization process, and our priorities for the needs of our national defense.

TAX REFORM

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute.)

Mr. BURTON of Indiana. Mr. Speaker, when I came to the Congress 3 years ago, one of the things promised was that I was going to work for tax equity and tax simplification.

Our opposition on the other side of the aisle has been beating up on us all morning because we voted against the Rostenkowski tax bill yesterday. This is 1,379 pages of new tax law, definite-

ly not simplification and definitely not equity. I could not in good conscience vote for this.

In addition to that, the U.S. Chamber of Commerce and other econometric studies point out that it will put us into a recession. In 1986, according to these studies, the real gross national product will go down by one-tenth of 1 percent; in 1987, two-tenths of 1 percent; in 1988, eight-tenths; in 1989, 1.4 percent; in 1990 and 1991, 2.7 percent.

□ 1130

Equipment investment will go down from one-half percent to 9.7 percent over the next 5 years. The Federal budget deficit will go up 7.6 percent the first year and an average of 6 percent a year for each of the next 6 years if this becomes law.

Unemployment, which is already at 7 percent, would go up over the next 6 years by 1½ to 2 percent. This is recessionary. That is why I voted against it. I am for tax simplification and tax equity, but this does not give it to us.

GRAMM-RUDMAN'S PROMISES: LOUD NOISE AND HOT AIR

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, today a new era dawns. The Gramm-Rudman bill was passed by Congress last night; Mr. Reagan signs it into law today, and all the Nation's fiscal problems and those of Congress will miraculously disappear.

I have a strong feeling that there might be a rude awakening for a lot of Members who bought all that hocuspocus. Like the magic of the "Wizard of Oz," it will soon become clear that the promises of Gramm-Rudman were nothing more than loud noise and a lot of hot air.

Unfortunately, before that unmasking occurs a lot of Americans are likely to be hurt by the destruction of health, education, and other vital Federal programs.

Gramm-Rudman plays havoc with the Constitution of the United States and endangers the economic future of the country, and all of this simply to avoid the budget decisionmaking responsibility which every Member sought in running for Congress.

Those Members who voted to shuck that responsibility and transfer it to a faceless bureaucracy and to the President of the United States obviously believe that the American people will be fooled into thinking that they actually did something real about the deficit.

Mr. Speaker, we will soon see who the real fools are.

MORE TIME IS NEEDED TO PROPERLY CONSIDER TAX REFORM

(Mr. MACK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MACK. Mr. Speaker, yesterday we spent a portion of the day discussing the Gramm-Rudman proposal, and some of us are going to walk arm-in-arm to bring about reduction in Federal spending; and there is an opportunity, I think, to walk arm-in-arm once again, with tax reform.

I think we have to stop for a moment: This document here is the document that was debated by the Congress for 2½ months, about how to establish some method of reducing the deficit. This document right here, 1,379 pages, we are being asked to vote on maybe today, maybe tomorrow. Most of the Members of the Congress have not the slightest idea what is in this.

It seems to me, as the gentleman from Indiana indicated, that there are many people who are concerned that this will drive us into an inflationary period. It would be a good opportunity for the Congress to stop and debate and discuss these 1,379 pages and try to find out what is in the document. Several hours of debate is not going to accomplish that. That is why we defeated the rule; that is why we want to have an opportunity for input into the design of tax simplification and tax reform.

THE PEOPLE SPOKE IN REJECTING THE RULE ON TAX REFORM LEGISLATION

Mr. WOLF. Mr. Speaker, I was in my office and listening to many of the speeches, and I just want to comment. There is a passage in Proverbs 16:18 which say, "Pride goes before destruction and a haughty spirit before a fall."

I did not come over here to blame anybody; I think both sides have their reasons for voting the way they want to vote, but I think the truth of the matter is many of us who voted the way that we did yesterday did it because the Committee on Ways and Means has an amendment in there which would unfairly tax teachers and policemen and firemen and Federal employees.

This was not a vote against tax reform; quite frankly what this was, this was an element of pride that got involved with the leadership on the Committee on Ways and Means whereby they refused to bend.

This body worked its will yesterday to say, "Take that bill back and amend it and give us an open rule whereby the people can speak." The people spoke on that vote, and I say it was an element of pride whereby they refused to give.

Quite frankly, we are all for tax reform. Let us bring it back, but let us give the people who have opposing views an opportunity to work their will.

GRAMM-RUDMAN WILL FORCE CONGRESS AND THE PRESIDENT TO PAY THE BILLS

(Mr. SLATTERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. SLATTERY. Mr. Speaker, the revised version of the Gramm-Rudman budget plan that was approved yesterday will tie liberals, conservatives, Democrats, Republicans, the President, and Congress to the stake, and when the President signs the plan, the fuse will be lit.

This is certainly not the ideal way to run our Government, but the fact is voodoo economics did not produce a balanced budget, and the President and Congress have demonstrated their unwillingness to make the tough choices necessary to balance the budget.

I believe this legislation will at long last force the President and Congress to pay the bills, and to stop this immoral, economically stupid policy of mortgaging the future of our country to pay for current consumption.

There is only one thing worse than tax and spend, and that is the spend and borrow policies that we have seen during the last few years. Maybe this proposal will at long last require the Congress to start the process of reconciling the political promises of the sixties and seventies with the economic and demographic realities of the eighties and nineties, and if that is the case, all Americans will be the winner.

SPECIAL INTEREST PROVISIONS IN GRAMM-RUDMAN

(Mr. DIOGUARDI asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. DIOGUARDI. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, we heard a couple of minutes ago someone referring to the questions that had been raised by the minority side as being claptrap and nonsense. I wonder whether the enthusiasm for the bill has something to do with the fact that down here buried in the bill is a convention center for Miami, is a stadium for Miami—are special interest provisions aimed at particular constituencies.

It seems to me that that is one reason why you can get awfully enthusiastic about this bill, but that does not mean the American people should be enthusiastic about it; they are going to have to pay for all those special interest provisions.

LOSS OF MAJOR DEFENSE CONTRACTS TO FOREIGN FIRMS

(Mr. DURBIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DURBIN. Mr. Speaker, I will be meeting today with representatives of the Department of Defense and spokesmen for Can Am Industries from my home district in Quincy, IL, to discuss the issue of our loss of major defense contracts to foreign firms.

As more foreign firms take contracts away from American producers like Can Am and Quincy, two concerns emerge.

First, the future of our defense mobilization base. We have to question the wisdom of U.S. reliance on foreign producers for critical military equipment.

Recently, I joined my colleague, Mr. MYERS of Indiana, in sponsoring an amendment to the appropriations bill to require the Department of Defense to report on the future of our mobilization base as we become more dependent on foreign manufacturers.

Second and closer to home is the loss of American jobs. There is little or no savings in awarding a low-bid contract overseas, when in the process we destroy the American employment base. Jobs are needed in Quincy, IL and across this country to stimulate our economy. This is a problem that will continue to plague us until some action is taken by the Department of Defense to protect our mobilization base and to protect American jobs.

TAX REFORM MEASURE IS OVERLY COMPLEX

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, it seems to me that when you look back at what we fought so hard for in 1981, that great Economic Recovery Tax Act, which has given us the strongest recovery in our three decades, it is absolutely ridiculous for us to bring before the House of Representatives this, so-called, tax reform measure. It is going to impose a 1,379-page tax burden on the American people.

□ 1140

Simplification, yes, we are all for it. But this kind of overly complex measure is ludicrous. It is a horrible burden on the American people, and I believe we should do everything we possibly can at this last hour to defeat it.

COMMEMORATING ARMENIAN GENOCIDE

(Mr. LEHMAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEHMAN of California. Mr. Speaker, very soon the House will begin debating the resolution commemorating the Armenian genocide. Many baseless and untrue assertions are being circulated to derail this legislation. Let us not ridicule our own integrity by accepting the notion that one genocide ought to be forgotten simply because the present government of the nation which perpetrated it is currently our friend. Let us not do harm to the victims and their families by creating the impression we are willing to acknowledge genocide when it is perpetrated against Jews but not against Armenians. Finally, we should all understand that the mere acknowledgement of a historical fact can do no harm to anyone, not even the guilty, for they are all dead, too.

EXPRESSING SORROW AT REPORTS OF LOSS OF LIVES IN MILITARY AIR CRASH

(Mr. BONER of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONER of Tennessee. Mr. Speaker, I join with Mr. SUNDQUIST and other members of the Tennessee and Kentucky delegations in expressing our deep sorrow over the reports of the air crash of a military flight with members of the 101st Airborne Division based at Fort Campbell, KY. Initial reports indicate that there are no survivors of this tragic crash.

Mr. Speaker, many members of this division at Fort Campbell resided in middle Tennessee. When the names of those killed are finally released, I do not doubt that some will have resided in my congressional district. These men and women, and their families, are important and vital members of our Nation's defense force. They are also valued members of the Fort Campbell and middle Tennessee community.

To their families and friends, we extend our heartfelt grief at their deaths. We join all Tennesseans and Kentuckians in extending our assistance to these families as they rebuild their lives.

RESEARCHERS FIND AIDS VIRUS IN CENTRAL NERVOUS SYSTEM

(Mr. ROWLAND of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROWLAND of Georgia. Mr. Speaker, this week's New England Journal of Medicine raises new concern about the AIDS virus and the potential harm it may cause to the central nervous system. Researchers at Harvard and the National Cancer Institute have detected the virus in cerebrospinal fluid and brain tissue. These findings raise the specter of permanent neurological deficits with resultant mental and physical sequalae for those victims who do not succumb to immunological damage.

Although these findings create new difficulties for researchers seeking a cure for AIDS, I am confident that with our medical research capabilities in the private and public sectors we can continue their efforts and eventually they will succeed. We must be prepared, however, to devote the time and money to this effort that it will require.

Mr. Speaker, years ago we had another sexually transmitted disease that also caused major disability and death in our society. Syphilis, which also affected the central nervous system, was a scourge of mankind for hundreds of years. The discovery of penicillin less than a half century ago gave us a cure and freedom from the ravages of that dread disease. With the continued support of our research efforts, I feel that we will also achieve victory in the battle against AIDS.

THE TAX BILL IS NEITHER FAIR NOR DOES IT PROMOTE GROWTH

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, I listened this morning to a number of my colleagues who, with some sincerity, bemoan the fact that we were not able to move forward on the tax bill yesterday. They made two points I would like to rebut. No. 1, they protested the fact that we were not allowed to debate the tax bill itself by defeating the rule. I point out that all the rule allows is debate. There was no chance to modify in any meaningful way a flawed bill. The bill is the problem, but the rule compounded the felony.

Second point, they bemoan the fact that we could not pass the bill and thereby achieve tax reform. The bill is not about tax reform, the bill is about tax politics. The bill is 1,379 pages long. It adds complexity to the tax code. It is neither fair nor does it promote growth. The bill asks workers in

America to achieve slightly lower marginal rates and lose their jobs. That is the ultimate bad bill. Antigrowth, antijobs, $175 billion additional in taxes on capital; it was a bad rule and a bad bill.

Now the House can move forward on tax reform. All it has to do is pass a minimum tax on the wealthy and the corporations and apply that revenue to lowering the deficit, lower interest rates, lower the overvalued dollar, and put America to work again.

Yesterday was not tax reform, it was tax politics.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 664. An act to amend the Panama Canal Act of 1979 with respect to the payment of interest on the investment of the United States;

H.R. 729. An act to amend the Panama Canal Act of 1979 in order that claims for vessels damaged outside-the-locks may be resolved in the same manner as those vessels damaged inside the locks, and for other purposes;

H.R. 1534. An act to convert the temporary authority to allow Federal employees to work on a flexible or compressed schedule under title 5, United States Code, into permanent authority;

H.R. 2976. An act to direct the Secretary of Agriculture to release the condition requiring that a parcel of land conveyed to New York State be used for public purposes and to convey United States mineral interests in the parcel to New York State;

H.R. 3085. An act to clear title to certain lands along the California-Nevada boundary; and

H.R. 3735. An act to designate the pedestrian walkway crossing the Potomac River at Harpers Ferry National Historical Park as the "Goodloe E. Byron Memorial Pedestrian Walkway."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 947), an act to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

The message also announced that the Senate agrees to the amendments of the House to the joint resolution (S.J. Res. 70), joint resolution to proclaim March 20, 1985, as National Agriculture Day.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 1890. An act to provide for an equitable waiver in the compromise and collection of Federal claims; and

H.R. 3384. An act to amend title 5, United States Code, to expand the class of individuals eligible for refunds or other returns of contributions from contingency reserves in the Employees Health Benefit Fund; to make miscellaneous amendments relating to the Civil Service Retirement System and the Federal Employees Health Benefits Program; and for other purposes.

LITHUANIAN INDEPENDENCE DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 409) to direct the President to issue a proclamation designating February 16, 1986, as "Lithuanian Independence Day," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore (Mr. LEHMAN of California). Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, further reserving the right to object, under my reservation I yield to the gentleman from Illinois [Mr. RUSSO], the chief sponsor of House Joint Resolution 409.

Mr. RUSSO. I thank the gentleman for yielding.

Mr. Speaker, on February 16, 1918, the people of Lithuania, after centuries of foreign domination, joined together and declared themselves to be a free and independent nation. This assertion of self-determination by the people of Lithuania stirred the hearts of many Americans then, and has not been forgotten by Americans today, 68 years later. A similar bold, proud, and courageous declaration heralded the beginning of our own Nation over 200 years ago.

In the years that followed, the Lithuanian people worked hard and with a sure hand to advance Lithuanian society in many areas of endeavor. Only 5 years after independence, Lithuania had raised its standard of living above the pre-1914 level without any assistance from foreign countries. A permanent constitution was adopted on August 22, 1922, which provided for an 8-hour work day, land reform, and various public works projects which, among other achievements, saw the number of secondary schools increase at a dramatic rate. The rebirth of an independent Lithuanian state launched a cultural renaissance which resulted in great accomplishments in music and literature. Lithuanian writers were inspired to pen many works rich in national folklore and history.

Unfortunately, this golden age of independence and progress lasted only 22 short years. In 1940, a Soviet-staged election led, despite international condemnation, to the annexation of Lithuania by the Soviet Union. The U.S. Government has never recognized this intolerable act, and the Soviet Union's complete disregard for Lithuanian national sovereignty and self-determination. To this day we maintain diplomatic relations with the exiled representatives of the former independent government.

Under the current Soviet puppet government, the people of Lithuania have suffered many hardships. The Soviets employed mass deportations in an attempt to break their national resolve. Civil and human liberties have been denied and Lithuanian literature has been suppressed in an effort to destroy their sense of national identity. The Lithuanians' only solace in the face of these indignities and injustices is the support of all free nations for their continuing determination to be free.

I feel honored to have the opportunity to speak on the Lithuanian people's behalf in recognition of their courage and resolve. They are a source of inspiration, and a reminder of the indomitability of the human spirit which struggles for liberty and justice even under the oppressive yoke of an unyielding totalitarian authority. I hope that you will join me today in voting for House Joint Resolution 409, and that on February 16, 1986, the 68th anniversary of the Declaration of Lithuanian Freedom, we will join together in assuring the brave people of Lithuania that they are not forgotten, and that all America shares their cherished hope of an independent Lithuania.

Mr. HANSEN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of the resolution (H.J. Res. 409) offered by our colleague, the gentleman from Illinois [Mr. RUSSO]. At a time, when United States-Soviet relations continue to be in the forefront of our thoughts and activities, let us remember the courageous struggle of the Lithuanian people. House Joint Resolution 409, which calls upon the President to proclaim February 16, 1986, as "Lithuanian Independence Day," is a befitting reminder of our duty to the fundamental ideal of freedom.

The small state of Lithuania continues to sag under the weight of Soviet oppression. Attempts at self-expression, through the unique Lithuanian culture, are cruelly stifled, and all religious expression is tightly controlled. Yet, Lithuania's citizens continue to persevere in their struggle to regain their nation. February 16, 1918, is for them the most important event in

their lives—it marks their freedom as a people until the Soviet takeover in 1940. Thus, it is important that this commemoration of the Lithuanian National Day is marked by us as well, so that the flame of freedom will continue to burn brightly.

Mr. Speaker, I urge our colleagues to support this measure, and to join all freedom loving Lithuanians in their celebration of this momentous date.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 409

Whereas February 16, 1986, marks the 68th anniversary of the declaration of independence of Lithuania;

Whereas on February 16, 1918, the Council of Lithuania, the sole representative of the Lithuanian people, in conformity with the recognized right to national self-determination, proclaimed the restitution of the independent and democratic state of Lithuania and declared rupture of all ties which formally subordinated Lithuania to other nations;

Whereas a free Lithuania existed until the Soviet takeover in 1940;

Whereas the United States opposes tyranny and injustice in all forms and supports the cause of a free Lithuania;

Whereas the oppressed people currently living in Lithuania should keep the flame of freedom forever burning in their hearts: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President shall issue a proclamation designating February 16, 1986, as "Lithuanian Independence Day" and calling on the people of the United States to celebrate such day with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CELEBRATING 75TH ANNIVERSARY OF NATIONAL CAMP FIRE ORGANIZATION

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate concurrent resolution (S. Con. Res. 69) to recognize the National Camp Fire Organization for 75 years of service, and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Reserving the right to object, Mr. Speaker, I do not object but would like to inform the House that the minority has no objection to the legislation now being considered.

Under my reservation, I yield to the gentleman from Missouri [Mr. WHEAT] chief sponsor of House Joint Resolution 298, to recognize the National Camp Fire Organization for its 75 years of service.

□ 1155

(Mr. WHEAT asked and was given permission to revise and extend his remarks.)

Mr. WHEAT. Mr. Speaker, the members of Camp Fire, Inc., have asked me to express their appreciation for your interest in their work and support of their efforts throughout our Nation.

I also want to thank my colleagues who joined in honoring Camp Fire, Inc., by cosponsoring House Joint Resolution 298. Camp Fire, founded in 1910, has offered boys and girls an opportunity to learn the social and self-reliance skills necessary for them to realize their best potential.

In the more than 300 local councils, Camp Fire provides a wide range of opportunities. In its 75 years, the organization has grown from a girls social club to an organization that allows all children, of any race, ethnic origin, religion, creed or gender an opportunity to realize their full potential, to function as caring individuals and to strive for the best society possible.

Camp Fire has taken its role in the community seriously. It offers a variety of programs ranging from a traditional club setting with a small group meeting weekly in a member's home under the supervision of an adult leader, to specialized programs designed to meet emerging community needs.

Camp Fire local councils have taken an active role in seeking improvement of societal conditions affecting youth through its advocacy in areas including day-care, youth employment, nutrition, juvenile justice, and sexual abuse of children. It has also developed special programs for exceptional children, migrant children, and the economically disadvantaged.

In my district, for instance, Camp Fire has worked with the Kansas City schools, other community organizations and parents to establish an after-school program at a number of schools in the region for interested children.

Thank you for joining me in celebrating the first 75 years of Camp Fire as we look forward to Camp Fire's next 75 years of service to the future generations of young people.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 69

Whereas the National Camp Fire Organization is celebrating its seventy-fifth anniversary during 1985;

Whereas Camp Fire has chosen to commemorate this significant anniversary in a national celebration of friendship;

Whereas Camp Fire councils offer young people opportunities to develop important friendships through informal educational programs for youth through the age of twenty-one;

Whereas in Camp Fire, recognition of accomplishments is combined with encouragement to use developing skills in service to others in the community; and

Whereas Camp Fire is to be commended for the opportunities for friendship the program offers young people throughout the Nation, and for the many services young people perform for the community as Camp Fire members: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress hereby recognizes the seventy-five years of service given by Camp Fire to the Nation.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

ETHNIC AMERICAN DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 32) to authorize and request the President to designate September 21, 1986, as "Ethnic American Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from Florida [Mr. FASCELL], who is the chief sponsor of House Joint Resolution 331, to designate September 21, 1986, as Ethnic American Day.

Mr. FASCELL. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of Senate Joint Resolution 32 which is identical to House Joint Resolution 331, which I introduced on June 27 and which has 144 cosponsors in the House. Senate Joint Resolution 32, which passed the Senate unanimously on May 16, designates September 21, 1986, as "Ethnic American Day."

By enacting this resolution, we as representatives of this great Nation of immigrants will convey to the world our pride in the vibrant cultural heritage that ethnic Americans have given to the United States. The passage of this resolution will convey to all the

pride we take in our cultural diversity, and it will show how highly we value the contributions of Americans of various ethnic backgrounds to our democratic society.

There probably isn't a country in the world today which hasn't contributed at least one citizen to the United States. Our citizens come from the four corners of the Earth. Since the early 19th century, more than 50 million immigrants have found their way to America. Many left their homelands for another chance at life—a life free from spiritual or material deprivation. However downtrodden, they shared one dream: achieving a better life in America.

Ethnic Americans have enhanced the values of a society devoted to freedom and cultural pluralism. They have been full and active participants in the life of this country, not only in time of peace but also in time of war. They have not, however, forgotten their roots. In America, millions of immigrants and their descendants are given the opportunity to perpetuate their diverse and distinct cultures and heritages. Many speak their native language and retain close ties with their old culture. Such cultural diversity is important in the development and enrichment of American society. It is in our interest to have an understanding of the depth and breadth of these contributions. A day in recognition of the contribution of the over 100 ethnic groups in the United States can only help to expand our awareness of each other—and to encourage us to look into and appreciate our own ethnic heritage or heritages. In looking toward the future, it is essential that we understand and appreciate our past. Daniel Webster once said that, "There is a moral and philosophical respect for our ancestors which elevates the character and improves the heart." One might say that understanding the cultures of our forefathers helps us view reality for a multidimensional perspective. Of course, measuring the contribution of ethnic Americans is like measuring flour to bread—it is, indeed, difficult to separate out. It is the thread from which the American cloth is woven.

Not only are ethnic Americans free to foster their respective traditions, they are free to manifest concern about conditions in their countries of origin, particularly those in which repressive regimes stifle the human rights of their former countrymen. In demonstrating this concern, they make an especially valuable contribution in that they remind all of us that we must never take for granted the principles of liberty and justice upon which our Nation was founded.

I, like many of you here, am a descendent of immigrants who came to this country seeking freedom and opportunity and a better life for themselves and their children. And like you, I am proud of the sacrifices they made and the enduring contributions they made to this great society.

The list is legion: Medicine, science, the arts, philosophy, education, politics, government—there is not a human activity which has not benefited from the contributions of immigrants and their succeeding generations. Perhaps their greatest contribution has been the appreciation for this Nation and its institutions which they have instilled in their children. And, as this is passed on to our children, in a sense their sacrifices and contributions are never ending. Their legacy will carry on from one generation to another.

Mr. HANSEN. I appreciate the remarks of the gentleman.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from New York [Mr. GARCIA], the distinguished chairman of the subcommittee.

Mr. GARCIA. I thank the gentleman for yielding.

Mr. Speaker, I am pleased that we are bringing this resolution to the floor today. We are a nation of immigrants. America is made up of a variety of ethnic groups. I am proud of my heritage, as I'm sure, all of my colleagues are proud of theirs.

Yet, this resolution does not simply choose to honor ethnic Americans. It also reminds us that the United States has long been a haven for victims of "religious and political persecution."

As chairman of the North Atlantic Assembly's [NAA] Civilian Affairs Committee, I have become more aware of the many millions of people in Eastern bloc nations who do not have the opporunity to worship or express themselves as they please. One of the committee's subcommittees monitors the Helsinki accords, so we are constantly made aware of the struggle of eastern Europeans.

Of course, eastern Europeans are not alone in their suffering. Latin America, Asia, and Africa all have victims of human rights abuses. Throughout my travels as a member of the House Foreign Affairs Committee, I have come to appreciate, even more, the haven that the United States has offered for millions of people for the last 200 years.

I want to thank my colleague from Florida, DANTE FASCELL, for introducing this resolution. As chairman of the House Foreign Affairs Committee, as the former Chairman of the Helsinki Commission, and as an ethnic American, he too has a heightened sense of what this Nation represents.

Mr. HOYER. Mr. Speaker, today I rise to join my respected colleague from the State of Florida, the chairman of the Foreign Affairs Committee and a leader in the Congress on the issue of human rights, in support of Senate Joint Resolution 32 designating September 21, 1986, as "Ethic American Day." The purpose of "Ethnic American Day" is to recognize and honor the contributions made by all ethnic Americans to our Nation and to recognize the uniqueness of our Republic—a Republic in which national unity is enhanced by ethnic and cultural diversity.

The accomplishments of ethnic Americans have been readily apparent in all aspects of life in our country since its founding days. The district heritages and cultures which make up our history have been and still are vital in the development of American society. Indeed, without them, America's richness, in terns of its technology, economy, political structure and spiritual strength, would not exist.

As cochairman of the Commission on Security and Cooperation in Europe, I am constantly reminded of the fact that the millions of immigrants who come to our shores and make a new life for themselves do so out of the desire for freedom and opportunity—desires which are stifled in a number of countries. Here their cultural heritage can flourish. The 1980 census identified the foreign ancestry of more than 188 million Americans. This is approximately 83 percent of our population. Indeed, the United States is a nation of immigrants. In my home State of Maryland more than 2 million citizens claim the heritage of a single ethnic group, and yet, equal to a pride in their heritage is their love for America.

A day set aside in recognition and appreciation of this great body of people—people who to a large degree make up the very essence of this country—would display to all at home and abroad a pride in our many heritages, a passion for the freedom upon which our Government rests, and an awareness that the strength of our national unity lies at least in part on our cultural heritage and diversity. Let us now join together in establishing September 21, 1986, as "Ethnic American Day".

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 32

Whereas the United State of America is a haven for victims of religious and political persecution and for those who seek freedom and opportunity;

Whereas the United State of America has welcomed oppressed and deprived persons and granted them refuge and citizenship;

Whereas enthnic Americans love the United States of America and have shed their blood in defense of America and its freedoms;

Whereas enthnic Americans have made outstanding contributions in the fileds of agriculture, labor, arts, science, medicine, business, and government, and to the quality of life in these United States; and

Whereas designation of an "Ethnic American Day" would contribute to a greater appreciation of the rich ethnic heritage of this

Nation and to the unity of all its people: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate September 21, 1986, as "Ethnic American Day" and to call upon the people of the United States to acknowledge and advance mutual understanding and friendship among all Americans regardless of their ethnicity.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SAVE FOR THE U.S.A. YEAR

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 436) to designate 1986 as "Save for the U.S.A. Year," and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 436

Whereas $200,000,000,000 of the United States Federal deficit is owed to foreign interests;

Whereas in 1985 the debt owed to foreign interests has caused the United States to become a net debtor nation for the first time since World War I;

Whereas the debt owed to foreign interests will reach $1,000,000,000,000 by 1990, with accompanying annual interest payments to foreign creditors of $100,000,000,000;

Whereas the people of the United States are not saving enough to meet the investment needs of the United States, including the financing of the Federal deficit;

Whereas the United States is becoming increasingly dependent on foreign capital;

Whereas the sale of savings bonds issued by the United States in 1985 will result in savings of $2,000,000,000 to the taxpayers of the United States as a result of lower interest costs to the Federal Government;

Whereas an increase in savings by the people of the United States will help reduce the Federal deficit and alleviate the substantial dependence by the United States on foreign capital: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(1) 1986 is designated as "Save for the U.S.A. Year";

(2) the President, when next addressing the Congress on the State of the Union, is requested to initiate a nationwide campaign, to be known as the "Buy Back America" campaign, for the purpose of encouraging the people of the United States to buy savings bonds and savings certificates of the United States in order to reduce borrowings from foreign sources; and

(3) the Secretary of the Treasury is requested to issue, under section 3105 of title 31, United States Code, savings bonds and savings certificates with such maturity dates, discount rates, and interest rates as will enhance the marketability of such bonds and certificates.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: Page 2, line 12, strike out "and".

Page 3, line 3, strike out the period and insert in lieu thereof "; and".

Page 3, after line 3, insert the following new paragraph:

(4) the Congress should actively support all United States savings bond programs by—

(A) endorsing such programs and conducting a thorough campaign among congressional staff and other employees of the House of Representatives to inform such staff and employees of the benefits of such programs; and

(B) informing all constituents of the benefits of such programs and urging all constituents to support such programs through the regular purchasing of United States savings bonds.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York [Mr. GARCIA].

The amendment was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL JAYCEE WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate Joint Resolution (S.J. Res. 213) to designate January 19 through January 25, 1986, "National Jaycee Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from Missouri [Mr. YOUNG], who is the chief sponsor of House Joint Resolution 447, to designate the week of January 19 to 25, 1986, as "National Jaycees Week."

Mr. YOUNG of Missouri. I thank the gentleman for yielding.

Mr. Speaker, today we are considering House Joint Resolution 447, legislation to designate the week of January 19, 1986, as "National Jaycees Week."

I would like to commend Chairman GARCIA and Mr. HANSEN, the ranking member of the Subcommittee on Census and Population, for recognizing the urgency of this resolution and bring it to the floor.

Due to the fact that this commemorative week would begin on January 19, 1986, and the House will not begin the 2d session of the 99th Congress until January 21, the House is under pressure to approve this resolution by the end of the year. The Senate version of "National Jaycees Week" was passed on November 4, 1985.

Founded in 1920 in St. Louis, MO, The U.S. Jaycees (or the Junior Chamber of Commerce, as it was known then) have a long history of community involvement. Currently, there are more than 268,000 Jaycees in 6,500 chapters throughout all 50 States and the territories.

The Jaycees welcome young men and women between the ages of 18 and 36 as members. These young people are involved in education, assisting the elderly, fundraising for the handicapped and disease research, in addition to other programs and projects that address community needs and problems. Many of the Jaycees programs provide help and assistance that might not otherwise be possible.

Congratulations to the Jaycees on 65 years of community service, and I know that we are all looking forward to another 65 years of success!

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 213

Whereas the United States Jaycees and its affiliated State and local organizations, have set aside the week of January 19 through January 25, 1986, to observe the founding of the Jaycees sixty-six years ago; and

Whereas the civic bodies and service organizations of our community and the departments of government recognize the contributions to the United States by the Jaycees; and

Whereas this organization of young people has contributed materially to the betterment of the United States through such programs as Individual Development

and Community Service for the past year; and

Whereas more than two hundred and sixty-eight thousand Jaycees in six thousand five hundred and fifty chapters in our fifty States serve this time honored ideal in a modern setting, dedicating their free time to faith, brotherhood, and freedom, and the service of their fellow citizens: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of January 19 through January 25, 1986, is designated as "National Jaycee Week". The President is requested to issue a proclamation calling upon the people of the United States for the observance of this week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolutions just considered and adopted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 192, NATIONAL DAY OF REMEMBRANCE OF MAN'S INHUMANITY TO MAN

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 328 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 328

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 192) to designate April 24, 1985, as "National Day of Remembrance of Man's Inhumanity to Man" and the first reading of the resolution shall be dispensed with. After general debate, which shall be confined to the resolution and which shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Post Office and Civil Service, the resolution shall be considered for amendment under the five-minute rule. At the conclusion of the consideration of the resolution for amendment, the Committee shall rise and report the resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the resolution and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

CALL OF THE HOUSE

Mr. MOAKLEY. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

□ 1220

The SPEAKER pro tempore (Mr. GRAY of Illinois). On this rollcall, 408 Members have recorded their presence by electronic device, a quorum.

Pursuant to the rule, further proceedings under the call were dispensed with.

NATIONAL DAY OF REMEMBRANCE OF MAN'S INHUMANITY TO MAN

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts [Mr. MOAKLEY].

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri [Mr. TAYLOR], for the purposes of debate only, and pending that I yield myself such time as I may use.

Mr. Speaker, House Resolution 328 is the rule providing for the consideration of House Joint Resolution 192, which would designate April 24, 1986, as a National Day of Remembrance of Man's Inhumanity to Man.

Mr. Speaker, House Resolution 328 is an open rule that provides for 1 hour of general debate, equally divided between the chairman and ranking minority member of the Committee on Post Office and Civil Service. The rule also makes in order one motion to recommit.

Mr. Speaker, House Joint Resolution 192 as amended, designates April 24, 1986, as a national day of remembrance of man's inhumanity to man, in memory of all victims of genocide, especially the 1.5 million in Armenian ancestry who were victims of the genocide perpetrated by the Governments of the Ottoman Turkish Empire between 1915 and 1923.

Mr. Speaker, House Joint Resolution 192 was previously considered under suspension of the rules on June 4, 1985, when the House voted 233 to 180 in favor of House Joint Resolution 192. Because the resolution did not receive the required two-thirds vote for passage, a request was made from the Committee on Post and Civil Service to grant a rule for the consideration of the House Joint Resolution 192. Since that time, Mr. Speaker, an amendment was adopted which clarifies the historical record and removes any suggestion that the modern Turkey Government was involved in the tragic events of 1915 through 1923.

Mr. Speaker, the murder of 1.5 million Armenians was the first genocide of the 20th century. Many of the survivors are still alive. Because their trauma has been largely forgotten, other peoples throughout the century have had to suffer through further genocides. Not too many years after the Armenian genocide, Adolph Hitler decided he could get away with the extermination of 6 million Jews because as he put it, "who still talks nowadays about the extermination of the Armenians?"

Mr. Speaker, by setting aside this day, we will acknowledge the pain and suffering of the men, women, and children who died for no other reason than the fact they were Armenians. We owe it to Armenian survivors as well as to the memory of those who were killed to remember this tragedy and to learn from it.

I urge my colleagues to vote for House Resolution 328 and to support the passage of House Joint Resolution 192.

□ 1230

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, House Resolution 328 should be defeated.

This rule brings to the floor of the House a commemorative resolution that will mean nothing but trouble for U.S. interests in a very strategic corner of the world.

On the basis of its substance, House Joint Resolution 192 should not be brought to the floor. That is why this rule should be defeated, and that is why I will attempt to do so.

The commemorative resolution made in order by this rule is guaranteed to strain our bilateral and treaty relationships between the Republic of Turkey and its passage might well lead to an outright rupture of diplomatic ties.

As one who is concerned about our future security interests and our association with Turkey, I can see no good reason for us to even debate House Joint Resolution 192.

Mr. Speaker, Turkey is one of our most valuable allies in the cause of peace and freedom and is one of the most important members of the North Atlantic Treaty Organization.

The resolution made in order by this rule is offensive to the Government of Turkey, it is offensive to the people of Turkey, and it is not a constructive way for the Congress to honor the ancestors of American Armenians.

We have only a few days' worth of floor time available before the recess, and the fact is this resolution will require several hours of debate under the 5-minute rule. The best thing to do is to defeat this rule.

Mr. Speaker, if this rule is not defeated, I fully expect that the normal legislative process will require several hours. This measure was defeated last year on the floor of the House in May, and it has not gotten any better.

Mr. Speaker, House Joint Resolution 192 designates April 26 as a day of remembrance of man's inhumanity to man, and in doing so it gives recognition to events that occurred nearly 70 years ago in Asia Minor.

Mr. Speaker, there are implications in the way these events are described in the resolution. The subtle wording of the resolution is written in such a way as to cast aspersions upon our faithful ally, the Republic of Turkey.

Most importantly, the view expressed does nothing to heal the differences that have grown over the years between people of Armenian ancestry and people of Turkish ancestry.

House Journal Resolution 192 places this House in the position of ratifying some historical facts in such a way as to favor one point of view over the other, and I do not think we should do that.

It is senseless for the Congress to commemorate something when the words themselves are enough to give cause to mindless terrorism against a nation's citizens and diplomats.

It may be difficult for most Americans to grasp the depth of feeling that has been generated over this resolution. I know it has been difficult for most Members. I do want to take one moment to express a historic parallel that would be appropriate.

Our own Nation was nearly torn asunder 120 years ago as the Civil War drew to a close. General Grant's Union Army had besieged General Lee's troops at Petersburg, VA, and General Sherman's men left a wide swath of bloody destruction as they marched through Georgia and the Carolinas.

I am sure that we could resurrect that event and have a very heated debate on this floor today, but it would not help unite our great Nation now, in the times in which we live, would continue the strain that led to a war for freedom that has bound this great Nation together as the hope of freedom throughout the world.

President Lincoln, perhaps one of our country's greatest Presidents, found a way to reunify our Nation. The President never spoke words more truly characteristic, nor beautiful, than in his second inaugural address.

Mr. Speaker, President Lincoln faced the challenge of rebuilding and preserving the Union on that occasion. Instead of demanding vengeance on the South, he asked for "malice toward none" and "charity for all."

President Lincoln implored our people "to do the right as God gives us the light to see the right." He asked our ancestors "to bind up the nation's wounds." He asked the northern citizens to be merciful, "to do all which may achieve and cherish a just and lasting peace" among ourselves and with all nations.

Mr. Speaker, that is the challenge we have today. Let us bind up our wounds. Let us look to the future, not to the past.

Mr. Speaker, defeat of this rule will not interfere in any way with the right of American Armenians to celebrate whatever day they want. There is a great community of loyal and dedicated Americans of Armenian ancestry in this Nation. We are proud of them. We are proud of the contribution that they have made and will continue to make in building a great America. We do not want to do anything to degrade them. I do not think they want us to do anything that would weaken our resolve as a nation or damage our participation in the North Atlantic Treaty Organization of which Turkey is an integral part.

We do not need the wording of this resolution. It does not treat the people it mentions in an evenhanded and equal way. We do not need the wording of this resolution. It is based on a desire to seek vengeance.

Mr. Speaker, we do not need the wording of this resolution. It does not seek to bind up the wounds of nearly 70 years ago. The Congress of the United States should look to the future, not to the past. This resolution does not do that.

Mr. Speaker, I urge defeat of this resolution.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from New

Mexico [Mr. RICHARDSON], for the purpose of debate only.

Mr. RICHARDSON. Mr. Speaker, first, I would like to say that my ignorance on this issue is massive. Second, I wonder if we are doing the right thing in discussing this sensitive, emotional issue in this manner.

In the past, I have supported the Armenian position. I have many Armenian friends who are very emotional about this issue, and rightly so. There was a massive genocide and Armenians rightfully deserve an expression of outrage and justice.

On the other hand, Turkey claims that passage of this legislation will sincerely harm United States-Turkey bilateral relations and cause potential anti-Armenian terrorist activity. The most distinguished Ambassador Elekday of Turkey personally visited me, and explained his grave concern. Turkey is a valued and staunch United States ally.

So this bill poses a dilemna, and in the end, I will vote with my Armenian friends, but wondering if this is the best vehicle to achieve this objective of expressing outrage at their genocide. Like any politician, I want to do the right thing but maybe it isn't possible.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes to the gentleman from Alabama [Mr. DICKINSON].

Mr. DICKNSON. Mr. Speaker, the Armed Services Committee of the House had the opportunity to visit Turkey earlier this year. While we were there, we were impressed very much by the concern of the Turkish Government and the people with whom we spoke over this proposed resolution.

You know, I am from the South. My grandfather himself was wounded in the Civil War, the war of northern aggression, as we call it.

So I ask the question, why do we need to go back 70 years and rehash this? What good does it do? Why is it so important to the Turkish people that this resolution not be passed by the House of Representantives?

I was very impressed with the urgency of their cause and their answer. You see, within the past 10 years, there have been approximately 50 Turkish diplomats and other officials assassinated by Armenian terrorists.

There was a long piece on either "60 Minutes" or "20/20," I have forgotten which, just within the past few months on this, documenting these things that I am saying.

They are convinced, and there is a telegram that has been sent to the members of the committee.

Now, this was pointing out that if we do this, what we do is encourage the extension of the terrorism. So the point is, what good does it do? Turkey is an important NATO ally. They have a 400-mile common border with the Soviets. If you count the Black Sea, it is a 1,200-mile common border. We have bases there. They are friends of ours, and to gratuitously insult them and cause a strain in our relations at the present time is ludicrous. What good does it do?

Let us put our interests first for a change. If you want to talk about man's inhumanity to man, let us not aim it at any one thing. Let us talk about 6 million Jews, Gypsies, and others killed in Germany. Let us talk about the decimation of the Indian population in this country by us. Let us talk about 2 million Cambodians killed by their own people.

You could go on down the list if you want to talk about man's inhumanity to man and have a great deal more numbers of people killed.

What we are doing here today is counterproductive. It adds nothing. I do not impugn the motives of anybody that is sponsoring this resolution, but I am saying it is not in our best interests. It is not either strategically, militarily, or any other way. If you made it broad enough to say that we are against all man's inhumanity to man, great; but to single out one segment of NATO, going back to an incident that occurred 70 years ago, what good does it do?

So if it would do some good, if it would be helpful to us, if it would strengthen our NATO alliances, fine, let us do it. If it is counterproductive, let us forget it and go on to something else.

I really think we ought to defeat the rule and go on about some serious business.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. Mr. Speaker, I listened very carefully to my distinguished friend, the gentleman from Alabama. There is no excuse for frustration turning into terrorism, but I have a different viewpoint, that it is just this very fact that the youth of Armenia in each generation as their grandparents tell them of the historical facts of this century's first massive genocide, this frustration, this hurt of the world not acknowledging this in a formal sense, this is what leads some young people to take these horrible, illegal, drastic and murderous moves.

□ 1245

I have never discussed this with the first Armenian to ever hold the Governor's seat in the highest State in the land. I have never discussed it with our Governor's wife, Gloria. I have never discussed it with most of my Armenian friends. It is just a given that in this century, the bloodiest century ever, we cannot forget Cambodia, or the Ukrainian slaughter of six times the magnitude of the Armenian holocaust of the kulak farmers. We can certainly never forget the Holocaust of European Jewry, and as a matter of fact, I went to the dedication of a great and beautiful building that will be a memorial to those that we must never forget that were killed by a Nazi power that we shed our blood to overthrow on the other side of the world.

Why did this Congress strike a gold medal to Elie Wiesel, a philospher that has survived the extermination camps of Nazi Germany? Because of one thought Elie Wiesel always put forward: We cannot forget.

If I thought that memorializing and recognizing the Armenian holocaust in the early part of this bloody century was going to hurt NATO, I would seriously consider not bringing it up, because of the living, because of the people that are here today that must be defended from the Soviet threat. But I have talked to distinguished diplomats from our great ally in Turkey, and they say, like so much in foreign policy, one thing publicly and another thing privately. And the diplomats have conceded to me privately that the shame is on the Ottoman Empire that existed precisely 400 years to the day that the hero of modern Turkey, who pulled their country centuries forward into the 20th century, the hero of it took on the name Ataturk, father of the Turks, grandfather of the Turks, and in American newspaper interviews admitted that the decadent Ottomans had performed this horrible genocide, the first in history that passed the horrible figure of a million.

I think that our relationship with Turkey is too strong to let the recognition of a historical fact, as I will always do on the Cambodians that suffered, over 2 million, maybe 3 million, the Jews that suffered, over 6 million Jews of Europe, and the Ukrainians that suffered, maybe over 7 million under the killer Josef Stalin. I think we must fairly recognize for our American Armenians and Armenians everywhere that a great country once existed that has been chopped into pieces, and that it involved a genocide by design of over a million people, a million and a half.

Mr. TAYLOR. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. SILJANDER].

Mr. SILJANDER. Mr. Speaker, 70 years ago, there was a genocide, Armenians were killed, Turks were killed. It was a bloody period in history.

Some say that we should acknowledge this, we should not be bashful that this happened. The House did in 1973 and passed and enacted a resolution dealing with Armenian genocide. This House, without the Senate concurring, did in 1984. So it is not as though it has gone unnoticed by this Congress.

Many things have changed, however, since the House and the Senate in 1973 and 1984 passed these resolutions. Turkey has become a democracy, an incredibly progressive democracy. They have become our most strategic, strongest ally in NATO. They border Iran, Iraq, Syria, Bulgaria, and the Soviet Union. They have open-armed asked us to come in with key strategic surveillance stations in Turkey, NATO headquarters, United States military base.

Do not take it for granted. In 1974, with the arms embargo, Turkey nearly closed and kicked the Americans out. So it is not as though they are reliable, predictable. They are our ally, but it is not as though that no matter what we do, they will stand by our side.

We have to realize this is an insult to the present Turkish Government for a sin committed 70 years ago by the Ottoman Empire.

They are an ally. We do not want to provoke, encourage in any way the Armenian terrorists who have already perpetrated 50 murders of Turkish diplomats.

This, my colleagues, is a mistake. This is the wrong time to engage in a very blatant, obvious, directed attack on the present Government of Turkey.

They claim they will not take it that way. It is not an attack on this present government, but the reality is the feelings are in Turkey, where it counts, that it is. Perception is all in politics, and this is being taken and perceived, and said time and time again by the Ambassador to Turkey that this will hurt American relations with our key ally, and I urge a "no" vote.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the gentleman from California [Mr. LEHMAN].

Mr. LEHMAN of California. Mr. Speaker, I believe we have a resolution before us that is obviously of great importance to many people who are in this room, and to many Americans around the country. I support this resolution, primarily because I personally have heard the stories by the survivors of the Armenian genocide and know what passage of this resolution means to them.

What passage of this resolution means is simply that all of the victims of genocide will be recognized, and specifically that the victims of the Armenian genocide will not be forgotten.

Passage will also confirm the historical accounts of this massacre which, if you recall from special orders given many times on this floor, have been amply described. The events which took place in the Ottoman Empire by Ottoman Turks have been chronicled in historical archives in our country and in others around the world.

Thus, the only purpose of this resolution is to ensure that the genocide of 1.5 million Armenians is recognized and recorded, nothing else.

Does anyone in this Chamber honestly believe that hundreds of thousands of Armenians just got up and left the land they lived in for 2,500 years because they read about America in a travel magazine? Of course they did not. They were murdered, and they were driven from their land, and no competent historian will refute this.

Our Ambassador at the time in Turkey, Henry Morgenthau, wrote a book about it. Winston Churchill chronicled it, and just as the gentleman from California [Mr. DORNAN] just said, Ataturk, the founder of the great modern Turkish Nation, acknowledged that the genocide occurred and said it ought to be acknowledged by other Turks.

Mr. Speaker, today we have some Members in this House who tell us that passage of this resolution does more than resolve a question of historical fact. We have heard that passage will harm the current-day relations that this country has with the current government of Turkey. Some would even have us recognize genocide based on the length of a country's border with the Soviet Union.

As the supporters of this resolution and I have stated numerous times, passage of this resolution is an attempt to let the Americans of Armenian descent see that the period in time when their relatives were driven from their homes and murdered is honored and recognized.

I stand here today to see that this resolution passes, not to incriminate anyone in the present Government of Turkey. The present-day Turkish Government has no more responsibility for the actions of its predecessors than does the present-day Government of West Germany for the action of the Third Reich. But West Germany does not protest that recognizing the Holocaust offends them and will harm their relations with the United States.

I suggest that the Government of Turkey should show the same kind of courage and quit hiding behind the skirts of their friendship with us on this issue. The Turkish Nation today is our ally and our friend and we are glad of that. When the genocide took place, they were our foe, allied with imperial Germany in the First World War. I know we do not deny that a war took place today because the Turkish Government might not like to admit the side that they were on, and we should not deny that the genocide took place either. We should not rewrite history every time it suits our fancy because we have some temporary foreign policy objective that will be served and work to our benefit by doing so.

To defeat the rule and not allow us to debate this resolution on the floor today is, in my opinion, a cowardly act and not worthy of this great body. I hope Members of this House will consider the strong statements in support of this resolution and give us a rule and debate the issue.

Mr. TAYLOR. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. ECKERT].

Mr. ECKERT of New York. Mr. Speaker, I rise in strong opposition to the rule and the resolution.

Mr. Speaker, Congress often passes commemorative resolutions as a gesture to this or that group because the cost is low and the benefits of public recognition for a deserving cause are high. In the case of the Armenian genocide resolution, however, there is no real benefit and there is a real cost.

It may seem that this legislation merely acknowledges the suffering of the Amenian people during the events of 1915 and thereafter. But it goes well beyond mourning Armenian losses during a very complex and confused time; it makes a direct accusation of genocide against the Ottoman Turkish Empire. There is historical evidence of Ottoman atrocities against the Armenian people, just as there is ample evidence of atrocities on the part of many groups in the region, including Armenian terrorists. But it is not at all clear that the events warrant an accusation of genocide. In a region where the confusion and anarchy of warring factions and ethnic conflict led to a situation that can be compared to Lebanon's, such a direct moral statement may not be appropriate. Deciding who was to blame for what during this period is a task more for historians than for Members of Congress.

The resolution goes well beyond making a questionable historical statement; it has ramifications that are of direct relevance to our relations within NATO today. In the 11 years since the Armenian terrorist campaign against Turkey began, more than 50 Turkish citizens, including many Turkish diplomats, have been murdered. Passage of this resolution would encourage Armenian terrorism; after each murder, the terrorists have claimed the alleged genocide as their justification. Turkey's Ambassador to the United States, Sukru Elekdag, has already received death threats in connection with his efforts to make the case against this resolution.

The President strongly opposes this resolution. In stating the administration's case against it, Secretary of State George Shultz noted that "[Armenian] terrorists have harassed and bombed Americans who disputed the genocide charge and lent support to fellow terrorists attacking and kidnaping our personnel in Lebanon. Adoption of House Joint Resolution 192 would inevitably be seen by these and other terrorists as a vindication and reward for their vicious campaign."

Turkish citizens are upset and worried about the implications of this bill, and justifiably so. As a former U.S. diplomat, I

know that passage of this resolution would be regarded as a decided foreign policy statement by this body, not merely as a commemoration of a historical tragedy. The Turkish people must regard it in that way; they will be the victims of the increase in terrorist activity sure to result from this bill.

The U.S. Ambassador to Turkey, Ambassador Robert Strausz-Hupe, also expressed this point of view in a recent cable in which he wrote that "the passage of this resolution will be regarded by all Turks, whether members of the Government or the opposition * * * as a gratuitous insult to a country and people that regard themselves, with much justification, as loyal allies and steadfast friends of the United States."

Secretary Shultz has said that the—

Terrorist campaign has transformed the genocide issue into a nationalistic, emotional matter for all Turks. Passage would generate an immediate reaction against the United States in Turkey. Turkey is a staunch NATO ally which fought with us in Korea, fields NATO's second largest army, guards the straits separating Soviet Black Sea bases from the Mediterranean, and provides military and other facilities vital to our security. It does not serve our national interest to harm this important relationship, particularly when we are consulting with Ankara on the future of our bases in Turkey.

Mr. Speaker, passage of this resolution may lead to many unnecessary deaths. It would damage our relations with a trusted ally in a turbulent part of the world. It should be defeated.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes and 30 seconds to the gentleman from from Kentucky [Mr. HUBBARD].

Mr. HUBBARD. Mr. Speaker, I rise in strong opposition to House Joint Resolution 192.

I ask my colleagues why, yes, why this resolution must be considered twice during 1985 by the U.S. House of Representatives? Just this past June 4, the House failed to suspend the rules and pass the same resolution.

We are here today, December 12, less than 2 weeks from Christmas with a Saturday session this week a probability because of the crowded end-of-session calendar, and we are taking up this House Joint Resolution 192 in an effort by some Members of the House to embarrass an important ally: Turkey.

There is no doubt in my mind that the tragic genocide of 1.5 million Armenians between 1915 and 1923 was indeed a horrible, terrible happening. But Members of Congress, could we remember that this is 1985? Turkey is an important NATO ally. Turkey borders the Soviet Union for nearly 400 land miles.

Turkish Prime Minister Turgut Ozal and Ambassador Sukru Elekdag, the members of the Turkish General Assembly, millions of people in Turkey today and thousands of Turkish Americans had nothing to do with what happened between 1915 and 1923.

The State Department strongly opposes this resolution. The Defense Department remembers that Turkey fought with us during the Vietnam war.

What would Americans in your hometown and mine think if we read every year that the Turkish General Assembly passes a resolution intending to embarrass the United States because of our treatment of Indians centuries ago, or because, regrettably, there was a time in American history when blacks in my hometown and in too many areas of the United States were slaves?

During my 11 years in Congress, I have traveled abroad very little. I was in Turkey this past August for 3 days. Dozens of Turkish leaders, including Turkish Prime Minister Turgut Ozal, expressed to me, as they have other Members of Congress, their very keen and bitter disappointment that the U.S. House of Representatives would continue to consider this resolution year after year to embarrass Turkey.

Does it not make sense that Members of the U.S. Congress should be trying to be friendly to Americans of both Armenian and Turkish descent?

Mr. Speaker, just today, right now, questions are mounting fast regarding how a DC-8 military charter plane exploded enroute from the Middle East to the United States carrying 258 soldiers from my district, Fort Campbell, KY. Another act of terrorism? Remember, this plane exploded, some say, before it took off in Newfoundland. Another act of terrorism by the PLO or the PLF?

Today, what a cruel irony of timing for us to be considering this particular resolution about man's inhumanity to man on the day that 258 American soldiers have been killed, perhaps by an act of terrorism, and we would ignore those specialists of terrorism in the Middle East with the PLO and the PLF, and today we would pass a resolution condemning Turkey for something that happened back in 1915 to 1923.

Members of Congress, it is ludicrous for us to pass this rule and this resolution. Please, vote no on the rule and let us get on to some other legislative business.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the distinguished gentleman from New York [Mr. BIAGGI].

Mr. BIAGGI. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I think it is important first to make it perfectly clear that this resolution is not intended to embarrass anyone, most of all the Turkish Government, and the resolution deals not specifically and not exclusively with the Ottoman Empire genocide of the Armenians, but deals with all genocide. It is a resolution dealing with man's inhumanity to man, whether it be Cambodia, whether it be the Holocaust in Germany, whether it be the Ukraine, or whether it be the Armenians in Armenia by the Ottoman Empire.

□ 1300

I think that is a straw man. Why the Government of Turkey is exercised about it, puzzles me, because we do have an excellent relationship as a Nation with the Turkish Government, and I am sure it will endure this resolution.

The fact of the matter is, we have enduring relationships with many countries, and on occasion they fear we may embarrass them, but if the relationship is one of substance, it will survive a resolution of this kind.

The fact of the matter is, we have made several attempts to classify and to designate the murder of 1½ million Armenians, 1916 to 1923, and we have not been successful. That is why we bring this resolution up again.

It is inconsistent with our national policy. We have addressed the Holocaust, we have addressed the Cambodian situation, we have addressed many. We have spoken about the denial and the enslavement of blacks in our own country time and time again, and continue to make reference to it as a point of reference so we can embark on more improved situations.

There is no question in my mind that the resolution should be passed. As it is, to once and for all classify that period of terrorism, of horror; give it its proper characterization. Clearly, it was genocide. Any other characterization would be inaccurate.

We are not alone in this. President Carter in 1978 said:

In the years preceding 1916, there was a concerted effort made to eliminate all the Armenian people, probably one of the greatest tragedies that ever befell any group.

In 1981, President Reagan said:

Like the genocide of the Armenians before it, and the genocide of the Cambodians which followed it—and like too many other such persecutions of too many other people—the lessons of the Holocaust must never be forgotten.

It is simple. Why Members argue that this would embarass the Turkish Government—we are talking about two different entities; we are talking about the Ottoman Empire, we are not talking about the Turkish Government.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from New York [Mr. GREEN].

Mr. GREEN. Mr. Speaker, I rise in support of the rule and the bill, and I rise particularly to address the question: Why today should we be considering this bill?

I think that there is a real reason that is embodied in the old statement, that those who do not learn from history are doomed to repeat it.

As President Reagan said in his Presidential Proclamation 4838 on April 22, 1981:

> Like the genocide of the Armenians before it, and the genocide of the Cambodians which followed it—and like too many other such persecutions of too many other people—the lessons of the Holocaust must never be forgotten.

We seek to memorialize the Armenian genocide in an effort to sensitize ourselves and the rest of the world so that those kinds of events do not happen again. I think that that purpose is in the long run more important than any self-inflicted embarrassment that the present Turkish Government may feel about this resolution, because it is not addressed to the Republic of Turkey at all; it is addressed to events that occurred under the Ottoman Empire, and were openly acknowledged by the first government of the Republic of Turkey as one of the reasons that they had overthrown that decadent empire.

The lessons of those events are important. It is important to keep them on people's consciousness. It has been said that Hitler, when someone suggested to him that world public opinion would be hostile if he proceeded with his so-called "final solution of the Jewish problem," commented, "Who remembers the Armenians?"

I think it is important to say that we remember the Armenians, and I think it is important that the whole world remember the Armenians as it remembers the Holocaust.

We have reached a point where the last survivors are now very elderly, and the direct witnesses to those terrible events will soon no longer be with us. So I think it is doubly important that at this time we recognize that event, because that is the only way we have any chance of preventing other terrible events like that in the future.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes to the gentleman from Utah [Mr. HANSEN].

Mr. HANSEN. Mr. Speaker, a lot of people have been coming up and talking on the floor, saying this is not going to hurt anything, it is not intended to hurt anybody, we are really not out to get anybody here, we love everybody at the time of Christmas; there is peace on Earth, good will toward men.

What happens is that I do not think that we are capable or have the ability or have the intelligence to superimpose our legislative thinking to determine what really happened a few years back, and when they say it is not intended to do this, Mr. Speaker, it should not hurt anybody. Let us see what the Turks have to say about that. These are the people we are talking about. We are not talking about Members of the U.S. Congress, and here happens to be a telegram from a man who ought to know; he happens to be our Ambassador over there; he is the extension of the arm of the administration; he is the man that gets the feeling for this, let us see what he has to say:

The American Ambassador says:

> I can assure you that the passage of that resolution will be regarded by all Turks, whether members of the government or of the opposition, and whether prominent personages or simple peasants and townspeople, as a gratuitous insult to * * * the people of this country.

Mr. Speaker, what we have to do today is just simply say, "What do we gain from this?" The answer is, nothing. What do we lose? It has been articulated very well; we lose a good NATO ally, we lose our friends. Secretary Shultz says we should not do this, the administration says we should not do this.

We have, and Members should all read it, from the Turkish Grand National Assembly, the statement:

> The adoption of such a resolution will constitute a heavy blow and harm irreparably the friendly relations between our two countries.

Now, what will we gain from this thing? This is a commemorative. What are commemoratives for? Pete Rose, Boy Scouts, things we have handled today; and now we are saying, "But we are going to insult one of our best allies over this."

Again, what do we gain? We gain absolutely nothing. In the 11th hour of this session, I cannot understand why we are talking about this.

Mr. MOAKLEY. Mr. Speaker, may I inquire how much time I have remaining?

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOAKLEY] has 14 minutes remaining.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia [Mr. GINGRICH] for purposes of debate only.

Mr. GINGRICH. Mr. Speaker, I am a very strong supporter of aid to Turkey, and I voted for it consistently; I intend to be a supporter of aid to Turkey in the future.

I originally opposed this proposal, but it is my understanding, and I would like to engage in a brief colloquy with the gentleman from California that this proposal will in fact be amended specifically to point out that we are referring to genocide which occurred in the Ottoman Empire, that it is not a commentary in any way on the current Government of Turkey, but that it is an accurate fact, that it is a real problem, that it is something worthy of our remembering.

I yield to the gentleman from California.

Mr. PASHAYAN. I thank the gentleman for yielding and I thank the gentleman for the position he has taken on this resolution as it would be amended by the committee chairman, the gentleman from Michigan [Mr. FORD].

The amendment will delete the word "in Turkey" and it will say that the genocide was perpetrated by the governments of the Ottoman Empire prior to the establishment of the Ottoman Empire between 1915 and 1923, prior to the establishment of the Republic of Turkey.

Now, I appreciate the gentleman from Georgia's understanding of this, that this is obviously strictly a historical reference, and it precludes in so many words the present Government of Turkey.

Mr. GINGRICH. Let me say exclusively that I can appreciate the sensitivities of all people; and candidly, there are things in American history that undoubtedly are worthy of similar kinds of reference; but it does seem to me that when you have a situation like this, that for us to be overly sensitive to the current Government could apply, for example, to West Germany, where we frequently apply resolutions, could apply in a number of cases.

This is the case where people do have a legitimate grievance, it is a historic event, we are not in any sense discussing the current regime in Turkey or the current Government of Turkey; and as I said earlier, I am a supporter of aid to Turkey and will continue to vote for that aid.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes to the gentlewoman from Maryland [Mrs. HOLT], a member of the Committee on Armed Services.

Mrs. HOLT. Mr. Speaker, we should defeat this rule. The last two speakers pointed out the fact that there will be an amendment offered. That presumes the adoption of the Ford amendment, which would preclude the adoption of the Murtha amendment, which would remove all indication of any ethnic reference from the legislation. I think that tells us something about what is being done here today.

□ 1310

We should defeat this miserable resolution because it is a document of ethnic bias that should have no place on the agenda of this House. Let us bury it. I say let us get rid of it. We demean ourselves in this time of good will by even considering this resolution which causes great offense to our important and courageous ally, the Republic of Turkey. We have heard speaker after speaker indicate that this really is something that is very, very important to the Government of Turkey and to the people of Turkey. I was there at the same time that the gentleman from Alabama was there.

Everybody was talking about it, the people in the street, taxidrivers, everybody. They do not want their ally, the United States of America, slapping them in the face about this particular issue. I think we should honor that. It does no good for our great Armenian-Americans. It recalls a terrible tragedy that occurred 70-odd years ago during that violent, horrible collapse of the Ottoman Empire. The modern Republic of Turkey bears no responsibility for the alleged massacres of Armenians, but it is perceived as aimed at them. This whole resolution is designed to fan the fires of ethnic hatred that have burned for centuries. We should be speaking of healing ancient enmities instead of reviving them. Let the historians debate these things. It is reckless and irresponsible for us to be considering a resolution which provides aid and comfort to Armenian terrorist organizations who have murdered 50 Turkish diplomats and other citizens in various parts of the world in the past 11 years.

I would remind our great Americans of Armenian descent that Armenia is a land under Soviet domination, and the people of Armenia are denied the birthright of liberty which we cherish. That should be our concern.

One of the major Armenian terrorist organizations has the avowed purpose of breaking off a part of Turkey to join it to Soviet Armenia. We should be supporting our ally Turkey instead of dealing with this ugly resolution.

Turkey is not the enemy of the free world. Turkey is a defender of the free world, the southern anchor of the NATO alliance and a country that is very important to our own interests and security.

The Republic of Turkey in recent times has enjoyed a remarkable economic revival because of free-market policies. She has become a stable and strong country in a region of the world notable for political chaos.

It is shameful to be dredging up bitter memories of long ago in a resolution designed to hurt and embarrass our ally, the Republic of Turkey. I urge the House to defeat this resolution.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. I thank the gentleman for yielding.

Mr. Speaker, as has been discussed here today, I wanted to alert the House that I have now finished an amendment that I will offer at the very beginning of the amending process which strikes all of lines 6 through 9 of the resolution and inserts in lieu thereof the following:

For the 1½ million people of Armenian ancestry who were victims of the genocide perpetrated by the Government of the Ottoman Empire between 1915 and 1923 prior to the establishment of the Republic of Turkey.

In doing that, I go further than the amendment originally intended. It originally read: "Ottoman Turkish Empire." The legislative history of this process will now show that we have deliberately removed from the original resolution all references directly or indirectly to Turkey, and then spell out as an additional assurance to the concerns raised by the State Department, that we are talking about events that occurred prior to the establishment of the Republic of Turkey. We are not talking about the current Government of Turkey, which is our ally; we are talking about the time prior not only to the current Government but prior to the establishment of the country.

I do not know how we would be able to make it more clear that there is nothing in this resolution, as there has been nothing in the other resolutions, offensive to our ally.

I would caution people about this: This is the first commemorative resolution that anyone can remember having gone through the rules process. Our committee reports out an average of five to six commemorative resolutions per week. This is the first one, going way back beyond my chairmanship; nobody on the Rules Committee could ever remember considering a rule for one of these. We take them to the floor most of the time, when we have 218 signatures on suspension. They rarely engender this kind of debate.

Mr. TAYLOR. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey [Mr. COURTER].

Mr. COURTER. Mr. Speaker, I think it is a rather ironic affair that the proponents of this amendment admit the fact that it is flawed, and they are saying it is going to be perfected later on during the amending process. It seems to me that if this resolution is a good one, if it deserves to be voted in favor of, it should be brought here in that condition. It should be considered without the proponents of the resolution saying that it is not perfect and needs to be significantly changed during the amending process. That is not the main reason, however, why I oppose the resolution. I oppose the resolution chiefly because it singles out the case of the Armenians in a resolution which begins by referring to all victims of genocide. The bill draws attention to one case, very frankly, at the expense of the others. If it is a resolution with regard to all genocide, it should be generic and should refer to all cases of genocide. If it is a resolution with respect to a particular country in a particular part of the world, so be it. It seems to me it denigrates, it demeans, and makes less significant other terrible acts of genocide that have taken place during the modern history of the world.

It ignores and does not mention what happened in Cambodia shortly after 1975, what happened in Mao's China, what is happening in Afghanistan today, what happened in Hitler's Germany. The resolution is simply wrong in its singularity. It talks about all genocide but then mentions the fact that only one is significant enough to be talked about in this resolution. I think that is an imperfection, and therefore I am going to vote against the resolution.

Also, whether we like it or not, the Turkish Government is looking at this resolution as something that is bad and will create bad blood between our two countries. Turkey, as has been pointed out by the gentleman from Alabama [Mr. DICKINSON] is a crucial NATO ally. Thirty-seven percent of the frontier of the Warsaw Pact is in Turkey. The United States has irreplaceable facilities in Turkey along with electronic intelligence gathering devices.

Mr. Speaker, I urge a "no" vote on this rule.

Mr. MOAKLEY. Mr. Speaker, for the purpose of debate only, I yield 2 minutes to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. Let me read from a State Department bulletin of 1982, if I might: "On April 17 and 24, 1909, over 30,000 Armenians were massacred in Adana and other villages along the Cilician Plains in order to suppress the national ambitions of the Armenian people." Why not recognize that? Here is what we hear today: "Turkey is our ally." So is West Germany. "Because it was a different country." The resolution, especially as amended, acknowledges that. "Because it took place 70 years ago." That has been mentioned several times.

Is there a statute of limitations on memory? This resolution is not anti anything but mass murder. There are few, precious few, issues that should not be compromised; that should not be questions of military bases or of constituencies. Such is an issue as the mass slaughter of a people, Members of the House, of any people.

I urge the passage of this rule and then the resolution.

Mr. TAYLOR. Mr. Speaker, how much time do I have remaining?

The SPEAKER pro tempore. The gentleman from Missouri [Mr. TAYLOR] has 7 minutes remaining.

Mr. TAYLOR. Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. Mr. Speaker, I rise in opposition to the resolution, and, therefore, to the rule.

Mr. Speaker, emotions run higher—far higher than this issue actually deserves. On

the face of it, a resolution to designate a day of remembrance of man's inhumanity to man should not be a controversial issue. Yet this one has become so. It singles out one ethnic group to remember and to grieve for, and one nation to accuse. When many great Americans are of the former group and the latter is an allied friend of our Nation, the result is, unfortunately, explosive.

The slaughter in Armenia, in which over 1 million people died, occurred at a moment of great historical turmoil. Yes, the forces responsible for most of the deaths consisted of soldiers of the Ottoman Empire. But my colleagues, present day Turkish realities have as little to do with the Ottoman Empire as present day Austria represents a mirror of the Hapsburg Monarchy.

This Member has respectfully suggested to our Turkish friends not to read more into this resolution than actually exists. However, given the level of emotions there is little doubt that, no matter how well intentioned, this bill will not change the past; rather it will create unnecessary difficulties in the future.

The resolution's sponsors will tell the House that references to Turkey will be removed from the resolution and that this change should satisfy opponents. The improvement of the bill is appreciated, but my strong opposition to House Joint Resolution 192 arises not from the language but the bill's unintended message. This Member knows full well that it is not the intent of the resolution's designers to alienate and rebuke the moderate democratic Government now in power in Turkey. Further, it is surely is not the intent of the sponsors to offer any encouragement to a small group of Armenians which espouse terrorism and violence.

But actions such as passage of this bill can and certainly will be misunderstood or misconstrued. That is the key point we must consider in the House today: What are the unintended acts and messages which could be stimulated by passage of this flawed resolution?

I urge my colleagues to vote for a substitute that may be offered by the gentleman from Pennsylvania. It is a sensible alternative to language which is detrimental. Indeed it accomplishes the title's intention: To proclaim a day of remembrance for all victims of brutal injustice, genocide, and inhumanity.

Mr. TAYLOR. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, I rise in opposition to the rule, although I do so with mixed emotions, coming from a family of immigrants myself. I understand the high feelings on the other side of this issue.

Mr. HANSEN of Utah asks the real pertinent question: "What is there to gain from doing this?" That is as weighed against what there is to lose. And I think there is a lot to lose.

One can argue that the reaction of the Turkish Government and the Turkish people to this resolution is not rational, that they are reading into it things that are not there. But the fact is, as has already been pointed out, that the perception is, and the perception remains, that this resolution indeed, even as it is proposed to be amended, does insult our ally, the Turkish Government, and the Turkish people.

Contrary to what Mr. DORNAN, my colleague from California said, I have never heard a Turkish diplomat privately say that he has no trouble with this resolution. In fact, I believe that they fear for their very lives should this resolution pass.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from California [Mr. LUNGREN].

Mr. LUNGREN. Mr. Speaker, as a cosponsor of House Joint Resolution 192, I rise in support of the resolution and in support of this rule. My hometown is Long Beach. I believe Long Beach, CA now is the second largest community that has Cambodians living in it anywhere in the world.

Virtually everyone who is from Cambodia living in my area has lost a close family relative. Yet the story of that particular genocide was kept off the front pages, even kept off the back pages. We did not "know" anything about it until it was over, and then we said "How did we ever miss it? Is it not a terrible tragedy? It ought not to happen again."

I think one of the reasons we missed it is because of a lack of sensitivity to the fact that this can happen, this has happened, and, yes, it probably will happen in the future.

We have to be very vigilant about that. We cannot and should not allow history to be rewritten. We should acknowledge what has occurred in history so that we do not repeat its many mistakes. In my home area of Long Beach in California, we have many Armenians as well. I do not think I have ever met a person of Armenian ancestry who has not had a grandfather, a mother, an uncle, an aunt, a relative, or someone close to that family who was lost in the genocide covered by this resolution.

The problem we have is that there has been an attempt to rewrite history over the last number of years. Some think that our relations with Turkey are so sensitive we cannot even admit what occurred during the Ottoman Empire, what happened prior to the establishment of the Turkish Empire, and that somehow if we do that we will be less in the eyes of the world and less in the eyes of the people of Turkey.

□ 1325

And that is why this is so specific. This says that if the President comes forward with a proclamation, that proclamation, in addition to talking about the other instances of genocide, shall mention this one. And those who are against us say, "Well, that is what is wrong with the resolution, it is only specific to this instance."

That is because we want this instance mentioned in the category of all of them when the proclamation is brought forward. In a sense, we are forced to this position because of what has occurred in the past few years, of an attempt to rewrite history. We are trying to make sure that history is not rewritten, only that it is acknowledged.

Mr. TAYLOR. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. ZSCHAU].

Mr. ZSCHAU. Mr. Speaker, I rise today in support of this rule and House Joint Resolution 192.

Earlier this year when this measure was before the House, I voted against it, primarily because I felt that it implied that the current Government in Turkey and the Turkish people were guilty of genocide. Since June, however, this bill has been amended to make it explicit that we are not charging the current Government in Turkey or the Turkish people of genocide. Rather, this bill explicitly refers to the crimes of the despotic government of the Ottoman Empire, which was itself overthrown by the people of Turkey. Today the successors to these liberal reformers govern a country that has become an integral member of Western Europe and the NATO alliance. No one should regard this measure as an indictment of that Government.

It is proper to commemorate the suffering of the people of Armenian ancestry. By remembering the atrocities of the past we can help prevent such crimes in the future. No one can deny the historical record of human suffering that occurred in Anatolia as the old Ottoman Empire collapsed and the region became a battlefield of the First World War. In approving this measure today, let us resolve to learn from the past and heal old wounds.

Mr. TAYLOR. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. BADHAM].

Mr. BADHAM. Mr. Speaker, we have been discussing here who wins and who loses by the adoption of this rule and the resolution.

Let me say who does not win. The American people do not win. Americans of Armenian descent do not win. Americans of Turkish descent do not win. Who wins? I will tell you who wins: Armenian terrorist organizations who want to Sovietize a hunk of the territory of the Republic of Turkey, a democratic nation and a member of NATO.

Let me quote the Armenian Soviet Socialist Republic foreign minister,

who said recently that the Turkish Ambassador in Washington, DC, Sukru Elekdag, is guilty of trying to oppose the recognition of the Armenian genocide and, therefore, he and his associates are "double offenders" and "deserve the same fate," death by terrorist assassination, "as their predecessors."

That, Mr. Speaker and Members, is what we are talking about. Who wins? Not freedom, not survivors, not Turkish-Americans, not Armenian-Americans, not the Republic of Turkey, but Armenian terrorist groups who want to lop off a hunk of the territory of a very valiant, stable, and dependable democratic ally.

Now, this resolution, on the surface, may seem a harmless acknowledgement of the suffering by the Armenian community of the Ottoman Empire during the First World War. However, House Joint Resolution 192 is far from harmless; indeed, it is an insidious resolution which attacks the integrity of the people and Government of modern Turkey.

House Joint Resolution 192 accuses Turkey of carrying out a systematic genocide of the Armenian people. Such an accusation must be rejected. There is no evidence to suggest that an organized campaign to eradicate the Armenians was carried out. In point of fact, the Ottoman, Russian, and British military campaigns in the eastern Ottoman Empire caused a tremendous uprooting of the populace. The Armenian revolt and establishment of the short-lived Armenian Republic led to civil war. In addition, the Turkish and Russian revolutions took their toll. Indeed, conventional and guerrilla war, famine, disease, and the collapse of Ottoman authority led to the deaths of 3 to 4 million Ottoman civilians including Turks, Armenians, Kurds, and Arabs alike.

It is wrong to attempt to attach the blame for the terrible events of 1915 to 1923 to the Turkish people and to government which at the time did not even exist. The Turkish Republic which arose from the ashes of the Ottoman Empire has little in common with it. Mustapha Kemal Ataturk led Turkey into the Western community of democratic nations, of which Turkey is now an integral part and key member. Turkish soldiers fought and died beside our own in the defense of freedom in Korea. And, Turkey was one of the few nations to give sanctuary to Jewish refugees of the Nazi Holocaust.

Because of Turkey's close association with the United States, many parties seek to undermine the Turkish Government. Armenian terrorists would be encouraged by the passage of this resolution as it would indicate a weakening of American resolve in maintaining our commitment of friendship and alliance with the Republic of Turkey. These terrorists have perpetrated their acts of violence throughout the Western world, including the United States. More than 50 Turks have been murdered, mostly diplomats who sought to maintain Turkey's links to the West. Americans also have been targeted and killed. We must not in any way concede legitimacy to the extremist positions and criminal activities of the Armenian terrorists.

It would be the height of immorality for us to allow this resolution to be used to condemn our loyal ally Turkey, whose sons have died beside our own, and serve the interests of terrorists who have murdered the citizens of both Turkey and the United States. I believe that it is vital that the U.S. commitments to its friends and allies remain strong. Thus, measures such as House Joint Resolution 192 which would weaken our vital alliances must be opposed.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from California [Mr. MOORHEAD].

Mr. MOORHEAD. Mr. Speaker, I rise in support of the rule and of House Joint Resolution 192, National Day of Remembrance of Man's Inhumanity to Man.

I believe, as a matter of conscience, there is a responsibility for us in this day and age to learn from the mistakes that have been made in the past. Genocide and cruelty of one nationality toward another are things that have taken place many times in history. There is no question but what the Ottoman Empire in the latter part of the 19th century began a policy of persecution against its Armenian population. This pattern of persecution brought about the deaths of Armenians in 1894 through 1896, in 1909, and culminated in the great massacre of 1915 through 1923 in which an additional 1.5 million Armenians died. Many who survived were exiled from their homeland.

This fact of history has been documented in official U.S. Government papers since 1915. Despite this and eyewitness accounts, including those by Henry A. Morgenthau, U.S. Ambassador at the time, and U.S. media coverage, we are engaged in a debate over whether or not these events of history should be recognized and remembered. Those of us who seek to recognize April 24 as the National Day of Remembrance of Man's Inhumanity to Man do so in order to pause and reflect upon the Armenian experience. We are asked to commemorate this day so that it serves as a warning signal against other similar atrocities. No act of human destruction of such great magnitude can be prevented if we permit it to be forgotten. That is why to say "What's done is done" is terribly wrong.

There is no attempt by this resolution to hold the Turkish people or the present Turkish Government responsible for acts committed by the Ottoman Empire. No statement assigning responsibility to this genocide can distract or add to the nature of the horrible events themselves, but to diminish or distort these events in any way is not only a great injustice in itself, but a great disservice to the memories of those who died and to their survivors and descendants. As we deplore the events of the late 19th century and early 20th century in this persecution, we also deplore all acts of terrorism of every kind and description today. International terrorism is a war against all civilized society and terrorist acts deserve the full penalty of the law. The world can only deplore the insane acts of a few extremists.

We are very proud of the Armenian population in the United States who constitute a family oriented, hard-working, productive, and law-abiding community. Never should the acts of a few be attributed to the many. As we remember the Armenian holocaust, let us commit ourselves to a course that would prohibit this type of thinking taking place ever again anywhere in the world.

Mr. TAYLOR. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from New York [Mr. RANGEL], the chairman of the Select Committee on Narcotics.

Mr. RANGEL. Mr. Speaker, I rise in opposition to the rule.

I had supported this concept in the past, not because I fully understood the issue of the problems that the Armenians had with the Turkish people, since I did not have any Armenians in my district, nor did I have any people of Turkish extraction; but I had felt that if there were Members of Congress who had problems that I would yield to the interests of my colleagues and support things that they thought would be in the best interest of their constituents.

Since that time, however, I have been dealing rather closely with the Government of Turkey in my capacity as chairman of the Select Committee on Narcotics. As most of the Members are aware, there was a time less than 15 years ago that the Turkish Government was responsible for approximately 80 percent of the illicit opium that had been grown throughout the world, and it now has reduced itself to growing absolutely none.

In working with the Government of Turkey and in working with the State Department, it has been brought to my attention that this resolution has caused a lot of concern to Turkish-Americans as well as Turkish people generally, and it has caused a lot of embarrassment to the people who represent the Government of Turkey here in the United States.

It seemed to me, after weighing the issue as to whether I would just do it for a colleague or whether I should be concerned as to the people who would be hurt by such a resolution, I think that the working relationship that this Government has with the Government of Turkey, especially as relates

to narcotics, which brings me a little closer to the issue, that I would rather not be offensive but to see what I could do to bring about a better relationship between the Armenian people and the Turkish people.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, as we consider the measure before us, House Joint Resolution 192, I think it is important to make clear what a vote in support of this resolution means—and what it does not mean.

I supported this designation of a National Day of Remembrance of Man's Inhumanity to Man when the House considered it in June and I am supporting it again today. I support it because it will serve to remind us of the tragic and senseless deaths of all victims of genocide, in particular, those hundreds of thousands of Armenians who lost their lives under the Ottoman Empire during the years 1915 to 1923. It is an important, humanitarian resolution.

Support for this resolution, however, should not be interpreted as an act of judgment against the present Turkish Government or the Turkish people. It should not be interpreted as a vote in support of Armenian terrorism. Finally, it should not be viewed as a weakening of our ties to and cooperation with modern Turkey, one of our important NATO allies and a partner in the war on drugs.

I ask my colleagues to keep these distinctions in mind.

Mr. MOAKLEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio [Mr. FEIGHAN].

Mr. FEIGHAN. Mr. Speaker, nothing so clearly threatens our future than the refusal to recognize the mistakes of the past. When those mistakes take the form of unspeakable atrocities—the bloody rule of Pol Pot in Cambodia, the massacres of Maoist China, the Holocaust in World War II—forgetting is a tragedy, but denial is a crime.

Seventy years ago, more than 1 million Armenians were taken from their homes by their Ottoman rulers and murdered. This incredible and brutal purge attempted to wipe out a vital, creative race—and it very nearly succeeded.

The few survivors and their descendents have been struggling with this memory for too long. The world has refused to recognize the Ottoman action as genocide. Turkey has orchestrated a vocal, bitter campaign to deny these million and a half murders, and has gone to great lengths to muzzle any recognition or criticism of the Armenian genocide in this country.

Frankly, Mr. Speaker, I find this appalling. But I am more concerned at this Congress' reluctance to take positive action on the resolution recognizing the events of April 1915.

Last year, a resolution creating a day of remembrance for the Armenian genocide passed the House, but was not addressed in the other body. This year, in a dramatic move, a United Nations panel cited the Armenian massacre as an act of genocide, greatly encouraging the hopes of all Armenians that just recognition might finally have arrived.

This body today has an obligation not to let the pendulum swing back again. House Joint Resolution 192 calls for Americans to take heed of the Armenian genocide, and to recognize for 1 day a year the horror that can be wrought by man against man.

This is not a resolution condemning anything or anyone except unwarranted brutality and prejudice. Surely that is something this country has come to stand for. Surely as the standard bearer of freedom and human dignity we have an obligation to lead the call for a long overdue recognition of the Armenian genocide.

Let us not let this opportunity go by again. It is my sincerest hope that passage of this resolution by the full Congress may send a strong signal to Turkey that our friendship is not served by their continued intransigence on this issue.

I would hope that our friendship might be used positively to urge them finally to recognize the Armenian genocide and condemn it as the atrocity it was.

But American recognition and tribute for such a just and compelling cause must not hinge on Turkey's attitude. This is not a Turkish resolution, this is an American day of remembrance, and as such deserves our most enthusiastic support.

I urge my colleagues to vote for this resolution.

Mr. TAYLOR. Mr. Speaker, I yield 1 minute to the gentleman from Virginia [Mr. BATEMEN].

Mr. BATEMAN. I thank the gentleman for yielding.

Mr. Speaker, if this body were governed by Roberts Rules of Order, a motion against the adoption of this rule to this resolution would lie on the basis of a motion to object to the consideration of the matter. Under Roberts Rules, such a motion lies in order to enable an assembly to avoid altogether any question which it may deem irrelevant, unprofitable or contentious.

I wish I had the time to state the case and to summarize that which you have already heard as to why this House, even dealing with this resolution, is unprofitable in the interest of the time of this body, it is unprofitable in the best interest of the national security of the United States, vis-a-vis any staunch, steadfast ally, the Republic of Turkey, and certainly there is no question that it is contentious.

I would remind the House that more than 60 historians have advised this House that there are indeed very difficult and unresolved questions in determining the responsibility underlying the tragedies which occurred in Asia Minor during the period in question. We cannot judge that in the course of 30 minutes of debate on either side of that proposition.

Mr. TAYLOR. Mr. Speaker, I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, there are amendments we have heard about and if they are adopted, they will preclude this House from considering the Murtha substitute.

These last minute attempts are another reason to defeat this rule.

If the rule is not defeated, the key vote in the committee will not come on the Murtha substitute, or even on the substitute that I have proposed.

The key vote, or votes, would come on any amendment that attempts to rewrite the resolution and narrow its scope.

If this rule is not defeated, we must oppose such amendments.

Narrowing the focus of the bill, at this late hour, must be seen for what it really is, an attempt to bring the bill closer to the original language.

If amendments are adopted that return the bill to its original form, we'll probably never see the substitutes as they are currently written.

Mr. Speaker, as we close debate on this resolution, I think we all recognize that the reported language of this resolution will lead us into a briar patch of emotional outrage from those who are offended by the words in this bill.

It will do great damage, in my judgment, to the cause of unity and strength upon which the free world depends and upon which our hopes for peace on Earth rest at this particular season of the year.

Mr. Speaker, this is a bad bill. I think it should be put aside by defeating its consideration under this rule. We should dedicate ourselves toward an era of understanding between the people who are affected on both sides by this legislation and to do our best to bind up the wounds and to establish a just and a lasting peace in this Nation and among all nations.

I urge the defeat of this rule.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. TAYLOR. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 263, nays 156, answered "present" 1, not voting 14, as follows:

[Roll No. 457]

□ 1350

Mr. McCAIN changed his vote from "yea" to "nay."

Mr. DORGAN of North Dakota changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 328 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the joint resolution, House Joint Resolution 192.

□ 1357

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 192) to designate April 24, 1985, as "National Day of Remembrance of Man's Inhumanity to Man," with Mr. BONIOR of Michigan in the chair.

The CHAIRMAN. Pursuant to the rule, the first reading of the joint resolution is dispensed with.

Under the rule, the gentleman from Michigan [Mr. FORD] will be recognized for 30 minutes and the gentleman from Utah [Mr. HANSEN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. TORRES].

□ 1400

Mr. TORRES. Mr. Chairman, I want to thank the distinguished chairman of the committee for allowing me to say a few words in support of this resolution.

It is unfortunate that we have to have legislation like House Joint Resolution 192 in Congress. I am saddened that man has been so cruel, so often, that we must memorialize these events. Genocide will not end with this resolution, but perhaps it will cause us to reflect on man's cruelty. Perhaps it will help us pledge to do better in the future. If House Joint Resolution 192 can achieve this simple goal, it is worth our support.

April 24, 1985, was the date chosen to memorialize these tragedies. This date marks the 70th anniversary of the near elimination of the Armenian people.

Seventy years ago, from 1915–23, 1½ million Armenian men, women, and children were murdered by agents of the Turkish Ottoman Empire. These years should not be forgotten. If we do forget, we insult the memory of all those who died.

We have chosen to memorialize April 24, but other dates in history could have been selected.

The calendar is filled with days marking the mass murders of innocent people. People who were murdered simply because of their race, religion or creed. Stalin tried to destroy the Kulaks because they interfered with his political goals. Hitler chose the Jews to blame for the world's problems. Pol Pot chose his own people—the Cambodians—to destroy because they stood in his way.

This resolution condemns the ignorance, hate, and prejudice that gave

rise to the all too frequent tragedies of man's inhumanity to man. I regret we need this resolution, but I fear that to forget the genocide of Armenians and other groups would be a mistake.

During the approaching holiday season we will recall our wish for peace on Earth and good will toward man. House Joint Resolution 192 reflects our commitment toward fulfilling this wish.

I urge your support of this significant resolution.

Mr. HANSEN. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Virginia [Mr. WHITEHURST].

Mr. WHITEHURST. Mr. Chairman, I want to repeat what I said earlier. This is the most mischief-making piece of legislation in my 17 years in this body. The potential for harm from it is incalculable, from jeopardizing our base rights to poisoning relations for years to come. No good will will come from it, be assured of that. A foundation of hostility and mistrust will be its legacy.

This is a most troublesome aspect, but it is not the only one that I wish to address this afternoon.

You have heard that over 50 Turkish diplomats have been murdered in recent years by Armenian terrorists. The proponents of this legislation say that they oppose the acts of these groups. I say to you that in no way mitigates the effect of the resolution as far as these organizations are concerned. In their eyes, this resolution legitimizes their action.

And who are they, who are these terrorists?

Hagop Hagopian, founder of ASALA, the principal Armenian terrorist organization. And do you know where he began his infamous career? As a member of the group who murdered the Israeli athletes in Munich back in 1972, he will applaud the passage of this resolution.

Carlos, the deadly international assassin, who has said publicly that his organization has entered into a working relationship with the Armenian terrorist groups.

And you heard the citation earlier of John Kirakosyan of the Armenian Soviet Socialist Republic, who has called for the death of the distinguished Turkish Ambassador to the United States, Sukru Elekdag.

All of us are concerned about genocide or acts of inhumanity, but this resolution as it is drawn will ill serve that worthy end if it insults or offends one of America's most faithful allies.

I urge defeat of this resolution.

Mr. FORD of Michigan. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. DYMALLY].

Mr. DYMALLY. Mr. Chairman, today we are considering House Joint Resolution 192, which declares April 24, 1986, as a "National Day of Remembrance of Man's Inhumanity to Man," authorizing the President to issue a proclamation calling on all Americans to observe that date for the remembrance of all victims of genocide. The 1½ million Armenian men, women, and children, are but one group whose genocide has not yet been fully recognized by the United States or admitted by the Turkish Government. Fear of antagonizing Turkey may prohibit some from voting favorably; however, this is unreasonable, because admitting the occurrence of this genocide which was perpetrated by the Ottoman Empire does not in any way incriminate the Government of Turkey. On the contrary, admitting, rather than denying, this genocide will be a positive step in United States-Turkish relations.

Mr. Chairman, reference was made to terrorists in the Armenian community. That reference is not relevant. It seems to me, to make reference to something that is happening today and compare it with an act that took place many, many years ago is totally inappropriate.

What we are saying in effect is that we deplore this terrorism, but we want to recognize the inhumanity of man to man in the resolution.

I ask for an "aye" vote.

Mr. HANSEN. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Nevada [Mrs. VUCANOVICH].

Mrs. VUCANOVICH. Mr. Chairman, I support House Joint Resolution 192 which would designate April 24, 1986, as "National Day of Remembrance of Man's Inhumanity to Man" marking the 70th anniversary of the Armenian genocide which began in 1915. I believe this tragedy should be remembered not just by Armenians but by all Americans each year.

The Armenian genocide took place from 1915 to 1923 by the Ottoman Turkish governments before the establishment of the Turkish Republic. Therefore, I do not believe this legislation is an attack on the current Turkish Government. The current Turkish Government refuses to acknowledge that this genocide took place. However, it should be noted that House Joint Resolution 192 says nothing about the conduct or the policies of the Turkish Republic.

This House passes commemorative legislation daily from National Adoption Week to Andrei Sakarov Day. House Joint Resolution 192 is another piece of legislation designed to commemorate a particular event that took place in history which deserves to be remembered. In fact, the U.S. Holocaust Memorial Council intends to include the Armenian genocide in its museum and educational programs. To memorialize the genocide of Armenians is no more anti-Turk than memorializing the victims of the Holocaust is anti-German or recognizing Andrei Sakorov would somehow deteriorate our relations with the Soviet Union.

The genocide of the Armenian people by the Ottoman Turks must be remembered and it is my hope that my colleagues will pass this vital legislation.

Mr. HANSEN. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. Mr. Chairman, I thank the gentleman for yielding. I think we ought to ask ourselves a couple question. Turkey is an ally of ours. What will be the perception of America by the Turkish people if we pass this resolution? Will that endanger our relationship with Turkey, an ally that is vital to the security of the free world in general and the United States of America in particular?

They have about 400 miles of border with the Soviet Union and they provide a valuable service to all of us by allowing our air bases to be domiciled in their country.

Will this endanger that relationship and is it necessary?

Now, there is a lot of conjecture on both sides about whether or not all these allegations really took place. There is no question a lot of people died during this period, but a lot of people died in a lot of other wars as well. A lot of other atrocities have taken place throughout history.

Under Pol Pot, 2 million people were killed in Cambodia, and yet we do not have a resolution to deal with that. Fifteen to thirty million people were killed in Communist China during the Cultural Revolution. We are not talking about that in this resolution. Forty to sixty million people were killed in the Soviet Union since the Bolshevik Revolution in 1917, but that is not in here. Six million people were killed in the Jewish Holocaust in Germany. That is not in here. Over 1 million people have been killed in Afghanistan since the Soviets have occupied that country. That is not in here, and neither are a myriad of other countries who perpetrated these types of atrocities upon humanity.

In my view, we should condemn all acts of genocide, not just point our finger at one person or one country and in particular a very vital ally of the United States of America.

I urge defeat of this legislation.

Mr. FORD of Michigan. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. LEHMAN].

Mr. LEHMAN of California. Mr. Chairman, I yield to the gentleman from New Jersey [Mr. TORRICELLI].

Mr. TORRICELLI. Mr. Chairman, I rise in strong support of the resolution.

I rise in support of House Joint Resolution 192, to designate April 24, 1986, as "National Day of Remembrance of Man's Inhumanity to Man."

The murder of 1.5 million Armenians was the first genocide of the 20th century. Many of the survivors are still alive. Because their trauma has been largely forgotten, other peoples throughout this century have had to suffer through further incidents of genocide. Hitler was emboldened by the world's failure to condemn and remember the Armenian genocide perpetrated in the last years of the Ottoman Empire. We must never repeat the mistake of silence.

I believe it necessary that we, in the United States—because of our concern for human rights in general and our recognition of the wrongs done to the Aremenians in particular—commemorate the anniversary of the Armenian genocide.

This is not a mere intellectual or historical exercise. Neither the victims of genocide nor the conscience of our Nation can rest until the record is set straight.

I reject the argument that this resolution inappropriately singles out Armenians, since other peoples have suffered from genocidal practices. A resolution embodying mention of all cases of genocide would be vague to the point of insignificance. It would be an insult to Americans of Armenian descent, and indeed all Armenians throughout the world, to ignore their particular tragedy.

I urge that all my colleagues support this important resolution. Let us express our hope that this century, which began with massacres of Armenians and continued with the most widespread killings mankind has ever known, not end with continued bloodshed. By commemorating this anniversary, we can help ensure that genocide will never again be ignored.

Hitler once said that no one remembers the Armenians. Perhaps he thought no one would remember his crimes. Let us show that we do remember, for ignorance of history is an invitation to repeat it.

Mr. LEHMAN of California. Mr. Chairman, I would like to very briefly look at some of the arguments that have been proffered here on the floor in opposition to this resolution thus far.

What about the issue of terrorism that has been brought up by a couple people speaking on the other side? One spokesman I believe painted all Armenians and their cause with the broad brush of some disgusting comment made by a Soviet Armenian official.

I would like to remind the people opposed to the resolution that the reason we have a Soviet Armenia is because of the genocide. That is the foreign policy issue here. The Armenians were massacred. They did not have the strength to have a country, and the Turkish people at that time and the Russians came in and took the land that was Armenia. It was the genocide that has given us Soviet Armenia and it is the Armenian Americans who would like to regain that territory from the Soviet Union and are among the strongest anti-Communists we have in this country.

We are all opposed to terrorism. Armenian Americans are just as opposed to terrorism as anyone else and are ready to stand up and condemn terrorism and have done so in their churches, in their political groups and in their social clubs. To condemn American people of Armenian descent for a few outrageous terrorists is a real affront and one that I resent. I do not think it is worthy of this great body.

Others tell us that this resolution is offensive to the Turkish Government and will harm our relationship with them. Well, give me a break. Is our relationship with the great Turkish nation, our ally, contingent upon our closing our eyes to a genocide which neither anyone currently living in Turkey or anyone currently in the Turkish Government had anything to do with? Is our bond with Turkey so weak that this is going to be an affront of great magnitude to them? No. I think Turkey is a better friend than that.

I think suggesting that something like this would harm relationships with the Turks is an affront to the Turkish people as well.

What about American foreign policy? I am really dismayed at the attitude so many people have put forward here that our recognition of a genocide should be conditioned upon our relationship with the current Government representing the area where the genocide occurred? Should there be any other criteria for recognizing genocide than the fact that the genocide itself occurred? If so, what should they be?

Should Turkey, our friend and ally, tell us what genocides we should recognize and what ones we should turn our backs to?

What about offending the Turkish Government and the Turkish people? Well, I am sorry, but if we do not pass this resolution, we will be offending American citizens, and thousands of them, by not recognizing the murder of their ancestors that took place at the beginning of this century.

□ 1415

Mr. HANSEN. Mr. Chairman, I yield 9¼ minutes to the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. Mr. Chairman, I thank the gentleman for yielding me this time.

There are few issues which have come before this Congress which have given me more difficulty than this one. I have spent an inordinate amount of time trying to come to grips with the profoundly significant moral and political issues raised by this resolution. I have talked to dozens of people in an effort to determine what really happened in the eastern parts of the Ottoman Empire in the second decade of this century, and I have listened very carefully to the debate on this resolution, both today and when it was brought up before the House a few months ago.

There are, indeed, some very signficant arguments which have been advanced against this resolution. We have been told by many of our colleagues that Turkey is a valued and valuable ally of the United States. We have been reminded that Turkey is in many respects the key to the southern flank of NATO. Through its control of the Bosporus and the Dardanelles, it gives us the capacity to protect the 6th Fleet, which in turn gives us the ability to maintain naval supremacy in the eastern Mediterranean.

With the second largest army in the alliance, Turkey makes a very signficant contribution to the maintenance of a conventional balance of power in Europe.

The adoption of this resolution, we have been told by many of our colleagues, could potentially jeopardize our relationship with Turkey and some of our most vital security interests in the eastern Mediterranean.

These are powerful arguments, and yet if these were the only arguments raised in opposition to the resolution, I would not find them persuasive.

I say that because there are similar arguments that might be advanced against a resolution which one day could come before this House memorializing the victims of Hitler's genocide against the Jews in which the argument might be made that this would disturb the sensitivities of another critically important NATO ally, the Federal Republic of Germany, and that the adoption of such a resolution would jeopardize potentially critical American security interests as well.

I want to be very honest with all of you. In my judgment, the memory of the 6 million victims of Hitler's genocide and our respect for the deaths which they suffered would lead to the conclusion that we would have no alternative but to accept such a resolution if it came before us. If that is indeed the case, what then distinguishes the resolution before us today which memorializes the victims of what has been characterized as the Armenian genocide from another resolution which might memorialize the victims of Hitler's genocide against the Jews?

The difference, I would submit, is the difference between a universally accepted historical reality and a hotly disputed view of events.

Some time ago, every Member of this House received a telegram concerning this resolution which was signed by a majority of the leading academic specialists on Turkey, the Ottoman Empire, and the Middle East in our country. The signatories include

such prestigious academics as Bernard Lewis, perhaps the preeminent specialist in the entire country on these questions at Princeton University, and Dr. J.C. Hurewitz at Columbia. I want to read to my colleagues two paragraphs of that telegram which bear precisely on the point I am trying to develop right now.

They wrote:

As for the charge of "genocide": No signatory of this statement wishes to minimize the scope of Armenian suffering. We are likewise cognizant that it cannot be viewed as separate from the suffering experienced by the Muslim inhabitants of that region. The weight of evidence so far uncovered points in the direction of serious intercommunal warfare (perpetrated by Muslim and Christian irregular forces), complicated by disease, famine, suffering and massacres in Anatolia and adjoining areas during the First World War. Indeed, throughout the years in question, the region was the scene of more or less continuous warfare, not unlike the tragedy which has gone on in Lebanon for the past decade. The resulting death toll among both Muslim and Christian communities of the region was immense, but much more remains to be discovered before historians will be able to sort out precisely responsibility between warring and innocent, and to identify the causes for the events which resulted in the death or removal of large numbers of the eastern Anatolian population, Christian and Muslim alike.

They go on to say:

As the above comments illustrate, the history of the Ottoman Armenians is much debated among scholars, many of whom do not agree with the historical assumptions embodied in the wording of House Joint Resolution 192. By passing the resolution, Congress will be attempting to determine by legislation which side of a historical question is correct. Such a resolution, based on historically questionable assumptions, can only damage the cause of honest historical inquiry, and damage the credibility of the American legislative process.

Mr. Chairman, I share the anguish of the Armenian people. Countless numbers of them were clearly killed in a cruel and barbarous fashion during the period of time covered by this resolution. But there were also countless numbers of Turks and Muslims who were killed in a cruel and barbarous fashion as well.

One of the problems with this resolution is that it asserts what happened to the Armenians was a genocide when the fact that it was a genocide is itself in dispute. There is, after all, a distinction between mass killings, which have gone on since the beginning of time, and genocide itself, which consists of a systematic effort to exterminate an entire race of people. This is not to suggest that mass killings are any less objectionable than genocide. Murder, after all, is murder. But there is a significant difference between the two and there is no evidence that I am aware of which demonstrates that the Ottomans were trying to exterminate all Armenians.

Furthermore, in view of the fact that the resolution does not refer to the fact that many Turks and Muslims were also killed during this period of time, I think it would be very difficult to justify the adoption of this resolution.

But when you add to those historical ambiguities and complexities the fact that the adoption of this resolution would severely strain our ties with a valued and valuable member of the alliance, and that it could potentially jeopardize vital American strategic interests in the eastern Mediterranean, it seems to me that it is very difficult indeed to justify the adoption of this resolution which characterizes the admitted and terrible sufferings of the Armenian people in the second decade of the 20th century as a genocide, when whatever happened to the Armenians, and it was terrible, and I join my colleagues in condemning those events, was clearly not a case of genocide as described in this resolution.

Mr. HILLIS. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Indiana.

Mr. HILLIS. I thank the gentleman for yielding, and I certainly commend him on his statement and would like to associate myself with his remarks. I think the gentleman has given us the clearest picture of the background and the situation that existed in Turkey at the time of the First World War as I have heard given on the floor on this issue yet.

I might say this to the gentleman, too, in my reading of this issue, at the conclusion of that war, Ataturk came in, and in a battle of his forces and those of the Ottoman Empire, he prevailed and was the father of modern Turkey. And it is my understanding further that there are Armenians living in Turkey today, and with the passage of this resolution which many of the citizens of the United States of Armenian ancestry are pushing for today, they would be worsening the conditions of their relatives, their brothers in Turkey who live there now. Would the gentleman see it that way?

Mr. SOLARZ. Mr. Chairman, I want to make it clear that I respect the right of the authors of this resolution and its sponsors to bring it before the House. I think it reflects the genuine anguish which they feel, and which the Armenian community and all Americans of good will feel.

But my reservations have to do with the linguistic accuracy of the resolution, and the extent to which it flatly asserts facts to be the case which are themselves hotly disputed, and with respect to which the leading scholars of the Ottoman Empire in our country, such as Bernard Lewis and J.C. Hurewitz have told us there is no historic or academic consensus.

Mr. HILLIS. I salute the gentleman on his statement.

Mr. FORD of Michigan. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. ANNUNZIO].

Mr. ANNUNZIO. Mr. Chairman, since my election to the Congress of the United States in 1964, I have each year without fail for 21 years taken the floor of the House of Representatives to mark the anniversary of the Turkish massacre of the Armenian people which took place 70 years ago.

I have said it before, and I shall say it again. History cannot be denied. It is public knowledge that our own State Department has irrefutable evidence in its own files of the Armenian genocide, along with Ambassador Henry Morgenthau's eyewitness reports which were cabled to our State Department at the time of the genocide. Yet, the current Turkish Government refuses to acknowledge the documented historical facts of the Armenian genocide.

The case for passage of the resolution before us today, House Joint Resolution 192, was stated most eloquently in an editorial in the Chicago Tribune on April 27, 1985. I call the attention of my colleagues to the views presented in this editorial, which follows, and I urge that they join me in voting for passage of House Joint Resolution 192.

NOW IT IS 70 YEARS

Anniversaries of Turkey's massacre of its Armenian citizens—which began in April of 1915—have changed their character. By now the observance is not so much a mourning for the dead, or the hideous manner in which most of them died. That was 70 years ago, and enough horrors have happened since to blur the memory.

Only one thing keeps this wound fresh among all the wounds the world has suffered. It is the stubborn refusal of Turkey's government and people to acknowledge that the massacre ever happened.

The time for mourning the dead may have passed. What is still to be mourned is the strange, perverse ability of human beings to deny reality and to keep denying it, apparently forever.

The Turks do not want to remember the systematic killing of more than a million men, women and children. No nation could. But there is a right way and a wrong way to get rid of an evil memory: to cleanse it, or to repress it. For 70 years Turkey has clung to the wrong way. It has tried to erase a historical fact from everyone's memory, to convince the world that such things are too dreadful to happen and therefore did not happen.

That is the purpose of observing this anniversary: to make clear that the self-deception has not yet succeeded. And if it has not worked for Turkey in 70 years, it may not be worth trying any longer, for the Turks or anyone else.

Mr. FORD of Michigan. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan [Mr. HERTEL].

Mr. HERTEL of Michigan. Mr. Chairman, it would be impossible for me to state how much I disagree with the last speaker from New York in such a short time.

Why are we here considering this resolution today? Ask Armenian Americans, ask Armenians around the world about the terrible genocide that occurred.

And what is genocide? The ruthless, frenzied roundup and forced rapes and brutal raids, killings, coerced religious conversion, and family massacres of 1.5 million innocent Armenian people.

Ask the people who had relatives that were killed in that genocide if there was a genocide that occurred. Ask the people that lost entire families in that genocide, and ask if it met the definition of genocide.

It has been stated before that the first time the word genocide was used in the English language was after this atrocity occurred.

What is worse than trying to eliminate a people? What is more heinous, what is more evil?

It would be terrible for this House and tragic not to recognize what did occur, because by doing so, we are declaring that we would condemn it in the past, condemn it today, and we will condemn it in the future as we should as human beings.

The Detroit News, a newspaper in Michigan, wrote an editorial on April 24 where they said:

Memory is the key. Survivors of the massacre are growing old now and there will be no witnesses. Before they are gone, it is essential to tell the story far and wide as it has not been told before to ensure that the world does not forget. After all, it was not just a piece of Armenian history. What happened in 1915 was the first awful display of international passivity and acquiescence in the face of organized human slaughter. Armenians, like Cambodians and Jews of this century, have a moral responsibility to bear witness and stand guard at the gates of our collective conscience, and ensure that they never forget.

This we do by passing this resolution.

I submit the editorial in its entirety for the RECORD:

[From the Detroit News, Apr. 24, 1985]

REMEMBERING THE ARMENIAN GENOCIDE

The Armenian genocide—an event that occurred 70 years ago and is being commemorated officially today—remains a double tragedy. The events themselves—the ruthless, frenzied roundup; forced marches; brutal rapes; kidnapings; coerced religious conversions to Islam; and finally the massacres of 1.5 million innocent Armenians—certainly were atrocities of the first magnitude, and their effect has only been compounded by 70 years of official silence.

In the years after the 1915 massacre the government of the United States offered safe harbor to the Armenian survivors. That act has been more than richly repaid by the contributions Armenian-Americans have made to their communities—Detroit preeminent among them—and to their nation.

Yet for reasons that seem neither clear nor sensible, the American government has never seen fit to acknowledge formally that Turks committed deliberate acts of genocide against the Armenians in 1915. Several presidents, including Jimmy Carter and Ronald Reagan, have made grieved references to the genocide. But for fear of offending our ally, Turkey, the State Department still refers to the occurrence as an "alleged genocide," despite the unchallenged witness provided by many credible observers, including our ambassador to Turkey at the time. A small group of Armenian terrorists have given some people an excuse for ignoring the simple truth Armenians rightly want the world to acknowledge: that a grotesque massacre claimed more than a million innocent lives. But those acts are not indicative of the Armenian community and should not prevent Mr. Reagan and the State Department from acknowledging the truth.

The Turkish government has carried the conspiracy of silence to an extraordinary length by refusing to concede that the event took place. It has not apologized, accepted moral responsibility, or admitted shame. Although this might be understandable in Turkish governments of past generations, it is not now. Neither the current government nor people of Turkey committed the crimes. They have nothing to lose, and much moral stature to gain, by reversing field on this issue of large symbolic significance.

The Turks and the State Department should know that free people do not and cannot fear ugly truths about their history. By keeping painful memories alive and unflinchingly facing hideous truths, people can ensure that mistakes of the past will not be repeated.

The Armenian genocide is particularly illustrative of this. In 1915, with half of the Armenian nation wiped out, Lord James Bryce told Britain's Parliament that, "there is no case in history, certainly not since the time of Tamerlane, in which any crime so hideous and upon so large a scale has been recorded."

Seventy years later in a century that has seen more bloodshed, brutality, and ruthless, organzed destruction of human life than any one before, we have learned the cost of ignoring or forgetting basest human actions. Had more attention been paid to the century's first genocide, perhaps later ones would have been averted. It is said that, when Hitler began to slaughter the Jews, he was warned that the world would not tolerate such atrocity. To which he replied, correctly, "Who today remembers the Armenians?"

Memory is the key. Survivors of the massacres are growing old now; soon there will be no witnesses. Before they are gone it is essential to tell the story far and wide, as it has not been told before, to ensure that the world does not forget. After all, it is not just a piece of Armenian history. What happened in 1915 ws the first awful display of international passivity and acquiescence in the face of organized human slaughter. And Armenians, like Cambodians and Jews of this century, have a moral responsibility to bear witness, stand guard at the gates of our collective conscience, and ensure that we never forget.

Mr. HANSEN. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona [Mr. MCCAIN].

Mr. MCCAIN. Mr. Chairman, there is going to be an amendment proposed which will basically close the rule, a narrowing amendment, and I urge my colleagues to reject that amendment when it comes up.

I think it is important for us to recognize the title of this resolution. It designates April 24, 1985, as "National Day of Remembrance of Man's Inhumanity to Man." There is no mention about Armenia in the title.

It is only later on in this resolution that we get to the subject of Armenia and the tragic events that took place in that country, which we all lament.

Before we narrow a day of man's inhumanity to man down to a simple tragedy that took place against the Armenian people, it maybe would be best to recollect some other incidents that have taken place, including the history of this country. Ask the Choctaw, in Maryland, the Cherokees in the Carolinas, the Sioux in the Dakotas, the Delawares in New Jersey, the Apaches in Arizona and New Mexico, and the Chippewas in Michigan, the Cheyenne of Colorado.

□ 1430

They have also been victims of genocidal acts, and possibly they should be made part of this resolution as well. What about our native Hawaiians? Millions of native Hawaiians resided in those islands when the white man came, bringing syphilis, typhus, measles, and other diseases, and wiped them out in a genocidal fashion as surely as putting a gun to their heads.

I urge my colleagues to consider amendments that may follow, if we are concerned about the issue of man's inhumanity to man, I believe such is what has been done to our native Americans; by the Spaniards to the Mayan and Aztec nations in South America; and others that have taken place across the history of this world.

Why do we focus on simply one terrible tragic incident in history? Finally, I would like to mention, indeed, we must be sensitive to our relations with our allies; we are sensitive to relations with all of our allies, and I think it is important for us to take into consideration their feelings as well, although that might not be the prime reason for rejecting this ill-advised bill.

Mr. FORD of Michigan. Mr. Chairman, I yield 2 minutes to the gentlewoman from California [Mrs. BOXER].

Mrs. BOXER. Mr. Chairman, genocide is genocide. Inhumanity is inhumanity; and the realities of genocide do not disappear in one generation; nor in two, nor in three, nor in four, nor in five. Just ask anybody who has lost relatives in a genocide.

If the effects of that genocide do not disappear the people who are lost are lost forever.

It is not the business of this body to rewrite history. We in this body must remember history in order to learn from it.

A genocide is a genocide. Calling what happened to Armenians a so-called genocide is rewriting history. The Armenian genocide took place. Period. And Armenian-Americans

should know that this Congress understands that.

Should other resolutions be brought forward, condemning human rights in any place in the world, I will be right there; bring them forward but don't stop this resolution.

As the leader of the free world, who stands firm for human rights, let this Congress not shrink from this resolution. Let us stand tall and vote for it.

Mr. HANSEN. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. Mr. Chairman, I share some of your consternation about which way to go on this particular resolution, and some of the questions that I have had answered listening to the debate.

The problem, as I see it, is not that the Holocaust against the Jews or the Ukrainians or the Afghanis are not mentioned in the resolution; the question is that there is no historical disagreement with the events surrounding the genocide against the Jews. There is no historical disagreement with the cordoning off of the Ukraine and the resultant starvation of 7 million people during the Stalin era. There is no disagreement among respected historians about what is happening in Afghanistan today; but there is, as the gentleman from New York [Mr. SOLARZ] so ably pointed out, significant scholarly disagreement over the history of that period, 1915–23.

Another point which I feel is important is that on the one hand we condemn the Turkish historical honor for events occurring some 60 to 70 years ago and at the same time, the enslaver of the Armenian people today, the Soviet Union, gets off scot-free.

Now, there has been systematic decimation of the intelligencia, of the commercial, of the cultural elements, of any Armenians who would speak out against Soviet rule, but we have never, and we do not in this resolution, condemn the present-day oppressors of the Armenian people.

So its seems that there is some discrimination here and in fact, the Soviets can use this resolution against the Turkish Government—in a way that could be quite debilitating to our strategic relationship in that area.

Mr. FORD of Michigan. Mr. Chairman, I yield 2 minutes to the gentlewoman from Connecticut [Mrs. JOHNSON].

Mrs. JOHNSON. Mr. Chairman, is the Armenian genocide a fact? Look in our own archives. Read the resolutions that the Congress passed starting in 1896. Look at the statements of American Presidents. Ask the people in the Gallery, ask the people in the churches that I represent, what they saw, what they experienced, what is seared in their memories and their hearts.

Does that reflect on contemporary Turkey? Not at all. Does that justify terrorism against Turkish diplomats? Not at all.

What is wrong about what we are doing on the floor of the House now and in recent years is that we are pitting two legitimate but distinct concerns against each other. We are pitting our friendship and respect for Turkey, a strong, vital democracy and an important ally of this Nation, and their legitimate concern for the vulnerability of their people to organize terrorists, against the legitimate concern of American Armenians, for the honesty and integrity of the historic record which our Government has helped establish in past decades and which our Government altered in recent years by substituting wordings so that genocide became "so-called genocide".

It is needless to pit legitimate interests against one another. We are paralyzing ourselves and worse, we are creating tensions and eroding important relationships within our country and between nations.

So let us act. Let us do what is necessary, obvious, and right. Let us recognize that genocide has occurred by passing this resolution. Let us recognize the facts of history and then let us join together to renew our efforts against terrorism, particularly as it focuses on Turkish citizens, and for our greater friendship between two great nations, Turkey and the United States.

Mr. HANSEN. Mr. Chairman, I yield 2½ minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Chairman, again, we debate the merits of House Joint Resolution 192. Supporters of this resolution claim that House Joint Resolution 192 is a simple and straightforward attempt to correct what they see as a gross injustice. Unfortunately, the resolution, if passed, might well be used by terrorists as justification for their actions against innocent civilians and diplomats, including American citizens.

Mr. Chairman, is more to be gained by passing this resolution than would be lost by not doing so? I don't think so. There are very real and tangible examples of Armenian terrorist activities against innocent civilians and Turkish diplomats. I will not recount the many bloody examples that exist. Suffice it to say that passage of this resolution, at this time, and after this body has disapproved an identical resolution in the past, would send entirely the wrong signal to these terrorists at a time when terrorism is on the rise and the civilized nations of the world are struggling to cope with the growing terrorist threat.

Mr. Speaker, this resolution is vigorously opposed by the Turkish Government, one of America's most solid allies and partners in opposing Soviet aggression. Turkey has long been a close friend of the United States, and acts as the guarantor of peace and security on NATO's southern flank. We all should support the many fine contributions which the Turkish Government and the Turkish Armed Forces have made to the security of the free world. As, I said in the debate on the rule, Turkey's view of this resolution could be criticized, but it is the perception—and we all know perception is reality.

I am afraid that the resolution before us today could serve to undermine America's common efforts with the Turkish Government to bring an end to international terrorism. I need not remind my colleagues that Secretary of State George Shultz has stated his concern that "passage of the resolution would undermine our efforts to combat terrorism and greatly harm United States-Turkish relations." Certainly, the supporters of this resolution do not wish to see United States-Turkish relations unduly harmed, nor do they seek to hinder our joint efforts for combating the plague of international terrorism. Yet, this is precisely what might happen if the resolution before us today is passed.

Mr. Chairman, Secretary of State Shultz summed up the case against House Joint Resolution 192 best, when he stated, "adoption of House Joint Resolution 192 would invitably be seen by these and other terrorists as a vindication and reward for their vicious campaign against Turkish diplomats and American citizens."

I strongly urge my colleagues to oppose this measure. No matter how well-intentioned it might be, the "powerful reasons," using Secretary Shultz' term, to oppose House Joint Resolution 192 should outweigh any possible reasons for supporting it. Again, I urge a "no" vote on House Joint Resolution 192.

THE SECRETARY OF STATE,
Washington, November 25, 1985.

Hon. ROBERT H. MICHEL,
House of Representatives.

DEAR MR. MICHEL: Following my letter to you of March 5, 1985, on this subject, I wish to reiterate the Administration's strong opposition to House Joint Resolution 192. A copy of this controversial resolution, which fell short of passage under a motion to suspend and pass June 4, is enclosed. In our view, passage would undermine our efforts to combat terrorism and greatly harm United States-Turkish relations.

Over 50 Turkish diplomats and American citizens have been killed by terrorists seeking to gain acceptance of the charge that the Turkish nation is guilty of a genocide. These terrorists have harassed and bombed Americans who disputed the genocide charge and lent support to fellow terrorists attacking and kidnapping our personnel in Lebanon. Adoption of House Joint Resolution 192 would inevitably be seen by these and other terrorists as a vindication and reward for their vicious campaign.

This terrorists campaign has transformed the genocide issue into nationalistic, emotional matter for all Turks. Passage would generate an immediate public reaction against the United States in Turkey. Turkey is a staunch NATO ally which fought with us in Korea, fields NATO's second largest army, guards the straits separating Soviet Black Sea bases from the Mediterranean, and provides military and other facilities vital to our security. It does not serve our national interest to harm this important relationship, particularly when we are consulting with Ankara on the future of our bases in Turkey.

Over 60 of our most distinguished scholars of Turkish and Middle East studies have questioned the historical assumptions of House Joint Resolution 192. While we do not dismiss the historic tragedy that occured in eastern Antolia 70 years ago, there remain powerful reasons for opposing the resolution. I ask your help is securing its defeat.

Sincerely yours,

GEORGE P. SHULTZ.

WASHINGTON, DC,
December 2, 1985.

Hon. ROBERT J. LAGOMARSINO,
House Office Building, Washington, DC.

On previous occasions, I conveyed to you the strongly negative feelings of the Turkish people regarding H.J. Res. 192.

There is no doubt in my mind that as an individual and as a Member of Congress you deplore terrorist savagery and violence, but I am indeed dismayed that many Members of Congress are not aware of the implication of the adoption of H.J. Res. 192, innocently entitled "National Day of Man's Inhumanity to Man," which wrongly endorses a charge that Armenians were victims of genocide in 1915.

Armenian terrorists in the past eleven years have murdered over 50 Turkish citizens. The assassins struck at targets which were most vulnerable and defenseless. Their victims have been diplomats—people trained to promote international tolerance and understanding. In the past eleven years, I have had to pay homage to 30 of my personal friends—colleagues, their spouses and children who were victims of the wanton terrorist savagery. After each murder, the terrorists have proclaimed as their pretext "vengeance" based on historical distortion, the same as that incorporated in H.J. Res. 192.

We must not lose sight of the fact that the founder of the Armenian terrorist organization Asala, Hagop Hagopian, began his notorious career as a member of the terrorist group which perpetrated the massacre of the Israeli athletes at the Munich Olympics in 1972. Moreover, we should not forget that Carlos, the deadliest of all international assassins, recently proclaimed on Spanish television that his organization has entered into a working relationship with Armenian terrorist groups, are collaborating with the same middle Eastern terrorist organizations responsible for the bombing of the United States Embassy and the Marine barracks in Beirut. These reports are well known by competent U.S. authorities, and indicate that the scourge of Armenian terrorism is also directed against the United States.

The victim toll among the overseas representatives of Turkey and the United States have been higher than any other countries. It is indeed strange at a time when the United States Government is actively striving to put an end to international terrorism that its Congress is even considering the passage of a resolution which at the very least lends moral support to one of the deadliest forms of international terrorism.

The Turkish people look to the Government of the United States, and especially its Congress, as upholders of justice and truth. Consequently, there is no way in which Turkish political leaders can justify to their voters an action of the United States Congress which so clearly condemns the Turkish people unjustly and endorses a falsehood as truth.

In the interest of both our countries and of truth, I urge you to vote against this resolution.

HIS EXCELLENCY
DR. SUKRU ELEKDAG,
Ambassador,
Embassy of the Republic of Turkey.

□ 1440

Mr. FORD of Michigan. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. PASHAYAN].

Mr. PASHAYAN. Mr. Chairman, on the subject of terrorism, let me simply say that for one-half century after the events that this resolution speaks to, there was no terrorism, for 50 years. Why, after that length of time, did the terrorism start? Mr. Chairman, the answer to that question is very simple: Because in this matter justice has still been denied. Why has it been denied? It has been denied principally because this Republic of Turkey, which, when it was constituted in 1922 and 1923, after the period of time the resolution speaks to, and which, when it was constituted, inherited not only the assets but the liabilities of the Ottoman Empire, because this Government has refused to acknowledge what a predecessor government did under a separate constitution, in the same way that West Germany has acknowledged what its predecessor government did under the Nazi regime.

Mr. Chairman, the unfortunate fact of human nature is that when a cause crying out for justice is left denied by the only people in the world who have the legal authority to stand up and acknowledge what happened, not by themselves but by their predecessors, unfortunately the passions of people sometimes take command and they do the most horrible kind of acts. And I stand here today, and I condemn any and all terrorism, and especially Armenian terrorism.

But at the same time I have to say that as long as this cause remains unjustly denied, the KGB and the Communist Party, who are obviously perpetrating this terrorism, are going to have fuel for their fire.

Mr. HANSEN. Mr. Chairman, how much time remains on this side?

The CHAIRMAN pro tempore (Mr. CARR). The gentleman from Utah has 9¼ minutes remaining, and the gentleman from Michigan has 15 minutes remaining.

Mr. HANSEN. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia [Mr. BATEMAN].

Mr. BATEMAN. I thank the gentleman for yielding.

Mr. Chairman, if the issue before us today were purely that of condemning mans inhumanity to man, we have lost any opportunity to make this resolution speak to that generic proposition which would find no opposition from anyone. That is not what this resolution did when it was offered for the first time in its original draft, it is not what it does as it comes to the floor today. It will not be just that, no matter what amendment is offered to it today. It could not be more apparent that rather than a general condemnation of man's inhumanity to man there is an effort here very subtly, without even judgment on the merits, to condemn certain acts of barbarism, of cruelty against a particular people in a particular place at a particular time, to fix a responsibility, as it were. This is the very thing that the gentleman from New York [Mr. SOLARZ] has warned us about, because there is difference among the most respected historians as to how and where to fix that blame. We do not speak in debate on this issue today in a vacuum. We have to focus on this issue if we are to resolve it on its merits in the contexts of the Crimean War, in the context of World War I and the struggle between the Germans as war was waged in Russia with the Ottoman Empire as its ally.

We would have to do it in the context of the Bolshevik Revolution and in the context of the war between the White Russians and the Red Russians. We cannot in this House make those kinds of judgments without the embarrassment of making them poorly and without the embarrassment to the very legislative process itself, which is what the eminent historians have warned us against.

Please do not, for no significant, meaningful, or useful purpose, pass this resolution and damage our alliance with our friends, the Turks. It is unprecedented in my experience in this Congress, and I dare say all the Members' experience, that so much concern be communicated from the highest levels of a friendly government to everyone who is a Member of this House, the concern with which that Government, our staunchest ally, feels with respect to this resolution.

For us to have been urged by our Secretary of State, by one of the most respected ambassadors in the chanceries of the world, our Ambassador to Turkey, who has warned us: Why do we do such a useless, unproductive thing?

Mr. FORD of Michigan. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. MARTINEZ].

Mr. MARTINEZ. Mr. Chairman, I really am surprised and a little bit ashamed that certain Members of Congress that feel that our relationship with Turkey is so weak that a single declaration of man's inhumanity to man would all of a sudden destroy that relationship. I do not think we are trying to place blame on the present Government of Turkey. We are asking that the present Government of Turkey recognize what the Ottoman Empire did, and that is well documented.

I laughed when one of my colleagues said that the historical academia has not come to a consensus. There are many issues that they do not come to a consensus on, and I doubt there are very few that they do. That is not at issue here. When Tel Et Bey, who was then the minister of war of the Ottoman Empire at that time, stated that emphatically they would eliminate the Armenian people off the face of the Earth and any association with Armenia, and when we look today, there is no Armenia, two-thirds of it is in Turkey and one-third in Russia; we know that they did, in effect, accomplish what they set out to do.

Further, when the infamous Hitler said to his cohorts in crime that he would start a process to eliminate the Jews and his cohorts said to him, "What would the world sentiment and opinion be of that?" he referred to what the Turks did to the Armenians and said, "The world took no notice of that, and world won't take any notice of this." And that is pretty much the truth. One of my colleagues said that while it was different, we recognize what happened to the Jews as if it were only the Jews that were persecuted by Hitler, but it was not. Hitler murdered Jews, he murdered Polish people. He murdered all those people under the name of nazism. There is no difference here. There is no difference at all. I think we have to recognize that. This resolution, really, if it refers to one particular genocide, and maybe it does not include all the rest, I do not think that is any reason for us to stand here and say because it does not include the rest we should not recognize the one and we should not stress the importance of recognizing man's inhumanity to man.

I think if we want to be against something we can be against it and we can come up with all kinds of reasons to be against it. Really, if your conscience justifies you being against something, if it is so emphatic of our beliefs, if we have a concern about what happens to people, and if we do not stand up and state that, then it will occur again and again. This is something we really have to be concerned with, because someone mentioned there are atrocities going on now. I think this resolution symbolizes our sentiment against all of those atrocities.

We should stand up now and be counted and vote for this resolution.

Mr. HANSEN. Mr. Chairman, I yield 2 minutes and 10 seconds to the gentleman from Guam [Mr. BLAZ].

Mr. BLAZ. Mr. Chairman, let me thank the gentleman for yielding. Ordinarily, while I find some of the bills that pass this House vague in some areas as to their purpose, I must admit that the purpose of the bill that is being considered now escapes me completely. Are we so devoid of our own misgivings in our country, are we so unmindful of history, that we can now sit here and sit in judgment of friends for what we perceive they have done? I have known in my own time and have witnesssed in my own time inhumanities. I have witnessed in my own time suffering and death. The history of my own people in my colony, which was almost decimated. Also, I have fought in three wars.

But I made up my mind 5 years ago to trade my sword for a legislative pen so that I may devote the rest of my life to preventing incidents of the past as are being described here rather than recalling them now on some of these shaky grounds that have been brought out by the proponents.

I am going to repeat something I said yesterday. As a Member of this body from the territories, while I enjoy all of the privileges, or most of them, of a Member, I do not have the privilege to vote here on the floor. I must now ask you to vote for me. I must ask you to defeat this resolution. I must remind you that after World War II we devised a plan to save Turkey. I have walked on the battlefield with them, and they now are pulling their share of defending the free world. Let us not slap the face of a proven ally of long standing.

Mr. FORD of Michigan. Mr. Chairman, I yield 6 minutes to the gentleman from Michigan [Mr. LEVIN].

□ 1455

Mr. LEVIN of Michigan. Mr. Chairman, I have listened intently to this debate, and it seems to me that there is really only one basic issue, and that is what happened. If there were organized mass murders in those days, it should be so called; and to do otherwise, no reason, no excuse is good enough.

So I want to talk a bit about history, because I have read this document that has been referred to, this statement from historians. So I went through the literature, as much as I could find, and I do not understand their statements because there are records within our own Government that say the contrary. The record is essentially clear.

I referred during the discussion on the rule to the Department of State bulletin of August, 1982, and let me read further from it. It discusses an order of the Minister of the Interior in those days, in the Ottoman Empire, and it refers to his order. Now I quote it. His order, not of the modern Turkish Government; that Government is not in question here. It is an order of the Ottoman Empire. And I quote this. There is an order for "the elimination of the Armenian element, which had been trying for centuries to undermine the foundation of the state."

That is a State Department quotation.

It is also interesting, a second point, to look at what the Turkish Government did after the end of the Ottoman Empire. And what did it do? It brought to trial people who were allegedly guilty of this heinous crime, and they were found guilty. They were found guilty.

And it is said here today, "Well, it is 70 years." And I say: So what?

And it is said that, "Turkey is our ally."

It seems to me that our creed is clear. When it comes to basic human rights, and that includes the right of a people to live, we do sit in judgment. We sit in judgment of our enemies, we sit in judgment of our allies, and I hope we sit in judgment of ourselves.

This resolution refers to history, it refers to a tragic set of incidents in history where hundreds of thousands lost their lives.

And, Members of this Congress, I do not think we want to quarrel how many hundreds of thousands died, whether it was 600,000 or 700,000 or 1½ million.

I remember when I was a student reading a book about the Soviet Union by an apologist of what happened in the 1930's in the Soviet Union, and I remember—I can almost quote it word for word because I have never forgotten the statement—he said that allegations that 10 million kulaks were killed in the 1930's, those allegations are wrong, there is only evidence that 6 million were killed by the Soviet authorities.

We are here to speak our conscience and not to obscure the record. This is not something personal, believe me, this is nothing personal as to the Turkish Government. Everybody here likes our close relationships with them. What is being said here is for us to acknowledge history. Some historians may find history obscure in this case, but it leaps up from the books. Hundreds of thousands of people lost their lives. There was a policy of a government to slaughter them. We should stand up and we should be counted.

The CHAIRMAN. The gentleman from Michigan [Mr. LEVIN] yields back 1 minute.

Mr. HANSEN. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky [Mr. HUBBARD].

Mr. HUBBARD. Mr. Chairman, I would like to ask the gentleman from Michigan if he would yield me the 1 minute that the gentleman just yielded back so I could have 1 minute from the Democrat side in opposition.

Mr. FORD of Michigan. I am sorry, I do not have the time at this point; but later, if the gentleman wants the time and if I do not have a request for it, I will give it to the gentleman.

Mr. HUBBARD. Mr. Chairman, I want to thank the Republican side for giving the Democrats who are opposed to this measure a chance to speak in opposition to it.

Mr. Chairman, it is now 3 p.m. on December 12, and we in the 99th Congress are not discussing the farm bill or the continuing resolution or tax reform or spending cuts or even what happened today to the 258 American soldiers from Fort Campbell, KY, which is in my district, who lost their lives in a tragic airplane blowup in Newfoundland. What are we doing today? Facing a possible Saturday session because of the crowded schedule, we are now into about the third hour of debate regarding House Joint Resolution 192. Is this the first time this year this has been brought up? No, it is the second time this has been brought up. This past June 4 the House failed to suspend the rules and pass the same resolution.

There is no doubt in my mind that the tragic genocide of 1.5 million Armenians between 1915 and 1923 was a horrible, terrible happening. But this is 1985. Turkey is an important NATO ally. Turkey borders the Soviet Union for 400 land miles. Having visited Turkey this past August for 3 days, I can assure my colleagues that the leaders of Turkey are very much disappointed in the Congress of the United States that this Chamber twice a year would try to embarrass Turkey and its leaders over something that happened back in 1915 to 1923.

I would ask my colleagues again, as I did earlier today, what would the American people say if every year the Turkish General Assembly passed a resolution, House Joint Resolution 192 they could call it, intending to embarrass the United States because of our treatment of the Indians years ago or having blacks as slaves?

The CHAIRMAN. The time of the gentleman from Kentucky [Mr. HUBBARD] has expired.

Mr. FORD of Michigan. Mr. Chairman, I yield 1 minute to the gentleman from Kentucky [Mr. HUBBARD].

Mr. HUBBARD. I thank the gentleman for agreeing to give one minute of time to those of us in opposition.

Mr. FORD of Michigan. I will give the gentleman additional time. I have to point out to the gentleman that I had to yield to Members of the other party who were not permitted to speak and, unfortunately, the principal author of the bill got the gentleman's time. Because he happened to be a Republican, he could not get time over there.

Mr. HUBBARD. I thank the chairman.

Mr. Chairman, this past August, visiting in the beautiful Turkish capital in Ankara, several members of the General Assembly again expressed their total shock at why the United States House of Representatives year after year wants to come forward and embarrass Turkey.

The State Department vigorously opposes this resolution, the Defense Department realizes that Turkey is an important ally who helped us in the Vietnam war and who would help us again. We have strategic points, sensitive points, inside Turkey, very close to the Soviet Union.

Again I say I hope the Members will join in opposition to this resolution and, hopefully, we would all agree that this atrocity between 1915 and 1923 is shameful but that we can look to some of the tragedies that are happening nowadays, including the possible terrorism that killed 285 American soliders today.

Mr. HANSEN. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana [Mr. HILLIS].

Mr. HILLIS. Mr. Chairman, I rise in strong opposition to the resolution now pending before the body.

Mr. HANSEN. Mr. Chairman, just let me make a point that no one on our side in opposition has asked. Maybe the gentlewoman from Nevada did when we gave her her request.

Mr. BIAGGI. Mr. Chairman, I rise to renew my support of House Joint Resolution 192 to designate April 24, 1986, as a "National Day of Remembrance of Man's Inhumanity to Man." This resolution which I am proud to cosponsor and voted for when it came before the House in June is an important resolution because it places the Congress in the position of visibly condemning those nations who have or continue to practice genocide.

The resolution has generated a great deal of controversy because of its legitimate quest to especially recognize a group of some 1.5 million victims of genocide. I refer to the Armenian victims of genocide perpetrated by the Ottoman Turkish Empire over an 8-year period beginning in 1915.

I strongly resent the outrageous effort being undertaken on the part of opponents of this resolution to dispute the historical accuracy of the Armenian genocide. I find it especially disturbing that the current Turkish Government is leading the effort aimed at either watering down or defeating this resolution entirely. What is especially difficult for me to accept is the position being advanced by our own Ambassador to Turkey Robert Strausz Hope. He contends that the Turkish Government will view passage of the resolution as a "distortion of history" and he adds "the Turkish Government does not accept the fact that there was a deliberate policy of genocide under the Ottomans against Armenians."

The fact that this genocide did occur is not challengable. The question of the intent of the perpetrators—or how closely the existing Turkish Government should feel responsibility about the actions of an earlier government to me are superfluous issues. The central issue is—does the Congress of the United States want to take a strong stand against genocide or doesn't it. Passage of House Joint Resolution 192 represents an affirmative answer.

This action we are asked to take today in recognizing the Armenian genocide is not without precedent. In both 1975 and again in 1984, and in both cases with my strong support, the House did pass resolutions very similar to this one. In both instances, the other body failed to act. The U.S. Holocaust Memorial Council intends to include the Armenian genocide in its museum and educational programs. President Carter on May 16, 1978, remarked at the White House "in the years preceeding 1916, there was a concerted effort made to eliminate all the Armenian people, probably one of the greatest tragedies that ever befell any group." Finally as the committee report notes, President Reagan on April 22, 1981, did make reference to the Armenian genocide when he said "Like the genocide of the Armenians before it, and the genocide of the Cambodians which followed it, and like too many other such persecutions of too many other people, the lessons of the Holocaust must never be forgotten."

What is not in issue is that the Ottoman Turkish Empire did commit one of the first and worst acts of genocide against the Armenian people in 1915. What is not in issue is the fact that the United States should condemn past acts of genocide and work for the elimination of future acts of genocide. Therefore, why is House Joint Resolution 192 so in issue. It is the right response on the part of the Congress to the horrible events of earlier this century. I urge its passage as reported by the committee.

Victims of genocide do exist in this world. We deplore those who perpetrated these acts. It is our responsibility not to allow the manipulation of history especially on a matter of this gravity.

The Armenian-American community is highly regarded and respected. They have made an enormously important contribution to our society in so many different ways. They have and continue to earn an honored and influential place in the American society of today. The events against an earlier generation of Armenians is something which remains so much a part of their history. The many responsible leaders in the Armenian-American community join in condemning recent acts of violence and terrorism directed at Turkish diplomatic

personnel. The importance of House Joint Resolution 192 to the Armenian-American community should not be understated. It should be recognized and then passed by the House today.

Mr. BOLAND. Mr. Chairman, I strongly support House Joint Resolution 192, which would establish April 24, 1986, as a "National Day of Remembrance of Man's Inhumanity to Man."

This day is intended as a day of commemoration for all victims of genocide. But as the resolution notes, it particularly recognizes the 1.5 million people of Armenian ancestry who were victims of the genocide perpetrated in the Ottoman Empire between 1915 and 1923. By setting aside this day, we will acknowledge the pain and suffering of the men, women, and children who died for no other reason than the fact that they were Armenians. In remembering those who perished in the Armenian genocide, we can reaffirm our dedication to the principles of personal and religious freedom, and our commitment to promoting peace and liberty throughout the world.

The Armenian genocide is a historical fact and to deny that fact is to deny the enormous amount of evidence supporting it. Today, some 70 years after the fact, the Turkish Government refuses to even acknowledge the events which took place under its predecessor government. We owe it to every victim of genocide to remember the horrible events of the past, to better understand and appreciate the magnitude of suffering involved, and to educate our children so that these terrible acts will not be repeated.

I urge my colleagues to support this resolution, which will help keep alive the memory of all victims of genocide. In passing this measure we can acknowledge the fact that there are instances in history when man's worst instincts prevail over his best. As unpleasant as that fact may be, seeking to ignore it or deny its existence poses a far greater threat to the world's future than any effort to recognize it. Only in acknowledging the past can we learn from it. House Joint Resolution 192 can make an important contribution toward that end and it deserves the support of the House.

Mr. ASPIN. Mr. Chairman, I rise in support of House Joint Resolution 192 to memorialize the anniversary of the start of the genocide of Armenians as a "National Day of Remembrance of Man's Inhumanity to Man."

A number of assertions have been made by opponents in the course of the debate. These assertions require a response.

First, to memorialize the genocide of Armenians is no more anti-Turk than to memorialize the victims of the holocaust is anti-German. Are the many events last spring marking the liberation of the concentration camps a gratuitous insult to one of our most needed and trusted allies?

Second, this is not an attack on the current Turkish Government. The genocide was committed from 1915 to 1923 by Ottoman Turkish Governments prior to the establishment of the current Turkish Republic. There is a problem because the current Turkish Government—unlike the current German Government—declines to acknowledge the historical facts of its predecessor's conduct. But the resolution before us says absolutely nothing about the conduct or policies of the Turkish Republic.

Third, the suggestion that the Armenian genocide may never have occurred flies square in the face of all the evidence. The American ambassador to the Ottoman Empire reported extensively for years on the continuing massacres and his efforts to bring them to an end. Most significantly, Kemal Ataturk, the founder of the Turkish Republic, himself denounced the massacre of "millions" of Armenians. In a 1926 article, he wrote of those Turkish rulers "who should have been made to account for the lives of millions of our Christian subjects who were ruthlessly driven en masse from their homes and massacred."

If the founder of the Turkish Republic can denounce the massacre of Armenians, why can't the United States Congress memorialize this face of history?

Last August, a U.N. human rights panel in Geneva specifically cited the genocide of Armenians. The Turkish Government objected to the reference too, and sought to have it expunged. It was not. We would look a little strange if—after all the criticisms I have heard in this body about the weak-kneed United Nations—we were to kill this resolution because of alleged offense only a dozen weeks after the U.N. panel has acted.

Finally, this resolution most certainly does not advocate or support terrorist organizations. There isn't a word in there in support of terrorism. Quite the contrary, the resolution condemns blatant murder.

House Joint Resolution 192 is very simple. It says nothing—good or bad—about the Turkish Republic or the Turkish people. It simply memorializes the genocide of Armenians—something Congress has done several times over the years. To suddenly refuse to do so this year—the 70th anniversary of the genocide—would be a major shift and a slap at all Armenian-Americans.

Mr. FAUNTROY. Mr. Chairman, as a cosponsor of House Joint Resolution 192, I am pleased to have the opportunity to urge support of this legislation which would designate April 24, 1986, as "National Day of Remembrance of Man's Inhumanity to Man."

This resolution is before us for the purpose of providing yet another needed reminder of the murderous capability of mankind as expressed in the crime of genocide and of the need to maintain vigilance against all variations of this offense against the human species.

The date House Joint Resolution 192 designates as the day for us to especially focus on humankind's capacity for genocide is April 24, the date on which people of Armenian ancestry commemorate the loss of some 1.5 million victims of genocide perpetrated by the governments of the Ottoman Turkish Empire during the years 1915–23.

This commemoration would be universal in application. The African victims of the slave trade in the Americas, the native American victims of, "manifest destiny" and the conquistadors, the Cambodians, the Jewish and other victims of the Nazi Holocaust, the brutalized of South Africa, and other victims of attempts to destroy racial, religious, or social collectivities would also be remembered.

Mr. Chairman, in this world which has seen so much racial, religious, and ethnic hatred and in which modern technology offers increased capability for genocide it is appropriate that we designate 1 day to remember man's inhumanity to man and all the victims of genocide. I urge my colleagues to approve House Joint Resolution 192.

Mrs. BURTON of California. Mr. Chairman the slaughter of 1,500,000 Armenians between 1915 and 1918 is a historically verifiable fact based upon a chilling weight of evidence.

This ethnic extermination was an act of genocide against a minority Christian population and a precursor to an act of genocide against 10 million people during World War II.

"Who still talks nowadays of the extermination of the Armenians?" was the question Hitler raised when the effect of public opinion was posed.

Our action in passing this resolution will, in some small fashion, demonstrate that the House of Representatives can express a sense of moral revulsion toward a blot on world history and, in stark rebuttal to Adolph Hitler, show that public opinion does care about the Armenian genocide and the need to call attention to acts of inhumanity against mankind.

Mr. MATSUI. Mr. Chairman, I rise today in support of House Joint Resolution 192 which would designate April 24, 1986 as "National Day of Remembrance of Man's Inhumanity to Man." April 24 is the anniversary of the brutal massacre by the Ottoman Empire Turks of its Armenian population. The systematic persecution of 1.5 million innocent Armenians was the first incidence of genocide in the 20th century.

I wholeheartedly support this proposal to designate this day as a National Day of Remembrance to honor all genocide victims. It is important for those of us who cherish freedom and who abhor the crime that was committed, to stand together in tribute and recognition of the men, women, and children whose lives were lost.

The administration has used faulty logic in its argument opposing a National Day of Remembrance. Secretary of State George Shultz, in a letter sent to Members of Congress, said that support of this resolution might encourage terrorist attacks. Since when do we allow terrorists to hold hostage our Nation's window on history? By refusing to acknowledge the brutal acts of history, we provide lasting refuge for modern practitioners of genocide and terrorism.

In plotting the second genocide of the 20th century, Hitler asked rhetorically, "who remembers the extermination of the

Armenians?" It is up to us, the free people of the world, to remember and to remind others.

Mr. FLORIO. Mr. Chairman, I rise in support of House Joint Resolution 192, to designate a National Day of Remembrance to commemorate and call attention to the Armenian genocide of 1915. As a cosponsor of this resolution, I would like to express my pleasure that this resolution has been again brought before us and that we will have the opportunity to recognize a tragedy that spanned a number of years and decimated the Armenian population in the Ottoman Empire while leaving innumerable scars on the survivors of this tragedy.

Last June, we observed the 70th anniversary of the beginning of the tragic genocide that lasted until 1923 and caused the deaths of 1.5 million Armenians and the exile of 500,000. The Armenian people were not only deported and robbed of their lands and possessions but they were also subjected to coldblooded massacres and atrocities and brutal extermination. Countless survivors witnessed the atrocities perpetrated upon their families, relatives, and friends; the survivors still carry with them the memory and the scars of this tragedy. Many of these survivors later emigrated to our country where they have demonstrated a determination to contribute to our society to the fullest extent possible.

The most glaring aspect of this entire tragedy is the fact that the Turkish Government still continues to deny that this genocide ever occurred and explains the deaths of 1.5 million Armenians as having resulted from years of civil strife in the region. This denial of history which has been documented by survivors, eyewitnesses, correspondents, U.S. Presidents and even past Congresses, underscores the need for approving House Joint Resolution 192 and paying tribute to the memory of those who died while ensuring that future governments will not be able to deny these atrocities. House Joint Resolution 192 designates a day of remembrance for the victims of the genocide but its intent has been misconstrued and its effects have been cast in the light of present-day relations between the United States and Turkey.

I would like to reiterate for my colleagues that this legislation addresses the concern that acknowledging formally this tragedy would endanger our relations with Turkey. The language of the resolution specifies that we are addressing events that occurred under the Ottoman Empire rule.

Despite the historic amnesia of the Turkish Government, it is our responsibility to preserve the memory of this tragedy. It is only with the constant reminder of tragedies such as the Armenian genocide that future tragedies can be prevented. House Joint Resolution 192 has become for many Americans a symbol of resolve of the Congress to remember the past and ensure that such tragedies never again happen. We owe it to future generations to continue our vigilance and ensure that this tragic chapter of the history of mankind is never again ignored, forgotten or doubted. I urge passage of this commendable resolution.

Mr. HANSEN. Mr. Chairman, I yield the balance of our time to the gentleman from California [Mr. BADHAM].

The CHAIRMAN. The gentleman from California [Mr. BADHAM] is recognized for 3 minutes.

Mr. BADHAM. Mr. Chairman, we are about to wrap up the debate on this resolution that we have. As has been said, we have had it before us a few times this year.

I never heard of Armenia until I came to this body, I guess. I heard about Armenians first when I was a child growing up in the depression and heard about starving Armenians. I imagine everybody my age or a little bit older or some younger have heard that expression, which relates to the tragic events of World War I. I never met a Turk until I was a Navy officer in the Korean war, and we had units of the Turkish Navy operating side by side on the land and at sea with our Navy and with our Armed Forces.

I grew up with Armenians in my hometown who were community leaders, fine respected people.

It is unfortunate that this resolution is before us today, because it is not going to help anybody, it is not going to help Americans of Armenian descent, it is not going to help Americans of Turkish descent. Indeed every time these kinds of resolutions come up there is another terrorist attack against Turkish diplomats, wherever they might be in the world, from radical Armenian terrorist organizations who have as their goal the lopping off a hunk of Turkey and having that become part of the Soviet Union. Is that really what we want?

My first visit to Turkey was in 1977, right during the height of the arms embargo, and our airplane that said, "United States of America" proudly along the sides of it landed at a Turkish Air Force Base outside of Izmir, and we looked at the results of a NATO ally's air force, sitting around with flat tires, and airplanes with no engines. 1977, mind you. F-86's. Come on, America. Does it really pay to be a friend of America? If you are a friend of America and an ally, you can stand by long enough and somebody will have a resolution condemning you.

Yes, this does condemn Turkey and it condemns Turks. My good friend and colleague from California, MARTY MARTINEZ, referred to the damage as having been done by not the Ottoman, not the government of the Ottoman Empire, but by the Turks.

Ladies and gentlemen of the Congress of the United States, have the spirit of this time of year to look at this for what it does and reject it. Have the spirit that we like to have at this time of year to say that maybe we ought to be getting people together rather than tearing them asunder and pitting Americans of various ancestry against Americans of other ancestry, which gives rise to the terrorism that we will claim to condemn.

Think about it.

Mr. FORD of Michigan. Mr. Chairman, I yield myself such time as I may consume.

Mr. FORD of Michigan. Mr. Chairman, House Joint Resolution 192 will designate April 24, 1986, as a day to remember man's inhumanity to man and all victims of genocide. It is on this date that the people of Armenian ancestry commemorate the death of some 1.5 million victims of genocide at the hands of the government of the Ottoman Empire.

At the outset, I want to stress that this resolution in no way criticizes the Government of the Republic of Turkey, with whom we enjoy an excellent relationship, and I have been somewhat taken aback by some of the assertions made during the debate.

It is my intention, as soon as we begin the amendment process, to offer an amendment that gives all of the Members of this House an opportunity to do what they have been saying they want to do. The adoption of my amendment will strike the reference to "Turkish" and "Turkey" and leave the only reference to the Ottoman Empire between 1915 and 1923, prior to the establishment of the Republic of Turkey. I will give this House an opportunity to have legislative history created that will show that this House took deliberate actions to determine that the events occurred before the creation of the Republic of Turkey and that the present Republic of Turkey is in no way referred to. If this amendment fails, it leaves a rather interesting—and I was fascinated to hear people over there suggest they were going to vote against the amendment because I constructed this amendment in response to what I thought the concerns of the State Department were. At least they are the ones communicated to me in writing.

Now, if you want to vote against this, does that mean that you do not agree with me that the present Turkish Republic was not responsible? Or does it mean that you take the other side of it?

□ 1510

The clear way to have this Congress go on record saying that we want it abundantly clear who we are talking about and that we are not indicting our allies in the Republic of Turkey, is to vote for my amendment when I offer it during the amendment process.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman.

Mr. PASHAYAN. I thank the gentleman.

I want to thank the chairman because I think he is exactly right in the effect of what his amendment achieves. That is the precise purpose of it. There is some ambiguity in the present language. I am the first to acknowledge that. I have said to this body, I have said to my colleagues and I think that there are some people who are observing this proceeding who fall into neither of those two, who understand when I say that I have said to them, and they know who they are, they are representatives of the government we are talking about, that it is not the purpose to indict or to suggest or in any way to impugn this Government of Turkey. The whole reference is to an historical event, the actions of a government that is now defunct, the Ottoman Empire, the Ottoman-Turkish Empire.

The amendment of the chairman of the committee perfects the present language. It is a perfecting amendment, and it makes it abundantly clear, unambiguously clear, that the resolution itself refers to an historical event of actions taken by the Ottoman-Turkish Empire or the Ottoman Empire prior to the day this Turkish Government was even conceived, prior to the day when this Government's constitution was written and when it was in operation. I do not think it is possible to make it more clear to anybody who wants to read simple English simply and clearly.

Mr. FORD of Michigan. I thank the gentleman for his comments and for his forbearance. I know the strong feelings he has had on this from the beginning; he is a valued member of the committee. There was some misunderstanding today as a matter of fact about why I could not get the amendment to the other side as fast as they would like it.

I went further than the amendment that was drafted this morning and took out additional language after conferring with the gentleman and the principal sponsor of the legislation in getting their agreement to it. I want to assure everybody that every step we have taken, if you look at the legislative history, has been to accommodate every concern that has been expressed to us. The gentleman has shown remarkable forbearance in cooperating in this effort.

The CHAIRMAN. Under the rule, all time has expired.

The Clerk read the joint resolution, as follows:

H.J. RES. 192

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That April 24, 1985, is hereby designated as "National Day of Remembrance of Man's Inhumanity to Man", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day as a day of remembrance for all victims of genocide, especially the one and one-half million people of Armenian ancestry who were victims of the genocide perpetrated in Turkey between 1915 and 1923, and in whose memory this date is commemorated by all Armenians and their friends throughout the world.

Mr. FORD of Michigan (during the reading). Mr. Chairman, I ask unanimous consent that the joint resolution be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

Mr. McCAIN. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will continue to read.

The Clerk concluded the reading of the joint resolution.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows

Committee amendment: Page 3, line 1 strike out "1985," and insert in lieu thereof "1986,".

The committee amendment was agreed to.

PARLIAMENTARY INQUIRY

Mr. HANSEN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HANSEN. Mr. Chairman, does this amendment preclude the substitute amendment of the gentleman from Pennsylvania [Mr. MURTHA] from being introduced?

The CHAIRMAN. We have disposed of the first committee amendment changing the date. This does not preclude other amendments from being offered at a later time.

The CHAIRMAN. The Clerk will report the remaining committee amendment.

The Clerk read as follows:

Committee amendment: Page 3, line 8, strike out "in Turkey" and insert in lieu thereof "by the governments of the Ottoman Turkish Empire".

The CHAIRMAN. Does any Member wish to speak on the committee amendment?

Mr. LUKEN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I want to rise in favor of this resolution to honor those Americans of Armenian descent and their relatives who were the victims of the genocide perpetrated on them early in this century. But more importantly, I support this resolution because it would recognize man's inhumanity to man, and the consequences of that inhumanity in the past to future generations. As Americans, we pride ourselves as champions of freedom and human rights, and in that spirit, we ought to approve this resolution today.

Unfortunately, Members of this House are getting bogged down in the controversies of this issue, including some assertions about what this resolution would and would not do, if enacted.

The first of these, is whether such a resolution would in some way legitimize the criminal acts of Armenian terrorists. Let me say that as a Member who deplores the savage acts of international terrorists, and has spent a great deal of effort in probing the kind of media coverage afforded to such people, I would be opposed to any measure that could be construed to encourage those who kill and maim innocent people in the name of political causes. However, I fail to see or understand how this resolution would have that effect. In fact, I submit that the nature of this resolution deplores impersonal and savage acts perpetrated throughout the world in the name of a government or a political cause.

Second, there are those who argue that this resolution is an insult and an affront to the Turkish Government and the Turkish people, longtime allies of the United States and to NATO. I again would not want to lend credence to any measure which would disparage our valuable allies. Again, I fail to see how this resolution, particularly if the language is changed to more accurately reflect the historical designation of the Ottoman Empire, and not the current-day Republic of Turkey, in the resolution, this charge becomes even more moot.

In conclusion, I hope that Members will see through the fog which hangs around this issue, as they have on so many other issues, and recognize this measure.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

AMENDMENT OFFERED BY MR. FORD OF MICHIGAN

Mr. FORD of Michigan. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. FORD of Michigan: Page 3, strike lines 6 through 9 and insert in lieu thereof the following: "for the one and one-half million people of Armenian ancestry who were victims of the genocide perpetrated by the governments of the Ottoman Empire between 1915 and 1923 prior to the establishment of the Republic of Turkey, and in".

Mr. FORD of Michigan. Mr. Chairman, I have outlined this before. I am certainly hoping that this amendment will be adopted because I have heard nothing but a constant strain of concern at all stages that we make it clear that we are not talking about the Republic of Turkey and we are not in any way attempting to condemn the Republic of Turkey.

Indeed, we do not try to assign responsibility in this kind of a resolution; this is a commemorative resolu-

tion. As I indicated, we report about five or six of these through the House per week. This is the first one that has generated this kind of inordinate concern. But in any event, the concern has been expressed to me by the State Department in communication and by Members who have spoken here today as well as in the committee. I have crafted this amendment in a way that removes even the watered-down language that was in the second committee amendment referring to the Governments of the Ottoman-Turkish Empire, and I changed that to the "Ottoman Empire." I am not trying to rewrite history and say that the Ottoman Empire was someplace else—in fact, a good deal of it was in what is now Russia—so I do not know whether it is really fair to call it the Ottoman-Turkish Empire or not. From what I have heard of the interpretations of history today, it would not be at all surprising to me if somebody quarreled with the accuracy of that.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman.

Mr. PASHAYAN. I thank the gentleman for yielding.

I wish to thank the chairman for his very skillful crafting of this language because it does remove ambiguity. I should like to ask the chairman: Is it the intention of the chairman, by this amendment, to create a legislative history that clearly exempts the Republic of Turkey from the ambit of this resolution? Is that the intent of the chairman?

Mr. FORD of Michigan. That is exactly my intent.

Mr. PASHAYAN. If the gentleman will yield further, is it the opinion and the judgment of the chairman that without this amendment it is quite likely, there is at least an ambiguity, although that is not the intention, that there is some ambiguity in the language leaving that same question open?

Mr. FORD of Michigan. I would make it even clearer than that. If you think that Turkey should be held responsible, you should vote "no" on the amendment.

Mr. PASHAYAN. I think the chairman is right.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman.

Mr. BURTON of Indiana. I thank the gentleman.

Mr. Chairman, I think many of us have a problem. First of all, the gentleman indicated that five or six of these go through here a week; I do not recall anything like this having gone through here.

Mr. FORD of Michigan. We just passed five before this one came up today. Five resolutions of this kind just before this one came up.

Mr. BURTON of Indiana. That dealt with this subject matter?

□ 1520

Mr. FORD of Michigan. No, commemorative resolutions.

Mr. BURTON of Indiana. Well, this does not fall into the category of what I call truly commemorative. You are getting into an entirely different area.

Anyhow, my question is, why is this being limited to just this one area or this one period of genocide in one area of the world?

There are all kinds of acts of genocide that have taken place in our lifetime. There is one in Afghanistan right now that is going on, there was one in Cambodia or Kampuchea under Pol Pot, and there was the Cultural Revolution in the 1950's when the Chinese killed 15 million to 30 million people. These were huge acts of genocide. I do not understand why the gentleman is limiting it to this one area where a very valuable ally of the United States is involved.

Mr. FORD of Michigan. I can answer the gentleman, if he gives me time. Let me just say to the gentleman that the reason that this deals alone with this one act is that April 24 is the date that has been celebrated in Armenian Christian churches as of this year for over 70 years. I think it would be rather presumptuous of us to assign that date to someone else.

If the gentleman wants a resolution on any of the subjects which he has talked about, commemorating anybody's murder of anyone in the countries that he has mentioned—and I have told him this in the committee—he should introduce it, and I hereby commit myself to cosponsor it and help him get it passed.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from California.

Mr. PASHAYAN. Mr. Chairman, my colleague may add my name to his list; any genocide he wishes to commemorate, any bill that he wishes to introduce commemorating as a historical fact a genocide done, he may feel free to add my name to the list.

Mr. BURTON of Indiana. Mr. Chairman, if the gentleman will yield one more time, I think that is a very kind gesture, but there have been so many acts of genocide perpetrated upon humanity throughout history, if we started getting into every act of genocide from Attila the Hun, Genghis Khan, on down to recent times—and you are going back 50 years with this one—we would spend all of our time passing resolutions of this type.

PARLIAMENTARY INQUIRY

Mr. HANSEN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HANSEN. Mr. Chairman, if I may state this one again, does this particular amendment put in by the gentleman from Michigan [Mr. FORD] preclude the gentleman from Pennsylvania [Mr. MURTHA] offering a substitute amendment?

The CHAIRMAN. Any germane substitute for the bill would be in order to be debated and to be voted upon.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from California.

Mr. PASHAYAN. I do not know if the gentleman's intention here is to engage this body in a long and technical debate for the purpose of trying to wile away the time until the gentleman might feel that some of us are even getting tired of this. The gentleman has read the language, and there is nothing here about——

The CHAIRMAN. The Chair has recognized the gentleman from Utah [Mr. HANSEN], and does the gentleman wish to continue his parliamentary inquiry?

Mr. HANSEN. Mr. Chairman, I guess until that would be offered the Chair would have no way of determining whether it would be germane; is that correct?

The CHAIRMAN. The gentleman is correct.

Mr. HANSEN. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman from Utah [Mr. HANSEN] is recognized for 5 minutes.

Mr. HANSEN. Mr. Chairman, I personally feel that those who have looked at this—and many of us have for many months here—realize that the gentleman from Pennsylvania [Mr. MURTHA] has the type of an amendment that is an amendment in the nature of a substitute that possibly answers half of the questions, if not all of the questions, that have been brought up today.

Most of the speakers who have been on their feet have talked about all the genocides that have been practiced, and they go back and recount them through history. We do not have to go through that again. We talked about what we gain and what we lose. We talked about those who oppose this in the administration, our Ambassador, and other people such as those. But in effect—and I know the Chair has not ruled yet, and I respect and appreciate that—we had, as I recall, as we walked in, an open rule. If we accept this premise, we have all of a sudden changed the rules that the Rules Committee gave us to a closed rule, and we now find ourselves in a situation where possibly this is a laudatory or admirable type of amendment.

I personally feel that it is only a half step. Having read the other amendment, which very possibly we will never get the opportunity to hear, we have now taken one minute step into this when we could have the whole thing, and I am very concerned about that, Mr. Chairman.

Therefore, I urge this body to reject this amendment so that something better can come along. I honestly feel that if the Members of this House had the opportunity to see something better—and I am sure most of them who are going to stand up now and speak have—they could see that this would cover all the problems we have and not just this select prosecution we are now looking at.

In this particular instance this still puts us in the position of zeroing in on one particular area, one group of people, and not taking them all. Those who have stood up, say maybe five of all the speakers, have talked again and again of all the types of genocide and problems that have occurred in America. Now the gentleman from Pennsylvania crafts a very fine amendment which we may not possibly have the opportunity to hear, and I would hope that the Members of the House would say, "Let's get a chance to look at something else." So if we want to vote against genocide and hit Cambodia and Hitler and maybe Sherman's march to the sea and what the Missourians did to the Mormons in 1883 and what we did to the American Indian, and on down the line, we now have that opportunity.

Why do we not put this all in one big thing and defeat this particular amendment offered by the committee chairman? Then we can get to the point of an amendment that we can all feel good about, and we can walk away in the Christmas spirit feeling that we have done something that is right and not hurt one of our most cherished allies, the Republic of Turkey.

So, Mr. Chairman, I urge strongly that we defeat this amendment so that we do have an opportunity to get to something that is much better.

AMENDMENT OFFERED BY MR. MC CAIN AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. FORD OF MICHIGAN

Mr. McCAIN. Mr Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. McCAIN as a substitute for the amendment offered by Mr. FORD of Michigan: Page 3, strike lines 6 through 9 and insert in lieu thereof the following: "for the one and one-half million people of Armenian ancestry who were victims of genocide between 1915 and 1923 prior to the establishment of the Republic of Turkey, and in".

Mr. FORD of Michigan. Mr. Chairman, I reserve a point of order against the amendment. I have not seen the amendment, and I would ask the gentleman if we may have a copy of it.

The CHAIRMAN. The gentleman from Michigan [Mr. FORD] reserves a point of order on the amendment.

The gentleman from Arizona [Mr. McCAIN] is recognized for 5 minutes in support of his amendment.

Mr. McCAIN. Mr. Chairman, having observed this debate now for some time, it appears as if there is a great difference of opinion as to the perpetrators of the genocide which we are in agreement took place tragically, the genocide that was inflicted upon the Armenian people. The question that arises, of course, is who perpetrated these crimes, and who is responsible?

I believe the purpose of the bill of the gentleman from Michigan [Mr. FORD] is to express the sorrow and grief of the American people and others throughout the world for those injuries that were perpetrated upon the Armenian people. My substitute simply removes the words, "perpetrated in Turkey by the governments of the Ottoman Empire," just those words. It would now read "* * * remembrance for * * * the 1½ million people of Armenian ancestry who were victims of the genocide between 1915 and 1923 prior to the establishment of the Republic of Turkey * * *" The rest of it is left unchanged.

I hope that the gentleman from Michigan would recognize that by removing the word, "Turkey," from this resolution we would be achieving his goal, which is to express sympathy for the people of Armenia and for what they have suffered. At the same time we can remove any doubts as to who is responsible, since that seems to be so eloquently described by my colleague, the gentleman from New York [Mr. SOLARZ], as to who were the perpetrators of these crimes and who indeed was responsible. The crime remains, the victims remain, the tragedy remains, and we want to commemorate that tragedy and, by doing so, ensure that it never happens again.

Mr. Chairman, I hope that my colleague, the gentleman from Michigan, would accept this amendment.

The CHAIRMAN. Does the gentleman from Michigan [Mr. FORD] insist upon his point of order.

Mr. FORD of Michigan. Mr. Chairman, I withdraw my point of order.

The CHAIRMAN. Does the gentleman wish to speak on the substitute?

Mr. FORD of Michigan. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to address questions to the author of the amendment.

As I look at it, all the gentleman does is repeat the language of my amendment, except to strike the reference to the "Ottoman Empire"?

Mr. McCAIN. That is correct.

Mr. FORD of Michigan. But then you leave in the language, "between 1915 and 1923 prior to the establishment of the Republic of Turkey"?

Mr. McCAIN. Indeed that is correct.

Mr. FORD of Michigan. Now, the interesting juxtaposition of my amendment without yours is that it makes a distinction between the Ottoman Empire and the Republic of Turkey. Your amendment leaves nothing to distinguish the Republic of Turkey from anything. If your objective is to make it clear we are talking about somebody else and not our allies in NATO, I suggest the gentleman's amendment robs the amendment of that clarity because it removes one side of the comparative juxtaposition.

□ 1530

Mr. McCAIN. Well, if the gentleman will yield, it is my understanding from the debate and my understanding from the study of history that there is a great deal of debate as to whether—and the subject of debate here was whether this genocide was indeed perpetrated by the Ottoman Empire or by Turkey or who it was that perpetrated this act of genocide, which we all accept took place.

By removing "Ottoman Empire" from this then, I think we remove the discussion and the debate which has taken place as to who perpetrated this crime, while still recognizing that it existed and took place.

Mr. Chairman, if the gentleman from Michigan objects, I will withdraw the amendment.

The CHAIRMAN. Does the gentleman from Arizona ask unanimous consent to withdraw the amendment?

Mr. McCAIN. Mr. Chairman, the gentleman from Michigan, I believe, has the time and if the gentleman would yield, I would tell the gentleman that if he wishes the amendment to be withdrawn, I will withdraw the amendment.

Mr. FORD of Michigan. Mr. Chairman, I have no objection to withdrawing the amendment.

Mr. McCAIN. Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona to withdraw his amendment?

There was no objection.

Mr. BADHAM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me try to give a description of where it is that we find ourselves now in this thicket.

We have a resolution before us and an amendment to that resolution also before us. The title is, of course, to designate April 24, 1986, which will be 1986, as a "National Day of Remembrance of Man's Inhumanity to Man."

The extremely cleverly drafted amendment proposed by the gentleman from Michigan, who takes modestly and sufficient amount of credit for the clever drafting of this amend-

ment, because man's inhumanity to man, if the Ford amendment is adopted by the Members of this House, gives a very strong unequivocal position that when man was inhumane to man, it occurred in the Ottoman Empire between 1915 and 1923 and it only included Armenia.

If this resolution is adopted with this title, it is so narrowed that man's inhumanity to man as interpreted by the U.S. House of Representatives includes Turkish man's inhumane treatment of Armenian man between the years 1915 and 1923. Is that what we want? I do not think that is really what we want, because men were certainly inhumane to man nationally in the Ukraine, to the Jews, in Afghanistan, to the Bahai's in Iran, in Kampuchea, formerly Cambodia.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I am delighted to yield to my friend, the gentleman from California.

Mr. PASHAYAN. Does the gentleman wish to change the name of the resolution by changing the words——

Mr. BADHAM. I think if the perpetrators of this resolution were to be fully forthright, the title should be amended to call it what it is. Call it a resolution of commemoration and condemnation of the Government of Turkey for man's inhumanity to Armenian man between the years 1915 and 1923.

Mr. PASHAYAN. And women and children?

Mr. BADHAM. Well, I do not refer to presiding officers as chair. So when it says man's inhumanity to man, that is fine.

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield to me?

Mr. BADHAM. I would be delighted to yield to the gentleman.

Mr. FORD of Michigan. Mr. Chairman, I know the gentleman intends this in a spirit of levity, but to refer——

Mr. BADHAM. No, I do not.

Mr. FORD of Michigan. Well, to refer to the 239 cosponsors of this resolution as perpetrators of the resolution I think reflects no credit to the gentleman or to his party.

Mr. BADHAM. I beg the gentleman's pardon.

Mr. FORD of Michigan. They are our colleagues.

Mr. BADHAM. Certainly.

Reclaiming my time, if we are really going to be serious about this, we ought to call it a resolution on Armenian genocide, or we ought to at least leave it open so that language might be put in there that refers to genocide, not just Armenian genocide. I think that is an important point and I think it should be considered, because the amendment is designed specifically, aptly and cleverly, to focus this on one particular genocide, at the sacrifice of all those other people who have suffered genocide.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I am happy to yield to the gentleman.

Mr. PASHAYAN. Mr. Chairman, is the gentleman going to submit an amendment that would change it, let us say, to commemorate the genocide by the Ottoman Empire against the Armenian people between 1915 and 1923?

Mr. BADHAM. Well, one cannot amend the title of a resolution until the resolution is either adopted or rejected.

Mr. PASHAYAN. Will the gentleman do that?

Mr. BADHAM. I might consider that.

Mr. PASHAYAN. Well, the gentleman has my support.

Mr. BATEMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to try to make a point here that I think needs to be made and that we are in significant risk of overlooking as we focus just upon whether or not the harm this resolution can do will be remedied just by an artful slight change in terminology as to whether it is Ottoman-Turkish Empire or just Ottoman Empire. I do not think that cures the mischief that will be done, though I appreciate very much the spirit in which the author of the amendment is attempting to do so.

The words remain in the resolution. We are singling out one incident of man's inhumanity to man that we described as the Armenian genocide.

I have not gone to the dictionary in recent hours to look up the word genocide, but the thrust of that which makes an atrocity, genocide, is that it is focused upon some group generally on ethnic or religious grounds.

That which our Turkish friends are very sensitive about in addition to the fear that this will give aid and comfort to Armenian terrorists in today's world is the reference to this as being—and those tragic events—as being acts of genocide. That is the bare historical issue which 60-some historians, tell us the judgment is history is still out on that and we should not legislate a historical judgment on it.

I have devised language, which quite frankly if this resolution is to pass, I think will legitimately desensitize the issue and would do so in a manner which should accommodate the very legitimate concerns of our Armenian people.

My suggestion would be that at line 7 of the resolution as it comes to the floor, we strike after the word "ancestry," the remainder of that line, the succeeding eighth and ninth lines, and insert in it the language, "both Christian and Muslim who were victims of atrocities perpetrated in the Ottoman Empire between 1915 and 1923," and then resuming with the text.

What this in effect would do would be to express the sense of this Congress and to commemorate through an act of Congress the tragedy that did occur in that part of Asia Minor between 1915 and 1923, a point that no person, no historian disputes. There is no dispute that there were atrocities and they happened there. It is indisputable that there were hundreds of thousand, if not a million and a half, Armenians, who were Muslims who were killed and uprooted from their homes in the course of the turmoil that took place there.

Why not as an act of man's inhumanity to man, if that is what we are to commemorate, why not make reference to the fact that there were atrocities inflicted upon Armenians, not necessarily in genocidal conduct of a government against a particular group of Armenians because of their religious faith?

I would suggest that there is more than enough fault for the millions of people who were wiped out in that part of the world during this 1915 to 1923 period. Why do we not if our real purpose is to commemorate the tragedy of that time that shall apply equally upon everyone who lived or occupied that part of the world, why do we not straighten out this language so it does that, rather than be doing something that in the context of this resolution, its legislative history, will inevitably come through as a judgment by us that X committed genocide against Y, when that is the very judgment that historically none of us are in a position to make?

Mr. SILJANDER. Mr. Chairman, will the gentleman yield?

Mr. BATEMAN. I am happy to yield.

Mr. SILJANDER. Mr. Chairman, I really think the Members should understand what is happening. I appreciate the gentleman in his attempt to clarify the issue.

We were told that this would be an open rule, that those of us who want to condemn genocide of all people could stand on this floor and do so. Now we have the tactic of the gentleman from Michigan introducing an amendment that would preclude us from condemning genocide of all people.

This is clearly, as it turned out to be, not an open rule at all, but rather a closed rule to preclude the Members of this body to condemn genocide among all people, not just focusing on one historical point that some historians say did or did not happen, and if it did happen, we are not sure who perpetrated it and who died on which side or the other.

This is a deception and I hope the Members see this.

PARLIAMENTARY INQUIRIES

Mr. PASHAYAN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. PASHAYAN. Mr. Chairman, a point of clarification: The amendment of the chairman does not preclude any other amendment being introduced, does it?

The CHAIRMAN. The gentleman will restate his parliamentary inquiry.

Mr. PASHAYAN. Mr. Chairman, does the amendment now pending before the body preclude—does the adoption of the amendment now pending before the body preclude any other amendment?

The CHAIRMAN. The Chair would have to examine any subsequent amendment to determine the answer to that question.

Mr. PASHAYAN. I thank the Chair.

Mr. FORD of Michigan. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FORD of Michigan. Mr. Chairman, in light of the rather startling interpretation of the rules that I have just heard from the other gentleman from Michigan, I do not understand that the adoption of this amendment closes the rule in any way at all. I believe that the rules with respect to the propriety of an amendment have to be determined as the amendment is crafted.

We can be here debating amendments until time runs out. There is nothing in my amendment—I would like to ask the Chair, is there anything in the amendment that prevents further amendments to the bill?

The CHAIRMAN. In answer to the inquiry by the gentleman from California, the Chair did not state that the offering of additional amendments would be precluded by the adoption of the amendment that is pending by the gentleman from Michigan.

The Chair stated that he would examine each and every amendment that was presented to the desk to determine if it could be offered.

Mr. MURTHA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I had intended to offer an amendment, and I will offer an amendment, but before the Ford amendment is agreed to, I would like to state the problem that I have.

In talking to the parliamentary experts and our Secretary of State, the gentleman from New York [Mr. SOLARZ], who is such an expert at this type of legislative endeavor, I find that if the Ford amendment is accepted by the body, it would prohibit me the opportunity, or at least that is our speculation, I have it on good word, it prevents me from offering an amendment that I have crafted in order to expand this situation. Let me read the substitute that I would like to offer.

I would rise in opposition to the Ford amendment, which would give me an opportunity to offer my substitute. Here is what my substitute would say:

SUBSTITUTE AMENDMENT FOR HOUSE JOINT RESOLUTION 192

Joint resolution to proclaim December 10, 1986, as the date on which the universal declaration on human rights was adopted by the United Nations as "A Day for the Remembrance for all Victims of Man's Inhumanity to Man Throughout the World"

Whereas, throughout history and in this century, untold millions of men, women and children have died or endured unspeakable suffering and cruelty as a result of the inhumane acts inflicted upon fellow members of the human race through genocide.

Whereas, as men and women everywhere strive to overcome the tragedies of the past and present and to uplift human dignity and the human spirit, it is appropriate to remember and honor all victims of genocide, and to console the families and descendants of victims, and to seek peace and reconciliation among all mankind: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That December 10, 1986, be proclaimed as "A Day of Remembrance" to urge all Americans to take time to reflect on the sufferings or victims of man's inhumanity to man, throughout time and in this century, by remembering those who suffered tragedies in which masses of people died or suffered grievous harm as a result of genocide.

The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such days as a time of remembrance.

□ 1545

This is acceptable, I think, to most Members of the House. If we had this opportunity, I think we would have widespread support for this type of a substitute where we would broaden the issue. Instead of narrowing it to one very tragic incident, we would broaden it to include all of the other incidents that have been talked about earlier today.

So I would urge that the Members of the House reject the Ford amendment and that we have an opportunity to consider a much broader substitute where the House speaks on the issue in a much broader context rather than single out an ally who has been so helpful to the United States and is so important to the security of the United States.

So I would urge the defeat of the Ford amendment and I urge an opportunity, then, to offer this substitute which would broaden the entire issue.

PARLIAMENTARY INQUIRY

Mr. BURTON of Indiana. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. BURTON of Indiana. Mr. Chairman, if the gentleman from Michigan [Mr. FORD] so chose, could he temporarily withdraw his amendment, and I know he is a man of fairness, so that we could consider Representative MURTHA's amendment?

The CHAIRMAN. By unanimous consent, the gentleman could ask that the amendment be withdrawn.

Mr. BURTON of Indiana. But the amendment could be temporarily withdrawn or withheld so another amendment could precede it?

The CHAIRMAN. That is possible by unanimous consent.

Mr. BURTON of Indiana. Mr. Chairman, I move to strike the requisite number of words, and I would like to engage my colleague from Michigan [Mr. FORD] in a colloquy.

My honorable colleague, chairman of our committee, I know in the spirit of friendship and cooperation at this very auspicious time of the year that you would like to do everything possible to bring us all together. And since there is a big division on this issue, would the gentleman consider withdrawing his amendment temporarily so that we can get a vote on the amendment by the gentleman from Pennsylvania [Mr. MURTHA]?

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BURTON of Indiana. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Chairman, it would be futile because I hear objections already.

Mr. BURTON of Indiana. It would be futile why?

Mr. FORD of Michigan. I have a chorus of objections over here.

Mr. BURTON of Indiana. Would the gentleman mind trying it?

Mr. FORD of Michigan. Yes; I would mind trying it.

Mr. BURTON of Indiana. I guess the spirit of this holiday season is not yet upon us.

Mr. FORD of Michigan. I appreciate that the holiday spirit has reached the gentleman. I wish that he would have had it a little earlier in the committee and it would have made things easier.

Mr. BURTON of Indiana. I guess I will just make this brief remark, and that is that I think that the gentleman from New York [Mr. SOLARZ], with whom I agree very infrequently, and the gentleman from Pennsylvania [Mr. MURTHA] have crafted an amendment that is workable and would be agreeable to almost everybody in this body and would solve the problem.

I find it very unfortunate that my colleague——

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BURTON of Indiana. I will be happy to yield to my colleague.

Mr. FORD of Michigan. This is not my first time on the floor with a piece

of legislation, and I did not really handle this legislation until it reached this stage. But I have never seen the Murtha amendment. The gentleman from Pennsylvania [Mr. MURTHA], until today, did not incidate to me he had an amendment. I was told that there was a Murtha amendment, but I was told by people on your side of the aisle about the Murtha amendment.

Then I asked, in conjunction with the gentleman from California, if he could get a copy of the Murtha amendment so that we could look at it. I yet personally, because I have been on five conferences at the same time, have not physically seen the Murtha amendment.

My amendment does not have anything to do with the Murtha amendment. His amendment, if it is worthy, will stand or fall on its own merit.

Mr. BURTON of Indiana. If I may reclaim my time, the honorable gentleman from Pennsylvania [Mr. MURTHA] just read the amendment into the RECORD, and he sits a mere 6 feet from the gentleman. I would think the gentleman could reach across the aisle and very quickly read his amendment. I would urge the gentleman to do so. If he chose to do that, he might find that it is an intelligent alternative to yours, and give us the chance to have a vote on it.

All we want, I say to the gentleman from Michigan, the honorable chairman, is to have the opportunity to vote on this alternative.

Mr. FORD of Michigan. If the gentleman will yield, he tells me he does not have a copy now. If the gentleman offers such an amendment, and we consider the amendment, I certainly will read it. But the amendment before us now is my amendment.

Mr. BURTON of Indiana. The gentleman knows full well if his amendment is voted upon and passed, it precludes any possibility of the gentleman from Pennsylvania [Mr. MURTHA] offering his amendment and gaining a vote.

Mr. FORD of Michigan. I have no way to judge that until I see what he offers.

Mr. BURTON of Indiana. We have just had a meeting with the Parliamentarian and it is my opinion, after listening to the conversation up there, that the Murtha amendment——

Mr. FORD of Michigan. I prefer to get my parliamentary rulings on the floor, in front of the body.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. BURTON of Indiana. I am happy to yield to the gentleman from California.

Mr. PASHAYAN. Mr. Chairman, I hope the gentleman is not engaging in a tactic here that will prolong this proceeding longer than it has already been going.

Mr. BURTON of Indiana. No.

Mr. PASHAYAN. Speaking of the spirit of the season, Members want to get on with this and come to a vote and get the thing over with.

Mr. BURTON of Indiana. I understand that.

If I may reclaim my time, the gentleman from Pennsylvania [Mr. MURTHA] is not going to get a vote on his amendment if the amendment offered by the gentleman from Michigan [Mr. FORD] is brought to the floor and voted upon and passed.

The CHAIRMAN. The time of the gentleman from Indiana [Mr. BURTON] has expired.

The question is on the amendment offered by the gentleman from Michigan [Mr. FORD].

The question was taken; and on a division (demanded by Mr. HANSEN), there were—ayes 7, noes 18.

Mr. FORD of Michigan. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count for a quorum.

Mr. FORD of Michigan. Mr. Chairman, I withdraw my point of no quorum:

The CHAIRMAN. The gentleman withdraws his point of order of no quorum.

All in favor of taking this vote by recorded vote will stand and remain standing.

Mr. FORD of Michigan. Mr. Chairman, just a minute. I withdrew my point of order because I assumed there were enough standing.

The CHAIRMAN. Does the gentleman renew his point or order?

Mr. FORD of Michigan. Yes; I do, Mr. Chairman.

The CHAIRMAN. The Chair will count for a quorum again.

A quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

□ 1610

The CHAIRMAN. Four hundred eighteen Members have answered to their names, a quorum is present, and the Committee will resume its business.

PARLIAMENTARY INQUIRIES

Mr. BURTON of Indiana. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. BURTON of Indiana. Mr. Chairman, if the amendment that is now pending before us is agreed to would that preclude a vote on the Murtha amendment?

The CHAIRMAN. The Chair will have to determine that if the amendment is adopted and the Murtha amendment is then offered.

Mr. BURTON of Indiana. Mr. Chairman, I have a further parliamentary inquiry.

The CHAIRMAN. The gentleman will state his further parliamentary inquiry.

Mr. BURTON of Indiana. I think many of us need to know that; otherwise, it will have a direct impact on the vote.

The CHAIRMAN. The Chair has just stated his position on that; he cannot make an anticipatory decision on that.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Michigan [Mr. FORD] for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. Five minutes will be allowed for this vote.

The vote was taken by electronic device, and there were—ayes 206, noes 213, answered "present" 2, not voting 13, as follows:

[Roll No. 459]

The Clerk announced the following pair:

On this vote:

Mr. MITCHELL for, with Mr. NELSON of Florida against.

Messrs. COLEMAN of Missouri, GRAY of Pennsylvania, COUGHLIN, ROEMER, WALGREN, and RANGEL changed their votes from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. FORD of Michigan. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

□ 1625

Accordingly the Committee rose; and the Speaker pro tempore [Mr. GRAY of Pennsylvania] having assumed the chair, Mr. BONIOR of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the joint resolution (H.J. Res. 192) to designate April 24, 1985, as "National Day

of Remembrance of Man's Inhumanity to Man," had come to no resolution thereon.

LEGISLATIVE SCHEDULE

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent to proceed for 1 minute for the purpose of discussing the schedule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, when the motion was made for the Committee to rise, there were at least six Members on their feet requesting a vote. Those Members were not recognized. The Chairman left the podium and brought the gavel to the current Acting Speaker. In my judgment, that is an unfair way to run the House. I would like the Speaker to explain the procedure.

The SPEAKER pro tempore. This occupant of the chair was not in the chair at that time. The Speaker or Speaker pro tempore cannot comment on proceedings in the Committee of the Whole.

Mr. FRENZEL Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Without objection, the gentleman from Texas [Mr. WRIGHT] is recognized for 1 minute.

There was no objection.

Mr. WRIGHT. Mr. Speaker, I would like to discuss the business for the remainder of the day and the remainder of this session.

Mr. Speaker, it will be the intention of the leadership to call up the rule on H.R. 1524, the Polygraph Protection Act of 1985. If we adopt the rule, that would be all we would intend to do today. There is no business, apparently, available for tomorrow. Three conferences on important matters are in progress. Having asked diligently and sought hopefully for some sign of probable conference report on which the House could vote on either the continuing appropriation, the reconciliation bill or the Food Security Act tomorrow, the leadership has concluded that it is impossible to have any realistic expectation that we would have a vote available to us tomorrow on any one of the three.

Therefore, rather than inconvenience all of the membership by requiring us to be in session tomorrow and/or Saturday and/or Sunday, we would expect to call up a resolution extending the continuing appropriation now in existence at the present level until 6 p.m., or thereabouts, on Monday next, and would ask conferees on these three bills, the continuing appropriations, the Food Security Act, the farm bill and the deficit reduction amendments, the reconciliation bill, to continue and pursue diligently and continuously, to the extent of their abilities, the goal of bringing to the House conference reports on Monday on those three bills.

Now, the House cannot adjourn, the Congress cannot adjourn, for the year until we have a continuing appropriations bill.

We would need to extend certain things in the reconciliation bill if we did not have that legislation itself because certain items therein expire, absent a continuance, so we surely would expect to have those two, and it is surely desirable, if possible at all, to have a conference report on the farm bill.

We would like to see those three things concluded on Monday. They cannot be concluded even on Monday unless conferees on all three bills are willing to stay and work through the weekend, and that is what we on this side would like to ask them to do, and I would earnestly hope and trust that we would be joined in that plea by the leadership on the Republican side, so that the membership at large might not be inconvenienced by staying around from day to day to day, with daily extensions of the continuing resolution.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I am happy to yield to my friend, the minority leader.

Mr. MICHEL. Having talked earlier with the ranking minority member on our Appropriations Committee, the gentleman from Massachusetts [Mr. CONTE], I was given to understand maybe it would be only a 1-day extension, and I must confess that I thought that was rather impractical because I know that we do want to have a farm bill, as the gentleman suggests. In the other body I do not think that a continuing resolution would be finally approved, frankly, until agreement is reached on the farm bill. I am also advised, in talking to the gentleman from Illinois [Mr. MADIGAN]—I have not talked to the gentleman from Texas [Mr. DE LA GARZA]—that progress was definitely being made toward some kind of resolving of that.

So having then seen that you want to go until Monday night for the continuing resolution would certainly be acceptable to this gentleman, for the moment. I know that those of us who have been around for so long feel that it would be great if we could conclude for sure by Saturday or Sunday, but I think it is rather impractical, and then when we begin another week, there is always that temptation—and I know that pressure upon the Speaker and all the rest—"ring me in, before the end of the session, bring this up, bring that up," and then it dwaddles on to Tuesday, Wednesday, Thursday, Friday. We do not want to see that happen. So if we can have that kind of target for Monday night, hopefully it could be reached. I think that would accommodate most Members. I am certainly willing to go along with that if that is the intention of the majority.

Mr. WRIGHT. I thank the gentleman.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. We were just discussing the last bill on the agenda today, National Day of Remembrance of Man's Inhumanity to Man. Is there any possibility or should we expect to see that again before we adjourn?

Mr. WRIGHT. I do not think we ought to expect to try to do that. We are dealing now with emergencies, things that have to be done for the good of the Nation and the economy of the Nation and extending laws that otherwise would expire.

However important our expression may be on the subject of man's inhumanity to man, it is not necessary that we complete it this year.

Mr. BURTON of Indiana. I thank the gentleman.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the assistant minority leader.

Mr. LOTT. It is not clear to me whether or not the intent is to have votes on tomorrow, Friday.

Mr. WRIGHT. We would not have a session tomorrow.

Mr. LOTT. Or Saturday.

Mr. WRIGHT. Or Saturday.

Mr. LOTT. Or Sunday.

Mr. WRIGHT. Or Sunday, if the other body will continue to our continuance of the present level of appropriations.

Mr. LOTT. Until midnight Monday; is that correct?

Mr. WRIGHT. Until 6 p.m. Monday, or thereabouts.

Mr. LOTT. Do we know when we would know that?

Mr. WRIGHT. I think within a very few minutes. I see the chairman of the Appropriations Committee standing here, apparently ready to legislate.

Mr. LOTT. Is it anticipated that we would have votes or we would be in session on Monday?

Mr. WRIGHT. It is anticipated we would be in session on Monday.

Now, I would advise Members not to go home nor leave the city this afternoon until first we discover whether this proposal is agreeable in the other body, and if we have an agreement that the continuing resolution on appropriations is extended until midnight Monday or 6 p.m. Monday, then Members may be reasonably certain that we will have votes Monday, and we would ask them to be prepared to be here Monday morning and to finish the session Monday. In that event, as-

suming the other body acts favorably upon a resolution that we would adopt, there would be no session tomorrow, no session Saturday, no session Sunday.

Mr. LOTT. If the gentleman will yield, does the gentleman anticipate coming in at the usual hour on Monday, at 12 o'clock, or would there be an earlier starting time?

Mr. WRIGHT. There are a number of bills on suspension Monday. I do not know any reason why 12 o'clock noon should not be an adequate hour.

Ms. FIEDLER. Mr. Speaker, will the gentleman further yield on that point?

Mr. WRIGHT. I yield to the gentlewoman from California.

Ms. FIEDLER. I would just like to make one brief point, if I may, as you decide what time we should come back on Monday.

Sunday is the last day of a holiday for the Jewish people. It is Hanukkah. And if it is required that we be here before 10 o'clock, 9 o'clock, or even 12 o'clock, it would be necessary for those of us who are on the west coast to travel the entire evening, and I would hope that the gentleman might consider postponing any votes until maybe 5:30 or 6 o'clock that afternoon, even though debate might take place earlier, to give us a chance to at least complete that evening.

Mr. WRIGHT. Well, let me respond, if I may, to the gentlewoman. I think all Members of the House should try to accommodate all other Members with respect to religious holidays when we can. Today is a part of Hanukkah, I am advised, and, of course, Members are having to travel today if they are away from their homes. I should think that noon Monday is probably a reasonable time so as to permit Members to be in their homes tonight and in their homes all day and through the evening Saturday and through Sunday. If we were to go beyond noon Monday, we probably could not finish Monday.

Ms. FIEDLER. I thank the gentleman.

FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1986

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations be discharged from further consideration of the joint resolution (H.J. Res. 476) making further continuing appropriations for fiscal year 1986, and ask for its immediate consideration in the House, any rule of the House to the contrary notwithstanding, and that debate be limited to 1 hour, the time to be equally divided between myself and the gentleman from Massachusetts [Mr. CONTE], and that the previous question shall be considered as ordered on the resolution to final passage without intervening motion.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 476

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the joint resolution of November 14, 1985 (Public Law 99-154) is hereby amended by striking out "December 12, 1985" and inserting in lieu thereof "six o'clock post meridian, eastern standard time, December 16, 1985".

The SPEAKER. The Chair recognizes the gentleman from Mississippi [Mr. WHITTEN].

□ 1640

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, may I say that this resolution is necessary. All of us are anxious to get away from here and to conclude this year's work. Earlier, I considered introducing a resolution to extend the continuing resolution by only 1 day. Further consideration, however, showed a danger that we would not be able to complete the conference within that time. Although we have made good progress in the conference, there are two subgroups which still have much work to do. After all items have been resolved by the conferees, it will require 10 to 12 hours for the staff to prepare the paperwork before the conference report may be brought to the House.

So after reconsidering the matter, the House leadership felt the only way to be safe was to extend the time until Monday because it looks like it would take that much time to conclude. This does not prevent us from concluding earlier if it were possible. It merely extends the date until 6 p.m. Monday, December 16, so the Congress will not be responsible for any delay or any interruption of the Federal Government.

May I say further that I conferred with Mr. CONTE as soon as I knew the change in plans, and he and I have agreed about the resolution that we are considering.

May I say again that all this resolution does is continue the present rate of operations for agencies still covered by the existing resolution until Monday afternoon at 6 o'clock. In the meantime, we have to conclude two subconferences that we have. One is on Interior and another on Defense, which I am sure all of the Members want us to conclude and which we must conclude. This should allow ample time. I have asked the chairmen of the two subcommittees involved to speed up their subconferences as much as they can and get through as quickly as possible.

So if it is possible to get through earlier, I would say so. But it looks like it is not. We are doing as much as we can. May I say again what the majority leader said and that is that this, of course, has to be concurred in by the body on the other side tonight or else the authority to finance many agencies of Government will lapse.

So I urge the Members' support of this legislation.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the extension. We are making fairly good progress in the conference on the continuing resolution, but there is no way in the world that we can finish that conference today. As you know, the continuing resolution expires tonight.

The Defense Subcommittee and the Interior Subcommittee are still meeting, and they still have a great deal of work. There is no reason why we should let the continuing resolution expire and create difficulties for the executive branch and see Federal employees being furloughed tomorrow.

I hope we can act quickly and that the Senate will do likewise so we can get back to work on the conference on the continuing resolution.

Mr. WHITTEN. Mr. Speaker, I would like to ask all the Members of the conference from the Appropriations Committee be available over the weekend to meet in conference. The conference is currently scheduled to reconvene at 7 o'clock tonight. With Interior and Defense particularly we are counting on staying here and concluding their work.

We hope the Members of the conference will stay available in case we have further meetings. I do not think there is any way for us to speed up what we planned, but in case we do, we will need the Members available to proceed with our business.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman.

Mr. CONTE. I would inquire of the gentleman, is the session with the full conference on the Senate side still scheduled for 7 o'clock tonight?

Mr. WHITTEN. The first business of the conference will be to agree with what we have done here. We meet again at 7 o'clock tonight to deal with what has happened, and several of the reports of the subconferences have not been approved by the full conference.

So it will pay for us to continue to be available over the weekend, if possible, so that we may conclude the conference.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed,

and a motion to reconsider was laid on the table.

PERMISSION TO FILE CONFERENCE REPORT ON THE BILL, H.R. 3037, AGRICULTURE, RURAL DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS, 1986

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill (H.R. 3037) making appropriations for Agriculture, Rural Development and Related Agencies for fiscal year ending September 30, 1986, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I take this time for the purpose of inquiring of the majority leader, it is my understanding the majority leader was prepared to make several unanimous-consent requests relative to the bringing up of conference reports on Monday and waiving points of order.

On the continuing resolution, I would rather delay giving unanimous consent to waiving points of order on the continuing resolution until the gentleman from Massachusetts and the gentleman from Mississippi have an opportunity to discuss an item that we did last year in this same kind of process. If there is that general accord and agreement, we can agree to that unanimous-consent request.

AUTHORIZING THE SPEAKER TO DECLARE RECESSES AT ANY TIME ON MONDAY NEXT

Mr. WRIGHT. If the gentleman will yield, Mr. Speaker, I ask unanimous consent that it may be in order for the Speaker to declare recesses at any time on the legislative day Monday, December 16, 1985, subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WRIGHT. May I inquire of the gentleman further, with respect to other unanimous-consent requests that may be useful, would the gentleman have an objection to a unanimous-consent request waiving points of order with specific reference to the Deficit Reduction Amendments of 1985 or the Food Security Act of 1985?

Mr. MICHEL. I would inquire of the gentleman, is that reconciliation?

Mr. WRIGHT. The reconciliation bill or the farm bill.

Mr. MICHEL. I cannot give the gentleman unanimous-consent request on reconciliation at this time. I was hoping that Mr. MADIGAN would be available to make sure that we could be all right on waiving points of order on the farm bill.

REQUEST FOR CONSIDERATION OF SUNDRY RULES ON MONDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that rules reported by the Rules Committee, if necessary, regarding the continuing resolution appropriations and the Food Security Act of 1985 and the Deficit Reduction Amendments of 1985 may be considered on the same day if reported by the Rules Committee on Monday next.

□ 1650

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Mr. Speaker, reserving the right to object, particularly on reconciliation, I have got to see that reconciliation act before agreeing to that unanimous-consent request.

Mr. WRIGHT. May I ask unanimous consent, then, Mr. Speaker, that any rules reported by the Rules Committee with respect to the Continuing Appropriations Act of 1986 or the Food Security Act of 1985, the so-called farm bill, if reported on Monday next, December 16, may be considered by the House on the same day? I am asking that the rule may be considered by the House.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. CONTE. Reserving the right to object, Mr. Speaker, the thing I am concerned about on the appropriation bill is that you can go to the bill and make certain amendments in order that would not be germane and we would not have an opportunity to raise an objection. I would like to have a little more time to talk with my committee chairman about where we are going to go and reach some kind of an agreement with him.

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield, the gentleman and I have reached agreement in the past. I would be glad to discuss with him the situation on this. I would like to have a little more time, too, to just see what it means.

Mr. CONTE. All right. Then I object, Mr. Speaker.

The SPEAKER. The gentleman objects?

Mr. CONTE. At this time, yes, Mr. Speaker.

The SPEAKER. Objection is heard.

REQUEST TO WAIVE 3-DAY RULE FOR CONSIDERATION OF CONFERENCE REPORT ON THE FOOD SECURITY ACT OF 1985 ON MONDAY NEXT

Mr. WRIGHT. Mr. Speaker, would the gentleman consider this unanimous-consent request: Mr. Speaker, I ask unanimous consent to waive the 3-day rule on the Food Security Act of 1985 with respect to the conference report or any rule that may be reported with respect to that bill on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Mr. Speaker, reserving the right to object, I would hope that the majority leader would withhold that until I get hold of my ranking minority member to make sure that everything is on the square.

Mr. WRIGHT. Mr. Speaker, I withdraw the unanimous-consent request at this time.

The SPEAKER. The gentleman withdraws his request.

PROVIDING FOR CONSIDERATION OF H.R. 1524, POLYGRAPH PROTECTION ACT OF 1985

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 337 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 337

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1524) to prevent the denial of employment opportunities by prohibiting the use of lie detectors by employers involved in or affecting interstate commerce, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill as an original bill for the purpose of amendment under the five-minute rule and each section shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments there to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN] for the purpose of debate only, and

pending that I yield myself such time as I may use.

Mr. MOAKLEY. Mr. Speaker, House Resolution 337 is an open rule that provides for the consideration of the bill H.R. 1524, the Polygraph Protection Act of 1985.

Mr. Speaker, the rule provides 1 hour of general debate, to be equally divided between the chairman and ranking minority member of the Committee on Education and Labor.

House Resolution 337 also makes in order an Education and Labor Committee amendment in the nature of a substitute now printed in the bill as original text for the purpose of amendment. The substitute is to be considered by section, with each section to be considered as read. In addition, Mr. Speaker, the rule provides for one motion to recommit with or without instructions.

H.R. 1524, the Employee Polygraph Protection Act of 1985, is a bill that would prohibit private employers involved in interstate commerce from requiring their employees, or their prospective employees from submitting to polygraph tests. This legislation is intended to protect workers who are wrongfully denied employment and whose careers are devastated because of lie detector test inaccuracies and employer abuses. The bill provides that employers who violate its provisions may be assessed a civil penalty of up to $10,000.

Mr. Speaker, the bill does make exceptions for Federal and State government employees. It also exempts drug company employees who have direct access to controlled substances in connection with an official theft investigation. The bill provides an additional exception for employees related to CIA, FBI, and the National Security Agency. Because of the recent spy scandals, the Government is considering a requirement that all Government employees and contractors who have or want to obtain a high-level security clearance take a polygraph test.

Mr. Speaker, H.R. 1524 is an attempt to answer the complaint that lie detector tests are inaccurate in the hiring of workers, and would require employers to use more reliable ways to verify personnel information.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, the rule has been ably explained. It is an open rule, but the bill is controversial. I received a number of wires and communications today in opposition to the measure.

Mr. Speaker, I oppose the measure on final passage, but I do not oppose the rule. I urge the adoption of the rule.

Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. FISH].

Mr. FISH. Mr. Speaker, I thank the gentleman for yielding me this time.

It is not my intention to take the full 5 minutes that was so generously offered, but I do rise to express my concerns over the Employee Polygraph Protection Act of 1985, which are both procedural and substantive.

On the procedural side, H.R. 1524 was reported out of the Education and Labor Committee only last week, on December 5, 1985. It received a rule late Tuesday night, and, until a couple of hours ago, was to be considered by the full House of Representatives.

H.R. 1524 was clearly drafted to ensure that the House Judiciary Committee would not review any of its provisions. The Judiciary Committee, over the years, has held many hearings that attest to the accuracy and benefits of the use of the polygraph. However, the Judiciary Committee was short-circuited, and did not have any opportunity to improve the bill.

My substantive concerns are several in nature:

First, H.R. 1524 is drafted under the assumption that polygraphs are not a useful method to screen individuals for employment purposes or to help in the investigation of theft losses or breaches of security. Employers who rely on polygraphs as a screening tool are convinced of the validity of this device.

In fact, the Office of Technology Assessment found "meaningful scientific evidence of polygraph validity." H.R. 1524 is an emotional, rather than an objective, response to ensuring that polygraphs are used in a way that is reasonable and not violative of civil rights and privacy concerns.

Second, H.R. 1524 is poorly drafted and could unintentionally thwart our efforts to combat terrorism and espionage.

I base this on the fact that the exemption language in section 6 is not broad enough. For example, while it appears on its face that DOD contractors are exempt, it is unclear whether personnel involved at securities research laboratories could be screened by a polygraph to ensure their reliability.

One of the most serious defects in H.R. 1524 is the failure of section 6 to provide for an exemption for employees of commercial aviation and employees who have access to secure areas of airports. Airlines are responsible for the safety of passengers, cargo, and aircraft.

Mr. Speaker, recent international and domestic incidents demonstrate the unique danger to air travel of terrorist and hijack attempts against commercial aviation. Just last July, Congress, in reaction to a lack of security at airports outside the United States, passed legislation specifically dealing with terrorism.

If offered, I will strongly support amendments that would permit the use of polygraphs to screen employees of commercial aviation and secure areas of airports if the duties of these individuals involve access to aircraft, either directly or indirectly through food services, maintenance, or baggage handling. I would also support any broadening of section 6 to include private security personnel.

Finally, I have serious concerns about the lack of a provision that would exempt Government contractors who are subject to the provisions of the Privacy Act. For example, there are a number of Government contractors who have access to highly sensitive information such as tax records, loan applications, and other credit information. These contractors routinely use polygraphs, in addition to other standard employee evaluation tools, to ensure that their employees do not use such information in a fraudulent manner.

In conclusion, while there is considerable merit to H.R. 1524, it needs serious improvement. Hopefully, in the ensuing weeks and months, a reasonable compromise can be worked out to insure that polygraphs will be used professionally and accurately while not jeopardizing legitimate uses of this device, especially in the area of combatting terrorism and espionage.

□ 1700

Mr. QUILLEN. Mr. Speaker, I have no further requests for time.

I urge adoption of the open rule, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the gentleman from Georgia [Mr. DARDEN].

Mr. DARDEN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, as a former district attorney, I am opposed to this bill in its present form; however, I want to commend the gentleman from Montana [Mr. WILLIAMS] for bringing the issue before this House which needs some serious debate and consideration.

I think it is very evident, Mr. Speaker, that polygraphs have been abused in many instances. I believe that polygraphs should be regulated and that minimum standards should be imposed.

Accordingly, Mr. Speaker, on this day the gentleman from Florida [Mr. YOUNG] and I have introduced H.R. 3916 which will be offered when this matter comes to the floor, in the nature of a substitute.

Let me say that the bill in its present form, Mr. Speaker, to which I am adamantly opposed, would effectively do away with the use of all polygraphs as far as private industry is concerned.

Let me emphasize, there have been abuses in the past, Mr. Speaker, but I believe that an orderly regulation of this industry should be imposed and that is what my substitute, which this rule allows, will do.

Let me say in conclusion, Mr. Speaker, that while I disagree with the original bill, I heartily support this open rule and urge its passage by the House.

Mr. MOAKLEY. Mr. Speaker, I yield 3 minutes to the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, I thank the gentleman.

As the people on both sides of this issue fully recognize now, this is a good rule. It is an open rule. It is the best that either side could hope for and it is not contentious.

Likewise, the bill has had a significant amount of support. It has gathered about 170 cosponsors on both sides of the aisle, because people believe that the growing number of polygraphs in the private sector needs to be stemmed. Both sides understand there are abuses. With this legislation we are simply trying to stem those abuses.

There are 2 million polygraph lie detector examinations a year given now in the United States and 98 percent of those are given by private business, far outstripping the amount given by government and criminal pursuits combined.

The number of tests given in this country has tripled in just the past 10 years. We are simply trying to stem the tide and bring some prudent reason to this.

By the way, 31 States and the District of Columbia have passed legislation affecting regulating the use of lie detectors; however, we found that this problem really needs some national attention and probably a Federal solution, because we find that the polyglot of regulations throughout the States is simply not adequate; so when this Congress returns after the first of the year, we will consider the Polygraph Protection Act, if this rule passes, as we expect it will, and at that time we will see if we cannot get both sides together to do what both sides agree needs to be done. We need to stem the increasing tide of the number of lie detector tests being given to private citizens in this country. We need to stem the abuses and I am convinced that this Congress is committed to do so.

I am including for the RECORD copies of letters concerning a critical section of this bill. The letters are from the Central Intelligence Agency, the Under Secretary of Defense and the chairman of the House Committee on Armed Services.

COMMITTEE ON ARMED SERVICES,
December 12, 1985.

Hon. PAT WILLIAMS,
U.S. House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR PAT: I understand that H.R. 1524, the Employee Polygraph Protection Act of 1985, will soon be considered by the House.

This is to advise you that the Committee on Armed Services is supportive of the amendment you propose to offer to section 6(b) of this bill. That amendment would exempt consultants or employees of contractors of the Department of Defense from the provisions of the bill. We believe it is necessary that the bill provide a specific exemption for employees of contractors of the Department of Defense and for consultants of the department.

Sincerely,

LES ASPIN,
Chairman.

CENTRAL INTELLIGENCE AGENCY,
December 11, 1985.

Hon. AUGUSTUS F. HAWKINS,
Chairman, Committee on Education and Labor, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I am pleased to respond on behalf of the Central Intelligence Agency to your letter of December 4, 1985 concerning H.R. 1524.

The Agency's concern with this legislation has been the sufficiency of the exemption for employees of Agency contractors. We have reviewed the "Amendment in the Nature of a Substitute to Section 6(b) in H.R. 1524" which was enclosed with your letter. Assuming that this amendment were to be adopted, the Agency's concern would be alleviated and the Agency would have no objection to this legislation. Other agencies, however, may seek amendments to the exemption provisions to insure that polygraph examinations are not precluded for contractors and consultants employed by the Federal Government and having access to classified information.

Thank you for the opportunity to comment on this legislation.

The Office of Management and Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

CHARLES A. BRIGGS,
Director, Office of Legislative Liaison.

THE UNDER SECRETARY OF DEFENSE,
December 11, 1985.

Hon. AUGUSTUS F. HAWKINS,
Chairman, Committee on Education and Labor, Washington, DC.

DEAR MR. CHAIRMAN: Reference is made to your letter of December 4, 1985 in which you offer amendment language to House Resolution 1524.

We do indeed support the language of the amendment and interpose no objection to the Bill so long as agencies of the Federal government and persons contracting with the government are exempt from its provisions.

Sincerely,

FRED C. IKLE.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. JONES of Oklahoma. Mr. Speaker, I was unavoidably absent Monday, December 9, 1985, and missed recorded votes on the following four suspensions: House Concurrent Resolution 239, Ireland-United Kingdom Agreement; H.R. 1083, low-level radioactive waste disposal policy; H.R. 3773, Federal Technology Transfer Act; and H.R. 1538, veterans compensation and health care.

Had I been present, I would have voted "aye" on all four measures, and I am pleased to note that they all passed by overwhelming margins.

ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT AMENDMENTS IN SECTION 901

Mr. UDALL. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House of the bill (H.R. 3851) to amend section 901 of the Alaska National Interest Lands Conservation Act.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Arizona?

Mr. SEIBERLING. Mr. Speaker, reserving the right to object, I would like to ask the distinguished chairman of the Committee on Interior and Insular Affairs if he would just briefly tell us what the bill does.

I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Speaker, H.R. 3851 is a bill introduced by our colleague, the gentleman from Alaska, [Mr. YOUNG] which would amend section 901(a) of the Alaska Lands Act.

Section 901(a) of the act establishes statutes of limitations applicable to judicial proceedings contesting certain determinations by the Department of the Interior that parcels of submerged lands in Alaska within areas being conveyed to Native corporations and groups under the Alaska Native Claims Settlement Act are beneath nonnavigable waters.

As the law stands now, if the land in question was conveyed to the Native corporation or group after the enactment of the Alaska Lands Act—that is, after December 2, 1980—a court action challenging a BLM determination of nonnavigability must be brought within 5 years after the conveyance. This bill before us would change that to 6 years: in other words, it would be a 1-year extension of the deadline.

At this point, a very brief review of some relevant history may provide some perspective.

This question of treatment of submerged lands in Alaska has been a very vexatious one ever since the enactment of the Native Claims Settlement Act. The problem arises from the interaction of the Settlement Act with the Alaska Statehood Act.

The gist of the problem is that under settled law, Alaska since its admission to the Union has been the owner of the lands under navigable waters in the State, with certain exceptions. However, the question of what waters are navigable is a legal one that only a court can answer for certain. Thus, as the Department of the Interior has proceeded with the transfers of land to Native corporations and groups under the Settlement Act, it has had to make decisions as to how to treat submerged lands, knowing that it stands open to being second guessed by a court.

In other words, BLM has had to decide whether to charge submerged lands inside Native selection areas against the Natives' entitlements, knowing that a court might later decide that those same lands had not been in Federal ownership since 1959, and thus that the Natives did not receive good title from the United States.

For the Natives, the unpleasant choice has been between accepting the BLM's decision, at risk of losing the submerged lands to the State, or contesting the BLM's decisions, with the consequent loss of time and money.

When we were debating the Alaska Lands Act here in the House, we attempted to resolve this by including in the House-passed Udall-Anderson bill a section which established a system similar to the procedures of the BLM Manual of Survey used in other States. Under the Udall-Anderson approach, BLM would have not charged against Native entitlements any submerged lands transferred to the Natives which were beneath lakes or streams above a certain size.

Unfortunately, the Senate did not accept this approach. Instead the Senate included in its version of the Alaska Lands Act—the version which the House ultimately had no choice but to reluctantly accept—what is now in section 901 of the act.

After enactment of the act, and even though the State had agreed to section 901, the State went into court and challenged the constitutional validity of the statutes of limitations in that section. That suit is still pending.

Next, then-Secretary Watt announced that he was going to take administrative action to address the submerged lands situation by promulgating new regulations to govern BLM's procedures for conveying lands under the Settlement Act. These regulations have been issued, but are also the subject of a pending legal challenge.

That is how we find ourselves where we are today, with the section 901 deadline for initial suits by the State to challenge submerged lands conveyances rapidly approaching.

In the Interior Committee, we have been discussing this matter for several years with the gentleman from Alaska, and it has been explored thoroughly at oversight hearings in 1982 and again in 1984. It has been and remains my strong belief that if Congress is to address this bill at all, it should do so directly and should resolve it on the merits. I think that would be better than to prolong it by measures such as extensions of the deadline.

I am reluctantly supportive of a short extension of the section 901 deadline to the extent that such an extension will afford us time to try to complete a resolution based on the merits and on mutual accommodations. I remain perfectly ready to work with the gentleman from Alaska and other interested parties to resolve this on the merits, on that basis. But this matter has dragged on far too long as it is, and if it proves impossible for us to expeditiously arrive at a legislative solution that can be generally accepted, then I would favor letting the courts resolve it however they may do so.

Mr. Speaker, I do urge enactment of this bill without any amendments. I attach a report from the Congressional Budget Office received too late to be included in our committee's report.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 12, 1985.

Hon. MORRIS K. UDALL,
Chairman, Committee on Interior and Insular Affairs, U.S. House of Representatives, Longworth House Office Building, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has reviewed H.R. 3851, a bill to amend section 901 of the Alaska National Interest Lands Conservation Act, as ordered reported by the House Committee on Interior and Insular Affairs, December 11, 1985.

H.R. 3851 would extend for one year the statute of limitations for judicial challenges to certain non-navigability determinations made by the Bureau of Land Management in connection with the conveyance of lands in Alaska pursuant to the Alaska Native Claims Settlement Act or the Alaska Lands Act. Any potential budget impact would depend on the substance and outcome of litigation that might be brought against the Department of the Interior during the extension period. CBO has no basis for predicting the extent or consequences of such litigation, and therefore cannot estimate the effect of this bill on the federal budget. However, it appears unlikely that there would be significant additional costs.

Enactment of this bill would not affect the budgets of state or local governments.

If you wish further details on this estimate, we will be pleased to provide them.

With best wishes,

Sincerely,

RUDOLPH G. PENNER.

Mr. SEIBERLING. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona [Mr. UDALL]?

There was no objection.

The Clerk read the bill, as follows:

H.R. 3851

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 901 of the Alaska National Interest Lands Conservation Act (Public Law 96-487) is hereby amended by striking the words "five years after the date of execution" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "six years after the date of execution".

Mr. YOUNG of Alaska. Mr. Speaker, this legislation is necessary to extend a statute of limitations in the Alaska Lands Act. Unless the statute of limitations is extended, we face the filing of many lawsuits in the State of Alaska solely to preserve rights which would be barred by the 5-year deadline.

I believe there is no compelling interest in having litigation filed to meet an arbitrary deadline. I hope we will be able to settle the acreage issues next year. In the meantime, the extension in this legislation is a positive step forward. For these reasons I urge my colleagues to support this legislation.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT AMENDMENTS IN SECTION 504

Mr. UDALL. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House of the bill (H.R. 2651) to amend section 504 of the Alaska National Interest Lands Conservation Act to promote the development of mineral wealth in Alaska.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. SEIBERLING. Mr. Speaker, reserving the right to object, I will be happy to give a brief summary of the bill, unless the distinguished chairman would like to do so.

Mr. UDALL. Mr. Speaker, the gentleman is better informed than the chairman and I would ask the gentle-

man under his reservation to give us a brief statement.

Mr. SEIBERLING. Mr. Speaker, I thank the gentleman.

Mr. Speaker, H.R. 2651, sponsored by the gentleman from Alaska, deals with Admiralty Island, AK. In particular, it addresses the provisions of section 504 of the Alaska Lands Act as those provisions apply to the Greens Creek area on the island, within the Admiralty Island National Monument but outside the portion of the monument which has been designated as wilderness.

In 1980 enactment of the Alaska Lands Act actually facilitated mineral exploration and development in that area, because it allowed the holders of certain unperfected claims to continue to explore on those claims and to attempt to perfect them. These rights were granted by the act, and would not have existed without the act because the area had been withdrawn from mineral entry by President Carter's proclamation of December 1, 1978, which established the monument. Under section 504 of the act, these rights to explore and perfect claims end next month—on December 2, the fifth anniversary of the enactment of the Alaska Lands Act.

Mr. Speaker, on Christmas Eve of last year the Acting Secretary of Agriculture sent Chairman UDALL a letter which announced that the administration intended to change the ground rules by "adjusting" the boundary of the monument so as to exclude the Greens Creek area. The effect of that, of course, would have been to overturn by administrative action the carefully crafted congressional compromise for the Greens Creek area. In Chairman UDALL'S letter of January 29 of this year to the Secretaries of Agriculture and Interior, it was pointed out that this would be a clear abuse of the boundary-adjustment provisions of the act and would be directly contrary to congressional intent.

Since then, the administration has not pursued its boundary adjustment proposal. Instead, they have left the issue to the Congress, where it should have been all along, and where it could have been addressed without the delays that resulted from the administrative actions.

Mr. YOUNG'S bill as introduced addressed the desire of Noranda and the other participants in the Greens Creek Joint Venture to continue to explore and perfect their Greens Creek claims. Because decisions about Admiralty Island were at the very heart of the debates on the Alaska Lands Act, it has been obvious that no far-reaching measures involving Admiralty Island can be passed if they are opposed by the various parties and groups with an interest in this subject. H.R. 2651 as introduced did not have such support and does not have it now.

However, I do believe that there is a strong possibility that a compromise can be developed which would have the support of all concerned parties and groups. Toward the goal of developing such a compromise, I have worked with the gentleman from Alaska and many others, and I believe that much progress has been achieved.

Unfortunately, we have not yet been able to forge an acceptable comprehensive settlement for the Admiralty Island issues. That does remain our goal, however, and I intend to continue to work closely with all concerned to try to achieve that goal. So far as a comprehensive bill is concerned, it remains my view that no such bill can be brought before our committee or to the floor unless it has the concurrence of all parties to our ongoing discussions.

Meanwhile, I believe that we can make a contribution to the momentum toward success by taking an interim step; namely for the House to pass Mr. YOUNG'S bill with the amendment in the nature of a substitute adopted by the Interior Committee.

Mr. Speaker, this substitute has been worked out in cooperation with the gentleman from Alaska, and has his support. It does two things, and two things only:

First, it says that the Greens Creek Joint Venture can continue to hold and explore its unperfected claims in the Greens Creek area for 1 year, but without the right to perfect those claims. The effect of this is to maintain the status quo of December 1, 1985, so far as the Joint Venture is concerned, without affording them the ability to gain final ownership of any minerals in claims which they did not have perfected by December 2 of this year. The representatives of the Greens Creek Joint Venture have agreed to this arrangement, and, in fact, have requested us to adopt such a provision pending further attempts to produce a comprehensive package which might afford them the additional provisions they are seeking.

Second, the amendment would authorize and direct the Secretary of Agriculture to begin negotiations with Shee Atika, Inc., aimed at securing Shee Atika's agreement that for a period of time the Shee Atika lands on Admiralty Island would not be logged or otherwise rendered unsuitable for possible preservation as wilderness. This section would authorize the appropriation of funds necessary for the Secretary to seek and secure such an agreement. Obviously, nothing in the amendment would be binding on Shee Atika—but we would require the Secretary to at least discuss with Shee Atika an agreement aimed at maintaining the onground status quo; again, this is aimed at aiding continuing efforts to arrive at a comprehensive resolution of the Admiralty Island issues through an entirely voluntary exchange by Shee Atika of its Admiralty Island lands for other property. We have been very careful to do everything possible to structure this substitute so that it would be without prejudice to any party in any litigation, and it definitely is not intended to take any position with regard to any issue in any litigation; to read it or cite it otherwise would be erroneous and with foundation.

I attach a report from the Congressional Budget Office, received too late to be included in our committee report on this bill:

CONGRESSIONAL BUDGET OFFICE,
Washington, DC., December 12, 1985.

Hon. MORRIS K. UDALL,
Chairman, Committee on Interior and Insular Affairs, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has reviewed H.R. 2651, a bill to amend section 504 of the Alaska National Interest Lands Conservation Act to promote the development of mineral wealth in Alaska, as ordered reported by the House Committee on Interior and Insular Affairs, November 20, 1985.

This bill would allow a one-year extension of certain mineral exploration permits in the Greens Creek watershed on Admiralty Island, Alaska. Based on information from the Department of Agriculture, CBO estimates that such an extension would result in no significant cost to the federal government.

In addition, the bill would instruct the Secretary of Agriculture to negotiate with Shee Atika, Inc., an Alaska native corporation with land holdings in the Admiralty Island National Monument, to reach an agreement under which Shee Atika, Inc. would preserve the wilderness character of its land. H.R. 2651 authorizes appropriation of such sums as may be necessary for this purpose.

CBO cannot precisely estimate the cost to the federal government of resource protection agreements under H.R. 2651 because the potential costs would depend on the outcome of negotiations, and the duration of such agreements is uncertain. Based on information from Shee Atika, Inc., it appears that in order to delay or halt its planned timber harvests, the corporation might require up to approximately $8 million annually in compensation for lost timber revenues and for certain costs that would be incurred if the timber were not harvested. This assumes that in the absence of any protection agreements, Shee Atika would proceed with its timber harvest beginning in the spring of 1986, as planned by the corporation. If litigation should again stall harvest plans, or if the federal government and Shee Atika should reach an agreement under which Shee Atika exchanges its Admiralty Island lands for other federal lands, federal payments to Shee Atika, Inc. for protection agreements could be significantly less. On the other hand, a land exchange might require additional federal outlays—though this bill does not authorize such an exchange.

Enactment of this bill would not affect the budgets of state or local governments.

If you wish further details on this estimate, we will be pleased to provide them.

With best wishes,
Sincerely,

RUDOLPH G. PENNER,
Director.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. SEIBERLING. I am happy to yield to the gentleman from Alaska for any additional comments he may have.

Mr. YOUNG of Alaska. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, this legislation, as the gentleman from Ohio has mentioned and the gentleman from Arizona, will extend the deadline of the Alaska Lands Act which limits development of the Greens Creek Mine project in Alaska.

It also authorizes the Secretary of Agriculture to engage in negotiations with the Alaska Native Corporation for the exchange of land held by the corporation within the national monument.

Both of these actions will help to provide an opportunity for better management of Admiralty Island.

Also, it is my hope that progress on further legislation on Admiralty Island can be made next year.

I want to compliment the gentleman from Ohio. We have communicated with the other body. We believe we are on the right track and we are very close to a final solution of this problem.

In the meantime, it is our intent that this legislation should have no effect on assisting legislation on the use of Admiralty Island.

Again, I urge rapid passage of this legislation and compliment the gentleman.

Mr. VENTO. Mr. Speaker, will the gentleman yield under this reservation?

Mr. SEIBERLING. I am happy to yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Speaker, I rise to thank my chairman, and particularly my subcommittee chairman, Mr. SEIBERLING, for their efforts on this bill and on all of the issues leading to a comprehensive resolution of complex resource management problems on Admiralty Island. I support those efforts and intend today to support the passage of this bill, even though it falls far short of the overall objective we intend to ultimately achieve.

I believe it is critical that the House understand the precise nature of this legislation and what it does, and does not do to meet the overall objectives for Admiralty Island which I and many others in the House of Representatives remain committed to resolve. Principal among those objectives, from my perspective, is for Congress to provide definitively for the rational management of the important and diverse resources of the island.

In light of the statements of Mr. SEIBERLING, and the language of the committee report, there is little reason for me to further detail the significance of Admiralty Island. Suffice it to say that even on national and international scales, Admiralty Island is unique. It represents an unparalleled opportunity for sensible protection and management of natural, scenic, scientific, fish and wildlife, wilderness, cultural, traditional subsistence and other values. There is no other place like it; Congress has recognized this fact and has already gone a long way toward the objective of protecting and enhancing these values.

But much remains to be done. In spite of past Federal enactments, as well as extensive settlement efforts, Admiralty Island remains today a legal and economic battleground which must be stilled if we provide for the long-term future of the resources and people of the island.

Beyond the principal objective of providing for the preservation and rational management of the island's resources, the specific problem is to deal with the substantial inholdings within the Admiralty Island National Monument. Beyond this concern lie numerous specific issues which relate to the owners of each major inholding on the island, the national interest inherent in protecting and expanding the monument, and the interests of the only permanent settlement on the island, the Native village of Angoon.

The development of inholdings within the Admiralty Island National Monument threatens the monument, the wilderness, and the traditional subsistence culture of the village of Angoon, and the final stronghold of the Tlingit culture. The inholdings include Noranda's mine within the Greens Creek drainage, Shee Atika, Inc.'s 23,000-acre timber holding within three separate drainages, Sealaska's corresponding subsurface inholding, and Kootznoowoo's subsurface inholding near Angoon.

After nearly 5 years of controversy, litigation, and settlement efforts, the opportunity to eliminate or consolidate these holdings and protect the monument from the adverse effects of development is at hand. The relevant parties have been negotiating the details of an exchange/consolidation proposal for nearly a year, but this long overdue resolution unfortunately could not be brought to a conclusion this year. So, instead of a comprehensive solution to all of the inholding problems, the committee has reported a separate bill that maintains the interest of two parties involved in the negotiation process, the Noranda Mining Co. and Shee Atika Inc.

Several points should be made about the decision to proceed now on an abbreviated and piecemeal approach rather than waiting for the comprehensive resolution which is so critical. First, the benefits being conferred on Noranda and Shee Atika Inc. in H.R. 2651 are real and substantial. Noranda, a Canadian mining company which is developing a potentially significant mine on Admiralty Island under the terms established in the Alaska National Interest Lands Conservation Act, is given protection in H.R. 2651 against the presumptive abandonment of unperfected mining claims within a portion of the area potentially to be mined, rather than losing those claims under existing provisions of law. In addition, they are given additional time to apply for new exploration permits in the same area. While this bill does provide that claims under either provision may not be perfected, and that the Government retails full ownership rights, these provisions nonetheless yield to Noranda the important opportunity, beyond existing provisions of law, to continue to explore and make critical resource development decisions on claims in this area.

Shee Atika Inc., the village corporation representing the Natives of Sitka, Alaska, is given the opportunity to reach an accord with the Federal Government, through the Department of Agriculture, in which Federal compensation would be provided in exchange for an agreement not to develop Shee Atika's inholding within the Admiralty Island Monument during a period in which the comprehensive settlement of inholdings on the island might be resolved. Although this agreement is subject to appropriations, it is nonetheless an important opportunity for the Shee Atika Corp. to be compensated during the negotiations for a comprehensive settlement. Such development would be, to say the least, economically and legally problematical due both to the condition of the timber market and the litigation and judicial decisions which are well described in the committee report.

As a result, these benefits to two parties in interest on Admiralty Island are not insubstantial. Nor are they given to either party, at least from my perspective, without substantial expectation by Congress that meaningful good faith negotiations will continue and reach a fair conclusion.

These expectations, in summary, are that both parties, will return to the negotiating table ready to work with all parties involved to frame a comprehensive settlement which Congress can consider early in 1986. The stakes on Admiralty Island are too high, and the opportunity for a comprehensive settlement too close, to be jeopardized by these short-term measures unless adequate assurance and commitment remain in place from all parties to a comprehensive resolution. I do not want Noranda to wait until its 1-year

extension has run its course before it returns to the negotiating table. Nor do I want Shee Atika to wait until any agreement it reaches runs out.

I proceed on the assumption that all parties to the negotiations thus far have given such assurance that they will continue negotiating in the Senate under the same principles that have been followed in the House. And I am further assured that Alaska's Senators, in conversations with the chairman, have also joined in this assurance. It is, to be certain, the fundamental reason for my support of H.R. 2651 at this time. If this opportunity to achieve a comprehensive settlement is to be realized, much remains to be done, and quickly.

I am troubled the negotiation process for a comprehensive settlement did not begin much earlier. The need for a comprehensive solution has been known to all parties and to the Senate for nearly a year. There have been signals that no comprehensive solution can be achieved unless the Alaska timber industry is given additional protection, even though numerous proposed solutions have been demonstrated to have no effect on that industry.

It appears that the Alaska timber industry, although not an essential party to this issue is nonetheless attempting to block the comprehensive settlement. Until this problem is resolved, promises of future negotiations do not appear any different from the negotiations of the past year. I believe the comprehensive solution should first be fashioned by the parties. Then, if there is any real effect on the timber industry, the problem should be addressed at that time.

The committee has been told by the timber industry, that it seeks first, a $10 million "administrative fee" for allowing the Federal Government to convey cutover lands on Kuiu Island to Shee Atika, Inc. The industry also has sought changes in the Tongass timber fund, which is $40 million annually, or whatever is necessary to maintain the industry at a 4.5 billion boardfeet harvest per decade. They have requested that approximately $20 million annually be spent on preroading roadless areas in the Tongass. These proposals are of significant concern because they would adversely affect remaining areas that may some day be added as wilderness. As important, it is my understanding that the roads simply are not necessary. The Forest Service even now is not able to sell all the timber it is offering from the Tongass Forest.

These demands and other actions have shadowed and unnecessarily burdened the negotiations toward a comprehensive settlement of Admiralty Island problems. Resolution of the problem exclusive of the timber industry is possible. However, if effects on the timber industry are conclusively demonstrated, then they can be addressed at that point.

Beyond this, I reiterate my thanks to my chairmen for their continued attention to this problem, and indicate my strong encouragement to the many parties involved to initiate negotiations early in the new year, and to bring us a comprehensive settlement at an early date.

Mr. YOUNG of Alaska. Mr. Speaker, this legislation will extend a deadline in the Alaska Lands Act which limits development of the Greens Creek Mine project in Alaska. It also authorizes the Secretary of Agriculture to engage in negotiation with an Alaska Native corporation for the exchange of lands held by the corporation within a national monument.

Both of these actions will help to provide an opportunity for better management of Admiralty Island. Also, it is my hope that progress on further legislation on Admiralty Island can be made next year.

In the meantime, it is our intent that this legislation should have no effect on existing litigation over the use of Admiralty.

Mr. SEIBERLING. Mr. Speaker, I just would like to add that we are proceeding with this bill today because also we have received assurances from the other members of the Alaska delegation in the other body, as well as from the chairman of the applicable subcommittee, the gentleman from Wyoming, Senator WALLOP, that if we do act today on this short form bill that they will not object to taking it up in the other body. Otherwise, there would not have been any point in doing it at this time.

Mr. Speaker, with those comments, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The Clerk will read the bill, as follows:

H.R. 2651

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 504 of the Alaska National Interest Lands Conservation Act (94 Stat. 2403) is amended by adding a new subsection (k) at the end thereof:

"(k)(1) As provided in this subsection, the Secretary of Agriculture shall issue the holder of any property located, recorded and maintained unperfected claim within the approximately nine thousand eight hundred and ninety acre area of the Admiralty Island National Monument, as generally depicted on a map of the area dated May 15, 1985, at the holder's request, an exploration permit subject to all the conditions of this section except subsections (c)(1), (c)(2), and (d)(3). Such permit shall be for the term of five years, with renewal periods of five years to be granted so long as the applicant submits any plan for exploration required by the Secretary. Such permit shall in all cases terminate no later than midnight, December 31, 2020.

"(2) Before the Secretary issues any permit for a period terminating after December 2, 1985, the holder of a claim or claims shall relinquish to the United States all rights to receive a patent to the fee title in any land upon which a claim or claims are located within the Monument, and evidence of such relinquishment shall be provided to the Secretary.

"(3) For any claims for which patent rights to fee title are relinquished under subsection (2) or for which valid discovery has been made or is made within the meaning of the mining laws of the United States during the term of any exploration permit, the holder of such claims shall be entitled to a patent to the minerals within such claims.".

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. UDALL

Mr. UDALL. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk, read as follows:

Amendment in the nature of a substitute offered by Mr. UDALL: Strike all after the enacting clause and insert:

SECTION 1. As used in this Act, the term "the Act" means the Alaska National Interest Lands Conservation Act (Public Law 96-487).

SEC. 2. (a) Section 504 of the Act is hereby amended as follows:

(1) by adding the following after the words "two-hundred-seventy days after the date of the enactment of this Act" in subparagraph (A) of paragraph (1) of subsection (c): "(or, with respect to an unperfected claim within the Greens Creek watershed portion of the Admiralty Island National Monument, within five years and three months after the date of the enactment of this Act)".

(2) by striking the period at the end of subparagraph (A) of paragraph (2) of subsection (c) and by inserting in lieu thereof the following: "or subparagraph (c)(2)(C)".

(3) by adding a new subparagraph (C) after subparagraph (B) of paragraph (2) of subsection (c) as follows:

"(C) Any permit to explore an unperfected mining claim within the Admiralty Island National Monument during the period beginning on the date five years and one day after the date of enactment of this Act shall terminate on the date six years after the date of enactment of this Act."

(4) by striking the words "before the expiration of such permit" from paragraph (1) of subsection (e) and by inserting in lieu thereof the words "on or before the date five years after the date of enactment of this Act".

(5) by striking the words "upon the expiration of such permit" from paragraph (2) of subsection (e) and by inserting in lieu thereof the words "at midnight, December 2, 1986,"

(6) by adding the following new paragraph (3) at the end of subsection (e):

"(3) No patent of any type shall be issued under this subsection with respect to any unperfected mining claim with regard to which the holder thereof has not notified the Secretary pursuant to paragraph (1) of this subsection on or before the date five years after the date of enactment of this Act."

(b) Section 504 of the Act is hereby amended by adding at the end thereof a new subsection (k) as follows:

"(k) PROTECTION AGREEMENTS—(1) Subject to the availability of necessary appropriations, the Secretary shall undertake to ne-

gotiate an agreement acceptable to and binding on Shee Atika, Inc., its successors and assigns, whereby it is agreed that during the term of such agreement there shall occur on lands within the boundary of the Admiralty Island National Monument which as of October 1, 1985, were owned by Shee Atika, Inc., no harvesting of timber, construction of roads, or any other activities which would impair the suitability of such lands for preservation as wilderness.

(2) During the period an agreement as described in paragraph (1) is in effect the requirements of Corps of Engineers permit No. 071-OYD-2-810133, Chatham Strait 92 shall be suspended so far as such requirements are applicable to lands subject to such an agreement.

(3) After the execution of the agreement described in paragraph (1) of this subsection, and subject to the availability of necessary appropriations, the Secretary shall undertake to execute similar agreements acceptable to and binding on Shee Atika, Inc., its successors and assigns, for periods after the expiration of the agreement described in paragraph (1). The provisions of paragraph (2) shall apply during the period any agreements executed pursuant to this paragraph are in effect.

(3) The Secretary is authorized to execute agreements similar to the agreement described in paragraph (1) with regard to any lands within the boundaries of the Admiralty Island National Monument which are owned by an entity other than the United States.

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Arizona [Mr. UDALL].

The amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

AUTHORIZING PRINTING OF BICENTENNIAL EDITION OF BIOGRAPHICAL DIRECTORY OF THE U.S. CONGRESS

Mr. FOLEY. Mr. Speaker, by direction of the Committee on House Administration, I call up Senate Concurrent Resolution 85 and ask for its immediate consideration.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 85

Resolved by the Senate (the House of Representatives concurring), That (a) the Joint Committee on Printing shall compile and print as a Senate document, with illustrations, and in such style and form as may be directed by the Joint Committee on Printing, a revised edition of the Biographical Directory of the American Congress up to and including the One Hundredth Congress (1774–1989).

(b) With respect to the compilation of the directory authorized by subsection (a)—

(1) the Historian of the Senate shall be responsible for providing to the Joint Committee on Printing the biographical data for Members of the Senate and for individuals who have served in both the House of Representatives and the Senate; and

(2) the Historian of the House of Representatives shall be responsible for providing to the Joint Committee on Printing the biographical data for Members of the House of Representatives and Delegates.

(c) The Joint Committee on Printing shall print seven thousand nine hundred and eighty-five copies of the directory, of which—

(1) two thousand and forty-five copies shall be for the use of the Senate;

(2) five thousand three hundred and ninety copies for the use of the House of Representatives; and

(3) five hundred and fifty copies for the use of the Joint Committee on Printing.

(d) The edition of the Biographical Directory of the Congress prepared pursuant to this resolution is prepared in celebration of the Bicentennial of the United States Congress and shall be known as the "Bicentennial Edition of the Directory of the United States Congress".

SEC. 2. There is authorized to be appropriated to the Joint Committee on Printing such sums as may be necessary for the employment of personnel and the payment of expenses to carry out the provisions of this resolution.

COMMITTEE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The SPEAKER pro tempore. The Clerk will report the committee amendment in the nature of a substitute.

The Clerk read as follows:

Committee amendment in the nature of a substitute:

Strike out all after the resolving clause and insert:

That (a) the Joint Committee on Printing shall publish and there shall be printed as a Senate document (with such illustrations and in such style and form as may be directed by the Joint Committee on Printing) a revised edition of the Biographical Directory of the American Congress for the period ending with the One Hundredth Congress (1774–1989). In celebration of the Bicentennial of the United States Congress, the revised edition shall be known as the "Biographical Directory of the United States Congress, 1774–1989: Bicentennial Edition".

(b) The Historian of the Senate and the Historian of the House of Representatives shall provide appropriate biographical data and other material for the revised edition, including data for—

(1) Senators and individuals who have served in both the Senate and the House of Representatives, to be provided by the Historian of the Senate; and

(2) Members of the House of Representatives (including Delegates and Resident Commissioners), to be provided by the Historian of the House of Representatives.

(c) In addition to the usual number, there shall be printed 7,985 copies of the revised edition, of which 2,045 copies shall be for the use of the Senate, 5,390 copies shall be for the use of the House of Representatives, and 550 copies shall be for the use of the Joint Committee on Printing.

Mr. FRENZEL (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER pro tempore. The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

Mr. FOLEY. Mr. Speaker, this concurrent resolution, sponsored by the Honorable CHARLES MCC. MATHIAS, JR., authorizes the publication and printing of a new edition of the Biographical Directory of the United States Congress, entitled the "Biographical Directory of the United States Congress, 1774–1989: Bicentennial Edition." This directory not only marks the first time that professional historians have reviewed, complied, edited, and proofed the biographical data for Senators and Representatives, but it further serves to commemorate the approaching bicentennial of the U.S. Congress, to be celebrated in 1989. The most recent of the previous editions was published in 1971, and has proven invaluable to Members of Congress, students, writers, and the academic community generally, as well as the press.

The Government Printing Office estimates that the cost of this publication will be approximately $299,581.93 for the 7,985 extra copies which are authorized to be printed under this concurrent resolution.

Senate Concurrent Resolution 85 represents a collective effort on the part of the Committee on House Administration, the Senate Committee on Rules and Administration, the Joint Committee on Printing, the Historian of the House of Representatives and the Historian of the Senate, and is a valuable historical document of which the Congress can be proud.

The Senate concurrent resolution was concurred in.

The title was amended so as to read: "Concurrent resolution authorizing printing of the Biographical Directory of the United States Congress, 1774–1989: Bicentennial Edition.".

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING OF PROCEEDINGS OF PORTRAIT UNVEILING CEREMONY OF HON. JAMIE L. WHITTEN

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the resolution (H. Res. 308), authorizing printing of the proceedings of the portrait unveiling ceremony of the Honorable Jamie L. Whitten, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 308

Resolved, That the proceedings of the portrait unveiling ceremony of the Honorable Jamie L. Whitten, chairman, Committee on Appropriations, which occurred on September 20, 1984, be printed as a House document, with illustrations and suitable binding.

SEC. 2. In addition to the usual number, there shall be printed, for the use of the Committee on Appropriations, six hundred and fifty copies of such document, of which one hundred and fifty copies shall be casebound.

Mr. FOLEY. Mr. Speaker, this resolution authorizes the printing, as a House document, of the transcript of proceedings of the Committee on Appropriations of September 20, 1984, incident to the presentation of the portrait of the Honorable JAMIE L. WHITTEN. In addition to the statutory usual number, there shall be printed, for the use of the Committee on Appropriations, 650 copies of this document, of which 150 shall be casebound.

The Government Printing Office estimates that the cost of this printing will be $2,329, including both the statutory amount and the amount allotted to the Committee on Appropriations.

This resolution represents a customary request that such proceedings be appropriately memorialized.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING OF TRANSCRIPT OF PROCEEDINGS OF COMMITTEE ON RULES INCIDENT TO PRESENTATION OF PORTRAIT OF HON. CLAUDE DENSON PEPPER

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the resolution (H. Res. 321), authorizing printing of the transcript of proceedings of the Committee on Rules incident to presentation of a portrait of the Honorable Claude Denson Pepper, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 321

Resolved, That the transcript of proceedings of the Committee on Rules on November 14, 1985, incident to presentation of a portrait of the Honorable Claude Denson Pepper to the Committee on Rules, shall be printed as a House document with illustrations and suitable binding.

SEC. 2. In addition to the usual number, there shall be printed, for the use of the Committee on Rules, 390 copies of such document, of which 90 copies shall be casebound.

Mr. FOLEY. Mr. Speaker, this resolution authorizes the printing, as a House document, of the transcript of proceedings of the Committee on Rules of November 14, 1985, incident to the presentation of a portrait of the Honorable CLAUDE PEPPER to that committee. In addition to the statutory usual number, there shall be printed, for the use of the Committee on Rules, 390 copies of the document, of which 90 copies shall be casebound.

The Government Printing Office estimates that the cost of this printing will be $3,203.72, including both the statutory number and the number allotted to the Committee on Rules.

This resolution represents a customary request that such proceedings be appropriately memoralized.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING OF ADDITIONAL COPIES OF "DEFENSE ORGANIZATION: THE NEED FOR CHANGE"

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the Senate concurrent resolution (S. Con. Res. 80), to authorize the printing of 2,000 additional copies of the Committee Print of the Committee on Armed Services (99th Congress, 1st Session) entitled "Defense Organization: The Need for Change," and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 80

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 2,000 additional copies of the Committee Print of the Committee on Armed Services (99th Congress, 1st Session) entitled "Defense Organization: The Need for Change", to be furnished to the Committee on Armed services.

Mr. FOLEY. Mr. Speaker, This Senate concurrent resolution authorizes the printing of 2,000 additional copies of the committee print of the Senate Committee on Armed Services entitled "Defense Organization: The Need for Change," (99th Congress, first session).

The Government Printing Office estimates that the cost of this printing will be $11,694, for the 2,000 copies.

The Senate Committee on Armed Services has requested this printing due to their allocation being exhausted and a continuing demand for the publication.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING OF ADDITIONAL COPIES OF "1984: CIVIL LIBERTIES AND THE NATIONAL SECURITY STATE"

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the concurrent resolution (H. Con. Res. 230), authorizing printing of additional copies of the transcript of hearings entitled "1984: Civil Liberties and the National Security State," and ask for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 230

Resolved by the House of Representatives (the Senate concurring), That there shall be printed, for the use of the Committee on the Judiciary of the House of Representatives, 500 additional copies of the transcript of hearings before the Subcommittee on Courts, Civil Liberties, and the Administration of Justice, entitled "1984: Civil Liberties and the National Security State".

Mr. FOLEY. Mr. Speaker, this concurrent resolution authorizes the printing of 500 additional copies of the transcript of hearings before the Subcommittee on courts, Civil Liberties, and the Administraton of Justice, entitled "1984: Civil Liberties and the National Security State," for the use of the Committee on the Judiciary.

The Government Printing Office estimates that the cost of this printing will be $17,717, for the 500 copies.

This additional printing has been requested by the Honorable Peter W. Rodino, Jr., in order to meet the demand they have for this document. Not only has this publication been helpful to Members of Congress, congressional staff, and executive branch personnel, but it also provides a reference work useful to students, academi-

cians, libraries, the judiciary, and other interested parties.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

ACCURACY IN HOUSE PROCEEDINGS RESOLUTION

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, I wish to focus the attention of the Members, briefly, on House Resolution 230, previously agreed to by the House, providing that, for the remainder of the first session of the 99th Congress, there should be a substantially verbatim account of House proceedings in the CONGRESSIONAL RECORD which should be clearly distinguishable by a different typeface from remarks not spoken, but inserted under leave to extend.

Mr. Speaker, it is most important to note that House Resolution 230 provided for this change only for the remainder of the first session of the 99th Congress.

Since the beginning of September 1985, the CONGRESSIONAL RECORD has reflected the change authorized by House Resolution 230; an alternate typeface replacing the "bullet" symbol. Pursuant to the provisions of the resolution, the Joint Committee on Printing [JCP] has been monitoring the change, and gathering comments, both positive and negative, which have been forthcoming.

In addition, the Joint Committee on Printing was requested to report its findings to the Committee on House Administration, no later than December 31, 1985, with the House Administration Committee being charged with the duty to report, as soon as practicable after receipt of the JCP report, the committee's findings and recommendations as to whether the rule, as revised, should be continued.

Due to time constraints at this point in the session, and because the Joint Committee on Printing has not yet completed their collection of findings on this matter, it is the intent of Mr. LOTT and myself, cosponsors of this resolution, to request of the JCP an extension of the new rule, promulgated pursuant to House Resolution 230. Pending a report by the JCP, it would be imprudent to return to the "bullet" symbol, for a brief time, if there even is the possibility that the House Administration Committee should decide to request a permanent change in the rule.

This extension is requested until such time as the JCP may report to the Committee on House Administration and until time as House Administration has the opportunity to fully study and report its well-considered findings, as required by House Resolution 230.

In this regard, Mr. LOTT and I intend to submit a letter to Chairman ANNUNZIO, of the Committee on House Administration, requesting his approval of such an extension; with an ensuing letter from the Committee on House Administration to Senator MATHIAS, the chairman of the Joint Committee on Printing, for the approval of the Joint Committee on Printing.

It is extremely important that a sufficient amount of time be allowed for the parties in interest to fully study the effects of this change in the CONGRESSIONAL RECORD or the entire effort will have been in vain. The CONGRESSIONAL RECORD is a valued tool of the Congress, and every effort should be extended to ensure the best possible publication.

Mr. LOTT. Mr. Speaker, I am joining with the distinguished majority whip [Mr. FOLEY] in asking the chairman of the House Administration Committee to request a temporary extension in the second session of our new CONGRESSIONAL RECORD rule.

As my colleagues may recall, earlier this year I offered a privileged resolution in the House calling for an investigation of some inaccuracies in the CONGRESSIONAL RECORD relating to the so-called "bulleting" procedure. Under that procedure, remarks that were only inserted were set off by bullets or dots to distinguish them from remarks that were at least partially delivered.

The House Administration Committee investigated my complaint and reported a resolution I had recommended that now requires any remarks not actually delivered to be in a different typeface.

The House adopted that new rule, House Resolution 230, just prior to the August recess and the experiment has been running in the House since September. Under the terms of the resolution, the rule will sunset at the end of this session unless specifically renewed following an evaluation by the Joint Committee on Printing and recommendation by the House Administration Committee.

Mr. Speaker, our distinguished majority whip, who is also chairman of the Subcommittee on Printing of the House Administration Committee and prime sponsor of the new rule, is asking that the rule be temporarily extended into the second session pending the final report from the joint committee and recommendation of House Administration. I concur in that request in order to ensure no lapse in the rule and urge any colleagues who do have comments on the new rule to forward them to the Joint Committee on Printing as soon as possible.

Mr. FRENZEL. Mr. Speaker, will the distinguished majority whip yield?

Mr. FOLEY. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, the minority members of the House Administration Committee want to salute the good work of both distinguished whips and to congratulate them for their cooperation and to say that in general we support their request and the statement which the gentleman from Washington [Mr. FOLEY] has just made.

GENERAL LEAVE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this 1-minute speech.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

THE TACTICS OF GRAMM-RUDMAN

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, I came here this morning to give a 1-minute speech on a bill that I was going to drop in the hopper today, called the Drug Enforcement Amendments Act of 1986, which takes three provisions, and makes the law a little tougher on designer drugs, on people who use minors to distribute drugs, and on the chemicals that are used to process coca paste into cocaine. My colleagues, I hope will read the bill and join me.

I am going to deviate from my previously planned speech on this bill because some of the outrageous comments I have heard from the other side today need to be responded to.

The gentlewomen from California talks to those people who, if they itemize, will lose their $2,000 standard deduction. What claptrap. What it is, is that if you itemize, you get a $1,500 exemption, which is $300 higher than the law allows now. Misinformation on which maybe they base their decision and which they should review.

The gentleman from Florida, my good friend Mr. MACK, talks about the small document, Gramm-Rudman, which we debated for 2½ months and the large document, tax reform, which we did not debate at all. Quite honestly, that is such claptrap it is pathetic.

The Gramm-Rudman document was never debated before the Senate voted on it; no Senator had an opportunity whatsoever except Mr. GRAMM and Mr. RUDMAN and Mr. HOLLINGS to even look at it; and this body has never had it debated, because it was shoved down our throats by the other body, tied to the deficit increase for the debt ceiling extension.

Those are the kinds of tactics which are being used. I think we ought to look at the tax reform bill; everybody knows that's in it; and we ought to do the right thing and get tax reform,

and stop listening to the nonsense of the other side.

DRUG ENFORCEMENT AMENDMENTS ACT OF 1986

Mr. Speaker, in 1984 Congress provided to law enforcement officers new weapons in the war on illegal drugs. I strongly supported this effort.

As Chairman of the International Narcotics Task Force and a member of two other committees that deal with the drug problem, I continually learn that additional antidrug laws still are needed.

Today, I am introducing a three-part bill that I call the Drug Enforcement Amendment Act of 1986. This proposal is not a cure all, but it will close up a few more loopholes through which the pushers have been wiggling.

Section 2 of the bill would impose stiffer sentences on individuals who use minors to distribute controlled substances. Specifically, it impose a penalty of up to twice the regular fine or prison sentence on any adult who commands, induces, or procures a minor knowingly to distribute drugs. For a second such offense, the penalty would be between 5 years and life and at least three times any special parole term. The sentence shall not be suspended and probation cannot be granted.

This section supplements a provision that Congress approved in 1985. Section 502 of the Comprehensive Crime Control Act of 1984 (P.L. 98-473) created a new penalty for the distribution of drugs within 1,000 feet of a school. This is good as far as it goes.

But, pushers also can be found in parks and playgrounds, and they may set up shop in developments that house families. In either of these instances, the pusher may lure—for money or drugs, or out of fear—minors to deliver their drugs and collect the money. After all, children are less conspicuious than adults in most areas.

My provision parallels for the most part the language that Congress approved in 1984 and would eliminate and unfortunate loophole.

Section 3 gives our law enforcement officers power to control so-called designer drugs. Designer drugs are analogs of perfectly legal compounds, but they often are more harmful than heroin or other illicit drugs. Virtually anybody with a modest knowledge of chemistry and a few common chemicals can alter slightly the molecular structure of a controlled substance, thereby creating what now is a legal drug.

In brief, this section makes it illegal to manufacture or distribute designer drugs for human consumption. The term "designer drug" is defined carefully. Violation of this law could lead to a punishment of up to 15 years and/or a $250,000 fine.

Section 4 deals with a continuing problem in the drug trade—control over the chemicals used to create or process illegal drugs. Generally, these chemicals have legitimate commercial uses, but they easily can be diverted to illicit uses. For example, ethyl ether and acetone are used to process cocaine. As more and more cocaine laboratories are being found in this country, we must develop some controls to limit to the maximum extent practicable the diversion of legal chemicals.

This section directs the Attorney General to study the need for methods to control such diversion and to report his findings to Congress. The Drug Enforcement Administration knows which chemicals need to be controlled, and I expect the Attorney General to include within this study all chemicals that now are diverted. I also hope that his report would include recommendations for procedures to deal promptly with any chemicals that may in the future be diverted to illicit uses.

As the war against drugs continues, the weapons of the drug traffickers change almost daily. The weapons that law enforcement officers use to protect us also should change to meet the continuing threat to our society.

CONGRESSMAN PEPPER REMAINS OPPOSED TO GRAMM-RUDMAN

(Mr. PEPPER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, on October 16, as a member of the conference between the House and the Senate on House Joint Resolution 372, known as the Gramm-Rudman resolution, I stated my opposition to that resolution. I concluded my remarks by saying, "We will long regret it if we allow this process to go to its ultimate termination as contemplated in this resolution." I added, "and I regret to see this scar upon the escutcheon of our legislative integrity." That is the way I felt on the opening day of the conference; that is the way I felt last night when I voted against this resolution. That is the way I feel today.

Mr. Speaker, the remarks to which I have referred to follow:

It is an honor to be a member of this distinguished conference. But I believe the approach that is made by this resolution is unfair to the House of Representatives and violates the due process of democracy in America.

The Constitution says that all legislative power shall be vested in a Congress which shall consist of a Senate and a House of Representatives. Now we are in a conference—a conference on what? A conference is generally described as a procedure by which differences between the House and Senate are reconciled by members representing the respective bodies.

But here we had to go to conference on the Senate amendment or appear before the public as not being interested in reducing the deficits, not appreciating its significance to America at the present time; so we had to bow down and put the ring in our nose and come trooping in to keep from being branded as not interested in reducing the national deficit.

Well, we are not the only ones that are responsible for that deficit. The administration, I don't know how many hundreds of billions of dollars it has reduced the Federal revenue since it has been in power. It created a deficit of $180 billion in 1981, by increasing expenditures for the defense of $90 billion and reduction of Federal revenue by $90 billion. The President has told us we can't even pass a minimum tax which will require corporations making $2 or $3 billion a year from defense work to pay a minimum tax because the President says he doesn't want that, it would make him a liar.

He said there weren't going to be any new revenues. It is one thing for the President to reserve his political integrity as he says it, it is another thing to deny the Congress the right to provide for America, which he has denied us the right to do. If the President will give us reasonable freedom of action to include at least a minimum tax, if not some additional revenue, then this group gathered here this afternoon, can balance the budget within a much shorter period of time than six years. We can do it within 30 days. I would hope that rather than at a time when democracy in the world in on trial, the Congress of the U.S., which we look to with pride, as the citadel of democracy, is having to admit that it has failed in its exercise of its Constitutional power; and we have to have the President come and rescue us to make us do what we should have done but won't do.

I am not willing to make that admission on the incapacity of the Congress of the U.S. to do its duty, and what I would like to see, Mr. Chairman, is this: this is the best leadership we will ever get together from the two Houses. Instead of spending all of our time with the resolution that is before us, this amendment that has been pushed upon us, let this group consider this as a time of conference in order to adopt a reasonable proper program for reducing the deficit, including passing legislation requiring the payment of a minimum tax for everybody to get necessary additional revenue, and if the President wishes to veto that, the American people would see who it is that is preventing the improvement of the situation of the deficit.

We will long regret it if we allow this process to go to its ultimate termination as contemplated in this resolution and I regret to see this scar upon the escutcheon of our legislative integrity.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair announces that we will be proceeding to special orders with the understanding that, without prejudice, we may return to the regular legislative schedule if need be.

INTRODUCTION OF AEROSPACEPLANE RESOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas [Mr. GLICKMAN] is recognized for 5 minutes.

Mr. GLICKMAN. Mr. Speaker, today I am introducing a resolution in support of expedited development of a technology which I feel will revolutionize our concepts of aviation and space. With the recent advances in materials, propulsion and systems integration technologies, we are now on the verge of bridging the gap between aviation and space through the develop-

ment of the first aerospaceplane, an aircraft capable of taking off from any standard runway, such as at Dulles Airport, and flying directly into space. A slightly different version, designed for air transport, would be capable of flying 300 to 500 passengers from the United States to China in 2 hours. Imagine what this new "Orient Express" could do to open up trade with the Pacific Rim nations and the rest of the world. Our concepts of time and distance would be forever changed, just as it was as we moved from horses to the automobile, or from trains to airplanes.

Mr. Speaker, NASA and the Defense Department have indicated that a prototype of this new generation of "aerospaceplane" could be flying by the early 1990's. With this effort, the United States would leap over the current generation of supersonic transports and literally launch American aviation into space. Perhaps the most important result will be assuring U.S. leadership in aerospace technology for years to come. Let the rest of the world work on building a miniature version of the shuttle while we go directly for the next generation of aerospace vehicles.

Mr. Speaker, the resolution I am introducing today expresses the support of the House of Representatives for a national program of hypersonic aircraft research and technology development, and calls for NASA, in consultation with other Government agencies, to submit their plan for such a program to the appropriate committees of Congress. With the support of Congress, the expertise of NASA and the Defense Department, and the energy of the U.S. aerospace industry, we will be able to move the world into the 21st century. I urge my colleagues to join us in this effort.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. PEPPER] is recognized for 5 minutes.

Mr. PEPPER. Mr. Speaker, I was unavoidably absent on Wednesday morning, December 11, 1985, for rollcall No. 448. At the time of the rollcall approving the Journal of December 10, 1985, I was conducting a hearing on doctors' fraudulent credentials. Had I been present, I would have voted "aye."

TORTURE IN IRAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DYMALLY] is recognized for 5 minutes.

Mr. DYMALLY. Mr. Speaker, some months ago I urged my colleagues to sign a letter in support of the resistance movement in Iran. Almost immediately after that letter was circulated, the State Department issued a brief identifying the resistance as anti-American, terroristic, and Marxist. I regret that the State Department brief intimidated me, and I stopped giving vocal support to the resistance.

Last night I had cause to reconsider. I was visited by three of the Ayatollah Khomini's torture victims. Two of the three are young women. By some miracle, they escaped Iran. But their bodies and their minds will never be free of the damage inflicted by the Ayatollah's agents. We hear so little of Iran here these days. I suspect we want not to hear of Iran, remembering our humiliation there. But I want to tell my colleagues what I saw last night because our looking the other way has allowed unspeakable atrocities to go on unchecked. If we have any compassion for our fellow human beings, we cannot continue to sooth ourselves by averting our gaze.

The two women had been school teachers in Iran. One of the women, on first glance, seemed not to have been hurt physically by the torture. But first appearances are deceiving. She said that her lip had been torn loose in the process of the torture. Only then did I see that her lower lip was held in place by scar tissue. I was sitting at an angle from her. When she turned her face to me and said her nose had been broken twice, I saw from the front that her nose was twisted in an S shape.

But those afflictions were minor compared to what followed. She undid the top button of her blouse to reveal large, red, round scars covering her chest. For 5 hours, she had been burnt with cigarettes. Every time she lost consciousness, she was revived so that she would experience the pain of each new burn. She described a game her persecutors called soccer wherein she was the ball. When the game was concluded, the players shoved her face into broken glass. To guard her face, she raised her arms which were severly cut and now bear long, sharp scars.

But the physical pain she endured may well not compare to the mental pain they inflicted on her. I still shudder to think of this. They brought her students to her one by one and executed them as she watched.

The other teacher is confined to a wheelchair. I wondered to myself whether surgery or therapy might enable her to walk someday. It soon became obvious that no therapy was going to help this woman. You see, she had no leg. What I thought was her leg was a prosthesis covered with a stocking and a shoe. Her leg had been hacked off with a machete. She told me she watched the Ayatollah's agents playing with her severed leg as though it were a football. Last night I saw terrorism in the flesh.

The man was quiet and spoke only at the end. He took a black and white family photograph from a small, red folder and handed me the picture saying in a low, choked voice that the photo was of his wife and 2-year-old child. He explained that his wife had recently been executed. And his child, his 2-year-old child, is at this moment imprisoned in Iran. Gentlemen and gentlewomen, this is terrorism. The three people I talked to are the lucky ones. They escaped. Since 1981, 50,000 others have not been so fortunate. They have been executed; 140,000 political prisoners are now held and tortured in Khomeini's prisons. What will be their final fate?

These acts I have described are anti-American in a fundamental sense: They are the antithesis of the principle of freedom that is the bedrock of our Nation. But more than being anti-American, these atrocities are crimes against humanity.

I call on the State Department to reexamine its position toward the resistance movement in Iran. Perhaps in this reexamination the officials of the State Department will find that the label of "terrorist" might better be applied to the Government of Iran rather than to the resistance. Perhaps in this reexamination the State Department will discover a group of true freedom fighters.

□ 1730

AMERICAN INTERESTS ARE BEING THREATENED BY COMMUNISTS IN THE PHILIPPINES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. LIPINSKI] is recognized for 5 minutes.

Mr. LIPINSKI. Mr. Speaker, I rise tonight to bring to the attention of my colleagues a speech which I gave before a group of political science graduates in my district concerning United States-Philippine relations. In wake of the fact that the Republic of the Philippines will be holding its first Presidential election in over 15 years, I believe it is appropriate to examine the principles which are key to American interests in Asia.

The United States has both major political and strategic interests at stake in the Philippines. As a former colonial power, the United States has probably closer ties with the Philippines than with any other Asian country. Most importantly, the United States maintains major air and naval facilities at Clark Field and Subic Bay. The post-1975 Soviet military presence in Vietnam has given these two bases added significance for balancing the military power in Asia.

Currently American interests are being threatened by a rapidly growing Communist insurgency that threatens the 20-year rule of Ferdinand Marcos and aims to install a Marxist, anti-United States regime. United States concern is shared by Manila's Southeast Asian neighbors, who see Philippine stability and the United States bases as crucial to the overall security of the region.

The Communist-led Now People's Army [NPA] has grown from a minor presence in the 1970's to a number now estimated at over 30,000 armed guerrillas. The NPA, in conjunction with the Communist Party of the Philippines [CPP], controls or is contesting control of settlements inhabited by at least 10 million people. The recent and rapid growth of these Communist groups can be directly attributed to their skillful exploitation of a growing number of popular grievances against the Marcos regime.

Political and economic power are monopolized at the top by a few elite individuals while at the bottom the mass of Filipinos live in virtual poverty without real input into the political process. A few favored administrators in the Marcos regime have been given control of large agricultural and industrial monopolies that dominate the economy. Political corruption and human rights abuses have fueled popular resentment. However, the most significant event during these turbulent times was the 1983 assassination of President Marcos' strongest political opponent, Benigno Aquino. Implications of military involvement in the Aquino murder have greatly hastened the decline in popular support for the regime while stimulating recruitment for Communist insurgents.

The Philippines is the only non-Communist country in Asia with a negative growth rate. The gross national product fell 4 to 5 percent during 1984 and 1985. Unemployment is reaching epidemic levels, exacerbated by a population growth far higher than in neighboring countries. The Philippines has the most serious external debt problem of any Asian country, aggravated by the large-scale flight of capital as wealthy residents move their assets to safer banking establishments abroad. Even under the most optimistic projections, the Philippines economy will only regain by 1990 levels achieved in 1980.

In this generally bleak picture, we must remind ourselves that the United States stake in the future of the Philippines is direct and substantial. The relationship between the two countries is unique if only because the Philippines was America's only true colony. Having occupied and subdued the Philippines afer the Spanish-American War, the United States laid the groundwork for political and economic independence. By World War II, a sufficient bond had been established between the two countries, so much so that Filipinos often fought alongside our American soldiers. After the war, the United States kept its prewar timetable and granted independence to the Philippines in return for economic privileges and the right to maintain military bases in the islands, notably at Clark Field and at Subic Bay, the largest American air and naval facilities outside the United States.

No location offers the same strategic or regional advantage as Clark and Subic Bay. Located about 800 miles southeast of a major Soviet facility at Cam Ranh Bay, Vietnam, and less than 10 hours by plane from the major oil fields of the Persian Gulf, the Philippine bases provide an ideal hub for accessibility through two crucial regions: east from the Persian Gulf across India to Southeast Asia, and south from the Soviet Union's Kamchatka Peninsula through Japan to northern Australia.

Given the strategic situation as it is developing in Asia, specifically the growing Soviet alliance with North Korea, the active measures by the Soviets over the past 15 years in Australia and New Zealand, and the current Soviet efforts to build an active force in the South Pacific, the United States can not afford to pull out of the Philippines.

The Republic of the Philippines has also adopted a political system patterned after our own and has maintained very close political, economic, cultural and military ties with us. Within Asia, the Philippines are viewed as a country so closely bound to the United States by ties of interest and sentiment as to give it a kind of dual indentity—half Asian and half American.

Clearly the recent deterioration in government authority and emergence of a powerful Communist insurgency in the Philippines threatens very important United States national interests. In an attempt to avoid irreversible damage and a chaotic political vacuum in the Asian region, the Marcos regime must initiate major reforms including: a crackdown on military abuses; a legitimate investigation into the Aquino assassination; more serious prosecution of the counter insurgency efforts against the Communist guerrillas; the limitation of Marcos' autocratic powers of legislation and detention; the assurance of honest local and Presidential elections; an attack on Government corruption; and finally, production of an economic recovery program built on the destruction of so-called crony monopolies that have crippled the Philippine economy through Marcos' tenure in office.

Perhaps our strongest basis for a non-Communist future is the continued widespread devotion in the Philippines to democratic norms and processes—particularly elections. Democracy has deeper roots in the Philippines than in most developing countries. Despite the inhospitable conditions in recent years, these roots are still alive.

The Philippines is a country long accustomed to molding its identity in the image of the United States and it is based upon this reservoir of affection and renewed commitment to democratic ideals that may represent our greatest hope for avoiding an Iranian fiasco in this strategically critical land.

THE COMPETITIVE AMERICA TRADE REFORM ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

Mr. PANETTA. Mr. Speaker, it is a pleasure to join my distinguished colleagues, Representatives FAZIO, AUCOIN, RICHARDSON, PENNY, and LAFALCE in introducing the Competitive America Trade Reform Act of 1985. This legislation was introduced in the other body on October 31 by Senator HART, whose leadership and foresight has been instrumental in the development of the proposal. The version we presented on November 21 is still in draft form. We offer it as a basis for discussion and welcome the input of our colleagues as we fine tune the package.

The future of America's economic well-being is seriously threatened. We can no longer rely on the luxury of unimpeded economic predominance. The world is shrinking as technological and economic distances between nations are bridged. This new interdependence is both enriching and challenging. If we are willing to commit ourselves to fundamental reforms which recognize evolving global trends, we will be in a position to reap enormous benefits for ourselves and our neighbors. Yet we cannot hide our heads in the sand, dreaming of days gone by. We must prepare to compete in a new global marketplace, drastically different from the one we have dominated over the past 40 years.

The challenges posed by the new economic realities will require a coordinated, comprehensive response. The first hurdle has been surpassed: America has belatedly recognized her declining competitiveness. In the last 3 months we have seen a rapid evolution of a concensus on the need for constructive action. The debate on the particulars of that action, however, is still wide open. Some would advocate a "painkiller" approach that would make us feel better today but do nothing to guarantee a long-term recovery. Others would place the entire blame for our economic woes on our trading partners and apply punitive measures that invite retaliation.

I believe that we must formulate a comprehensive trade policy which would take into consideration the new economic environment in which we are operating. I am not alone in this conclusion. Americans are increasingly recognizing that the trade problem will not be solved by painless, quick fix measures. Furthermore, any intelligent policy must begin with a realistic assessment of the causes of our declining competitiveness.

Our bill is based on just such an assessment. The first and foremost cause of the trade deficit comes as no surprise to anyone. The dollar is overvalued. It has

been estimated that the dollar is inflated by at least 40 percent. The causes for this overvaluation are many, but the direct relationship between the massive Federal deficit and the rise in the dollar cannot be overemphasized. We are spending way beyond our means, and must finance the shortfall with borrowed moneys. Since domestic savings are not sufficient to cover the gap, we have relied on foreign investment. The resulting capital inflows have driven up the price of the dollar and placed it on an upward spiral that cannot be easily contained. Serious deficit reduction must be a national priority.

The consequences of a strong dollar have been felt by every American. Although some have enjoyed new travel opportunities and increased foreign purchasing power, others have found themselves devastated—jobless, unskilled, and unprepared for the future. For the first time in over 70 years America has found herself in the unenviable positon of net indebtedness. Our debt is likely to surpass those of even the largest Latin American borrowers if the trend is not abated quickly. Our industries will never be able to compete in a global market in which our products are greeted with what amounts to an automatic 40-percent surcharge because of the exchange rate. No amount of protection can overcome that decidedly unfair barrier to trade.

Therefore, a comprehensive trade policy should be based on measures to ease the dollar down to a more realistic level.

The second underlying cause of our trade deficit is the declining demand in the Third World for American goods. Most of America's outrage about the trade issue has focused on Japan and its relatively closed market. However, it is instructive to note that while trade with Japan dropped $18 billion between 1980 and 1984, trade with Latin America declined by a full $23 billion over that same period. The lesser developed and newly industrialized countries traditionally have absorbed 40 percent of our products. Today, their ability to purchase any items from abroad is severely limited due to their debt crises. Virtually all foreign currency must go toward this repayment. Furthermore, the austerity programs imposed upon them have necessitated drastic reductions in consumption. We must take precautions to ensure that our actions do not exacerbate this problem nor add to the instability of fragile new political structures in those countries. Renewed growth in the developing world will benefit all nations.

Third, a number of countries pursue policies that unfairly impede the flow of free trade, and we cannot stand by helplessly as they claim more and more of our market share. The message must go out to our trading partners that America means business, and if the business is free and fair we are more than willing to participate. But we simply will not tolerate actions that handicap us from the outset.

Our trade laws need to be reformed, and we need to rely on them. Laws already on the books are collecting dust due to lack of use. When we take a stand through the enactment of legislative remedies and procedures we must be prepared to enforce them.

In reforming these laws, we should clearly define specific actions we deem to be unfair—in as much detail as is feasible—clarify the procedures by which we will investigate and take action against allegedly unfair practices, and encourage the eventual dismantlement of those practices through negotiation.

Fourth, a comprehensive trade policy should address internal factors affecting the declining competitiveness of American industry. Why is our manufacturing sector becoming outdated? Why are foreign products claiming an increasing share of the domestic market? What structural factors in our educational system leave us unprepared to deal in a global marketplace? Why are we unable to produce as efficiently as some of our competitors? These are just some of the questions which need to be explored and answered on an ongoing basis. We must also reach a consensus on an appropriate corrective plan, both on a national basis, and industry by industry. We must work cooperatively to restore America's competitive edge.

Finally, although the structure of our industrial base is evolving, we cannot leave affected workers and industries out in the cold. We must offer compassionate assistance, but assistance which recognizes that the realities of our economy are changing. Workers who have lost their jobs because of increased competition from abroad and with no hope for future employment in a related field, must be retrained. The burden for this readjustment process must be borne by the Nation as a whole, since no individual can be held responsible for global economic changes beyond his or her control. However, such readjustment assistance must be accompanied by a firm commitment and dedication on the part of the worker. Likewise, an affected industry must be assisted, but must also pledge to help itself. Plant closings and unemployment in any one sector affect each and every American. We must lend a hand to those left with the short end of the stick, not only out of human compassion but also because a revitalized American economy is in the best interest of us all.

Our bill addresses all five of these needs with concrete reform proposals. We believe that this kind of broad based approach is the most sane and effective tactic to take. Some Members may disagree with certain elements of the bill, or may have suggestions for additions and improvements. We welcome such comments, and hope to work together with bipartisan cooperation to develop sound policy. I urge my colleagues to review this legislation carefully, and lend your support to our efforts.

Economics is not a zero-sum game. Our gain is not our neighbor's loss, nor vice versa. If we are willing to act constructively to breathe new life into our economic system, a prosperous future is on the horizon. We need only reach out and claim it.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida, [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, due to official business, I was unable to be present and voting numbers 448 through 452. Had I been present, I would have voted "aye" on roll No. 448, motion to approve the Journal; "aye" on roll No. 449, adoption of House Resolution 336, providing for the consideration of H.R. 3838, tax reform; "aye" on roll No. 450, adoption of House Resolution 333, providing for the consideration of Senate Joint Resolution 238, United States-China Nuclear Cooperation Agreement; "aye" on roll No. 451, final passage of Senate Joint Resolution 238; and, "aye" on roll No. 452, House Resolution 329, providing for the consideration of H.R. 3525, Uniform regional poll closings.

SHOULD THE UNITED STATES RENDER AID TO JONAS SAVIMBI IN ANGOLA?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan [Mr. SILJANDER] is recognized for 60 minutes.

Mr. SILJANDER. Mr. Speaker, tonight I am taking out a special order dealing with an issue that many Americans may not be fully aware of. It is something new in the foreign policy arena, and it deals with the conflict in the Government of Angola in the Southern Hemisphere of the African Continent.

There have been incredible controversies internally within the State Department in terms of the policy toward Angola, that is, our policy toward Angola, and also within the Congress of the United States. There has been reasonable unanimity, I feel, amonG the Republican side, and some on the Democratic side have agreed with some of the policies that I am about to expose as well.

So I want to make very clear this is a bipartisan point of view reflected in a bill that I have introduced dealing with Angola. I will get to that in just a moment. There are 108 cosponsors including many, many Democrats.

The major cosponsor is Congressman SAM STRATTON of New York. It is entitled "The Siljander-Stratton Bill, Aid to Jonas Savimbi of UNITA for Fighting for Freedom in Angola."

I think it might hold some merit to outline briefly the history of the conflict and where we are today.

Angola has been a country that has been at war with itself since the early 1960's. The war has been a conflict between a group called the MPLA and the colonial Angolan Government supported by the Portuguese Government.

The MPLA was the first of the liberation movements in Angola. But even from the beginning the MPLA was not backed fully by the people of Angola. Not because they backed the Portuguese but, rather, because it had Soviet ties and Marxist-Leninist leanings in terms of ideology.

Soon after the beginning of the war with the MPLA and the Portuguese, the MPLA was forced to become an exile organization operating out of the Congo. From the Congo the MPLA saw a very limited success against the Portuguese-controlled government. But in 1957 the MPLA founded another group called the FNLA, or the National Front for Liberation in Angola. Its original name was the UPNA and from the beginning was based in Zaire, and it drew support primarily from the Bakongo people in the northern part of the country. Similar to the MPLA—all these acronyms, I know, are confusing—but this other group, the FNLA, did not have much success against the Portuguese Government.

So one of its members named Jonas Savimbi, who was becoming a more and more recognized name here in the United States, decided to form his own group. He said the FNLA was far too liberal and impotent against the Portuguese Government and the MPLA was also impotent and far too leftwing. So he decided to form a totally new organization called UNITA.

UNITA was a group that has been striving for peace ever since. This time, however, they had far more success against the Portuguese Government. But in the 1970's the Portuguese found a coup in their country; a far different government took over the country of Portugal, and Portugal decided and made an announcement in July of 1974 that it would be willing to colonize Angola and work with all three of these liberation movements for democratization of the country. All three of these movements, and I will repeat, the MPLA, the FNLA, Jonas Savimbi's UNITA, all signed the Alvor agreements. These agreements were signed in 1975. They said they wanted free elections in the country and established an interim coalition until they could arrive at a complete democratization of the government.

However, the MPLA and the FNLA began fighting and bickering in terms of who would actually share the power. In the meantime, Jonas Savimbi and his UNITA organization decided to lay down their arms. They had confidence in the Alvor agreement which all sides had, and, in the meantime, the other two groups, suspicious of each other, did not put down their arms. They fought against each other, and eventually the MPLA rose to the top, and the two literally took over the country, and since then there have never been free and open elections as promised and signed in the Alvor agreements.

Today Jonas Savimbi is still fighting a war. But incredibly enough, this war is no longer against the Portuguese nor is it even against the MPLA particularly. This war is against Cuba, this war is against the Soviet Union, this war is against expansionism of the Soviets and East bloc countries in Africa. There are 35,000 to 45,000 Cuban troops, without any dispute of the numbers, a minimum of 35,000 and a maximum of 45,000, now in Angola. The human rights record of Angola is despicable. They voted in the United Nations General Assembly 4.9 percent of the time with the United States of America. In fact, their voting record is worse than Vietnam's.

Their voting record is worse than Libya's. Mu'ammar Qadhafi's Libya votes more with us than does Angola. Syria, Laos, even Afghanistan, vote more with the United States than does the country of Angola. They were cited as the five most anti-American nations in the world. The State Department, while we have our disagreements here and there, has been clear about the human rights record in Angola. The human rights record includes executing of prisoners, widespread disappearances of political prisoners, persistent allegations of torture, mistreatment in the prisons, arbitrary arrests, trial without due process, no freedom of religion. The MPLA propagates, of course, atheism/communism; there are restrictions on freedom of travel, denial of freedoms of assembly, there are no free labor unions, no right for a citizen to change the vote of the Government to a vote for their representatives or even to express a dissenting opinion. Indeed, I think it is more than abundantly clear that Angola is a country that is in conflict with the provisions of morality, of human decency, of treating a fellow human being in a rational, reasonable way, in deep conflict with those values that we in America hold so dear.

And, lastly, I would like to indulge in a colloquy for just a moment with my good friend from California, Congressman DORNAN. There are about nine major arguments I would like to engage my colleague from California, arguments against assisting the freedom fighters. This is how I would like to frame our discussion: The issue comes down to, after hearing the case, the history of Angola, after understanding there is a Marxist-Leninist government in power, a puppet government supported by Cubans, Soviets, Bulgarians, and North Koreans, the issue is simply this: Should we assist Jonas Savimbi of UNITA who is fighting for his life, for his country, and for his freedom? Should we assist him with military and humanitarian assistance, or should we not?

There are about nine arguments why we should not. Those are the arguments I would like to discuss with my colleague from California, Congressman BOB DORNAN.

Welcome, and I appreciate your participation in this special order. I yield to the gentleman.

Mr. DORNAN of California. I thank my colleague for yielding.

Any of our fellow American citizens following your special order tonight should know by way of credentialing that I serve on the Subcommittee on Africa of the Committee on Foreign Affairs of this great body, and the gentleman from Michigan [Mr. SILJANDER] is the senior ranking member on that committee. There are only four of us. The House looks to us on our side of the aisle to do the research and the homework and to bring some light to the issues involving all of this, the largest continent on the planet Earth. Then they take the lead from us in our party. I just want to commend the gentleman for the fact that he has gone beyond what the average Member of this Chamber or the other body does in pursuing an issue. The gentleman has carefully, without taking any time away from servicing his district, gone to some of these areas of the world over there, which involves fast schedules, hard work. The gentleman has seen for himself. He has been to Mozambique, to other African countries in the area. He has carefully explained on this floor that there are probably only 2 countries in all of Africa, and that is 51 nations if you take into account all the island nations, in the high 40's if you deal with just those in the land mass, and if you take south of the sub-Sahara you are still dealing with 40 nations; only two, Botswana and possibly Ghana, where there is any type of representative government at all with an opposition party. As flawed as the Government of South Africa is, with its policy of racism, institutionalized in what they and we call apartheid, keeping the races apart, which certainly offends God, if not all civilized sensibilities; there is more freedom in that country, even the oppressed blacks who do not have the opportunity to vote, there is more opportunity to sound off, to speak up, even before reaching the point of arrest or any rough handling on the Government's part than any other of the black governments except for the two aforementioned ones.

So I would like the gentleman to go down the nine points, but I prologue that by saying that I had an opportunity to see on that fourth network, "Cable Network News," it likes to refer to itself as the most important network in the world, and when something is breaking fast, any hour of the day, 24 hours a day, they certainly do

become No. 1, well, they did a better investigative piece on film on Jonas Savimbi, filmed at his headquarters in Jamba, in the southeastern corner of that large country of Angola. They did a better in-depth analysis of what is happening there and what type of a leader this man is than all the other television networks put together. He speaks fluent English, he is charismatic, he is powerful looking, he is just the kind of a figure that Africans seeking freedom are looking for in a leader.

In Vietnam there was an ultimate tragedy in the end that there was a figure, although a killer, with a world-known name, Ho Chi Minh, was on the side of the forces of fighting for multi-pluralistic government freedoms, there was no identifiable figure around which to rally. After Batista, who fled Cuba, who was there on the side of the freedom fighters to match the charismatic Che Guevara, otherwise known as Lynch. Bobby Lynch, his brother, Ernie Lynch, otherwise known as Che Guevara, the Argentine. We had only a Cubamata to rally around. That is why Castro arrested his best lieutenant and put him in jail for 20 years. In every area around the world we have no name around which we can rally in Afghanistan; in Nicaragua we had one, Eden Pastora, and he and his troops are being allowed to be starved right out of the conflict. But in this area of Africa, Angola, we have the name. There is not a Member of this Chamber on either side of the aisle who can name someone in the Angolan Government who is actually a leader participating in the fighting. But this name, Jonas Savimbi, is known all across this massive continent of Africa. This time we have the charisma, we have the leader. He rides at the front of his troops. He has a command of the issues, and now we have to, as you have taken the lead and implore this man to leave his fighting men in the field while—what is the figure that you taught me? Nine Soviet generals.

Mr. SILJANDER. Approximately 12 Soviet generals now in Afghanistan planning a new offensive which they have not gotten into.

□ 1755

Mr. DORNAN of California. I will close on that, then. While this man is facing 12 Soviet generals and sundry colonels, majors, captains and Soviet guidance in the Cuban units, right down to the company level, he has to be pulled away from his men to come to this Hill and lobby narrow-minded liberals, certainly narrow-minded on this issue, as Jose Duarte had to do, to turn the tide in this House on El Salvador. By the way, there is another example where we had the person with the name value, and the other side deals with nameless Communist guerreros up in the hills of El Salvador. blowing up everything they can get their hands on.

So he will come here in January, thanks to people like you, and he will be as effective as President Jose Duarte. He will turn around, I believe, the key number of votes so that he can go back—and pardon the poetic sentence, but I believe it—put his life again on the altar of freedom, and then it is up to God as to whether he dies at the front of his troops or not, just as we do not know the outcome historically of what will happen to a courageous Notre Dame graduate named Jose Napoleon Duarte.

So I thank you for the lead you have taken, and I look forward to hearing these nine points. I have not had the advantage, because we have not sat together on the African Subcommittee this week, to hear what you have worked out as a plan for the survival of freedom and a template, an example, for all of Africa, on how to do it, and how you can turn around the confused leader of the free world, confused because of this Congress, the United States of America.

Mr. SILJANDER. I want to thank the gentleman from California. He has been an invaluable asset in the subcommittee, and I appreciate his input and his help, especially in the public forum of bringing this name Jonas Savimbi to the minds of millions of Americans whose hearts are going out to those who are fighting the same cherished, beloved freedoms that we enjoy here.

And the nine points, I hope in the hour we will have an opportunity to identify these nine myths, as they can be termed, as well, but before we hit the nine points I would like to yield to both the gentleman from California and the gentleman from Indiana [Mr. BURTON], another member of the Subcommittee on Africa, whose outstanding leadership I appreciate. He is always promoting me to move forward, as the ranking Republican, and I appreciate his efforts and his vibrant interest on this issue. Let us face it, how many Americans, really, have ever heard before the last months of Jonas Savimbi or Angola?

In fact, Members on the floor of the House, when I asked several of them to cosign my aid bill, said, "Who is she?" They said, "Who is she?" But things are changing. They know who he is. He is a freedom fighter. He is an articulate man of his word and deed. I would like to try to have the input of both the gentleman from California and the gentleman from Indiana on each of these nine points. I will mention what they are. I will throw maybe one point out, and I would like to hear ideas, but in the meantime I would like to yield to the gentleman from Indiana, [Mr. BURTON], for any comments he would like to make.

Mr. BURTON of Indiana. I appreciate the gentleman from Michigan taking this special order.

One of the things I think is so important is that the people in this body as well as the people across this country know what is going on in various parts of the world, in particular in Central America and in southern Africa, so that they will be aware of what the consequences are if the Soviets are successful, or their surrogates, and they take over various parts of the world.

The other night we had a debate on this floor, in which I had a very small part. Mr. SOLARZ of New York, Mr. WOLPE of Michigan, along with Mr. HYDE of Illinois and Mr. GINGRICH of Georgia, had a pretty spirited debate on this issue.

I had a problem with that because a lot of the issues which are so important were not really brought to light. There was a lot of rhetoric. I think Mr. GINGRICH and Mr. HYDE made some valid arguments. But, unfortunately, a lot of the things that we discussed in the African Subcommittee were not brought to light. But I would like to just touch on a few issues that I think are very important, and then I would like to be involved in a colloquy with the gentleman from Indiana and the gentleman from California.

First of all, what is at stake in southern Africa? If Angola should fall totally to the Communists, if the Soviets have their way, and Mozambique stays in the Communist column and the Renamo forces over there are unsuccessful, there will be a crescent formed across the southern tip of Africa, and the only country left that will not be Communist, the only real country that is viable, will be South Africa.

Now, we have real problems, all of us, with the racial policies of that government. Nevertheless, we do not want that country to go Communist because things that are vital to the security of the United States of America emanate from that part of the world. But we have a vital stake in what goes on in southern Africa.

If Angola goes Communist, if the UNITA freedom fighters who are fighting so valiantly for their freedom and for their country's future security, if they are unsuccessful, then in my opinion it is just a matter of time until the Communist forces are able to launch an all-out offensive on South Africa and put that country in the Communist column.

Now, what does that mean to the free world? Five minerals that are absolutely vital to the security of the free world come out of the southern part of Africa. The only other place most of these minerals are able to be obtained is from the Soviet Union. So if South Africa goes Communist, minerals that are vital to the military se-

curity of this country and to the economic health of this country will only be able to be obtained through the Soviet Union or the Soviet Union's surrogates.

Mr. SILJANDER. If I could reclaim my time for a moment, that is a very important point. In Michigan and Indiana, which the gentleman represents, and in California, the auto industry is a very important and vital industry. Now, many UAW autoworkers would ask, "Well, what does Angola have to do with my paycheck?"

Mr. BURTON of Indiana. That is right.

Mr. SILJANDER. "Why should we be sending any money to Jonas Savimbi in Angola?"

Well, part of those five ores that the gentleman is referring to which are located either in South Africa, all of them, or in the U.S.S.R., many of them are crucial to the production of automobiles. So while Africa . a long way away from the United States and the concerns of farmers and autoworkers and small business people and housewives, it is very important to the economy, at least where I come from, with two General Motors plants located in or nearby my home town.

Mr. DORNAN of California. It goes without saying that automobiles also mean M-1 Abrams tanks. And you cannot put a jet aircraft in the air, commercial or military, without using the same critical minerals that come from this area of the world or the Soviet Union.

Mr. BURTON of Indiana. If the gentleman will yield further, I am glad the gentleman mentioned specifically the auto industry. I have two General Motors auto plants in my district and a Chrysler and a Ford right on the periphery of my district, and they make M-1 tank transmissions, so I am interested in all of the things that you gentlemen have alluded to.

But in additon to these vital minerals, also 40 percent of the free world's oil supplies come around the southern tip of Africa, and you can bet if the Soviets or her surrogates take control of South Africa, they are going to have their ships in those harbors within just a matter of a few days, and that means that they will have control over those sealanes, and the oil supplies that are so vital to the entire free world will be in jeopardy. In time of economic or military crisis, we will have their hands, the Soviets' hands, around our throat.

Now, what are the Soviets doing in Angola right now? There are 12 Soviet generals who are over there helping direct the offenses that have been taking place by the Angolan Communist forces. Just recently—and I think the gentleman may have alluded to this earlier—the Communist forces in Angola, the Cubans, the Angolan troops, led by the Soviet generals, launched a major offensive against the UNITA forces. And the UNITA forces held their own, but they did lose some vital areas. Now, the Soviet Union has been bringing in 15 planeloads per day of new military equipment to reinforce that position, and they brought in 1,500 Cuban troops and I think 6,000 MPLA troops, Angolan troops, into that area, so they will be able to launch a major offensive during the rainy season or just after the rainy season ends.

That is very significant. They are building up for a major offensive. They are flying about 10 sorties a day into the UNITA force areas, where they control them, to feel out how strong the UNITA forces are, so that they will know where to hit and how hard to hit in order to defeat them.

So the United States of America, which we have just pointed out has a vital interest in what goes on in southern Africa, really needs to pay attention and give support to Savimbi and the freedom fighters, because not only is Savimbi and the freedom forces' security at stake, but the security of the entire free world is at stake as well. And that includes the United States of America.

I know the gentleman who is the ranking Republican member of the South African Subcommittee is well aware of this. I am anxious to hear the nine points that he talked about a few moments ago and to engage with him in a colloquy to discuss this.

Mr. SILJANDER. Once again I would like to thank the gentleman from Indiana, Congressman BURTON, for his astute observations, especially as to what is happening presently in Angola.

I would like to throw them out one at a time rather than going through all nine. If we do not finish tonight, I will make a request of the gentleman that he and I can get together and finish the nine points. I think it is important, for the RECORD and for the American people, that they understand that these nine arguments are purely unequivocal myths of why we should not help Jonas Savimbi.

The first one is: Aid to UNITA will strengthen the Angolan Government's reliance on the Cubans and Soviets.

What they are saying is that if we help finance the freedom fighters, somehow that will encourage more support of the Cubans and the Soviets.

Well, first, they are totally dependent on the Cuban and Soviets now, Ten years ago, Senator Clark passed the so-called Clark amendment. This Clark amendment stated that the U.S. Government, overtly or covertly, secretly or on the table, could not aid Jonas Savimbi or any freedom fighters in Angola. It passed.

Mr. DORNAN of California. Senator Clark lost his seat 2 years later.

Mr. SILJANDER. Senator Clark lost his seat 2 years later, thank goodness.

Mr. DORNAN of California. As did his fellow Senator from Iowa who supported him in this Clark amendment, Senator Culver, who lost his 2 years after that.

Mr. SILJANDER. But the Clark amendment, even though both of these major Senators lost, for 10 years was in effect law, prohibiting the U.S. Government assisting in any way.

Now, here is an interesting statistic: In 1975, the argument was, "Let's negotiate our way out of this, not contribute toward an escalation." At that time, in 1975, the Congress bought the argument there were 12,000 troops in Angola, 12,000, a significant number. Their argument was, "If we do not pass the Clark amendment, there will be more troops." Well, we did. Ten years, no way. The result today, there are now 35,000 to 45,000 Cuban troops, that is a minimum of three times more; so the point is, the negotiations have not worked over 10 years, and banning any aid has not worked, and what it has done is, it has encouraged more troop occupation of Cuba and the Soviet Union rather than less.

Mr. BURTON of Indiana. If the gentleman will yield, I think he makes a very valid point. In addition to the tremendous buildup in Cuban troops and having Soviet manpower in there as well—not in the same degree that we have Cuban troops—the Soviets have poured in $2 billion in military assistance in just the last year.

Mr. SILJANDER. How much?

Mr. BURTON of Indiana. $2 billion.

Mr. SILJANDER. The gentleman means "b" for billion?

Mr. BURTON of Indiana. Not million, $2 billion in military assistance in just the last year. So our staying out because of the Clark amendment has not deterred the Soviet Union or her surrogates in any way.

I think this is something that we should think about as far as Nicaragua is concerned or Angola or anyplace where the Communists are making an offensive against freedom forces. The only thing they understand is strength. As long as the free world continues to back up and say, "Hey, all we should do is negotiate," we can only do one thing, and that is to lose. I think that lesson should have been learned very, very well when we were in Vietnam. Fighting a defensive war, always trying to negotiate, backing up, never taking the battle to the enemy, never giving freedom fighters the ability to win, can only lead to one thing, and that is ultimately defeat. And when that happens, the Soviet and the Soviet sphere of influence spreads. If we do not watch what we are doing, they are very likely to checkmate the entire free world at some point in the future. So we must be strong.

Mr. SILJANDER. That is an excellent point.

To summarize, the reason why this is a myth, that if we contribute to the aid of freedom fighters there will be more aid to the Communist government by Cuba, the fact is in the 10 years we were banned from doing it the troop size of the Cubans tripled. In the last 18 months there has been $2 billion, as the gentleman from Indiana outlined—"b" for billion dollars—of military hardware poured into Angola to the Marxist puppet government.

Myth No. 2: Aid to UNITA undermines negotiations over the independence of Namibia.

Namibia is a country just south of Angola, occupied by the South Africans at this point in time.

Now, that is the argument that is put forth. It is pretty obvious that the MPLA victory in Angola will mean either a Communist Namibia or a Namibia that will remain under the South African control. So to allow a crush or defeat of UNITA, Jonas Savimbi, will allow total domination by the Communists in Angola, which will only further spread communism, as you outline, this layer of communism over South Africa, and put more conflicts, more deaths, more civil war in Namibia rather than less.

So I see this as ludicrous.

□ 1810

Mr. DORNAN of California. Let me speak to that point. Not everyone following this special order may know that some of us get unwanted breaks in service here due to losing elections. Others of us are taken out of office with a pencil, as happened to me in a back room in San Francisco, even through I am from southern California, I lost my seat in the gerrymandering process.

During my 2 years out, 1983, and 1984, I had the chance to go and spend over a week in Namibia with my wife, traveling from one end of that country to the other, analyzing the atomic energy production at Rossing, one of the most sophisticated plants in the world. Looking at the diamond mines, even the diamonds that are taken from the surf along the oceanfront down near the South African border, and meeting with black representatives of different, various parties. A unity party of blacks and whites, and analyzing the situation in another large country of Africa, but this time with a very thin, sparse population of less than 1.5 million people.

This country Namibia, although for years it was known as South West Africa, and was a German colony taken away from Germany after World War I. The Germans did not do, fortunately for the country much colonizing, and when they left, you would hardly know they had ever been there.

It then became a protectorate of South Africa, because South Africa was not determined to be the pariah state by the rest of the world that it is today. Historical events overtook the perception of how civilized South Africa was. They were good enough to shed their blood in World War I and World War II, and also in Korea with us, even supplying fighter pilots that flew our supplied P-51 Mustangs.

But during that South African rule, South Africa never imposed the same harsh rule of apartheid on this small, 1½ million, thinly spread out population of Namibia. The city of Windhoek is clean, it is beautiful, and the government that can evolve there in a free, multiparty-type state I am convinced will be an example, not just an example, a shining example, to all of Africa, how whites and blacks can and must live together, and how people can learn not how to win elections, which everybody knows how to do in Africa or Asia or anywhere else if there is only one party running; they have those phony elections in the Soviet Union all the time. That is why I am amazed that Castro has never tried to pull off a one-party election like Danny Ortega. He is so egotistical he does not want any election; he is just emperor for life.

But in this country, now a protectorate of South Africa, Namibia, if it is allowed to move into an electoral process without the interference of SWAPO, which has a seat at the United Nations and uses the ultimate policy of Communist people in an election, that is, if you do not like what is going on you blow up the country, and if you lose an election, you slit everybody's throat who beat you and declare a new election.

If SWAPO, which is a Communist front group supported by the Soviet Union and the Cubans, if they are allowed as the United Nations is pushing to do, to destroy Namibia's chance at freedom and alternately our governments, depending on who is in the White House but with a sort of consistent policy of the State Department, has all but embraced this concept, that SWAPO should be handed an election in Namibia.

Yes, there are South African troops along the border of Angola and the northern border of Namibia, seeing that their self interests, not having Namibia turn into a Communist state, bringing a border that much closer to the South African border, and, as a matter of fact, scarfing up this atomic energy production plant, a huge area, modernized facilities, landmover vehicles as big as this entire area of the well and the Speaker's tripartite desk arrangement, and not to mention the diamond mines and other critical mineral facilities, this country must be allowed to move toward democracy without the heavy-handed approach of this Communist front group, SWAPO.

Now, yes, the South Africans have used this area as a staging area to cross the Illongo River and move into military operations in Angola. But Namibia is not going to have its fate determined about how we approach the Communist forces in Luanda, hundreds of miles to the north. Namibia is a country that we can have a separate foreign policy approach to, moving it toward this mixed white and black, multiparty system, bring it into freedom, be an example to all of Africa, while we still support Jonas Savimbi and bring freedom to Africa.

Let me anticipate some people sitting out there following this special order saying, "How can Savimbi, if he is a legitimate black leader and freedom fighter, deal with South Africa and accept aid from them?" That is like asking Winston Churchill why he dealt with a killer named Joe Stalin. Churchill's answer was, "To keep democracy safe and win freedom, I will make a deal temporarily with the Devil himself."

Jonas Savimbi, a free leader, in Angola, guarantees Namibia becomes a free state in Africa with a multiparty system and a duly elected government and those two countries become examples for South Africa to share the vote with all of its citizens.

Mr. SILJANDER. I thank the gentleman. We are getting into our third point. To finish the second myth that undermines negotiations in Namibia, it is interesting that over 10 years of having no military aid whatesoever, in other words, no pressure on the MPLA, the Communist group in Angola, to negotiate Cuban troop withdrawals for the independence of Namibia which South Africa is willing to do and our State Department is attempting to negotiate, for 10 years they have collapsed.

So, somehow, now that the Clark amendment is repealed, and the Congress is moving very rapidly toward covert aid toward the freedom fighters in Angola, somehow they argue, do not do it; it will undermine negotiations. We tried no financing of the freedom fighters; we had no success whatsoever. Not even limited; zero success. So we hope this added pressure will bring about negotiations, will bring about Cuban troop withdrawal in Angola and bring about a fair democratization and independence of Namibia.

I yield to the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. I appreciate that, and along with the point the gentleman from Michigan and the gentleman from California just made, Mr. Savimbi, who has very little choice in where to turn for assistance so that he can fight his war for freedom there against the Communist forces, has an-

other stumbling block put before him by our State Department.

Our State Department has never declared Angola to be a Communist country. They received $2 billion in military assistance over the last year to 18 months. There are 35,000 to 45,000 Cuban troops there. The leaders are avowed Marxists.

Mr. SILJANDER. Just a moment. Do you mean to tell me that the State Department of the United States of America has not declared that country, under the conditions you have just articulated, has declared a Communist nation?

Mr. BURTON of Indiana. No, they have not. And because our State Department has not declared Angola a known Communist country, to be a Communist country, the Export-Import Bank of the United States of America can loan money to the Communist government in Angola. Just recently, the Export-Import Bank of America loaned $129 million to the Communist government of Angola who were fighting the freedom fighters led by Mr. Savimbi.

Mr. SILJANDER. So what the gentleman is saying is that our State Department, refusing to recognize the puppet government being held in place by Cubans and Soviets and Bulgarians and Koreans——

Mr. DORNAN of California. And East Germans.

Mr. SILJANDER. And East Germans and other Soviet bloc nations are in fact being financed, at least financed through taxpayers' guaranteed loans to businesses in Angola such as Chevron-Gulf, who financed 90 percent of all the revenues of the Government of Angola, and paid Castro for his mercenaries, to quote Congressman BOB DORNAN in a "60 Minutes" interview, that are murdering black men, women, and children.

This is an incredible scenario.

□ 1820

Mr. BURTON of Indiana. It certainly is, and I think that the gentleman from Michigan and I and the gentleman from California [Mr. DORNAN] all feel that the State Department should be taken to task for not admitting that Angola is a Communist government. Once that admission is made, it will be illegal for us to loan any money through Eximbank to that Communist totalitarian government.

Mr. DORNAN of California. One of the ironies here—and I apologize to the gentleman for trying to get so much information out on each point, because the clock is going to chase us, and maybe the gentleman better go down through several of the points and we will pick the ones that we feel we can contribute toward—standing on the second tier level, the President of the United States, looking as though he had not been in the air for hours and hours coming home from Geneva, told us in the State of the Union Address November 21 that he made it very clear to the leader of the Communist world, Mikhail Gorbachev, that we were interested in freedom fighter movements around the world. And he selected five: of course, Nicaragua; of course, Afghanistan; Cambodia must have surprised Mr. Gorbachev a bit. He mentioned the word Angola. I do not want to torture the odds, what was the fifth one? He mentioned Afghanistan, Nicaragua—Ethiopia. He mentioned Angola as a country worthy of our help and that if he cannot negotiate with the leader of the Soviet Union to stop their expansionism in this country, that we were going to start to help those who were on our side of the fence in this killing conflict.

And while he is telling us that, the State Department people, who have the control for our policy in Africa, are watching him on television, saying what to themselves:

> Whoops, there goes the leader off with the policy that he was elected by 49 of our 50 States to pursue, but this is not the policy we have decided is best for the United States, the free world, or those people in the bush in Africa who are dying for freedom,

which is not divisible in this world any more than the Communists think their cause of world dominion is divisible.

Mr. BURTON of Indiana. One brief followup, if I may, and that is that the State Department and others in our Government that feels like Mr. Savimbi is deserving of convert aid, although I am not sure any of us getting there as yet, but when we, the gentleman in the well, and the gentleman from California and I, along with the gentleman from New York [Mr. KEMP] and the gentleman from Florida [Mr. PEPPER], talked about getting $27 million in humanitarian aid to the freedom fighters, there was opposition from leaders in the State Department. None of us can understand that.

Humanitarian aid is the same thing that we are giving to the freedom fighters in Nicaragua, and yet $27 million is the same amount we are giving to the freedom fighters in Nicaragua. It was requested for the freedom fighters in Angola and no response, no positive response, all negative.

Mr. SILJANDER. It seems remarkable we are willing to spend $100 billion, and we should, for our defense of NATO allies, but we are unwilling to spend $27 million to protect a key oil and mineral region in the world.

Let me get on to myth No. 3, which I think is probably the most paramount argument used by the other side.

Aid to UNITA they say is a myth. We allied the United States to South Africa and undermined respectability in Africa.

Let me just say two quick things: That is one of the most ridiculous arguments of them all, but most, as I said, often used. Just because South Africa is brought up in a knee-jerk way, a knee-jerk fashion, it is automatically assumed it must be wrong.

We abhor apartheid. We have opposed it. I have made endless speeches on this floor opposing apartheid.

That does not mean, as the gentleman from Florida [Mr. PEPPER] once said, that everything South Africa does is absolutely wrong.

And is it not a little bit foolish to assume that a black freedom fighter who has been fighting white Portuguese long before the South Africans even entered the scene in Angola would somehow, after he takes over, welcome the South Africans and establish an apartheid government in his nation.

Mr. DORNAN of California. Of which he would be on the wrong side.

Mr. SILJANDER. Of which he would be on the wrong side because he is black. I mean, it is the most absurd argument that this black freedom fighter fighting against colonialism for 25 years, a quarter of a century, would somehow welcome an apartheid white racist regime. It is mindboggling that they would be so foolish to even bring the argument up.

Mr. DORNAN of California. We are not even going to comment on No. 3. It is self-evident.

No. 4.

Mr. SILJANDER. No. 4, aid to UNITA will widen the Angolan civil war is myth No. 4.

It is not a civil war anymore. It is not anymore civil war than Afghanistan is a civil war. UNITA is fighting an invasion, and invasion by Cubans. if that Government were to offer free and open elections tomorrow, the MPLA would be out, and UNITA would certainly easily take precedence.

Mr. BURTON of Indiana. If I might follow up on the gentleman's point, there are 35,000 to 45,000 Cuban troops there propping up that Government, and if they were to leave and go home, as they should, to the island of Cuba, that Government would fall in a very, very short period of time. I do not think anybody disputes that.

But in order to make sure no matter what happens the Cubans will stay behind, the Government of Angola recently passed a law—if you want to call it passing a law, I think it was an edict by the totalitarian leaders over there—that anybody who has done anything in the cause of the Communist movement in Angola, no matter wherever they came from, they can become a citizen immediately of Angola. They can have dual citizenship.

So how do you tell if the Cubans left if he is a member of the Cuban Army?

I mean he can say, "I am now a member of the Angolan family. I am a citizen here." And we would not be able to keep track of him if we did reach an agreement to send them home.

Mr. DORNAN of California. Exactly.

Mr. SILJANDER. Myth No. 5, Jonas Savimbi is a Maoist.

Is it not rather interesting the same people who are thrilled to send military and nonfood economic aid to the Communist named Machel in Mozambique somehow try to twist the argument around and suggest, "Oh, he's a Maoist, therefore we shouldn't send any aid to Jonas Savimbi."

Let me respond to that. That is just ignorance of history. Jonas Savimbi in the seventies seeking out training for low intensity guerrilla warfare could not find any place in the Western free world for training. The only place in the world one could train for this type of warfare was in China. Indeed, he spent 10 years there. Indeed some of his literature in the seventies did have this Maoist overtones. Why? Because China was supporting him with help, both logistically, militarily, and tactically. And that was the pragmatic thing to do, just as he is asking a white racist government for assistance of South Africa. He is practical. He will get it anyplace he can obtain it, so far not willing by law to do so.

So suggesting Jonas Savimbi somehow is a Marxist is ridiculous.

Then they say, "Well, he is at least a Socialist." Well, should we break ties with Mr. Mitterrand of France because he claims to be and is a Socialist?

The second point. Let us assume that they are right and he is a hardline Marxist-Leninist or, as they suggest, a Maoist, and Jonas Savimbi is successful in toppling the Communist government. Who will Jonas Savimbi invite in? The Cubans? The Soviets? The Bulgarians?

Jonas Savimbi has painted himself in a pretty clear pro-Western corner. Who else is he going to invite in to support his government from an obvious inevitable insurgency by the left?

So to suggest that Jonas Savimbi is a Marxist is totally ridiculous.

Mr. DORNAN of California. Well, they play to, of course, this side of the House where there are more conservatives. They do the same thing with Eden Pastora, claiming he is a Marxist and lying, and offering his life again in the field against the Sandinistas who he says are not Sandinistas. They betrayed him, that he is loyal to Sandino. Call him a Marxist.

On their side of the aisle they probably tell of us that he is a Fascist.

And the same thing with Savimbi. He is a Fascist on one side of the aisle. He is said to be a Marxist on the other. Anything to destroy the credibility of somebody who is willing to fight for his freedom, and he is asking us for help.

Mr. BURTON of Indiana. If I might just follow up.

Mr. SILJANDER. I yield to the gentleman.

Mr. BURTON of Indiana. If Savimbi were a Communist, why would the Soviet Union have 35,000 to 45,000 Cubans there fighting him? Why would they send $2 billion worth of military aid in there? Why would they be sending 15 planeloads, transport planeloads of new military supplies in there every day to defeat him?

They are afraid of him because they know he is the one person and his army is the one army that could defeat the Communists over there and reverse the Brezhnev doctrine: once we get a country, we never give it back.

Mr. DORNAN of California. One thought on that.

Let us say for the sake of argument that he was an independent-minded Marxist or Communist. I got off an airplane once at the airport at Zagreb, Yugoslavia, and what do I see up on a concrete stanchion but a U.S. F-86-D jet aircraft. I was stunned. I said, "What, did they shoot this down and put it on a platform?" Then I remembered that under President Eisenhower, following behind me through pilot training were Yugoslav pilots from a Communist country. And that was a Republican President.

□ 1830

What did we debate here the other day with a great mix, you had to have a scorecard to tell who was on what side, giving nuclear energy, skills, and technology, to a Communist country. Now, I happened to vote against it, but there were a lot of people all over that issue.

We are going to come up with a resolution again to give it to the Rosenbergs.

It is incredible, but when it suits somebody around here they decide that we should not deal with a Socialist, and the fact is that Jonas Savimbi is coming our way and if he studied in China in his youth, but now wants to be a friend of the United States, well, is that any different than all this shuffling around to shake the hand of Anwar Sadat when he kicked the Russians out of Egypt because they would not even allow them on bases on his soil and decided that he would throw in his fate again with the free world and the United States?

Mr. SILJANDER. I think both the gentleman made excellent points.

Mr. BURTON of Indiana. There is one more point I would like to make, if I may.

Mr. SILJANDER. I am happy to yield to the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. I am sorry to interrupt, but you know we cannot make the whole world over in our image, and we are going to have to deal in some parts of the world with people who do not believe exactly as we do and exactly in our form of Government, but they may have the same enemies. They may have as one of their enemies the Soviet Union or the Cubans. And because of the mutual security of their country and our country, of their position and our position, we may have to work together even though we do not agree philosophically on exactly the form of government that they should have.

I think it is very important if the Free World is to survive and if we are to defeat communism, which is moving in every part of the world at the same time, it seems like anymore, we have to work with those people.

Mr. DORNAN of California. We broke bread here recently with members of the loyal opposition of our mother country, which has the mother of parliaments, in London. These are the members of the Labor Party. Their platform has completely embraced now most of socialism and unilateral disarmament and pulling out of NATO. They have just made Margaret Thatcher's work that much easier for us, the polarization is so incredible there.

Do we look at these people somehow or other as pariahs, these Members of Parliament of the Labor Party? They are so far to the left of Jonas Savimbi, can you imagine Savimbi coming to power and then suggesting unilateral disarmament for his new free nation of Angola on the continent of Africa? It is absurd that we cannot deal with him.

Mr. SILJANDER. Just to close this fifth myth about Jonas Savimbi being a Maoist or Marxist-Leninist, I have heard Socialist, Maoist, Communist, I have heard every conceivable title attached to him. Many of these quotes used by the chairman of the subcommittee, the gentleman from Michigan [Mr. WOLPE] are quotes from the sixties. They are quotes from the seventies.

I do have, to clarify any misunderstanding, a letter from UNITA, from Mr. Chitunda, who is the Foreign Minister or their foreign relations expert. I have a letter called, "What UNITA Believes." So if you are interested in wanting to know what they believe in terms of their economy, in terms of their philosophy, it is listed very carefully and very specifically.

Now, I could close with another letter from UNITA which says:

> During the Portuguese colonial era the movement's literature was full of revolutionary Marxist rhetoric—

Which it was, this is the rhetoric being quoted by the left—

but this was more with a view to cultivating material assistance from Red China than as a sincere reflection of UNITA's ideological beliefs.

Myth No. 6—we have about 7 minutes to go. "UNITA cannot win." So why support Jonas Savimbi if he does not have a chance to win?

That is not also supported by any fact. It is definitely clearly a myth.

Mr. DORNAN of California. Mr. Speaker, if the gentleman will yield further, isolationists in this country said, "Winston Churchill cannot win." Therefore, make sure he does not win, and shut down the arsenal of democracy. Do not help him.

Mr. SILJANDER. Excellent point.

Jonas Savimbi can win, and he proved it last July. Thousands of Cubans, thousands of Angolan troops, with tanks, Mig's, infantry, all types of hard infantry vehicles, challenging Jonas Savimbi in a major offensive, the ground forces of the MPLA were terribly bloodied. They were driven back and they were miserably defeated by what they called a man in the bush who had no chance of winning. He won. He held his own. He has proven himself. He lost hundreds of men as well, but the point is, Jonas Savimbi is still alive. Her is still well and UNITA is flourishing.

I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I have strong suspicions that members of our own State Department believe that Mr. Savimbi and the UNITA forces cannot win, and that really concerns me.

You know, Jeane Kirkpatrick, when she was our representative to the United Nations, made a very impassioned speech at one time, and in her speech she said, "Those people who do not believe that guerrillas who are fighting for freedom can win are wrong."

As a matter of fact, guerrillas do win all the time. The problem is they are Communist guerrillas. She quoted T.E. Lawrence's statements that he made when they were fighting over in the Middle East about how guerrillas and a small force can beat a larger force if they are well organized and use guerrilla tactics.

The UNITA forces can win if they have the wherewithal to do it. That is where the United States and the free world comes in. We need to give them the military equipment that is necessary and they will get the job done.

Mr. SILJANDER. Is it not interesting, even without any help for 10 years from the United States, that they still control 90 percent of the territory and even in the capital city of Luanda they still have significant support, Jonas Savimbi does, in the major capital city?

Mr. DORNAN of California. Hit those last two points, the clock is chasing us.

Mr. SILJANDER. Yes; the clock is chasing us.

Myth No. 7—"The Cubans are in Angola to protect it from South Africa." That is nonsense, but it is said often.

Mr. DORNAN of California. I know it.

Mr. SILJANDER. It is said often both in subcommittee and full committee and on the floor. In fact, the Cubans are not anywhere near the South Africans. The South Africans are in the southern part. The Cubans are thousands of miles away protecting U.S. oil fields, Gulf Oil and Chevron, to keep financing their positions. They are also in the field fighting Jonas Savimbi. There has not been one encounter, not one, with the Cubans attacking the South Africans. It is a misnomer. It is a misunderstanding.

Mr. DORNAN of California. The mayor of Atlanta when he was our Ambassador at the United Nations said the Cuban mercenaries were a stabilizing force—the way the Gulag concentration camps in the Soviet Union stablilized political dissent.

Mr. SILJANDER. Myth No. 8. "The war in Angola is a tribal war." That is a myth. It is not a tribal war. Savimbi is an Ovimbundu. He has also support from other tribes, the Chokwe, Luena, Cabinda, Bakongo, Kimbundu, and other tribes that are involved with Jonas Savimbi. It is a falsehood.

The time is going, so I will run through these quickly.

The last myth, Myth No. 9. "The MPLA is willing to negotiate." They have never negotiated. They expanded the Cubans from 12,000 to 40,000. They put in $2 billion in Soviet hardware in the last 18 months. They have never been willing to negotiate. The Cubans and the Soviets do not want to negotiate a settlement. Otherwise, why would they be there?

I yield to the gentleman from North Carolina [Mr. COBEY] who has been waiting patiently.

Mr. COBEY. I just wanted to say that I wanted to commend the gentleman from Michigan [Mr. SILJANDER] and the gentleman from Indiana [Mr. BURTON] and the gentleman from California [Mr. DORNAN] for taking this time out and standing up for this cause.

The gentleman is not alone. There are many of us here in the House of Representatives who support the gentleman's position and we appreciate the leadership the gentleman has taken on this important and vital concern of our Nation.

Mr. DORNAN of California. We always need to hear from someone from the 13 Original Colonies where our freedom was born.

Let me close my part of the remarks by again repeating the stirring words of the great 17th century English poet. It becomes a cliche to us. If we do not use it, we become cynical, but when it is fresh to young ears, and there will be some young people listening tonight who will hear it for the first time, and I paraphrase a little bit of it: "No man is an island unto himself, but rather a part of the whole and when a clog washes away from the peninsula, Europe is the less for it."

In his world, he meant John Donne, freedom everywhere, "and when that bell tolls," he said, "do not ask for whom it tolls. It tolls for thee."

The bell of freedom is ringing in Angola right now and Jonas Savimbi is ringing it. I hope he rings it as loud as he can when he comes here in January. If we do not respond, we turn our backs again on people who are part of this peninsula of this whole, and when they die in our name, if we do not help them, it is another disgrace for the United States.

Mr. SILJANDER. Mr. Speaker, I thank the gentleman from California.

I yield to the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. Mr. Speaker, I want to thank my colleague, the gentleman from California, and the gentleman from Michigan. They have been very eloquent and I am sure we appreciate their position.

I would just like to say to my colleagues and to the people of this country that the security of southern Africa, all the countries of southern Africa, has a direct bearing upon our freedom and we must not turn our backs on those who are fighting for that freedom in that part of the world.

Mr. SILJANDER. I want to thank all three gentlemen for the contribution and for their leadership in this cause.

I want to apologize to the membership and those listening that we had to breeze through rather quickly on the last several points, but this will not be the end of the debate on Angola. This is really, frankly, just the beginning.

America must decide whether or not we as the bastion of democracy, the leader of the free world, whether we are willing to support those with a common vision, that vision of democracy, freedom of expression, of religion, of faith and hope and dreams and ambition. The people of Africa, and specifically Angola, have the same heartthrobs, the same hopes, the same dreams as you and I do. Do you not think it is worth a very minor part of our expense to make sure that those fighting for freedom against Soviet global adventurism and expansionism can win a victory? Let us win one for the Gipper.

Mr. Speaker, I yield back the balance of my time.

EXTENDING APPLICATION OF CERTAIN TAXES, TRADE ASSISTANCE, REIMBURSEMENT PROVISIONS, AND BORROWING AUTHORITY

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means be discharged from further consideration of the bill (H.R. 3918) to extend until December 18, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. BLILEY. Reserving the right to object, Mr. Speaker, I do so not to object, but to ask the chairman, is this the extension of the tobacco tax until Monday under the continuing resolution?

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. BLILEY. I am happy to yield to the gentleman.

Mr. ROSTENKOWSKI. Mr. Speaker, the unanimous-consent request is to extend for 4 days until Wednesday, December 18, the four provisions that will expire this Saturday. The provisions involved include the current law reimbursement rates and procedures for medicare payments to physicians and hospitals, the authority for the railroad unemployment fund to borrow if necessary from the railroad pension fund system, the Trade Adjustment Assistance Program, and to what the gentleman has referred, the current 16 cents per pack tax on cigarettes.

Mr. Speaker, if the gentleman will yield further, these four provisions are extended in some modified form in our reconciliation legislation which is currently in conference. The bill before us today simply extends the current law for 4 days. This will give us time to reach agreement on these issues in the reconciliation conference, without creating disruption in the Medicare and other programs affected by these provisions.

Mr. BLILEY. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois [Mr. ROSTENKOWSKI]?

There was no objection.

The Clerk read the bill, as follows:

H.R. 3918

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXTENSION OF INCREASE IN TAX ON CIGARETTES.

Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to increase in tax on cigarettes) is amended by striking out "December 15, 1985" and inserting in lieu thereof "December 19, 1985".

SEC. 2. EXTENSION OF TRADE ADJUSTMENT ASSISTANCE PROGRAM.

Section 285 of the Trade Act of 1974 (19 U.S.C. note preceding section 2271) is amended by striking out "December 14, 1985" and inserting in lieu thereof "December 18, 1985".

SEC. 3. EXTENSION OF BORROWING AUTHORITY UNDER THE RAILROAD UNEMPLOYMENT INSURANCE ACT.

Section 10(d) of the Railroad Unemployment Insurance Act is amended by striking out "December 14, 1985" each place it appears and inserting in lieu thereof "December 18, 1985".

SEC. 4. EXTENSION OF MEDICARE HOSPITAL AND PHYSICIAN PAYMENT PROVISIONS.

Section 5(c) of the Emergency Extension Act of 1985 (Public Law 99-107) is amended by striking out "December 14, 1985" and inserting in lieu thereof "December 18, 1985".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENDING DAIRY PRICE SUPPORT PROGRAM AND CERTAIN FOOD STAMP PROGRAM PROVISIONS

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture be discharged from further consideration of the bill (H.R. 3919) to extend temporarily the Dairy Price Support Program and certain Food Stamp Program provisions, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I do so to allow the gentleman from Texas to explain, as was mentioned in the title, it does temporarily extend the Dairy Price Support Program, Food Stamp Program, and I understand there are a couple other programs that are in the bill, is that correct?

I yield to the gentleman from Texas.

Mr. DE LA GARZA. That is correct. The pilot Food Stamp Program for Puerto Rico and the announcement for marketing quota for flue cured tobacco.

Mr. WALKER. These are extensions precisely similar to those previously granted for these programs, is that correct?

Mr. DE LA GARZA. That is correct.

Mr. WALKER. This extends it until the end of December?

Mr. DE LA GARZA. The gentleman is correct.

Mr. WALKER. Are these programs that will be included in the full continuing resolution that will pick up from that point on?

Mr. DE LA GARZA. Either in the continuing resolution or in the farm bill.

Mr. WALKER. Or in the farm bill, which we expect to have on the floor before we adjourn?

Mr. DE LA GARZA. The gentleman is correct.

Mr. WALKER. Mr. Speaker, I thank the gentleman and withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas [Mr. DE LA GARZA]?

There was no objection.

The Clerk read the bill, as follows:

H.R. 3919

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 201(d)(1)(B) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)(1)(B)) is amended by striking out "December 13, 1985" and inserting in lieu thereof "December 31, 1985".

SEC. 2. The last sentence of section 17(b)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2026(b)(1)) is amended by striking out "December 13, 1985" and inserting in lieu thereof "December 31, 1985".

SEC. 3. Effective for the period beginning December 14, 1985, and ending December 31, 1985, section 19(a)(1)(A) of the Food Stamp Act of 1977 (7 U.S.C. 2028(a)(1)(A)) is amended by striking out "noncash".

SEC. 4. Section 317(d) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1314c(d)) is amended by inserting after the first sentence the following new sentence:

"Notwithstanding the foregoing sentence, the proclamation of the national marketing quota for the 1986 crop of Flue-cured tobacco may be made not later than December 31, 1985.".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1845

TRIBUTE TO GILBERT GUDE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. CLINGER] is recognized for 60 minutes.

Mr. CLINGER. Mr. Speaker, I am proud to rise today and say a few words on behalf of our good friend—the retiring Director of the Congressional Research Service—Gilbert Gude.

Gil Gude, one of our colleagues who ably served in this body from 1967-76, has led a remarkable public career. His service in the Maryland House of Delegates, the Maryland Senate, the U.S. House, and finally as the Director of CRS, has made Gil one of the most re-

spected men in Washington and in his home State of Maryland.

What makes Gil truly remarkable, is that he not only performs his duties admirably, he takes part in life with a certain passion. Perhaps his deep respect of our environment has been the hallmark of Gil's fine career. Beginning with his founding of the Energy and Environmental Study Conference to his authorship of a book about his beloved Potomac, Gil Gude has shown a pronounced and heartfelt appreciation of America's treasures.

Although Gil left the House in 1976, he had intended to go home and devote his energies toward books dealing with the Potomac. Yet when he was tapped to head the Congressional Research Service, he responded favorably and has done a superior job in his 8 years of service.

As you know Mr. Speaker, CRS has come to play an integral role in helping Members of Congress and their staff perform the important tasks with great dispatch and accuracy. Whenever we need to know answers to questions ranging from the start of the Pelopennesian wars for our constituents, or the latest figures on economic growth, we turn to CRS and ask for the answer—and we want it yesterday. While Gil Gude has been at the helm, he has presided over an 800-person research staff and kept us all happy with superb service.

During his tenure at CRS, Gil's avocation has been the study of the Potomac River and the surrounding coal fields, mountians, and forests. His book—"Where the Potomac Begins: A History of the North Branch Valley"—is an affectionate account of the people and places which make up part of Americana; a book which would have made Norman Rockwell smile. In this book he sketches "Main Street America" in a loving collection of stories and photographs which make up a vanishing portrait of our wonderful country.

In a review in the Washington Post, the reviewer remarked how in 1975, Gil devoted a congressional recess to hiking the 400 miles of the Potomac River in an unsuccessful effort to have it designated a national river.

What he found at the river's headwaters was a world shaped by the economics of coal and the vagaries of mining disasters, "a piece of Appalachia . . . markedly different from the foothills and coastal plains of the East."

Surely Gil Gude has became our Ansel Adams. He is a gentleman truly devoted to the discovery and celebration of one of America's pearls—the Potomac and its surrounding regions.

I suppose Gil's philosophy can be best summed up in something he said a couple years ago:

Beyond the question of economics—employment and efficient utilization of existent structures in the community—and the concern to protect and preserve our architectural heritage, there is good evidence, in my opinion, that historic preservation is but one aspect of the much greater environmental movement.

The environmental hysteria of the late sixity's and early seventy's is mostly gone, but in its place is a feeling held by large numbers of American people that one of the basic goals for government and the private sector is a healthy, and wholesome environment—and within all of our communities preservation of our historic heritage is most appropriately a part of that environment.

I know we will all miss having Gil here with us on Capitol Hill. As chairman of the House Wednesday Group, I have had the unique opportunity in having known Gil when he was a member of the Wednesday Group. As a friend and colleague, I wish him and his lovely wife Jane well in their future endeavors and thank him for his years of excellent service.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. CLINGER. I am happy to yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, I am proud to join the distinguished gentleman from Pennsylvania [Mr. CLINGER] in paying tribute to the extraordinary service of our former colleague, Gilbert Gude, as head of the Legislative Research Service of the Library of Congress.

Gil served in this body for 10 years. Three of his terms overlapped with my early years in the Congress.

Since that time, he has been serving in the Library of Congress, working with his former colleagues in providing what has come to be regarded as first-class service to the Congress, its committees, our chairmen, and all of our Members.

Gil has previously been given a goodbye. We have eulogized him here when he left the Congress.

I think it is important to note, however, the extra measure of service which he gave when he probably would have been happier doing what he now intends to do; that is, writing and studying in the area particularly concerned with the beautiful Potomac River.

Gilbert, we regret you are going, but we know that you know when the time has come. It was the same as when you were in the House. Only you knew when it was time for you to move to other activities.

I personally wish Jane and Gil a great happiness, good health, and great success as they move into a yet perhaps fourth career or perhaps more, which I know is going to be successful.

I thank the gentleman for yielding.

Mr. CLINGER. I thank the gentleman very much for those very excellent remarks. I think you have stressed an aspect that needs to be reemphasized, and that is the high degree of professionalism which Gil Gude brought to the Congressional Research Service during his tenure there.

It is an outstanding research arm of the Congress. I think that no Member has been in any way turned away from their doors, and in almost every case, their requests for information, for data, for research have been answered with great expedition. I think a great deal of the credit for the professionalism that is provided by that very vital part of the service necessary for Congress is the result of Gil Gude's work.

Mr. Speaker, I know that many other Members, were it not for the lateness of the hour and the lateness of the session, would have been here to participate in this special order. That is why I have asked that we be given 5 additional days to revise and extend our remarks.

Mr. CONTE. Mr. Speaker, one of the real pleasures of serving in this great institution is to be able to pay tribute to honorable and distinguished public servants. I would like to take this opportunity to do just that for Gil Gude, a former Member of the House of Representatives from Maryland's Eighth Congressional District and the Director of the Congressional Research Service at the Library of Congress.

I was sorry to learn this week, that Gil planned to retire his post at CRS at the end of the month. He has served this legislative body nobly as a Member, from 1967 to 1976, and as Director of the CRS since. I know my office is not the only one that has relied countless times on Gil's amazing wealth of knowledge and the valuable advice of his 850-member staff.

It was always encouraging to know that literally any answer known to man was at the fingertips of a true and respected friend.

High on Gil's own list of priorities was the Potomac River. During his years in Congress and at the Library of Congress, he demonstrated great concern and curiosity for the river and set about learning its secrets. So strong was his interest, in fact, he walked the 400-mile length of it and searched to find its elusive source. The story turned into a book called "Where the Potomac Begins," and a wealth of information about one of the Nation's best known but least understood bodies of water.

We in Congress will miss Gil's help and the enthusiasm he always demonstrated in his years of service to this Nation. I'm certain the good people of Maryland are proud of the contribution he made to this country. I know I am proud of the contribution he made to Congress and I know my colleagues share that feeling.

I wish Gil the best of everything in his pursuits and hope he'll get a little more time, now, to search for answers to his own questions for a change.

Mr. McDADE. Mr. Speaker, I am pleased to rise with my colleagues to honor one of our former colleagues, Gilbert Gude, who recently announced that he will retire from

his position as Director of the Congressional Research Service.

It was my good fortune to serve with Gil during his years here in the House from 1967 through 1976. Gil made his mark on many pieces of legislation, but is especially known for his sponsorship of the legislation creating the C&O National Historic Park. The history of the canal is very near and dear to his heart. His love of history provided the impetus for the long struggle to get this legislation through the Congress. At the time he was in Congress, a number of historic sites had already been lost through development. He was determined not to let this happen to the C&O Canal. As a result of his efforts, the canal will be preserved so future generations can actually see the canal and not have to try to visualize the structure in their mind's eye.

This love of the canal and the Potomac River led to his writing a book about the area entitled: "Where the Potomac Begins." Reading this book tells you a lot about the author. First, you are impressed with the research that he put into the effort. Second, you learn about the history of the area through anecdotes involving real people. Gil writes about them as if they were next door neighbors or personal acquaintances. Only a person who is genuinely interested in and concerned about people could write in such a fashion.

His concern about people made him a great Congressman. Whenever there was an issue affecting the welfare of people, particularly senior citizens, you could count on Gil taking an active role. His concern for people and their environment led him to cofound the Environmental Study Conference.

After leaving Congress, he was appointed Director of the Congressional Research Service in the Library of Congress. What an excellent choice. Having served in the Congress, he knew precisely what the CRS should provide to Members so that they could perform their duties more effectively. His attention to detail and interest in research made him an especially appropriate person to head up the CRS. He has served the Congress well in making the CRS responsive to congressional needs.

Now, in taking leave from this position, I wish him well. I know that we can look forward to still many more accomplishments as he pursues his interests in history and the people who made and are making history.

Mr. COUGHLIN. Mr. Speaker, I find it most fitting that Congress has taken a special order in honor of our former colleague and Director of the Congressional Research Service, Gilbert Gude, who has announced his retirement effective December 31.

Gil and I began our tenure in the House around the same time and were faced with the many troubling issues of the seventies. Even then, Gil's love of the environment was well known. A key sponsor of bills creating the C&O Canal National Historic Park and protecting America's wild horses, his contributions to the preservation of our Nation's national resources will be long remembered.

Gil brought a unique perspective to the Congressional Research Service. Having availed himself of this service while a Member, he approached this position knowing the problems as well as the successes of the organization. The legacy he is leaving at CRS will benefit future Members for years to come. His eight years as Director came during a time when data was expanding exponentially and the need for managing this information was critical. The Congressional Research Service has done an unparalleled job and provided the Congress with the tools for making many major decisions.

Although Gil Gude is retiring, he will long be remembered not only by those of us on the Hill but by the many students of nature who will read his book, "Where the Potomac Begins: A History of the North Branch Valley." There are few men, indeed, who have carved such an enduring niche in so many disciplines.

Our very best wishes go to Gil and his lovely wife Jane.

Mr. FISH. Mr. Speaker, I am very happy for this opportunity to recognize the lifetime of achievement of our friend and former colleague, Gilbert Gude. His professional life has been spent in public service, in the Maryland State Legislature, in Congress, and as Director of the Congressional Research Service.

While serving in Congress, he was the key sponsor of environmental bills that are major contributions to public policy. He was cofounder and cochairman of the Environmental Study Conference, a nonpartisan research group that has been of great help to members by providing them with indepth, timely information on environmental and energy issues.

His tenure as Director of the Congressional Research Service is a further example of his belief in the necessity for accurate nonpartisan information that can be used by the Members of Congress to make informed policy decisions. His years in Congress well qualified him for that task and he proved his abilities on a daily basis. Members of Congress and their staffs will always be indebted to him for his leadership and his professionalism.

Gilbert Gude understands responsibility. He wasn't just a spectator, but took the responsibility to get things done, making the Congressional Research Service an invaluable resource.

Gilbert Gude and his contributions will be greatly missed by those who know him, work with him, and depend on his extensive abilities.

Mr. CLINGER. I yield back the balance of my time.

GENERAL LEAVE

Mr. CLINGER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order this evening.

The SPEAKER pro tempore (Mr. VISCLOSKY). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

ADJOURNMENT TO MONDAY, DECEMBER 16, 1985

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

STAR WARS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. SEIBERLING] is recognized for 15 minutes.

Mr. SEIBERLING. Mr. Speaker, on Monday at page 11480 of the CONGRESSIONAL RECORD, I inserted three articles about the manner in which the President made the decision to go ahead with the SDI or the so-called Star Wars weapons program. That is an incredible story, and I will not try to repeat it here, except to call Members' attention to it in Monday's RECORD.

The gist of it is that the President made this decision without consulting the Defense Department, the Secretary of State, his principal scientific adviser, or trying to get any sense of the impact on our foreign policy, on our defense strategy, on our allies, et cetera. I suggest that Members may find it worth taking a look at.

Today I received in the mail a copy of an article printed in the Cleveland Plain Dealer of December 7 by Flora Lewis, the foreign correspondent for the New York Times. The headline is "Incredible Is the Right Word."

The article starts out this way:

> The hyper-selling of Star Wars has gone far beyond the childish crayola spot aimed at the general public on TV, beyond the vague claim made to businessmen and allies by the program director, Lt. Gen. James A. Abrahamson, of the progress at an "incredible pace." It has gone to the point of covering up scientific failure in a way that endangers the honesty of research.

It goes on to say "Ray Kidder, a physicist at Livermore, was quoted in the Los Angeles Times as saying:

> The public is getting swindled by one side that has access to classified information and can say whatever it wants and not go to jail, whereas we (the skeptics) can't say whatever we want. We would go to jail, that is the difference.

Why would they go to jail? Because the scientists who are working on this, who see that these tests are not doing all of the great things that the administration is trying to claim for them, cannot cite chapter and verse, cannot give the details because the details are classified military information. So that gives a completely free rein to the administration to make whatever

claims they want as to the alleged success of these tests.

Yet, many of the scientists who know the facts are saying that the administration claims are not so.

The article goes on to say:

The next test, scheduled in Nevada this month and named "Goldstone" was going "full speed ahead" despite clear evidence that it cannot be properly measured with existing instruments. The x-ray laser, pet project of the physicist Edward Teller and the centerpiece on which he sold Star Wars to President Reagan, is the current focus of many of the scientists' distress.

Nevertheless, Mr. Teller went to President Reagan, according to this article, and wrangled another $100 million for the project, including this months' test which will probably cost $30 million.

Now yesterday we passed the modified version of Gramm/Rudman budget and deficit resolution. We are going to be haggling over every little program, every little expenditure for nonmilitary programs, and yet without batting an eyelash, based on what Mr. Teller told the President, why, he gets another $100 million, including $30 million for a test that the scientists say cannot possibly do the job because of various technical problems which I do not need to go into.

Furthermore the article says, although the administration keeps saying its antimissile program is nonnuclear, the x-ray laser relies on a nuclear explosion for its energy.

Insistence on continuing these tests is a major reason Washington won't even listen to the Soviet proposal for a comprehensive test ban.

□ 1900

Now, a comprehensive test ban would do several things for arms control and for getting the nuclear arms race under control. The Soviets, of course, have made a unilateral, temporary test ban. Whether they will continue it unilaterally is doubtful; but if we could have a comprehensive ban on the testing of nuclear weapons, that would in itself gradually cause the nuclear arsenals of both the Soviet Union and the United States to deteriorate because apparently it is necessary to make periodic testing of all the different types of weapons to make sure that the radioactive elements are still going to work. They decay over a period of time, so they get less and less reliable.

That in itself would make for less likelihood that either side would use their nuclear weapons, if we had a nuclear test ban, because they are not alble to know whether they are going to work, whether they are reliable.

Nevertheless, we are not engaging in that simply because to do so would mean that these tests for the so-called x-ray laser for the SDI Program could not be carried out; but they could not be carried out by the other side, either.

The complete article follows:

INCREDIBLE IS THE RIGHT WORD

(By Flora Lewis)

PARIS—THE HYPER-SELLING OF STAR WARS HAS GONE FAR BEYOND THE CHILDISH GRAYOLA SPOT AIMED AT THE GENERAL PUBLIC ON TV, BEYOND THE VAGUE CLAIM MADE TO BUSINESSMEN AND ALLIES BY THE PROGRAM DIRECTOR, LT. GEN. JAMES A. ABRAHAMSON, OF PROGRESS AT AN "INCREDIBLE PACE." IT HAS GONE TO THE POINT OF COVERING UP SCIENTIFIC FAILURE IN A WAY THAT ENDANGERS THE HONESTY OF RESEARCH.

Some of the scientists involved are bursting with frustration. They don't know how to cope with this government disinformation compaign. A top official at Livermore and another at Los Alamos, the two national labs where the key research takes place, have resigned, though they are too discreet to explain their decisions.

Ray Kidder, a physicist at Livermore, was quoted in the Los Angeles Times as saying: "The public is getting swindled by one side that has access to classified information and can say whatever it wants and not go to jail, whereas we (the skeptics) can't say whatever we want. We would go to jail, that's the difference."

Energy Secretary John S. Herrington, however, has both denounced the doubters for hurting the national interest in speaking up and called it just a "little squabble" among scientists.

Herrington said that the next test, scheduled in Nevada this month and named "Goldstone," was going "full speed ahead" despite clear evidence that it cannot be properly measured with existing instruments. The X-ray laser, pet project of the physicist Edward Teller and the centerpiece on which he sold Star Wars to President Reagan, is the current focus of many of the scientists' distress.

It was Teller himself who leaked last April that a test took place March 23, and his cronies put out word that it was highly successful. It wasn't. It turned out that the monitoring instruments themselves were excited by the X-rays to emit light. Therefore the brightness they measured was much greater than what the device actually produced and the result was completely unreliable.

Undaunted, Teller went to Reagan and wangled another $100 million for the project, including this month's test, which will probably cost $30 million. Participants urged a delay until the measuring problem could be solved, which would take six months to a year. That was rejected on the grounds that loss of momentum would be politically unfavorable, even though the test is almost sure to be futile in the circumstances.

Furthermore, although the administration keeps saying its anti-missile program is non-nuclear, the X-ray laser relies on a nuclear explosion for its energy. Insistence on continuing these tests is a major reason Washington won't even listen to the Soviet proposal for a comprehensive test ban.

There are other well-grounded scientific doubts about the X-ray laser. The assumption that it can kill Soviet missiles while they are being boosted rests on their current technology; they take three to five minutes to burn out and carry warheads some 200 miles above the earth. But American experts know that it wouldn't be hard, or inordinately expensive, for the Russians to accelerate burning time, bringing it down to some 50 seconds and completing the boost at 50 or 60 miles high.

X-rays can't penetrate the atmosphere, and at that altitude they wouldn't get through even if the loss of shoot time could be overcome. But nothing else has been developed as far, so X-ray lasers remain the chief hope for boost-phase missile defense.

The willful distortion of research is a scandal, reminiscent of Stalin's support for Trofim Lysenko's phony theories of genetics because they were politically pleasing. The result set Soviet biology back a generation.

American physicists working on the Strategic Defense Initiative aren't threatened with the gulag, but they are being put in a demeaning position that undermines their integrity. It isn't a violation of their high security clearance to say that but it could be if they gave out details to support their stand.

They have been arguing inside the program for some time, to no avail. Apparently they haven't been able to get through to Reagan to let him know what is happening. That is why their concerns are seeping into public print, despite the gag rule.

Apart from the other arguments for and against Star Wars, if it isn't based on good science it can never by anything more than what Reagan calls it, his "dream." But it could be a devastating nightmare, sapping the authenticity of American science.

RESTORING TAX-EXEMPT TRAVEL PASSES TO PARENTS OF AIRLINE EMPLOYEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma [Mr. JONES] is recognized for 60 minutes.

Mr. JONES of Oklahoma. Mr. Speaker, today I am introducing legislation to restore tax-exempt travel passes to the parents of airline employees.

As you know, for years air travel passes have been provided to airline employees and their immediate family as a fringe benefit not subject to taxation. This travel is on a standby basis, available only if a seat is vacant.

Last year, the Tax Reform Act of 1984 essentially codified the exclusion from tax. However, among the many provisions of the act was one that eliminated the long tradition of considering parents to be within the immediate family of an airline employee. Thus, under present law, an air travel pass provided to a parent of an employee is taxable income.

As a result of this provision, the Internal Revenue Service established regulations setting the tax for parents' airline passes at 50 percent of the highest coach fare. After 40 years of tax free travel, parents are suddenly being charged an amount which frequently is higher than most of the available discount fares. Moreover, even though this charge is being imposed, their flying privileges remain on a standby basis.

Many of the parents are elderly individuals on fixed incomes. These individuals were previously able to travel only because of the tax exempt status of airlines passes. Today, they are faced with purchasing a pass at one-half of the highest coach fare and possibly being denied boarding at a

connecting point that can involve a cost of hotel and meals while awaiting the next available flight. In several instances, this travel is further limited by the fact that parents can no longer obtain passes on an airline other than the one directly employing their child. A large portion of the industry has discontinued parents passes for other airlines due to the volume of paperwork required by the Internal Revenue Service.

The result of this legislation has been to reduce parents pass ridership on at least one major airline by approximately 75 percent. At the same time, the employee of a clothing or applinance store can still purchase clothes or a dishwasher for their parents on a tax-free basis and give it to the parent.

The intent of implementing the tax was to generate additional revenue for the Federal Government. Yet, little, if any moneys are being raised as parents choose not to travel. Thus far, the tax has only achieved to penalize these individuals by taking away the benefits of free air transportation.

My bill would again place parents in the same category as the spouse or dependents of an airline employee when air travel privileges are provided as a fringe benefit. As with the employee, the benefit must be a "no additional cost service." That is, the parent may use the pass only if space on the flight were otherwise going to remain used.

The airline industry is experiencing a period of change and reorganization. Air travel privileges for employees, their families and parents are important job incentives. The modification enacted in 1984 is unnecessary. There is little, if any, economic justification and absolutely no social purpose in continuing this tax. I invite my colleagues' support in correcting this situation.

IMPROPER POLITICAL SOLICITATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. LOTT] is recognized for 30 minutes.

Mr. LOTT. Mr. Speaker, today I am introducing a new House rule to prohibit the solicitation of campaign contributions in the House of Representatives.

Under my proposed rule, no Member, officer or employee of the House could solicit a Federal campaign contribution from any Federal employee, and no person could solicit such contributions in House office buildings or the House portion of the Capitol.

Ironically, Mr. Speaker, this language is nearly identical to the current statutory prohibitions found at 18 U.S.C. 602 and 607. However, the Justice Department uses a "coercion" standard as a threshold for prosecution, and our own House Committee on Standards of Official Conduct recently became "married" to that standard.

I say "recently" since the House ethics manual published by the Standards Committee just last year indicated that any solicitation by House Members and staff of Federal employees was illegal, and I quote: "Members of Congress, candidates for Congress, and Federal employees are now specifically prohibited by provisions of Federal criminal statute from soliciting political contributions from Federal governmental employees, including employees of the House of Representatives."

The manual does go on to indicate that, "The intent of the prohibition on solicitations . . . was to prevent Federal employees from being subject to any form of political assessment," and "protecting employees who, because of their employment and position may be subject to coercion." (Ethics Manual, 98th Congress, 2d Session, pp. 123–24.) In other words, while the object of the statute was to prevent coercive solicitations, the means chosen to achieve that end was to prohibit all solicitations.

And yet, Mr. Speaker, just 1 year after the ethics committee published that manual, it reversed itself in its report of September 19, 1985, entitled, "Investigation of Alleged Improper Political Solicitation" (H. Rept. 99–277). The report, filed in response to a complaint which Congressman MCCANDLESS and I had filed about a solicitation received in a House office, concluded that, solicitations "are statutorily suspect only if they are to be read as seeking coerced political contributions from Federal employees, i.e., congressional staff." (p. 13)

Under the committee's new coercion standard, for a solicitation to be considered "coercive" it must have the characteristic of a "shakedown," and involve "intimidation." Moreover, there must be the "intent or perception to coerce Federal employees (congressional staff) into making political contributions," that is, evidence of "victimization." (Report, pp. 15 and 23.)

Mr. Speaker, because I feared that this new interpretation would open the door to so-called "voluntary" solicitations of contributions from House and other Federal employees by Members and candidates, I appealed to the Standards Committee, on September 27, to reconsider its findings that only "coercive" solicitations are prohibited by Federal law. In its response of October 21, the committee responded that it is "married to the judicial and executive interpretations of the law which require coercion as an essential element of improper political solicitations."

I consequently wrote to the committee on October 29 and asked whether its interpretation would now permit Members of Congress to solicit House staff for campaign contributions, provided the solicitation was couched in purely voluntary, noncoercive terms. I framed my question in the form of a request for an advisory opinion on proposed conduct pursuant to House Rule X, clause 4(e)(1)(D). The committee responded on November 21 that, "absent a specific, factual recitation of the circumstances and language attending such a solicitation," my request was not in proper form and therefore could not be answered with an advisory opinion.

However, the committee was kind enough, on that same date, November 21, to issue an advisory letter to all House Members to provide "guidance concerning political activities which may be undertaken by Members, officers, and employees of the House of Representatives." The letter goes on to indicate that it was occasioned by the issuance of its recent report on improper political solicitations, and formal and informal requests by Members as to what activities are and are not permitted.

The letter reiterates the committee's coercion standard as follows:

In sum, it is illegal to coercively solicit a political contribution from such an individual. Both case law and the Department of Justice take the approach that, under 18 U.S.C. 602, an individual is subject to prosecution where it is shown that a Federal employee was pressured to make a political contribution to a Federal election, such as one involving the election of a Member to Congress. The Committee adopts this analysis of the statute.

The letter goes on to acknowledge that some have urged that coercion not be considered an element of the offense, but rejects this on the basis of the contrary analyses of the Justice Department and courts:

While it may well be that coercion should not be considered an element of the crime, this is a matter which should be specifically addressed in legislation. Until such time, the Committee will treat as improper, subject to investigation, and, as appropriate, sanction, any indication that an individual subject to this Committee's jurisdiction has applied coercion to a Federal employee for the purpose of extracting a political contribution.

Mr. Speaker, because the Ethics Committee is not retreating on its coercion standard, I agree with it that this is a matter which now "should be specifically addressed in legislation." The purpose of the new House rule I am introducing today is to once again bar the House door to political solicitors. Such activity has no business in this House or in any other Federal office building, whether it be considered coercive or voluntary. If history is any guide, we should realize that by opening that door even a crack, we open this House to all manner of possible problems, pressures, abuses, and accusations. That's what led to the enactment of the Civil Service Act in 1883 and why Congress so firmly put its food down and issued a flat ban on political solicitations rather than attempting to define and enforce a more nebulous standard.

On December 4, 1882, President Chester A. Arthur called on Congress to enact a civil service reform bill which included a flat ban on political solicitations of Federal employees. The President observed that "such contributions have at times been obtained from persons whose only motive for giving has been the fear of what might befall them if they refused." And he went on: "It goes without saying that such contributions are not voluntary, and in my judgment their collection should be prohibited by law."

During the ensuing congressional debates which led to the enactment of the Pendle-

ton Act and its provisions barring political solicitations, speaker after speaker made the same point that the line between what is voluntary and involuntary is blurred at best, and that the mere use of position in making the solicitation could be perceived as an exaction.

Mr. Speaker, clauses 1 and 2 of the House rule which I am proposing is nearly a verbatim restatement of sections 602 and 607 of title 18 of the United States Code, insofar as they apply to the House. But I want to make clear here and now that I intend for the "plain meaning rule" of statutory construction to apply to this rule, that is, it means what it says. And what it says is that no Member or employee of the House may solicit campaign contributions from other Federal employees—including other House staffers—and no person may solicit such contributions in House offices, buildings, or the House portion of the Capitol.

Clause 3 of the proposed rule codifies the longstanding interpretation that these prohibitions on solicitation do not apply to Member-to-Member requests for campaign contributions. But the clause goes on to qualify this exception by prohibiting such protected solicitation from directly or indirectly soliciting a Member's staff as well.

Mr. Speaker, I regret that it is even necessary to introduce this resolution, but unfortunately it is given the recent turn of events. The sooner we close this door that has been opened, the better off the House as an institution will be. I hope the Rules Committee will move forward expeditiously on this proposal before we regret it. I urge any colleagues who are interested to join us in cosponsoring this important rule. At this point in the RECORD, Mr. Speaker, I include a copy of the proposed rule, and a letter from Common Cause endorsing the proposal. The resolution and letter follow:

H. RES. 341

Resolved, That the Rules of the House of Representatives are amended by adding at the end thereof the following new rule:

"RULE LI."

"PROHIBITION OF POLITICAL SOLICITATIONS."

"1. A Member, officer, or employee of the House of Representatives shall not knowingly solicit any contribution within the meaning of section 301(8) of the Federal Election Campaign Act of 1971 from any officer or employee of the United States or any department or agency thereof.

"2. No person shall solicit any contribution within the meaning of section 301(8) of the Federal Election Campaign Act of 1971 in any office or building of the House of Representatives or in that part of the Capitol assigned to the use of the House.

"3. The prohibitions contained in this rule shall not apply to the solicitation of any contribution within the meaning of section 301(8) of the Federal Election Campaign Act of 1971 by a Member of Congress of another Member of Congress, provided that any such solicitation does not directly or indirectly solicit such contributions from the employees of the Member being solicited as well.".

COMMON CAUSE,
Washington, DC, December 11, 1985.

Hon. TRENT LOTT,
2400 Rayburn House Office Building
Washington, DC.

DEAR REPRESENTATIVE LOTT: We are writing to express our strong support for your proposal to amend the House Rules to prohibit the solicitation of political campaign contributions by House members from federal employees.

The need for such a prohibition is clear. Congressional employees and other federal workers are placed in an untenable position if Members of Congress are free to solicit campaign contributions from them. The need for this to be a flat prohibition against knowing solicitation is also clear. There is no other way to draw a line between "voluntary contributions" and "coerced contributions" and no other way to prevent the kind of implicit coercion that is bound to occur if such solicitations are allowed.

As you know, under an existing federal statute, Members of Congress are already barred from soliciting federal employees for campaign contributions. The Justice Department has said it will not proceed with a criminal prosecution under this statute, however, unless coercion can be established in the case.

The fact that Justice has established a coercion standard for bringing a criminal prosecution, however, does not vitiate the fact that a flat prohibition on such solicitations exists in the federal statute and also has been incorporated into the House ethics manual. As the ethics manual notes in explaining the application of the provision to the House, its purpose is "to prevent federal employees from being subject to any form of political assessment," and to protect "employees who because of their employment and positions may be subject to coercion."

We are aware that the House Committee on Standards of Official Conduct has said it, in effect, is "married" to the Justice Department's position that actual coercion is a necessary element of the solicitation prohibition. We believe that the Committee's interpretation is wrong and has created a serious problem.

House standards must include clear rules to prevent congressional employees and federal workers from being pressured into making campaign contributions to Members of Congress. In adopting the Justice Department's "coercion" standard for criminal prosecution of such solicitations, the Ethics Committee has, in effect, left the House without any effective prohibition in this area.

It is the responsibility of a legislative body to establish standards of conduct for its Members and employees. Such standards must be defined in terms of what is proper conduct for a public official, not in terms of what constitutes a criminal action. The House has traditionally required that its Members live up to higher standards than that of avoiding criminal conduct.

We believe it is essential for the House to move quickly to remedy this situation. Your proposal would clearly establish that Members cannot knowingly solicit any campaign contribution from a federal employee. This standard is necessary if federal employees are to be protected against undue pressure from Members in the solicitation of campaign funds. While the Ethics Committee has said it does not believe such a flat prohibition presently exists, the Committee should have no problem with the notion that such a ban should exist to protect federal employees and the integrity of the House.

We strongly support your amendment and urge the House to act on it quickly.

Sincerely,

FRED WERTHEIMER,
President.

H.R. 3917—EXTENSION OF THE PERIOD ALLOWED FOR COMPLIANCE WITH CERTAIN FINANCIAL RESPONSIBILITY REQUIREMENTS APPLICABLE TO LAND DISPOSAL FACILITIES UNDER THE SOLID WASTE DISPOSAL ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina [Mr. BROYHILL] is recognized for 15 minutes.

Mr. BROYHILL. Mr. Speaker, today I am pleased to introduce, along with Mrs. JOHNSON, Mr. GINGRICH, Mr. THOMAS of Georgia, Mrs. SMITH of Nebraska, and Mr. TAUZIN, legislation that will correct an inequitable and unintended result of the Solid Waste Disposal Act Amendments of 1984. If this legislation is not enacted, many businesses will be forced to shut down, despite their good faith efforts to demonstrate financial responsibility for liability claims, and despite their compliance with the groundwater monitoring requirements of the Solid Waste Disposal Act. Let me explain.

On November 8, 1984, the President signed into law the Hazardous Waste Control and Enforcement Act. One of the provisions of that law required all hazardous waste land disposal facilities to certify by November 8, 1985, that they were in compliance with both the ground water monitoring regulations as well as the financial responsibility requirements promulgated under the Solid Waste Disposal Act. Failure to so certify would result in the closure of the land disposal facility.

I am advised by the EPA that since the time this legislation was enacted into law—1 year ago—insurance has become unavailable for pollution risks. It is, therefore, impossible for many land disposal facilities to obtain the insurance they need to comply with the financial responsibility requirements. If they cannot comply with the financial responsibility requirements, these facilities will have to close.

Mr. Speaker, it is clear that there is a great inequity here. Through no fault of their own, these facilities will have to close even though the only reason they cannot comply with the law is due to problems in the insurance industry over which they have no control. They will have to close even though they have worked hard to comply with the important groundwater monitoring regulations. If we allow this to happen, we will be penalizing those very businesses that have devoted time and money to comply with the groundwater regulations. Furthermore, by forcing these businesses to close, we will destroy their financial ability to properly manage the haz-

ardous wastes remaining in their land disposal facilities. We cannot allow this to happen.

EPA has recently advised me that there is no way to avoid the unintended impact of the current law other than by Congressional action.

Mr. Speaker, the legislation I am introducing today is a revised version of H.R. 3692 which I, together with several of my colleagues, introduced on November 6, 1985. This new legislation contains additional safeguards that will assure that those facilities that avail themselves of this extension are in compliance with the requirements of the Solid Waste Disposal Act. These facilities must certify that they are in compliance with not only the groundwater monitoring requirements of the Solid Waste Disposal Act but also that their facility is not contaminating groundwater or that there is a compliance monitoring or corrective action program in place.

Mr. Speaker, this short extension is only a means to an end. It simply affords Congress the time needed to understand, and hopefully resolve, the underlying problem—the unavailability of liability insurance. I would note for the benefit of my colleagues that this insurance problem affects more than these particular businesses, and I hope that the Congress will soon focus its attention on the broader insurance problem facing this Nation.

This legislation is particularly time sensitive. Without this legislation, many businesses that are acting in an environmentally responsible manner will be forced to cease operation because they cannot use their land disposal facilities. This will have an adverse impact on not only those individuals who count on these businesses for jobs but also the surrounding community that looks to these businesses to continue the proper management of their existing land disposal facilities. I urge my colleagues to move this legislation expeditiously through the House and to call upon the other body to take it up without delay following action by the House.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the chairman of the Committee on Public Works and Transportation, which was referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION,
Washington, DC, December 12, 1985.

Hon. THOMAS P. O'NEILL,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved the construction of a 789,245 gross square foot United States Federal Building and Courthouse in Chicago, IL at a total estimated cost of $209,034,000; the construction of an estimated 313,600 gross square foot public building in Wilkes-Barre, PA, at a cost of $20,672,000; and three 11(b) Resolutions (Tacoma, WA; Gloucester, MA; and Reading, PA).

The original and one copy of the authorizing resolution are enclosed.

Every best wish.

Sincerely,

JAMES J. HOWARD,
Chairman.

PARLIAMENTARY INQUIRY

Mr. WALKER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WALKER. Could the Chair inform us what we are waiting for?

The SPEAKER pro tempore. A message from the Senate.

Mr. WALKER. A message from the Senate; and is the message on the way?

The SPEAKER pro tempore. Yes, it is.

Mr. WALKER. I thank the Chair.

The SPEAKER pro tempore. The Chair thanks the getleman from Pennsylvania.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 476. Joint resolution making further continuing appropriations for fiscal year 1986.

CONFERENCE REPORT ON H.R. 3037

Mr. WHITTEN submitted the following conference report and statement on the bill (H.R. 3037) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1986, and for other purposes:

CONFERENCE REPORT (H. REPT. 99-439)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3037) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 5, 9, 10, 12, 21, 22, 23, 29, 33, 35, 38, 47, 53, 55, 64, 65, 68, 69, 70, 73, 76, 84, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, and 100.

That the House recede from its disagreement to the amendments of the Senate numbered 6, 7, 8, 11, 16, 17, 18, 26, 34, 42, 50, 71, 72, 74, 77, and 86, and agree to the same.

Amendment numbered 4:

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$53,454,000*; and the Senate agree to the same.

Amendment numbered 15:

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$44,500,000*; and the Senate agree to the same.

Amendment numbered 19:

That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$100,000*; and the Senate agree to the same.

Amendment numbered 24:

That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment, as follows:

In lieu of the sum named in said amendment insert *$725,000*; and the Senate agree to the same.

Amendment numbered 25:

That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,500,000*; and the Senate agree to the same.

Amendment numbered 27:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$300,477,000*; and the Senate agree to the same.

Amendment numbered 28:

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$5,479,000*; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$400,821,000*; and the Senate agree to the same.

Amendment numbered 39:

That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$220,348,000*; and the Senate agree to the same.

Amendment numbered 43:

That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$15,000,000*; and the Senate agree to the same.

Amendment numbered 44:

That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$2,112,600,000*; and the Senate agree to the same.

Amendment numbered 45:

That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$2,112,000,000*; and the Senate agree to the same.

Amendment numbered 48:

That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$682,000,000*; and the Senate agree to the same.

Amendment numbered 49:

That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$650,00,000*; and the Senate agree to the same.

Amendment numbered 51:

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$4,400,000,000*; and the Senate agree to the same.

Amendment numbered 52:

That the House recede from its disagreement to the amendment of the Senate numbered 52, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,700,000,000*; and the Senate agree to the same.

Amendment numbered 54:

That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$100,000,000*; and the Senate agree to the same.

Amendment numbered 57:

That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$750,000*; and the Senate agree to the same.

Amendment numbered 58:

That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$375,297,000*; and the Senate agree to the same.

Amendment numbered 59:

That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,950,000*; and the Senate agree to the same.

Amendment numbered 60:

That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$975,000,000*; and the Senate agree to the same.

Amendment numbered 61:

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$2,195,000,000*; and the Senate agree to the same.

Amendment numbered 63:

That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended as follows:

In lieu of the sum named, insert *$100,000,000*; and the Senate agree to the same.

Amendment numbered 66:

That the House recede from its disagreement to the amendment of the Senate numbered 66, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$365,460,000*; and the Senate agree to the same.

Amendment numbered 80:

That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows: *: Provided, That none of these funds shall be used to develop, establish, or operate any program of user fees authorized by 31 U.S.C. 9701*; and the Senate agree to the same.

Amendment numbered 82:

That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$29,416,000*; and the Senate agree to the same.

Amendment numbered 87:

That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to change "75" to "65"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 13, 14, 20, 30, 31, 32, 37, 40, 41, 46, 56, 62, 67, 75, 78, 79, 81, 83, 85, 101, and 102.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3037) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1986, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

Report language included by the House which is not changed by the report of the Senate, and Senate report language which is not changed by the conference are approved by the committee of conference. The statement of the managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein.

TITLE I—AGRICULTURAL PROGRAMS

PRODUCTION, PROCESSING AND MARKETING

OFFICE OF THE SECRETARY

Amendment No. 1: Appropriates $1,750,000 for the Office of the Secretary as proposed by the House instead of $5,360,000 as proposed by the Senate. The House amount included funds only for the immediate Office of the Secretary and Deputy Secretary, whereas the Senate proposed to fund the Secretary, Deputy Secretary, and all of the Assistant and Under Secretaries and supporting staffs in a single account.

Amendment No. 2: Provides $8,000 for official reception and representation expenses for the Office of the Secretary as proposed by the House instead of $15,000 as proposed by the Senate. The conferees agree that reception and representation expenses for the Department will be reviewed during the hearings on the fiscal year 1987 budget request.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

Amendment No. 3: Restores House language establishing a separate account for the Office of the Assistant Secretary for Administration and appropriates $484,000 for that Office. The Senate proposed to fund this account under the Office of the Secretary.

STANDARD LEVEL USER CHARGES (USDA)

Amendment No. 4: Appropriates $53,454,000 for Standard Level User Charges (USDA) instead of $49,454,000 as proposed by the House and $57,100,000 as proposed by the Senate. The conference agreement maintains this account at the 1985 appropriation level, and includes a general provision stating that none of the funds in this Act shall be available to reimburse the General Services Administration for payment of Standard Level User Charges in excess of the amounts specified in this Act.

OFFICE OF THE ASSISTANT SECRETARY FOR GOVERNMENTAL AND PUBLIC AFFAIRS

Amendment No. 5: Restores House language establishing a separate account for the Office of the Assistant Secretary for Governmental and Public Affairs and appropriates $337,000 for that Office. The Senate proposed to fund this account under the Office of the Secretary.

PUBLIC AFFAIRS

Amendment No. 6: Deletes House language and inserts Senate language providing a center heading.

LEGISLATIVE LIAISON

Amendment No. 7: Deletes House language providing a center heading.

INTERGOVERNMENTAL AFFAIRS

Amendment No. 8: Deletes House language providing a center heading.

OFFICE OF THE ASSISTANT SECRETARY FOR ECONOMICS

Amendment No. 9: Restores House language establishing a separate account for the Office of the Assistant Secretary for Economics and appropriates $418,000 for that Office. The Senate proposed to fund this account under the Office of the Secretary.

OFFICE OF THE ASSISTANT SECRETARY FOR SCIENCE AND EDUCATION

Amendment No. 10: Restores House language establishing a separate account for the Office of the Assistant Secretary for Science and Education and appropriates $371,000 for that Office. The Senate proposed to fund this account under the Office of the Secretary.

AGRICULTURAL RESEARCH SERVICE

Amendment No. 11: Appropriates $501,043,000 for the Agricultural Research Service as proposed by the Senate instead of $492,806,000 as proposed by the House. The conference agreement includes the following increases above the budget request for human nutrition research programs:

Tufts University	$1,000,000
Children's Nutrition Research Center	1,000,000
North Dakota Center	400,000
Beltsville Center	200,000

For integrated production research in Oklahoma, the conference agreement includes $500,000 as proposed by the House instead of $300,000 as proposed by the Senate.

For water conservation research at Texas Tech University the conference agreement includes an increase of $250,000 above the budget request as proposed by the House.

For tri-fly research at the University of Hawaii the conference agreement includes an increase of $340,000 above the budget request as proposed by the Senate. The House bill had earmarked $340,000 within existing funds.

The conference agreement includes the following increases above the budget request for research as proposed by the Senate:

Dairy forage research at Madison, Wisconsin	$200,000
Peach research at the Appalachian Fruit Laboratory	200,000
Sunflower research at North Dakota State University	100,000

For pay annualization the conference agreement includes an increase of $6,597,000 above the House amount instead of $9,647,000 as proposed by the Senate. The House bill had proposed a reduction of $8,397,000 in the estimates for pay annualization. Within the funds for pay annualization, the Department should use $200,000 for the transfer to the Office of the Assistant Secretary for Science and Education for scientific review and use $150,000 for potato varietal development work in the Pacific Northwest. In addition, out of these funds the conferees will also expect the Department to give increased attention to potato research at Orono, Maine.

Amendment No. 12: Restores House language providing for the transfer of funds for scientific review from the Agricultural Research Service to the Office of the Assistant Secretary for Science and Education. The Senate proposed transfer of these funds to the Secretary of Agriculture.

BUILDINGS AND FACILITIES

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $6,350,000 for buildings and facilities instead of $3,600,000 as proposed by the House and $3,350,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides for the following facilities:

	House	Senate	Conference
Planning for School of Veterinary Medicine at Tuskegee Institute	$600,000	$600,000	$600,000
Construction of Germplasm Collection Facility, Aberdeen, Idaho		2,700,000	2,700,000
Feasibility Study for Agricultural Science and Industry Facility, Pennsylvania State University		50,000	50,000
Planning for Research Facility, University of Illinois	3,000,000		3,000,000
Total	3,600,000	3,350,000	6,350,000

The conferees agree that the germplasm facility to be constructed at Aberdeen, Idaho, shall not duplicate the facility currently at Beltsville, Maryland, and shall work in cooperation with the Beltsville germplasm facility. Furthermore, the conferees agree that no personnel, equipment, or other resources shall be transferred from Beltsville to Aberdeen to staff or equip this facility.

The conferees request a report not later than February 1, 1986, on the use of the funds appropriated in fiscal year 1984 for a regional veterinary school in Nebraska. The regional approach having failed, it is proposed that the funds be used for a clinical facility for training veterinary students from Nebraska and Kansas and for research in the areas of food processing, transportation and marketing systems.

COOPERATIVE STATE RESEARCH SERVICE

Amendment No. 14: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which earmarks $28,805,000 for special research grants instead of $27,310,000 as proposed by the House and $26,718,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The following table reflects the conference agreement for special research grants:

[In thousands of dollars]

	House	Senate	Conference
Special Research Grants (P.L. 89-106)	(27,310)	(26,718)	(28,805)
STEEP-Soil Erosion in N.W.	622	622	622
Food Systems Research Group (Wisconsin)	156		156
Pest Management	3,091	3,091	3,091
Rural Development Centers	311	450	381
Soybean Cyst Nematode (Missouri)	300	300	300
Bean and Beet (Michigan)	97		97
Animal Health	6,000	6,000	6,000
Aquaculture (Stoneville)	420	420	420
Dairy and Beef Photoperiod (Michigan)	35	35	35
Pesticide Clearance	1,440	1,440	1,440
Minor use animal drugs (IR-4)	240	240	240
Pesticide Impact Assessment	2,069	2,069	2,069
Dairy goat research (Texas)	100		100
Aquaculture (general)		518	300
Milk consumption (Pa.)		300	300
International livestock program (Ks.)		100	100
Stored grain insects (Ks.)		300	300
Germplasm resources	1,000	1,000	1,000
Blueberry shoestring virus (Michigan)	96		96
Peach tree short life (S. Carolina)	192	192	192
TCK Saut (wheat)	361	361	361
Sugarland use research (Hawaii)	150	150	150
Mosquito research	480	480	480
Int's. Prod. Systems (Oklahoma)	250		250
Preservation and processing research (Okla.)	150		150
Dried Bean (North Dakota)	50	50	50
Sunflower insects (North Dakota)	150	200	200
Tropical and subtropical	3,250	3,250	3,250
Potato research	600	800	800
Asparagus yield decline (Michigan)	100		100
Bio-control of grasshoppers	50	50	50
Wool research (Texas)		150	150
Ag Policy Institute (Iowa and Mo.)	450		375
Biomass from dairy processing waste (Missouri)	300	300	300
Stone fruit decline (Michigan)	300		300
EDB replacement (Hawaii)	300	300	300
Wood utilization research	3,000	3,000	3,000
Integrated reproduction management (NEB)	100		100
Cranberry/Blueberry disease and breeding (N.J.)	100		100
Alternative cropping systems (Southeast)	300	300	300
Maple research (Vermont)		100	100
Apple quality research (Michigan)	100		100
Aquaculture planning grant (Hawaii)	150	150	150
Fruit and vegetable production and marketing (Ky.)	150		150
Plant stress (N. Mexico, Calif. and Texas)	300		300

Amendment No. 15: Earmarks $44,500,000 for competitive research grants instead of $34,000,000 as proposed by the House and $46,500,000 as proposed by the Senate. The following table reflects the conference agreement for competitive research grants:

[In thousands of dollars]

	House	Senate	Conference
Competitive research grants:			
Plant Science	4,500	16,500	14,500
Soybean research	(518)	(518)	(518)
Acid precipitation	(695)	(695)	(695)
Alcohol fuels	(540)	(540)	(540)
Animal Science	4,500	4,500	4,500
Brucellosis	(500)	(500)	(500)
Reproductive efficiency	(2,500)	(2,500)	(2,500)
Pest Science	3,000	3,000	3,000
Gyspy moths	(1,000)	(1,000)	(1,000)
Boll weevil/Boll worm	(1,000)	(1,000)	(1,000)
Pine bark beetle	(1,000)	(1,000)	(1,000)
Human Nutrition	2,000	2,500	2,500
Biotechnology	20,000	20,000	20,000
Total, Competitive research grants	34,000	46,500	44,500

Amendment No. 16: Earmarks $5,000,000 for higher education strengthening grants as proposed by the Senate instead of $3,000,000 as proposed by the House.

Amendments No. 17 and 18: Make technical corrections to legal citations as proposed by the Senate.

Amendment No. 19: Limits the amount of funds that can be used for employment of consultants to $100,000 instead of $50,000 as proposed by the House and $150,000 as proposed by the Senate.

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates a total of $290,423,000 for the Cooperative State Research Service instead of $276,428,000 as proposed by the House and $290,336,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

EXTENSION SERVICE

Amendment No. 21: Restores House language transferring $38,627,000 from the food stamp program to the expanded food and nutrition education program. The Senate proposed to delete the transfer from the food stamp program. The conference agreement provides for a total of $60,354,000 for the expanded food and nutrition education program (EFNEP).

Amendment No. 22: Earmarks $3,500,000 for the urban gardening program as proposed by the House instead of $1,750,000 as proposed by the Senate.

Amendment No. 23: Restores House language earmarking $1,020,000 for the farm safety program and $50,000 for the integrated reproductive management program. The Senate proposed to delete funding for both of these programs.

Amendment No. 24: Earmarks $725,000 for payments for work at the rural development centers instead of $1,000,000 as proposed by the Senate. The House bill included $500,000 for work at the rural development centers under the Federal administration appropriation.

Amendment No. 25: Earmarks $1,500,000 for financial management assistance instead of $1,000,000 as proposed by the House and $2,000,000 as proposed by the Senate.

Amendment No. 26: Earmarks $2,500,000 for renewable resources extension as proposed by the Senate. The House bill contained no provision for this program.

Amendment No. 27: Provides a total of $300,477,000 for the Extension Service instead of $296,752,000 as proposed by the House and $337,059,000 as proposed by the Senate.

Amendment No. 28: Appropriates $5,479,000 for Federal administration of the Extension Service instead of $5,979,000 as proposed by the House and $5,279,000 as proposed by the Senate.

The conference agreement deletes funding for the rural development centers as proposed by the Senate since they are funded separately in Amendment No. 24. The conference agreement includes $200,000 for a comprehensive farm and ranch management program as proposed by the House.

OFFICE OF THE ASSISTANT SECRETARY FOR MARKETING AND INSPECTION SERVICES

Amendment No. 29: Restores House language establishing a separate account for the Office of the Assistant Secretary for Marketing and Inspection Services and appropriates $347,000 for that Office. The Senate proposed to fund this account under the Office of the Secretary.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

SALARIES AND EXPENSES

Amendment No. 30: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $316,286,000 for salaries and expenses of the Animal and Plant Health Inspection Service instead of $281,165,000 as proposed by the House and $309,502,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The following table reflects the conference agreement:

Golden nematode	$1,007,000
Grasshopper and Mormon cricket	18,000,000
Import-export inspection	8,533,000
International programs	2,036,000
Agriculture quarantine inspection	54,926,000
Brucellosis eradication	70,200,000
Animal damage control	20,000,000

In connection with Amendment No. 85, the conference agreement provides that $16,173,000 shall remain available until expended for the grasshopper and Mormon cricket control program.

Amendment No. 31: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which added language to transfer the animal damage control program from the U.S. Fish and Wildlife Service to the U.S. Department of Agriculture. The conference agreement includes $45,000 for the guarding dog program.

FOOD SAFETY AND INSPECTION SERVICE

Amendment No. 32: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$370,000,000, of which $5,735,000 shall be available only to the extent an official budget request is transmitted to the Congress*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides a total of $370,000,000 as proposed by the Senate instead of $358,494,000 as proposed by the House. The conference agreement also provides full-year funding, subject to the submission of an official budget request.

FEDERAL GRAIN INSPECTION SERVICE

SALARIES AND EXPENSES

Amendment No. 33: Restores House language rather than making a technical change as proposed by the Senate.

AGRICULTURAL MARKETING SERVICE

MARKETING SERVICES

Amendment No. 34: Appropriates $32,208,000 for the Agricultural Marketing Service, marketing services as proposed by the Senate instead of $31,455,000 as proposed by the House.

FARM INCOME STABILIZATION

OFFICE OF THE UNDER SECRETARY FOR INTERNATIONAL AFFAIRS AND COMMODITY PROGRAMS

Amendment No. 35: Restores House language establishing a separate account for the Office of the Under Secretary for International Affairs and Commodity Programs and appropriates $502,000 for that Office. The Senate proposed to fund this account under the Office of the Secretary.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

SALARIES AND EXPENSES

Amendment No. 36: Provides $400,821,000 for salaries and expenses of the Agricultural Stabilization and Conservation Service instead of $395,119,000 as proposed by the House and $406,524,000 as proposed by the Senate.

Amendment No. 37: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$400,821,000 of the above amount*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement limits the transfer from the Commodity Credit Corporation to the Agricultural Stabilization and Conservation Service to $400,821,000 instead of $395,119,000 as proposed by the House and $406,524,000 as proposed by the Senate.

DAIRY INDEMNITY PROGRAM

Amendment No. 38: Deletes Senate language providing that funds for the dairy indemnity program shall remain available until expended. The conferees agree to include this provision under section 608 of the General Provisions.

CORPORATIONS

FEDERAL CROP INSURANCE CORPORATION

ADMINISTRATIVE AND OPERATING EXPENSES

Amendment No. 39: Appropriates $220,348,000 for administrative and operating expenses of the Federal Crop Insurance Corporation instead of $200,502,000 as proposed by the House and $240,194,000 as proposed by the Senate.

COMMODITY CREDIT CORPORATION

REIMBURSEMENT FOR NET REALIZED LOSSES

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

To reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed, pursuant to the Act of August 17, 1961 (15 U.S.C. 713a-11, 713a-12), $9,195,240,000, and in addition $4,000,000,000 which shall be available only to the extent an official budget request is transmitted to the Congress.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides a total of $9,195,240,000 as proposed by the House instead of a current indefinite appropriation of "such sums as necessary" as provided by the Senate. The conference agreement also provides an additional $4,000,000,000 to be available subject to the submission of an official budget request.

TITLE II—RURAL DEVELOPMENT PROGRAMS

RURAL DEVELOPMENT ASSISTANCE

OFFICE OF THE UNDER SECRETARY FOR SMALL COMMUNITY AND RURAL DEVELOPMENT

Amendment No. 41: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

OFFICE OF THE UNDER SECRETARY FOR SMALL COMMUNITY AND RURAL DEVELOPMENT

For necessary salaries and expenses for the Office of the Under Secretary for Small Community and Rural Development to administer programs under the laws enacted by the Congress for the Farmers Home Administration, Rural Electrification Administration, Federal Crop Insurance Corporation, and rural development activities of the Department of Agriculture, including $375,000 for grants pursuant to the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1926(a)(11) and 7 U.S.C. 1932(c)), $790,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes $350,000 for the contract program established two years ago in Oklahoma, and $25,000 for the nonprofit Hilltown Community Development Corporation to conduct a rural product development and marketing assistance project to promote business and community development in rural areas.

OFFICE OF RURAL DEVELOPMENT POLICY

Amendment No. 42: Deletes funding for the Office of Rural Development Policy as proposed by the Senate. The House bill proposed $2,037,000 for this Office.

The conferees are aware that the Office of Rural Development Policy has been a resource in support of rural health issues, such as advocacy and monitoring of health, transportation, education and aging.

The conferees expect these functions in rural health to be continued by the Secretary not only in the field of advocacy, but in maintaining statistical information on a variety of areas which can be the source of facts for needed action in the area of rural health.

FARMERS HOME ADMINISTRATION

RURAL HOUSING INSURANCE FUND

Amendment No. 43: Provides $15,000,000 for very low-increase housing repair loans instead of $17,000,000 as proposed by the House and $10,200,000 as proposed by the Senate.

Amendment No. 44: Provides $2,112,600,000 for rural housing loans instead of $3,221,000,000 as proposed by the House and $1,932,600,000 as proposed by the Senate. The conference agreement includes the following loan levels:

Low-income housing loans (sec. 502)	$1,400,000,000
Rural housing site development (sec. 524)	600,000
Rural rental housing (sec. 515)	700,000,000
Domestic farm labor (sec. 514)	12,000,000
Total	$2,112,600,000

Amendment No. 45: Provides that not less than $2,112,000,000 shall be available for subsidized interest loans to low-income borrowers instead of $3,220,000,000 as proposed by the House and $1,932,000,000 as proposed by the Senate.

Amendment No. 46: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

For rental assistance agreements entered into or renewed pursuant to the authority under section 521(a)(2) of the Housing Act of 1949, as amended, total new obligations shall not exceed $167,513,000 to be added to and merged with authority provided for this purpose in prior fiscal years: Provided, That not to exceed $35,000,000 is available for newly constructed units financed by section 515 of the Housing Act of 1949, as amended, including not less than $5,000,000 for newly constructed units financed under sections 514 and 516 of the Housing Act of 1949: Provided further, That agreements entered into or renewed during fiscal year 1986 shall be funded for a five-year period, although the life of any such agreement may be extended to fully utilize amounts obligated: Provided further, That agreements entered into or renewed during fiscal years 1983, 1984, and 1985, may also be extended beyond five years to fully utilize amounts obligated.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement earmarks $5,000,000 for farm labor housing.

Amendment No. 47: Appropriates $1,843,927,000 for restoration of interest subsidies and losses of the Rural Housing Insurance Fund as proposed by the House instead of $2,136,784,000 as proposed by the Senate.

AGRICULTURAL CREDIT INSURANCE FUND

Amendment No. 48: Provides a total of $682,000,000 for real estate loans instead of $732,000,000 as proposed by the House and $532,000,000 as proposed by the Senate. The conference agreement includes the following loan levels:

Farm ownership loans	$650,000,000
Insured	(400,000,000)
Guaranteed	(250,000,000)
Soil and water loans	28,000,000
Insured	(22,000,000)
Guaranteed	(6,000,000)
Indian land acquisition loans	4,000,000
	$682,000,000

Amendment No. 49: Provides not less than $650,000,000 for farm ownership loans instead of $700,000,000 as proposed by the House and $500,000 as proposed by the Senate.

Amendment No. 50: Provides that of the total available for farm ownership loans, $250,000,000 shall be guaranteed loans as proposed by the Senate instead of $200,000,000 as proposed by the House.

Amendment No. 51: Provides a total of $4,400,000 for operating loans instead of $3,400,000,000 as proposed by the House and $4,772,000,000 as proposed by the Senate.

Amendment No. 52: Provides that the total available for operating loans, $1,700,000,000 shall be guaranteed loans instead of $1,480,000,000 as proposed by the House and $1,772,000,000 as proposed by the Senate.

Amendment No. 53: Appropriates $1,089,943,000 for restoration of interest subsidies and losses of the Agricultural Credit Insurance Fund as proposed by the House instead of $1,477,565,000 as proposed by the Senate.

RURAL DEVELOPMENT INSURANCE FUND

Amendment No. 54: Provides $100,000,000 for insured community facility loans instead of $115,000,000 as proposed by the House and $75,000,000 as proposed by the Senate.

Amendment No. 55: Appropriates $560,005,000 for restoration of interest subsidies and losses for the Rural Development Insurance Fund as proposed by the House instead of $612,098,000 as proposed by the Senate.

RURAL HOUSING FOR DOMESTIC FARM LABOR

Amendment No. 56: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $10,000,000 for rural housing for domestic farm labor. The House bill contained no provision for this program.

COMPENSATION FOR CONSTRUCTION DEFECTS

Amendment No. 57: Appropriates $750,000 for compensation for construction defects instead of $1,000,000 as proposed by the House and $500,000 as proposed by the Senate.

SALARIES AND EXPENSES

Amendment No. 58: Appropriates $375,297,000 for salaries and expenses of the Farmers Home Administration instead of $356,297,000 as proposed by the House and $394,197,000 as proposed by the Senate. The conferees agree that the Department should continue paying the balance of FmHA staff out of the revolving fund and should submit detailed estimates of current services as part of the fiscal year 1987 budget.

Amendment No. 59: Earmarks $1,950,000 for the circuit rider program instead of $1,600,000 as proposed by the House and $2,100,000 as proposed by the Senate. The conference agreement is based upon the fact that part of the year has passed and the Senate increase can be reduced.

RURAL ELECTRIFICATION ADMINISTRATION

RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND LOAN AUTHORIZATIONS

Amendment No. 60: Places a ceiling on rural electrification loans of $975,000,000 instead of $1,100,000,000 as proposed by the House and $850,000,000 as proposed by the Senate.

Amendment No. 61: Places a ceiling on total commitments to guarantee loans of $2,195,000,000 instead of $2,345,000,000 as proposed by the House and $2,045,000,000 as proposed by the Senate.

Amendment No. 62: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that no funds appropriated in this Act may be used to deny or reduce loans or loan advances based upon a borrower's level of general funds.

REIMBURSEMENT TO THE RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND

Amendment No. 63: Appropriates $100,000,000 for restoration of interest subsidies and losses for the Rural Electrification and Telephone Revolving Fund instead of $225,395,000 as proposed by the House. The Senate amendment deleted funding for interest subsidies and losses.

RURAL TELEPHONE BANK

Amendment No. 64: Deletes Senate language regarding a borrower's level of general funds since the limitation agreed to in Amendment No. 62 applies to both the rural electrification and the telephone programs.

CONSERVATION

OFFICE OF THE ASSISTANT SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT

Amendment No. 65: Restores House language establishing a separate account for the Office of the Assistant Secretary for Natural Resources and Environment and appropriates $386,000 for that Office. The Senate proposed to fund this account under the Office of the Secretary.

SOIL CONSERVATION SERVICE

CONSERVATION OPERATIONS

Amendment No. 66: Appropriates $365,460,000 for Soil Conservation Service, conservation operations instead of $365,629,000 as proposed by the House and $365,400,000 as proposed by the Senate. The conference agreement includes $60,000 for the backwater irrigation study as proposed by the House.

Amendment No. 67: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *That of the foregoing amounts not less than $290,035,000 is for personnel compensation and benefits: Provided further, That in addition to the above amounts, $8,000,000 is hereby appropriated to be transferred to and merged with the watershed and flood prevention operations appropriation for use in carrying out activities authorized under the Public Law 534 program: Provided further,*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement restores and amends the House language providing no less than $290,035,000 for personnel compensation and benefits. The conference agreement also provides an additional $8,000,000 to be used in carrying out the P.L. 534 program.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

AGRICULTURAL CONSERVATION PROGRAM

Amendment No. 68: Appropriates $190,000,000 for the agricultural conservation program as proposed by the House instead of $165,000,000 as proposed by the Senate. The conferees are aware that some funds were carried over from fiscal year 1985. However, the conferees feel that these carryover funds result from cost-share rates that have been set at too high a level in certain parts of the country.

Amendments No. 69 and 70: Delete Senate language regarding long-term agreements.

WATER BANK PROGRAM

Amendment No. 71: Appropriates $8,800,000 for the water bank program as proposed by the Senate. The House bill contained no provision for this program.

EMERGENCY CONSERVATION PROGRAM

Amendment No. 72: Deletes House language appropriating $5,000,000 for the emergency conservation program as proposed by the Senate. The conferees have been advised that sufficient carryover funds are available for this program.

TITLE III—DOMESTIC FOOD PROGRAMS

OFFICE OF THE ASSISTANT SECRETARY FOR FOOD AND CONSUMER SERVICES

Amendment No. 73: Restores House language establishing a separate account for the Office of the Assistant Secretary for Food and Consumer Services and appropriates $350,000 for that Office. The Senate proposed to fund this account under the Office of the Secretary.

COMMODITY SUPPLEMENTAL FOOD PROGRAM

The conferees agree that remaining fiscal year 1985 appropriations should be used for administrative expenses associated with the handling of cheese and bonus commodities by CSF program operators. Therefore, the Department is directed to report its action in this matter to the House and Senate Appropriations Committees prior to the fiscal year 1987 hearings.

FOOD STAMP PRINTING

The conferees ageee that none of the funds in the Act are appropriated for printing food stamp coupons outside the United States.

FOOD DONATIONS PROGRAMS

Amendment No. 74: Appropriates $194,573,000 for the food donations progams as proposed by the Senate instead of $187,622,000 as proposed by the House.

Amendment No. 75: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that up to $7,000,000 of the amount appropriated for food donations programs may be used to pay outstanding claims for meals served in fiscal year 1985.

TITLE IV—INTERNATIONAL PROGRAMS

PUBLIC LAW 480

Amendment No. 76: Provides that up to 10 percent of the funds made available for the Public Law 480 program may be transferred between titles as proposed by the House instead of 15 percent as proposed by the Senate.

OFFICE OF INTERNATIONAL COOPERATION AND DEVELOPMENT

Amendment No. 77: Appropriates $5,417,000 for the Office of International Cooperation and Development as proposed by the Senate instead of $3,917,000 as proposed by the House. The conference agreement includes $1,500,000 for agricultural scholarships for foreign students as proposed by the Senate.

The conferees ageee that the Office of International Cooperation and Development shall be maintained as an independent office.

SCIENTIFIC ACTIVITIES OVERSEAS

(FOREIGN CURRENCY PROGRAM)

Amendment No. 78: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the first sum named in said amendment, insert: *$3,000,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $3,000,000 for the scientific activities overseas program instead of $5,000,000 as proposed by the Senate. The House bill contained no similar provision for this program.

TITLE V—RELATED AGENCIES

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

Amendment No. 79: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$396,955,000, and in addition $6,674,000 shall be available only to the extent an official budget request is transmitted to the Congress*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $396,955,000 for salaries and expenses of the Food and Drug Administration instead of $392,370,000 as proposed by the House and $399,629,000 as proposed by the Senate. The conference agreement also deletes language proposed by the Senate earmarking funds for orphan product grants and contracts, and provides an additional $6,674,000 which shall be available only to the extent an official budget request is transmitted to Congress.

The conference agreement includes an appropriation of $10,015,000 and 70 full-time equivalents for work on Acquired Immune Deficiency Syndrome. The conference agreement also includes an appropriation of $4,700,000 for orphan product work, of which not less than $3,000,000 shall be available only for orphan product grants and contracts, to provide for orderly growth in this program.

The $6,674,000 which the conference agreement provides, subject to a budget request, represents $2,965,000 for increased operating costs and $3,709,000 for increased personnel costs.

Amendment No. 80: Restores and amends House language to provide that none of the funds available to the Food and Drug Administration for salaries and expenses shall be used to develop, establish, or operate any program of user fees authorized by 31 U.S.C. 9701. The House provided this limitation on funds "in this Act" and the Senate deleted the House provision. The conference agreement includes $5,000,000 to continue the processing of new drug applications with appropriated funds.

Amendment No. 81: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: *: Provided further, That a portion of the funds appropriated under this heading shall be used to complete, by June 1, 1986, the safety evaluation of sulfiting agents*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement concurs with the Senate amendment which provides that funds available to the Food and Drug Administration shall be used to complete, by June 1, 1986, the safety evaluation of sulfiting agents, and makes a technical change to add the word "further".

COMMODITY FUTURES TRADING COMMISSION

Amendment No. 82: Appropriates $29,416,000 for the Commodity Futures Trading Commission instead of $28,416,000 as proposed by the House and $30,307,000 as proposed by the Senate.

TITLE VI—GENERAL PROVISIONS

Amendment No. 83: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *person, persons or corporation upon a final finding by a court of competent jurisdiction that such party is guilty of growing, cultivating, harvesting, processing or storing marijuana, or other*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement makes a technical modification of the language which has been in the Act for a number of years regarding the making of production or other payments to persons who produce prohibited drug-producing plants.

Amendment No. 84: Restores House language providing that not to exceed $40,001,000 shall be charged against the Working Capital Fund for personnel compensation and benefits.

Amendment No. 85: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: *Rural Housing for Domestic Farm Labor; Agricultural Research Service, Buildings and Facilities; Scientific Activities Overseas (Foreign Currency Program); Dairy Indemnity Program; and $16,173,000 for the grasshopper and Mormon cricket control program, Animal and Plant Health Inspection Service;*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 86: Makes a technical correction as proposed by the Senate.

Amendment No. 87: Restores and amends House language requiring the Department to sell certificates of beneficial ownership equal to not less than 75 percent of the value of loans closed during the year. The Senate deleted the House language, and the conference agreement retains the House language but lowers the sales requirement to 65 percent.

Amendments No. 88 through 100: Restore House section numbers.

Amendment No. 101: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that the authority of the Commodity Credit Corporation to lease space for its own use or to lease space on behalf of other agencies of the Department of Agriculture shall not be restricted, with an amendment which changes the section number to Sec. 629.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 102: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 630. Section 221 of the Biomass Energy and Alcohol Fuels Act of 1980 (Public Law 96-294; 42 U.S.C. 8821) is amended by—

(1) Striking out "September 30, 1984" and inserting in lieu thereof "June 30, 1986"; and

(2) adding at the end thereof the following: "The Secretary of Energy may modify the terms and conditions of any conditional commitment for a loan guarantee under this subtitle made before October 1, 1984, including the amount of the loan guarantee. Enactment of this section shall not be interpreted as indicating Congressional approval with respect to any pending conditional commitments under this Act.".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

FISCAL YEAR 1986 SEQUESTRATION PROCEDURES

Should a sequestration be required during fiscal year 1986, for the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (P.L. 99-177), the following information provides the definition of the term "program, project, and activity" for appropriations for Agriculture, Rural Development, and Related Agencies programs. The term "program, project, and activity" shall include the most specific level of budget activities detailed in the Agriculture, Rural Development, and Related Agencies Appropriation Act for Fiscal Year 1986 (H.R. 3037), the House and Senate Committee reports on the bill (H. Rept. 99-211 and S. Rept. 99-137), as well as the conference report and the accompanying joint explanatory statement of the managers of the committee of conference.

In carrying out the Presidential Order, agencies shall apply this definition to all items specified in the explanatory notes as changed by congressional action, and in addition:

For the Agricultural Research Service the definition shall include specific research locations as identified in the explanatory notes and lines of research specifically identified in the reports of the House and Senate Appropriations Committees.

For the Soil Conservation Service the definition shall include individual flood prevention projects as identified in the explanatory notes and individual operational watershed projects as summarized in the notes.

For the Farmers Home Administration the definition shall include individual State, district and county offices.

For the Agricultural Stabilization and Conservation Service the definition shall include individual State and county offices.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1986 recommended by the Committee of Conference, with comparisons to the fiscal year 1985 amount, the 1986 budget estimates, and the House and Senate bills for 1986 follow:

New budget (obligational) authority, fiscal year 1985	$38,261,575,000
Budget estimates of new (obligational) authority, fiscal year 1986	33,233,217,000
House bill, fiscal year 1986	33,120,901,000
Senate bill, fiscal year 1986	34,250,444,000
Conference agreement, fiscal year 1986	33,262,354,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1985	−4,999,221,000
Budget estimates of new (obligational) authority, fiscal year 1986	+29,137,000
House bill, fiscal year 1986	+141,453,000
Senate bill, fiscal year 1986	−988,090,000

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 947. An act to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

BILL AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following days present to the President, for his approval, a bill and joint resolution of the House of the following titles:

On December 11, 1985:

H.J. Res. 372. Joint resolution increasing the statutory limit on the public debt.

On December 12, 1985:

H.R. 2965. A bill making appropriations for the Departments of Commerce, Justice and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1986, and for other purposes.

ADJOURNMENT

Mr. SEIBERLING. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 7 minutes, p.m.) under its previous order, the House adjourned until Monday, December 16, 1985, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2385. A letter from the Assistant Administrator for Pesticides and Toxic Substances, Environmental Protection Agency, transmitting final rules under the Federal Insecticide, Fungicide, and Rodenticide Act [FIFRA], pursuant to the act of June 25, 1947, chapter 125, section 25(a)(4) (94 Stat. 3195); to the Committee on Agriculture.

2386. A letter from the Director, Office of Management and Budget, transmitting a cumulative report on rescissions and deferrals of budget authority, pursuant to 2 U.S.C. 685(e) (H. Doc. No. 99-136); to the Committee on Appropriations and ordered to be printed.

2387. A letter from the Secretaries of Agriculture and Energy, transmitting a report on the status of Federal programs relating to the barter or exchange of commodities owned by the Commodity Credit Corporation for materials and products produced in foreign countries, pursuant to 15 U.S.C. 4053; to the Committee on Foreign Affairs.

2388. A letter from the Secretary of Energy, transmitting a letter of support for the United States-China Agreement on the Peaceful Uses of Nuclear Energy; to the Committee on Foreign Affairs.

2389. A letter from the Director of the Selective Service, transmitting a report of the Selective Service's internal accounting and administrative control system, pursuant to 31 U.S.C. 3512(c)(3); to the Committee on Government Operations.

2390. A letter from the Administrator, Panama Canal Commission, transmitting a claim for $404,366.82 from Norwegian American Cruises for damages incurred in the Panama Canal, pursuant to Public Law 96-70, section 1415(b); to the Committee on Merchant Marine and Fisheries.

2391. A letter from the Secretary of Transportation, transmitting a request for improvements to the Mike Monroney Aeronautical Center; to the Committee on Public Works and Transportation.

2392. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to provide for voluntary private alternative coverage for Medicare beneficiaries, and for other purposes; jointly, to the Committees on Ways and Means and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2651. A bill to amend section 504 of the Alaska National Interest Lands Conservation Act to promote the development of mineral wealth in Alaska; with an amendment (Rept. 99-436). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 3851. A bill to amend section 901 of the Alaska National Interest Lands Conservation Act (Rept. 99-437). Referred to the Committee of the Whole House on the State of the Union.

Mr. MITCHELL: Committee on Small Business. H.R. 2787. A bill to extend through fiscal year 1988 SBA pilot programs under section 8 of the Small Business Act (Rept. 99-438). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee of conference. Conference report on H.R. 3037 (Rept. 99-439). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL (for himself, Mrs. JOHNSON, Mr. GINGRICH, Mr. THOMAS of Georgia, Mrs. SMITH of Nebraska, and Mr. TAUZIN).

H.R. 3917. A bill to extend the period allowed for compliance with certain financial responsibility requirements applicable to land disposal facilities under the Solid Waste Disposal Act; to the Committee on Energy and Commerce.

By Mr. ROSTENKOWSKI:

H.R. 3918. A bill to extend until December 18, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Programs; to the Committee on Ways and Means.

By Mr. DE LA GARZA:

H.R. 3919. A bill to extend temporarily the Dairy Price Support Program and cer-

tain Food Stamp Program provisions, and for other purposes; to the Committee on Agriculture.

By Mr. BROWN of Colorado:

H.R. 3920. A bill to authorize and direct the Secretary of the Interior to amend the contract between the United States and the Purgatoire River Conservancy District (contract number 7-07-w0095); to the Committee on Interior and Insular Affairs.

By Mr. DANNEMEYER (for himself, Mr. ANDERSON, Mr. BADHAM, Mr. BEILENSON, Mr. BOSCO, Mr. BROWN of California, Mr. COELHO, Mr. DIXON, Mr. DORNAN of California, Mr. DREIER of California, Mr. DYMALLY, Mr. EDWARDS of California, Mr. FAZIO, Mr. HAWKINS, Mr. HUNTER, Mr. LAGOMARSINO, Mr. LANTOS, Mr. LEHMAN of California, Mr. LEWIS of California, Mr. LOWERY of California, Mr. LUNGREN, Mr. MATSUI, Mr. MCCANDLESS, Mr. MINETA, Mr. MOORHEAD, Mr. PACKARD, Mr. SHUMWAY, Mr. ROYBAL, Mr. THOMAS of California, and Mr. ZSCHAU):

H.R. 3921. A bill to establish the Richard M. Nixon National Historic Site in the State of California, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. DE LA GARZA:

H.R. 3922. A bill to authorize additional bankruptcy judgeships for the southern district of Texas; to the Committee on the Judiciary.

H.R. 3923. A bill to amend section 10530 of title 49, United States Code, to make the registration requirements of that section inapplicable to foreign carriers domiciled in Mexico; to the Committee on Public Works and Transportation.

By Mr. FASCELL:

H.R. 3924. A bill to authorize and direct the Foreign Claims Settlement Commission of the United States to determine inheritance claims of United States nationals against Romania; to the Committee on Foreign Affairs.

By Mr. GEJDENSON:

H.R. 3925. A bill to lower for a 3-year period the rate of duty on glass inners designed for vacuum flasks; the Committee on Ways and Means.

By Mr. GILMAN:

H.R. 3926. A bill to amend title 38, United States Code, to extend eligibility for burial allowance to certain additional veterans and to increase the burial plot allowance for veterans from $150 to $250, to the Committee on Veterans' Affairs.

H.R. 3927. A bill to amend the Internal Revenue Code of 1954 to allow a credit against tax for expenses incurred in the care of elderly veterans, to the Committee on Ways and Means.

H.R. 3928. A bill to amend the Internal Revenue Code of 1954 to make the credit for dependent care services necessary for gainful employment a refundable credit and to allow an additional investment tax credit for dependent care center property; to the Committee on Ways and Means.

By Mr. HOWARD (for himself, and Mr. SNYDER) (by request):

H.R. 3929. A bill to amend subtitle IV of title 49, United States Code, to reduce regulation of motor carriers of property, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. JONES of Oklahoma:

H.R. 3930. A bill to amend the Internal Revenue Code of 1954 with respect to treatment of fringe benefits provided to the parents of employees; to the Committee on Ways and Means.

By Mr. MOAKLEY:

H.R. 3931. A bill to designate the General Services Administration building known as the "United States Appraiser's Stores Building" in Boston, MA, as the "Captain John Foster Williams Coast Guard Building;" to the Committee on Public Works and Transportation.

By Mr. MOODY (for himself, and Mr. OBEY):

H.R. 3932. A bill to provide for State regulation of the transportation of high level radioactive waste; jointly, to the Committee on Interior and Insular Affairs, Energy and Commerce, and Public Works and Transportation.

By Mr. ORTIZ:

H.R. 3933. A bill to amend title 28 of the United States Code to authorize the appointment of additional bankruptcy judges for the southern district of Texas; to the Committee on the Judiciary.

By Mr. PASHAYAN (for himself, and Mr. THOMAS of California):

H.R. 3934. A bill to amend the Wild and Scenic Rivers Act and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ST GERMAIN

H.R. 3935. A bill to require candidates for the office of Representative or Senator to provide copies of their State and Federal income tax returns for publication in the CONGRESSIONAL RECORD; to the Committee on House Administration.

By Mr. SMITH of Florida (for himself, Mr. FASCELL, and Mr. HYDE):

H.R. 3936. A bill to amend the Controlled Substances Act to create new penalties for the use of children in the distribution of controlled substances and for the manufacturing with intent to distribute, the possession with intent to distribute, or the distribution of designer drugs, and for other purposes; jointly, to the Committees on Energy and Commerce and the Judiciary.

By Mr. WHEAT:

H.R. 3937. A bill to amend title 5, United States Code, with respect to withholding certain city or county taxes from the pay of Federal employees; to the Committee on Post Office and Civil Service.

By Mr. WHITTEN:

H.J. Res. 476. Joint resolution making further continuing appropriations for fiscal year 1986; to the Committee on Appropriations.

By Mr. NEAL:

H.J. Res. 477. Joint resolution proposing an amendment to the Constitution of the U.S. providing that, except in cases of national emergency, expenditures of the U.S. Government in any fiscal year shall not exceed its revenues for that fiscal year; to the Committee on the Judiciary.

H.J. Res. 478. Joint resolution proposing an amendment to the Constitution of the United States providing that, except in cases of national emergency, expenditures of the U.S. Government in any fiscal year shall not exceed its revenues for that fiscal year and shall not exceed 20 per centum of the gross national product of the preceding calendar year; to the Committee on the Judiciary.

By Mr. ASPIN (for himself, Mr. EVANS of Illinois, Mr. FUSTER, Mr. BOLAND, Mr. EMERSON, Mr. MOAKLEY, Mr. BENNETT, Mr. MRAZEK, Mrs. BENTLEY, Mr. O'BRIEN, Mr. STENHOLM, Mrs. HOLT, Mr. HEFTEL of Hawaii, Mr. KOLTER, Mr. STOKES, Mr. LANTOS, Mr. HAYES, Mr. HENDON, Mr. DORNAN of California, Mr. SAVAGE, Mr. MINETA, Mr. FAZIO, Mrs. BOXER, Mr. HUGHES, Mr. MATSUI, Mr. YOUNG of Florida, Mr. DWYER of New Jersey, Mr. HARTNETT, Mr. NICHOLS, Mr. RAHALL, Mr. QUILLEN, Mr. VOLKMER, Mr. SCHUMER, Mr. SOLOMON, Mr. LAFALCE, Mr. RUDD, Mr. YOUNG of Alaska, Mr. LEVIN of Michigan, Mr. CROCKETT, Mr. BUSTAMANTE, Mr. SHUMWAY, Mr. GINGRICH, Mr. LUNDINE, Mr. MCGRATH, Mrs. MEYERS of Kansas, Mr. HORTON, Mr. BRYANT, Mr. DAUB, Mr. YATRON, Mr. SCHUETTE, Ms. MIKULSKI, Mr. MARTINEZ, Mr. MOODY, Mr. BORSKI, and Mr. BOUCHER):

H.J. Res. 479. Joint resolution to designate October 8, 1986, as "National Fire Fighters Day"; to the Committee on Post Office and Civil Service.

By Mr. BOEHLERT:

H.J. Res. 480. Joint resolution designating the week beginning April 13, 1986, as "National Medical Laboratory Week"; to the Committee on Post Office and Civil Service.

By Mr. PEPPER:

H.J. Res. 481. Joint resolution to designate the week of February 9, 1986 through February 15, 1986 as "National Burn Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. ST GERMAIN:

H.J. Res. 482. Joint resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SHAW (for himself, Mr. CHAPPELL, Mr. LIVINGSTON, Mr. ROTH, Mr. JEFFORDS, Mr. LUNGREN, Mr. WISE, Mr. RIDGE, Mr. EDWARDS of Oklahoma, Mr. WOLPE, Mr. BEVILL, Mr. FLIPPO, Mr. MICHEL, Mr. LOTT, Mr. KEMP, Mr. WRIGHT, Mr. FOLEY, Mr. GEPHARDT, and Mr. HOWARD):

H.J. Res. 483. Joint resolution to designate the first Friday of May each year as "National Teacher Appreciation Day", to the Committee on Post Office and Civil Service.

By Mr. DORNAN of California:

H. Con. Res. 259. Concurrent resolution expressing the sense of Congress that the President should express to the Government of the Soviet Union the disapproval of the American people concerning that Government's systematic nondelivery of international mail addressed to certain persons residing within the Soviet Union, that the Department of State should pursue this matter at the diplomatic level with the Soviet Union and other countries, and that the United States delegation to the next Congress of the Universal Postal Union seek the compliance of the Government of the Soviet Union with the acts of the Universal Postal Union; jointly, to the Committee on Foreign Affairs and Post Office and Civil Service.

By Mr. GLICKMAN (for himself, Mr. LUJAN, Mr. BROWN of California, Mr. LEWIS of Florida, Mr. MINETA, Mr. WALKER, Mr. ROE, Mr. BOEHLERT, Mr. NELSON of Florida, Mr. PACKARD, Mr. ANDREWS, Mr. GORDON, Mr. DORNAN of California, Mr. PRICE, Mr. BRYANT, Ms. OAKAR, Mr. WHITEHURST, Mr. WORTLEY, Mrs. BENTLEY, Mr. PORTER, Mr. CARR, and Mr. WILSON):

H. Res. 340. Resolution expressing the sense of the House of Representatives that a national program of hypersonic aircraft research and technology development lead-

ing to a proof-of-concept flight demonstration should be pursued vigorously by the National Aeronautics and Space Administraton; to the Committee on Science and Technology.

By Mr. LOTT (for himself, Mr. FRENZEL, Mr. VANDER JAGT, Mr. PURSELL, and Mr. MCCANDLESS):

H. Res. 341. Resolution to amend the rules of the House to prohibit the solicitation of political campaign contributions by Members, officers or employees of the House or employees of the U.S. Government, and to prohibit such solicitations by any person in any House office, building, or portion of the Capitol; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. BLILEY introduced a bill (H.R. 3938) to provide for a 10-year extension of patent numbered 3,435,845; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 471: Mr. WHITEHURST, Mr. DAUB, Mrs. BENTLEY, Mr. WILSON, and Mr. HYDE.

H.R. 864: Mr. SKELTON and Mr. BARNES.

H.R. 870: Mr. BONIOR of Michigan, Mr. GINGRICH, and Mr. SHELBY.

H.R. 979: Mr. DANIEL and Mr. BARNARD.

H.R. 1139: Mr. APPLEGATE.

H.R. 1356: Mr. BUSTAMANTE, Mr. LEATH of Texas, and Mrs. VUCANOVICH.

H.R. 1875: Mr. ROBERTS, Mr. VANDER JAGT, Mr. GRAY of Illinois, Mr. PURSELL, Mr. DOWNEY of New York, and Mr. VOLKMER.

H.R. 2010: Mr. PURSELL.

H. Res. 219: Mr. GILMAN.

SENATE—*Thursday, December 12, 1985*

(Legislative day of Monday, December 9, 1985)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

God of all comfort, be with Senator GOLDWATER, his two sons and two daughters, in the loss of his beloved wife Peggy.

This morning we feel the pain of the families of the 250 soldiers and the 8 crewmembers killed in the airplane crash at Gander Airport in Newfoundland, and we pray for them.

Father in Heaven, we beseech you for Your continued guidance—Your enablement—as the Senate works its way through controversial issues and clashing wills in a tough agenda. This room is occupied by 100 of the most powerful people in the Nation—for that matter, the world. Each is one, among many in his State, chosen and entrusted with the delicate, difficult stewardship of the democratic process. It is awesome to contemplate the immense potential when their power is united. It is tragic to observe the impotence when their powers collide and neutralize the power of each so that the whole is less than the sum of its parts.

You know the Senators, Lord, their motivation, purpose, sincerity, commitment. Protect them from the contradiction of national leaders victimized by their own power, position, prestige, and self-image. Protect their families from being victims. Renew the Senators in their dedication to the mandate which brought them to this Chamber and the will to be faithful to those who believed them and sent them here. Gracious God, transfigure these closing days of this session into a shining hour for the U.S. Senate. In His name Who was the Servant of all. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, and then routine morning business not to extend beyond the hour of 9:30, followed by, I guess, the OPIC conference report, S. 947, then the White Earth Indian Reservation bill under a 4-hour time agreement. Hopefully, today we can do the counterterrorism bill under a time agreement, possible trade legislation, if there can be a time agreement, and any conference reports that accompany the so-called must items. I think the only one that could possibly come before us today would be the continuing resolution.

We still, before we complete action this year, must come to grips with the farm bill. That means passing it. Hopefully, we could break the logjam on that in the conference this morning. Second, the farm credit legislation. There are a couple of ways we can approach that and dispose of that before we leave. And then reconciliation.

It would seem to me we would be walking away from all the work that many committees and many Members were engaged in throughout the year if we failed to pass a conference report on reconciliation. It involves a total of $85 billion in spending reductions over the next 3 years. I hope we will not say, "Well, that is something we can delay until next year."

There is little hope that we will adjourn this week. So it is now my hope that we may adjourn by midweek of next week. It seems to me that that would be the earliest time.

I will try to advise Members about this evening. I doubt that we will have a late evening, unless we are waiting on a conference report.

Also, because so many of our colleagues are involved in conferences, we would like to stack the votes, if there are any votes requested this morning, until about 1 o'clock and any other votes, maybe, until about 4 or 5 o'clock this afternoon to avoid Members' breaking up their conferences, coming back to the floor, and wasting a lot of their very valuable time in the last few days of the session.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER (Mr. MCCONNELL). The acting Democratic leader is recognized.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that 2 minutes of the Democratic leader's time be reserved for his use at any time today.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE NUCLEAR THREAT TO THE PACIFIC

Mr. PROXMIRE. Mr. President, the Prime Minister of New Zealand has said that he objects to the use of New Zealand ports by American ships carrying nuclear weapons. New Zealand may ban such American ships in the future. Our State Department has told New Zealand that if they prevent American ships from using New Zealand ports, we will regard this as a violation of our mutual defense agreements with New Zealand. The effect of that could exclude New Zealand from the protection of American naval and other military forces in the event of a Pacific war. Australia has announced that she would provide what military protection she could to New Zealand even if New Zealand is deprived of American protection. Australia has also indicated that, at least for the present, she will not ban American ships carrying nuclear weapons from her ports.

The New Zealand embargo of American ships carrying nuclear weapons could spread throughout the world. We Americans have very different views than New Zealand's Prime Minister. And why not? Here we are a super nuclear power. We are the nation that first developed nuclear weapons. We are the only nation that has ever exploded nuclear weapons as an act of war. We are a nation that now includes some 25,000 nuclear weapons in our arsenal. We see the Pacific Ocean as our ocean, an American ocean. We have far and away the most powerful Navy in the world. Our Navy bestrides and dominates the Pacific. No other nation, certainly not the Soviet Union, can even dream of challenging our naval power. Naturally, we want to keep it that way. As we see it, this total naval domination of the Pacific by the United States serves the interest of New Zealand. We are friendly. We have no designs on New Zealand. We constitute an important market for New Zealand goods. So why should New Zealand worry if, from time to time, we find it convenient for our ships carrying a nuclear payload to dock in New Zealand? What is the problem?

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Mr. President, the problem is a real and legitimate problem. It is shared by the overwhelming majority of nations throughout the world. This vast majority of the world's nations have no nuclear weapons. They have no desire ever to acquire nuclear weapons. But they see the two superpowers rushing ahead pell mell in a nuclear power buildup which they are now told by the most eminent scientists in the world could bring to all the people in the world a nuclear war which would constitute the most devastating environmental disaster in 65 million years: A nulcear winter. The people of New Zealand would be victims just as surely as the people of America and Russia. The people of New Zealand mind their own business. They work hard. They treasure their freedom and their nation's sovereignty. They feel that that freedom and sovereignty entitles them to keep nuclear weapons out of their ports.

And there is another more immediate nuclear weapons concern that those who dwell in Pacific lands share. The nuclear policies of the United States have endangered them for years. In a recent article in the New York Times, Jonathan Weisgall, who is writing a book on U.S. nuclear testing in the Pacific, reports that:

> The United States conducted 66 nuclear tests in the Marshall Islands, and France continues testing at Mururos Atoll. Japan has proposed dumping nuclear wastes off the Northern Marianas. In response to these developments, the 13 members of the South Pacific Forum, including Australia and New Zealand, last summer ratified a treaty banning the manufacture, testing or stationing of nuclear arms in almost all the South Pacific. This wide antinuclear sentiment is summed up in a poster that says, "If it's so safe, store it in Washington, dump it in Tokyo and test it in Paris."

That is an interesting statement.

Mr. President, I challenge any Senator to put herself or himself in the position of a New Zealander or a resident of the Marshall Islands or the Mariannas, and I ask you, would you not share that same resentment against both superpowers for this senseless nuclear arms race, for the failure to end nuclear weapons testing totally and forthwith, and for their arrogant disdain for effective arms control?

The Prime Minister of New Zealand probably will not get much sympathy in this body. Most Senators will share the sentiment of the administration that sees this country as the great protector of the freedom of the democracies in the Pacific and throughout the world. Most Senators feel the price of that freedom to the Pacific nations must be to tolerate the nuclear weapons policies of this colossus of the Pacific. No question about it—the United States does, indeed, provide the people of the Pacific a protection against Soviet communism. We can do a great deal better, however, in providing protection against the consequences of the unrestrained nuclear arms race and the prospects of nuclear war.

MYTH OF THE DAY: PHONE RATES UP SINCE BREAKUP

Mr. PROXMIRE. Mr. President, the myth of the day is that the breakup of the American Telephone & Telegraph System has lowered telephone rates.

You might remember back in January 1984, the Bell System was broken into eight giant pieces: Seven regional companies handling local phone service and AT&T responsible for long distance. The primary rationale was to create a competitive long distance telephone system and thereby reduce phone bills.

Well, this is one of those good news, bad news stories. The good news is we still have the finest telephone system in the world. Since the breakup, businesses have benefited from new technologies and high-speed data processing services. And there has been that expected drop in long distance telephone rates as rivals of AT&T set up their own long distance services. Consumers now can buy their own phones and choose from an amazing variety of designer phones, ones with speed dialing or memory calling.

Has this helped business and consumers? It certainly has. Business communication is more efficient and consumers now have a greater choice of phones and service.

But there is a down side, a bad side to the good.

A recent study concluded that all too often consumers are paying more for telephone service with no real improvement in service. What does that mean? It means that while long distance rates have gone down, rates for basic local phone service have risen. Those are the rates you and I pay for our home phone service. According to this study—by the Consumer Federation of America—the nationwide average for basic, unlimited flat-rate phone service increased by 35 percent over the last 2 years. Looking ahead, some warn costs to consumers could double or triple by the end of the decade.

For poor and elderly Americans, those rising rates may come down to something very basic: The difference between having or not having a phone.

Think about that for a moment: Not being able to afford a telephone. That is not a very happy prospect, especially if you are old or poor.

So while our phone system remains unparalleled, there are warning signs we should heed.

Rising rates could mean the end of virtually universal phone service. Although long distance phone rates are lower for all of us because of the breakup of AT&T, for some Americans the cost of local telephone service threatens to become too great a burden.

"SHOAH" A HEBREW WORD FOR CATACLYSM

Mr. PROXMIRE. Mr. President, "Shoah" is a Hebrew word for cataclysm. It is also the title of a 9-hour documentary dramatizing the Holocaust.

The film documents chilling interviews with the survivors of Nazi death camps and records the emotional reports of those assisting in the mass exterminations. French director Claude Lanzmann relentlessly taps the memories of a survivor of a Polish death camp. He secretly films a former SS officer's account of squeamish details of murder. Mr. Lanzmann unmercifully takes the dramatic testimony of a Jewish barber once in charge of cutting the hair of those about to enter the gas chamber.

His acute attention to detail stirs a painful recollection of the Holocaust. Shoah will do much to publicize the atrociousness of genocide. So will the Genocide Convention.

But the Genocide Convention will make further assurances that there will be no more Shoahs. The convention undertakes to prevent and to punish acts of genocide. As an international law, it will strengthen the worldwide dedication to prevent another Holocaust.

The United States can greatly contribute to this purpose by adding its name to the list of 96 nations already having ratified the treaty. Now is an invaluable opportunity to condemn and curtail continuing acts of genocide—in Afghanistan, in Iran, in East Timor, and elsewhere. We are urged by President Reagan and our colleagues in this body, at this very moment, to seize this initiative and ratify the Genocide Convention.

Let us not ignore the encouragement from our leadership. They plead with us to recognize the convention's ability to combat genocide and uphold the dignity of human rights. I ask the Senate to turn to the Genocide Convention quickly and vote for its immediate ratification.

WISCONSIN ELECTRIC CO. AND THE FIGHT AGAINST ACID RAIN

Mr. PROXMIRE. Mr. President, Wisconsin Electric Power Co. recently announced a terrific 6-year, $600 million program to clean up its sulfur dioxide emissions and install innovative new technology in two plants.

Not only does the company's plan result in cleaner air but it provides almost 900 new construction jobs and establishes the company as a national leader in its industry.

The company will convert four units at the Oak Creek Powerplant to atmospheric fluidized bed combustion, the largest such installation in the world. Four other units at Oak Creek and four at the company's Port Washington plant will also be renovated, extending their useful lives and reducing their emissions.

In addition, the company will burn lower sulfur coal at all its major plants and is applying for funds under the Clean Coal Program to install a demonstration of the even newer pressurized fluidized bed technology at the Port Washington plant.

According to the company, these actions, in combination, will reduce emissions by 42 percent over 1980 levels and 50 percent over 1970 levels, despite a 64-percent increase in electricity generation during the same period. The atmospheric fluidized bed units alone will result in a 90-percent reduction in emissions for the boilers in which they are installed.

Yet, in spite of all these reductions, Wisconsin Electric's customers will not suffer. Instead, they will benefit from these cost-effective strategies which extend the lives of existing boilers instead of building costly new plants.

Mr. President, these actions by Wisconsin Electric provide a model for the rest of the utility industry of ways to produce clean air as well as electricity. The achievements of this firm should be repeated nationwide and saluted by environmentalists everywhere.

Mr. President, I yield the remainder of my time—and I know we are about to go into morning business, so there will be 5 minutes there in addition—to my good friend from Oklahoma.

I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 9:30 a.m., with statements therein limited to 5 minutes each.

Mr. PROXMIRE. Mr. President, I yield the remaining time of the leader also to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. BOREN. Mr. President, I thank my distinguished colleague for yielding to me.

OIL IMPORT FEE

Mr. BOREN. Mr. President, over the past few weeks, we have been putting the finishing touches on the work of this session. The bills now winding down to a final vote are important bills, Mr. President. The legislation now traveling through final processes of the various joint conferences will immediately and dramatically affect our Nation and each individual American.

But Mr. President, I would hope that in our zeal as Senators to address these issues, we would not ignore our role as guardians of the future. We must try to look ahead and not wait to deal with potential problems until they reach crisis proportions.

Because we face so many immediate problems, we have the bad habit of putting off those that seem less immediately pressing. We put them aside, planing to return to them at a more convenient time. Often, however, these problems do not wait for us, and before we have had a chance to act, they become far more dangerous and demand far more difficult solutions.

Several weeks ago I suggested to my colleagues just such a specter. This specter is still with us, just beyond the spotlight, and I do not want to let this session end without once again sounding a warning to my colleagues.

We have all taken some pleasure, Mr. President, from the loosening of the OPEC strangle hold on our economy and the resulting drop in the price of oil. Our Nation is to be congratulated for its conservation efforts to reduce dependence on imported oil and for its thrust in domestic oil exploration and production.

This progress is threatened by potential sudden drops and instability in oil prices.

Oil imports by Western nations in 1984 were actually less than imports before the oil crisis in the early 1970's. But since 1981, the price of oil has been falling and imports into the United States have risen. If prices continue to fall, the Department of Energy predicts, America's oil imports will double by 1995.

The hard lessons of conservation taught by high oil prices may be forgotten by a nation awash in cheap gas, and we may find ourselves profligate users of precious energy, surrendering once again to the cartel of the Mideast producers.

But, Mr. President, even before that happens, the fall in the price of oil could cause severe difficulty in our domestic economy without the help of OPEC.

Since the weakening of OPEC, analysts have predicted that there could be sudden sharp drops in the price of oil. Only yesterday, the New York Times in an editorial repeated the possibility that oil will fall $10 per barrel, to $18 per barrel or below. Mr. President, let me say that if the price of oil were to fall to $18 per barrel or lower, the domestic oil industry in this country would be devastated, and domestic production would be severely curtailed. We as a nation could no longer be proud that we have reduced our dependence on foreign oil and increased our reliance on domestic production, Mr. President, because the foundation of our domestic producers will have been shaken from beneath them.

The value of oil reserves in the ground is used as security for billions of dollars in loans held by American banks. If the value of these reserves were to drop so drastically, not only would the domestic industry suffer, but the effect of this deflation of assets would have a domino effect on the financial system, sending major shock waves even through the big money centers such as New York and Chicago.

Mr. President, I suggest that we can avoid that event. I suggest that we can put in place an oil import fee that will allow us to preempt the negative effects of a dramatic fall in the price of oil and still enjoy the benefits such a drop could bring our economy.

My legislation proposing such a fee was introduced in August. My plan includes a variable cost per barrel on imported foreign crude and imported refined products. It would be regionally fair and would preserve competitiveness in sensitive areas of trade.

Mr. President, an oil import fee such as the one I am suggesting, which would not raise oil prices from current levels, would generate as much as $15 billion per year for the U.S. Treasury.

The $15 billion per year is a matter of some consequence in these days of intolerable budget deficits, Mr. President. It is becoming clear that early next year we will face dramatic cuts in social and defense spending under the provisions of the Gramm-Rudman deficit reduction mechanism. The revenue from an oil import fee would sharply reduce the amount of these automatic cuts and would reduce the need for tax increases on average Americans while protecting the stability of our economy and financial system at the same time.

Mr. President, the specter is still well in the shadows. There is today no cause for panic in the domestic energy industry nor in our Nation's huge financial markets. It is possible, in fact, that prices will not fall as dramatically as some have predicted, and that the tiers of an oil import fee would never begin to phase in. But Mr. President, it is a role of this body—the U.S. Senate—to foresee potential dangers and to put in place a safety net for the goals we have achieved in energy conservation, for America's domestic energy industry, and the country's financial system which funds that industry.

Now is the time for an oil import fee. It is simply too good an idea to discard. Mr. President, I have today written the chairman of the Finance Committee, Senator ROBERT PACKWOOD, requesting hearings as early as possible in January on my bill. There are other proposals for such a fee. There are undoubtedly possibilities to modify and

perfect my proposal, but it is vital that we push ahead with hearings on the entire subject.

We must not delay. We must not wait until a potential problem now just over the horizon becomes a full-blown crisis.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point the letter which I wrote to Chairman PACKWOOD requesting hearings on the subject of an oil import fee; also, an article from the Washington Post of December 12 which recounts the dramatic fall in the futures market for oil prices described by one petroleum futures analyst, as "It's just an unmitigated catastrophe. This is the oil market's 1929."

Mr. President, I also ask unanimous consent that the letter which I wrote to the budget conferees in July be printed in the RECORD. The conferees, I might say, under the leadership of the Senate, took this same proposal to the White House this summer. I ask that it appear at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, December 11, 1985.

Hon. BOB PACKWOOD,
U.S. Senate,
Washington, DC.

DEAR BOB: I am writing to ask your assistance in scheduling hearings before the Finance Committee at the earliest possible time on the issue of oil import fees in general and S. 1507, the Energy Independence Act, in particular.

Enclosed is a copy of the letter I sent to the Budget conferees last July, in which I warned of the devastating impact of a sudden drop in the price of crude oil. While of course we still hope that this will not occur, OPEC's recent decision to maintain market share in the face of falling prices, increases the possibility for damaging instability of oil prices.

Now is the time for us to act. We must not allow this opportunity to prevent severe damage to the domestic energy industry and the resulting ripple effect through our entire economy to pass us by. I am not alone in my interest in this matter, several of our colleagues have expressed an interest in this legislation. There are also other proposals which have been made for an oil import fee. It is time we grant this issue the forum it requires.

I appreciate your consideration of this matter, and hope that we can have hearings on this matter early in the new year and explore my proposal and others for the establishment of an import fee.

Sincerely,

DAVID L. BOREN,
U.S. Senator.

[From the Washington Post, Dec. 12, 1985]

PETROLEUM FUTURES CONTINUE TO FALL

Petroleum futures continued to collapse yesterday on the New York Mercantile Exchange. The selloff was triggered by the weekend meeting of the Organization of Petroleum Exporting Countries and its decision to maintain market share even if prices fall, said Peter Beutel, a petroleum analyst in New York with Rudolf Wolff Futures. "It's just an unmitigated catastrophe. This is the oil market's 1929," he said.

Prices fell by the daily limits yesterday even though they had been increased from the normal $1 a barrel for crude oil and 2 cents a gallon for distillates and gasoline. Because prices fell by the limits again yesterday, the limits will be expanded once again today, said Mary Ann Matloch, a spokeswoman for the exchange.

Crude oil settled $1.50 to $2.28 lower, with the contract for delivery in January at $25.23 a barrel; heating oil settled 3 cents to 4.49 cents lower, with January at 75.11 cents a gallon.

U.S. SENATE,
Washington, DC, July 17, 1985.

Senator PETE DOMENICI,
U.S. Senate,
Washington, DC

DEAR PETE: As you struggle with the urgent need to develop a plan to reduce the budget deficits I would suggest that there has never been a better time to consider an import fee on foreign crude oil and refined products.

First, it could provide an important source of revenue to help us balance the budget. A fee of $5 per barrel on imported crude and $10 per barrel on refined products would produce a total of $18.59 billion in revenues for the federal government.

Second, it is only fair that foreign producers bear a part of the burden. Domestic producers already pay income taxes, in addition to the windfall profits tax and severance taxes which foreign producers do not have to pay. Current refining capacity has fallen to only 14 million barrels per day. Studies reveal that U.S. refining capacity is at or below the level required to meet our basic security requirements. This fee would stem the flow of domestic refinery closings.

Third, the import fee could be designed to prevent any unfair regional impact by rebating fees paid on home heating oil, through block grants to heavily impacted regions, and by exempting oil and feedstocks used inherently in the manufacturing process.

Fourth, the fee would enhance energy conservation. If oil prices drop as much as has been projected, wasteful use of energy will again be encouraged. The fee could be designed to begin phasing down when oil prices exceeded $30 per barrel and completely phased out at $35 per barrel to make sure that undue burdens are not placed on consumers.

Fifth, the fee would place a safety net to protect the national economy and financial system against the threat of a ripple effect if the price of oil dropped suddenly to the $20 level or below, as some analysts predicted in the media over the weekend. A sudden sharp drop in oil prices could so devastate the domestic industry and banking institutions which finance that industry, that it could pose a threat to the entire economy. It makes sense to put a safety net under the domestic industry which at the same time would promote tax fairness, help balance the budget and encourage sound energy conservation.

I urge the budget conferees to seriously consider this proposal.

Sincerely,

DAVID L. BOREN,
U.S. Senate.

Mr. BOREN. Mr. President, in view of recent events, it is my intent to also contact the Secretary of the Treasury and the Chief of Staff at the White House, as I did last summer, to urge them to reconsider the proposal which they temporarily set aside this past summer.

THE PENDING FARM BILL

Mr. BOREN. Mr. President, on another subject, last night, I made brief remarks on the floor and inserted into the RECORD additional comments about the pending farm bill which is now in the agricultural conference between the House and the Senate.

I want to repeat what I said last night.

There are those who say we must have a farm bill before this session is finished. I have seen that mentality take over this body in the past, the idea that for some reason we must have a bill. It does not matter what bill, it does not matter the contents of the bill, we simply must have a bill.

That line of argument, Mr. President, is ludicrous. I want to repeat what I said last night. Yes, the farmers of the country would like to have a good farm bill. They would like to have a good farm bill reported immediately, so there might be some hope for their survival. But they do not want a bad farm bill. They do not want a farm bill that will leave them without hope.

It would be far better to write a good farm bill in January and February of next year than to rush a bad farm bill through to passage now. I hope that every Member of the Senate and every Member of the House of Representatives read in the papers yesterday all across this country the front page story of the tragedy which occurred in a rural community in Iowa. I hope they read about a 63-year-old man, a pillar of the community, a man who contributed so much to his own community, a good neighbor, who, because of the financial pressures he was facing, became so distraught and mentally deranged that he killed his beloved wife of 40 years, then he turned the gun on one of his neighbors with whom he had had a good relationship, that ended up by taking the life of the community's banker who tried to carry him through his difficult financial times, and then turned the gun on himself and tragically took his own life.

I wish I could say, Mr. President, that those actions taking place in that community just a few hours ago in the Midwestern part of this country were atypical.

Mr. President, as I go around my own State and in the agricultural communities in my State, I have never witnessed such massive emotional depression on the part of a group of people since I have been in public office.

As I was riding back on the subway car last night, back over to my office after making those comments on the floor, I ran into two or three other people who were saying they had read the article. As one of them said, "What a tragedy."

These were not people who refused to work. These are hard-working people who work on farms from sunup to sundown. Yet they are having problems over which they have no control and they are desperate.

Mr. President, when you are 63 years old and farming is all you have ever known, there is no way to make a fresh start. It is pretty late in the day to learn a new skill and move your family to some other part of the country, uprooting yourself from the farm where your family has lived for several generations.

Mr. President, the farm bill now in conference, and the proposals that were made which were pending last night, would, instead of offering hope, reduce farm incomes between 6 percent and 11 percent next year.

Mr. President, I cannot in conscience be a part of that. I will not go back to the farming communities where I have been and tell them that I assisted in any way in the passage of a bill to reduce farm incomes between 6 and 11 percent a year.

I will not go back to those in their sixties who live on the farms and whose families have lived there for two or three generations and who are about to lose their farms and tell them that all we can do is offer a bill that is going to mandate no hope but utter hopelessness for them. I will not do that.

I hope, Mr. President, that the conferees will hear the message that is coming across the country and at the very bare minimum will produce a farm bill that will enable us to have hope of some modest improvement in farm incomes. If we are just to continue the status quo it will provide no hope for those who are so desperate in the Farm Belt of this country, those in an area of the country where we are about to see one of the largest social upheavals in modern times if we do not take action.

Mr. President, I will just say again, and I hope the conferees hear it, this Senator in conscience cannot be a part of getting a bad farm bill rushed into law before we leave for the Christmas recess. This Senator hopes to have the opportunity to help enact a good farm bill. This Senator will do what he can to make sure that we do not rush a bad bill into law, one that will take away hope in the agricultural community simply under the banner that we must have a bill. We must have a good farm bill, Mr. President; we must not have a bad farm bill that will cut farm incomes from the current levels.

THE GENOCIDE TREATY

Mr. METZENBAUM. Mr. President, the other day on the floor of the Senate an effort was made by the majority leader to get a unanimous-consent request having to do with the subject of bringing up the Genocide Treaty.

At that time, an objection was registered, as he had a right to do, by the senior Senator from North Carolina.

At that point, the senior Senator from North Carolina indicated that part of his opposition to bringing up the Genocide Treaty at that point, or at any point for that matter, related to his concern for the State of Israel and reflected views of many of the leaders in the American Jewish community.

The Senator from Ohio then took the floor in order to challenge that position. I said that I felt I was far more able to speak to the position of the American Jewish community than was my distinguished colleague from North Carolina. After I concluded my remarks, the Senator from Nevada [Mr. HECHT] arose to say that he had been speaking with some lawyers who had indicated their concerns and pretty much joined in the position of the Senator from North Carolina.

Since that point, Mr. President, I have had an opportunity to discuss this subject with a number of leaders of the American Jewish community. One of them has been particularly active and involved in this entire issue over a period for many years. He is Mr. Hyman Bookbinder, the Washington Representative for the American Jewish Committee. I take this means of reading into the RECORD the letter that he addressed to me in connection with this matter. It is dated December 10, 1985.

Senator HOWARD METZENBAUM,
140 Russell Office Bldg., Washington, DC.

DEAR SENATOR: I have just read the colloquy on the Senate floor on December 5 regarding the unanimous consent request to consider the Genocide Treaty. I write to express my profound appreciation to you for making it clear that the Jewish Community actively supports Senate ratification of the treaty, as it has for over 30 years now. It is simply mind-boggling to have it suggested by the Senator from North Carolina and the Senator from Nevada that there is Jewish opposition as such to ratification.

Whatever some individuals might have indicated to these Senators, I can assert with authority that every recognized national Jewish organization is and has been enthusiastically supportive of ratification. I know whereof I speak. As Chairman of the group of Washington Representatives of all national Jewish agencies, I know first-hand how supportive the entire Jewish community has been, and remains.

There have always been some individuals and groups that have imagined all kinds of horror stories about the possible abuse of the treaty. A number of understandings and reservations have been developed which surely should satisfy even the most skeptical opponents that their fears are unwarranted. At what I hope is the last moment before this much-to-long-delayed action by the Senate, it is now suggested that Israel, and presumably the Jewish people, would be hurt by Senate ratification. This is among the more ludicrous arguments that have been raised. Israel itself was among the first ratifiers of the treaty, and many Israeli leaders over the years have urged American ratification. Moreover, the treaty has existed for over 30 years. Why would American ratification now make it a threat to Israel?

Again, Senator, thank you for setting the record straight.

Sincerely,

HYMAN BOOKBINDER,
Washington Representative.

Mr. President, I rise because I am concerned that ratification of the Genocide Treaty is long, long overdue. As a matter of fact, at the conclusion of the session last year, we made in this body a firm commitment, a specific direction to the leadership of the Senate to bring it up in early 1985. That has not been done.

We owe it to ourselves. We were the ones who instructed ourselves to bring it up. We owe it to ourselves to meet our own commitment. But far more important than what we owe to ourselves is the fact that we owe it to those who lost their lives and gave their lives in the Holocaust—11 million of them, 6 million of them Jews—and so many others who have been victims of genocide over the years. We owe it to the memory of each and every one of them to move with dispatch and quit befuddling the issue.

The Genocide Treaty should be ratified. It can be ratified. The votes are here to do it.

Bring that issue to the floor. Let those who want to fight for the reservations do so. Let us have an up-or-down vote on the reservations but let us also have an up-or-down vote with respect to ratification of the Genocide Treaty.

One man in the U.S. Senate has addressed this issue specifically over many, many years. We all doff our hats to Senator PROXMIRE, who is that individual. Let us join his leadership and bring this matter to the floor at the earliest possible date. Let us not befuddle the issue any further.

LET'S PASS THE FARM BILL

Mr. PRYOR. Mr. President, I want to take a couple of minutes today to express my desire and hope that we complete action on the 1985 farm bill before we adjourn for the year. This bill simply has to be considered "must" legislation. We've already disposed of the extension of the public debt limit, and we're going to pass the stop-gap funding measure, the continuing resolution. But, the farm bill should be on the list of "must" items.

I've heard rumors that the leadership in the House of Representatives intends to adjourn tomorrow night,

Friday, regardless of whether or not the conference report on the farm bill is passed. This bill is so important to our Nation's agricultural producers, Mr. President, that we simply must not adjourn until we complete action on it. If the Speaker of the House, Mr. O'NEILL, wants to leave this weekend, I'll pay his airfare back to Washington next week if he'll just keep the House in session long enough to consider the conference report on the farm bill.

Mr. President, our farmers have to know what the next farm program will be. The only way this can be done is for the Congress to complete action on the bill this year. I'm willing to stay here as long as it takes to do this, and I hope the leadership of both the House and the Senate will keep us in session until this piece of "must" legislation is completed.

EFFECT OF GRAMM-RUDMAN ON BASE CLOSURES

Mr. MOYNIHAN. Mr. President, I rise to express regret to the Senate that in the heat of yesterday's debate on the Gramm-Rudman legislation, I may have exaggerated what I regard as the devastating impact the bill will have on the American defense program.

In the cool light of day, I have reexamined the measure and report with relief that section 252(a)(2)(C)(ii) states:

No order issued by the President . . . for fiscal year 1986 may result in a base closure.

CHIEF JUSTICE WARREN E. BURGER AND THE BICENTENNIAL OF THE CONSTITUTION

Mr. THURMOND. Mr. President, on September 17, 1987, our Nation will celebrate the bicentennial of its great Constitution. In 1983, Congress expressed its belief in the importance of this event by authorizing the establishment of the Commission on the Bicentennial of the U.S. Constitution.

Approximately 5 months ago, the Bicentennial Commission began its efforts to promote and coordinate activities to commemorate the bicentennial.

As one who is privileged to be a member of the Commission, I am pleased to report that the Commission is off to an excellent start. I believe that most of the credit for the Commission's fine beginning must go to its distinguished chairman, Chief Justice Warren E. Burger.

The importance of the Chief Justice to the Commission and the evidence of his leadership in coordinating an appropriate and meaningful bicentennial of the Constitution was clearly displayed in an article printed yesterday in the New York Times. I ask unanimous consent that the article, "The Chief Justice Is Calling," written by Mr. James Reston, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 11, 1985]

THE CHIEF JUSTICE IS CALLING

(By James Reston)

WASHINGTON.—It's not often that the Chief Justice of the United States emerges from the silent portals of the Supreme Court to call on the American people for help, but Warren E. Burger is calling on us now.

As chairman of the Bicentennial of the United States Constitution, he is asking us not to forget our present conflicts but to remember the 200th anniversary of the signing of the Constitution on Sept. 17, 1987, and to use these coming two years to educate ourselves and our children about its meaning.

The Chief Justice has no illusion that his speeches, remarkably good as they are, or that the work of his little commemorative committee will arrest the attention of the American people.

He is appealing for help from the media, the schools, the colleges and all other organizations, religious or secular, to give this commemoration of the Constitution the attention it deserves, and so far isn't getting.

How did it come about, Chief Justice Burger asked recently, that 55 men in a country of barely three million produced in Philadelphia almost 200 years ago a Constitution to govern themselves that still serves a nation of 250 million, and remains one of the mysteries and triumphs of the poltical world?

It's a good question, and there are some examples in American history about how it might be answered. On the American frontier, it was the women—always the women—who organized the book clubs and the discussion groups to puzzle out their problems.

Even in the desperate days of the Civil War, Mr. Lincoln signed the Morrill Acts for the creation of the land grant colleges in the belief that the education of the poor would promote the general welfare.

Chief Justice Burger learned all about this in his native Minnesota, and knows the potential power of these American institutions.

Now, in every state, city, town and village, we have parent-teacher associations, service organizations, labor and business institutions, country newspapers, suburban papers, radio and television stations galore—the most spectacular communications network in the history of the world—most of them concentrating on the narrow conflicts of the day's latest disaster.

Chief Justice Burger is not saying that we should evade these unavoidable conflicts—that's what the Supreme Court does every day—but that in the confusion, we should take time out on the 200th anniversary of the Constitution to reflect on where we've been and where we're going.

This would require more than speeches from the Chief Justice. A few fundamental documents could guide the nation's discussion in the next two years.

For example, nearing the end of World War II, and fearing that the United States might reject the organization of the United Nations, as it abandoned the League of Nations after World War I, a very few people in the Roosevelt and later in the Truman Administration put together a clear and simple explanation of the problem and circulated it all over the country for discussion in everything from university classrooms to church basements and Rotary meetings.

This involvement of the people had a critical and maybe even a decisive effect on this nation's foreign policy when at the end of World War II, the New World was summoned to the defense of the old Western civilization.

"One of the unique features of our Constitution," Chief Justice Burger said the other day, "is that it was not a grant of power from government to the people, but a grant of power by the people to the government, which they—the people—had created."

But what I think the Chief Justice is saying is that the people have forgotten to remember, that they are so battered by bad news every day that they have forgotten the foundation of the Constitution.

He knows very well that in the summer of 1987 the Constitution will be big news, when everybody is off on vacation. But that's not his point.

He wants these next two years to be used for the education of our children on what the endurance of the Constitution for 200 years means. He is appealing to the newspapers, to the people who produce documentaries on radio and television, to the school principals and administrators of colleges and universities.

"Please," he's saying, "pay attention to the good news of our history at a time and on an occasion when they might listen. You owe it to your children, who will have to carry the Constitution into the next century."

PRAYER PETITION ON BEHALF OF THE FARMERS OF OUR LAND

Mr. GRASSLEY. Mr. President, earlier this week, the heartland of America was rocked with the tragic news of a triple murder/suicide carried out by a farmer who had lost all hope.

Dale Burr, a farmer from Lone Tree, IA, shot and killed his wife, Emily; his banker, John Hughes; and his neighbor, Richard Goody. He then turned his gun on himself and committed suicide.

The Cedar Rapids Gazette reported that "Burr, according to Johnson County Courthouse documents and other sources, owed more than $600,000, a debt accumulated in recent years. He hadn't purchased any land since 1970, although his son John, acquired 80 acres in 1982."

The fact that he had not tried to buy up every piece of land that he could get his hands on is very important, and I hope my colleagues take special note of that so that they know farmers are in trouble even though they have not bought a lot of land.

The point is thousands of farmers are in financial troubles not because they were greedy, but because they were hit with one calamity after another.

We in Congress have to answer this question: Who should pay for the damage created by our own Government's actions or inactions? Who should pay for the Soviet grain embargo? The runaway inflation that drives

up the costs of farming? Who should pay for our weak trade policy that lets the treasuries of our foreign competitors walk all over our farmers? Who should pay for the damage created by high interest rates resulting from our fiscal and monetary policy?

Many people believe that the answer is to phase out price supports. This is the only safety net farmers have against the abuses of our Government. We cannot take that safety net away until we are willing to promise our farmers never to let the Government or other governments unfairly disrupt our farm economy.

In short, we must promise to truly get Government out of agriculture. But let's take first things first.

Unfortunately, it appears that many have decided that the farmer should pay for the abuses of Government.

Mr. John Hughes, the banker who was killed, was buried yesterday. At the request of his family, Rev. Henry Greiner of St. Mary's Church in Iowa City delivered a prayer.

It is entitled "A Prayer Petition on Behalf of the Farmers of Our Land."

I would like to share this moving prayer with my colleagues in hopes that they can catch a glimpse of the suffering and desperation that permeates the farm country of much of the Midwest.

I particularly hope that our colleagues from the House and Senate who are working in conference on our farm legislation take note of this prayer. As we move toward Christmas, my prayer is that the conferees can shape a farm bill that offers real hope for our Nation's farmers.

I will read the prayer.

PRAYER PETITION ON BEHALF OF THE FARMERS OF OUR LAND

(By Rev. Henry Greiner, St. Mary's Church, Iowa City, at the request of the Family of John Hughes)

Oh God our Father, our hearts are troubled and saddened by the events of these past few days. We, who live in the heartland of this country, cry out to You in this hour of agony, and we fervently pray that You will hear our cry.

First of all, we ask that You send the gift of Your healing Spirit on those who are the innocent victims of this tragedy. Lord, we plead that such a force of violence may never be unleashed on families, neighborhoods and communities again.

Secondly, Lord, we hold out to You the present crisis that hovers over those whose existence depends on tilling, planting and harvesting of the land. We, who live in rural America are in trouble, Lord—not because we have been lazy or irresponsible, or because we have not worked long and hard. As a matter of fact, Lord, the harder we work, the more desperate the situation becomes.

Lord, all we ask is that our President and elected officials will not be deaf to the cry of those who till the soil and feed the nation. All we ask is that our fellow citizens across this land will not trample on the hands that feed them.

Lord, we ask that the sound of these shots—so desparate and so insane—will arouse the conscience of this nation so that we might realize there is more lasting peace and security in a basket of bread than there is a whole bunker of bullets.

But, Lord, our ultimate security rests on You.

Oh, Lord, rescue us from the dangers that threaten to destroy our little towns and a way of life so deeply rooted in the founding strengths of this country—our family farms—bring healing to the hearts and homes of this land where today there may be frustration and loneliness and desperation. Once again, Lord, bring a sense of self-worth and dignity to the oldest and noblest profession in the world, and give us a renewed sense of faith and trust in You.

Finally, Lord, bring Your peace to all who are gathered here.

We ask this in Jesus' name. Amen.

Mr. DURENBERGER. Mr. President, I rise just briefly to compliment my colleague from Iowa for that statement, and to commiserate with him because he shares with the people about whom he spoke one very important common element; that is, before he is a Senator, an important politician in this country, a candidate for election, and everything else, something else. He is a farmer also.

I am sure CHUCK GRASSLEY could hear those shots in that small town more clearly than most other people on the floor of the Senate. I think CHUCK probably better than any of the rest of us understands that no farm bill is going to solve all by itself the problems facing those people.

No magic vote here on the floor of the Senate or waving of the pen by the President of the United States is going to bring those people back to life nor sustain the lives that are gradually being sapped from millions of Americans, particularly in the Midwest.

I know the Senator in the chair, I know my colleague from Iowa, and others on this floor have been to the small towns in America in the last 2 years. They have been to the hospitals. They have been to the food shelters. They have been to the mental health centers. They have talked with the pastors. They talked to the priests. And they have talked to people of rural America who cannot understand—not why we have not passed a farm bill—why, why, oh why the President and elected officials are deaf to the cry of those who till the soil and feed the Nation.

In this prayer, Pastor Greiner says:

Oh, Lord, rescue us from the dangers that threaten to destroy our little towns and a way of life so deeply rooted in the founding strengths of this country—our family farms.

Mr. President, let me say the greatest danger of all is not the economy, it is not the farm bill, but it is the deafness of the elected leadership of this country right here in Washington to the realities of what has happened to the little towns and the little people of this country.

So I express my gratitude on behalf of the many troubled Minnesotans, my gratitude to the Senator from Iowa for reminding us of the tragedy that is being visited on so many of our constituents by our deafness to their concerns.

Mr. GRASSLEY. I thank my colleague from Minnesota for his kind remarks, his support of the farmers, his working with us, and of course, his understanding of these problems.

Thank you very much.

TRIBUTE TO MRS. BARRY GOLDWATER

Mr. THURMOND. Mr. President, it was with great sadness that I learned of the passing yesterday of Margaret Johnson Goldwater, the beloved wife of our friend and colleague, BARRY GOLDWATER. Peggy reigned serenely over her fun-loving family, providing a wonderful haven for her ever popular husband.

She was a person of many talents. She studied painting in New York for 3 years, worked as a fashion designer and founded Planned Parenthood of Central and Northern Arizona.

Always a good sport, Peggy joined her family on deep-sea fishing trips, camping in the wilderness, and even shot the rapids of the Colorado River in a rubber raft. Upon her husband's election to the Senate in 1952, she packed up her brood and moved to Washington, remaining here until her failing health required a warmer climate.

BARRY and the children always came first to Peggy and she once commented that living with BARRY GOLDWATER was the most exciting thing that had ever happened to her. Theirs was one of the happiest and most successful marriages I have ever known.

As a couple BARRY and Peggy were inseparable, sharing life at its fullest. Throughout BARRY's career, she was a source of unflagging support and I grieve for my friend's great loss.

My wife, Nancy, loved and admired Peggy very much and joins me in extending our deepest sympathies to BARRY and their children.

FAREWELL TO CURTIS RAY SKIPPER

Mr. DENTON. Mr. President, I would like to call the attention of the Senate to the change of command that will take place on 15 December, 1985 at the 375th Transportation Group [MT] in Mobile, Alabama.

At that time, the Group's commander, Colonel Curtis Ray "Skip" Skipper, Transportation Corps, U.S. Army Reserve, will be passing the flag.

With over 30 years of service to his country, Colonel Skipper is ending his long and distinguished career with the U.S. Army. Colonel Skipper has been in a unique position with the 375th

Transportation Group because he wore two hats: He was both the military commander of the Group and its senior civilian technician.

The 375th is comprised of nine units, ranging from a transportation terminal headquarters, to an operating transportation battalion, to a maintenance battalion, to military police, engineer, medical, and AG units.

During his short command tenure, "Skip" has certainly raised the profile of his units. His units have participated in no less than 14 exercises. Most of the exercises involved coordinating his units with active duty Army commands as well as heightening the skill levels of the command staff.

The most recent exercises in which the 375th participated were Rapid Strike III, Operation Chevron II, and Bright Star-85. The first of these exercises emphasized basic small unit and individual defense/survival training and evaluation. All of the "Tools of the Trade" were used during the preparation and execution of the exercise.

The second exercise, Operation Chevron II, involved weapons qualification and common task training and testing. Bright Star-85 was the most recent exercise, and it was unique because the headquarters deployed overseas to the austere environment of North Africa.

Mr. President, in each case the 375th performed at a level of expertise and effectiveness of its best active duty counterparts.

The fact that the 375th Transportation Group was involved in these exercises proves not only the value of the Group to the Army Reserve, but indeed to the entire wartime readiness of our Armed Forces.

Colonel Skipper's distinguished military career has spanned over three decades and is a shining example to which others should aspire. Skip has worked his way up through the ranks to the point where he has now held the highest rank in the Army Reserve in all of south Alabama.

I wish Colonel Curtis Ray Skipper—my good friend "Skip"—Godspeed in all of his future endeavors.

Mr. President, we should all be proud that we have people like "Skip" serving this country.

INDUSTRIAL AMERICA IN DISTRESS

Mr. BYRD. Mr. President, there has been a great deal written and spoken about the distress in which industrial America finds itself as we face the 21st century from fewer than 15 years away. Our basic industry has been buffetted by a myriad of forces—many fully beyond its control. As a result, we are witnessing what has been called the great shaking out as some industries manage to prosper, others manage only to survive, and distressingly many go belly-up—the victims of effects they could not overcome or withstand.

One of these factors has been identified—correctly, I believe—as that of foreign competition, often from industries that rely on far lower-priced labor than our culture and national conscience ever would condone here; often from industries that enjoy large subsidies from their governments. We in the Senate have debated various solutions to such problems on several occasions this year.

All of us who serve in the Senate are fortunate to have constituents or other trusted friends who, looking from a bit greater distance at the problems we confront at close range, offer suggestions to us that are well worth our consideration.

Today, I would like to commend a friend of mine—Mr. Courtney Burton, Jr., who is chairman of the board of the Oglebay Norton Co., A Cleveland-based shipping and mining company deeply involved in the steel industry. Mr. Burton resides part time in Wheeling, WV, and I have come to know and respect him over the years.

Mr. Burton has witnessed first-hand the deterioration of the steel and related industries that once were the backbone of the Midwestern heartland and the core of our Nation's economic strength. From his personal experience—which stretches back to the 1940's, when he was principal owner of the Ferro Machine & Foundry Co., and beyond—he has analyzed the current predicament in which our basic industries now are situated, and he has made some observations and suggestions that I wish to commend to the attention of my colleagues in this body.

After commenting on the deindustrialization of America, and some of the causes he has identified, Mr. Burton proceeds to suggest that America cannot sustain the standard of living we have known in the past, much less enhance our growth and opportunity, if we rely only on information and service industries and allow basic heavy industry to atrophy. It is his belief that we need to take dramatic action now to save and rebuild our industrial infrastructure.

Correctly noting that possible solutions to this predicament must not add to the pressure on the Federal deficit or precipitate a protectionist reaction among our international trading partners; that it must be perceived as being fair and nonpartisan; and that it also must be sufficient to the task at hand, Mr. Burton suggests we look to an updated version of a device employed with great success during the 1940's—to what he describes as "a reprise of the Reconstruction Finance Corporation" which he calls an "industrial reinvestment corporation." As he envisions it, it would be a self-funding mechanism, financed through an import tax, that would supply badly needed capital in the face of the virtual evaporation of conventional financing.

I do not intend to imply that Mr. Burton's observations and suggestions are at the stage of being fully developed policy pronouncements. Indeed, Mr. Burton, in a pamphlet he has issued containing his observations and recommendations, titled "Industry and Independence * * * or Liquidation and Dependence," remarks that "there are many more details that need to be worked out." Nonetheless, his observations may prove helpful to all of us who are struggling with the devastation we see in our industrial heartland and trying to find workable solutions. Surely his description of the problems he and other industrialists now face—and have faced over the course of the past 40-plus years—can serve as helpful reference points as we try to find politically and substantively feasible solutions.

I hope that the ideas, which he commendably has taken the time and energy to place on paper and share with those of similar interests and concerns, will contribute to finding one or more means of improving the current circumstances of our basic industries. I hope thousands of others of the men and women who have built this Nation and forged it into what it is today will harness their experience, their talent, their intellect, and their spirit, and bring their ideas to us. Because it is out of such a reservoir that we will find the answers that ultimately will allow us to leave the dark days of the recent industrial downturn behind us.

Mr. President, I commend Mr. Burton's writing to those who share the concerns I have described.

Mr. President, I ask unanimous consent that Mr. Burton's monograph titled "Industry and Independence * * * or Liquidation and Dependence," be printed in full in the RECORD.

There being no objection, the monograph was ordered to be printed in the RECORD, as follows:

INDUSTRY AND INDEPENDENCE * * * OR LIQUIDATION AND DEPENDENCE?

(By Courtney Burton, Jr.)

Perhaps there is nothing new under the sun.

Back in the 1940's, when I was principal owner of The Ferro Machine & Foundry Co., an employer of 3500 and supplier of gray iron castings to automotive industry, we needed to construct a castings facility nearer the assembly plants. But to do that, sizable long-range funding was needed.

The automotive industry then, as now, was cyclical. Though we were, possibly, the nation's largest foundry of its kind, the inherent instability of our marketplace rendered normal long-range financing difficult for us to obtain. In many ways, our situation then was little different from the prob-

lem America's basic industries are facing today—a pressing need for capital funding in the face of a virtual evaporation of conventional financing.

But there is one major difference between the 1940's and now. Back then, we had a source of alternative financing. Through the Federal Reserve Bank in Cleveland, Ferro's capital needs were filled with a guarantee from the Reconstruction Finance Corporation, a program created during the Depression to help rebuild America's industrial infrastructure. A line of credit was established, new facilities were added, and working capital was assured. It proved to be a success story, and the capital loan was repaid by Ferro in full.

Today there is no such program available to our basic manufacturing industries. Instead, our resources and our wealth are being used either to speculate in the financial markets or to export our industrial capability to competitor nations around the world.

If we were running Ferro Machine & Foundry Co. in today's America, we would be forced by circumstances to find ways to move our new gray iron casting facility overseas.

We are dismantling our industrial capability and constructing in its place a "supermarket" for imports. America, once the world's greatest supplier, is becoming a distributor for an expanding Third World.

I look back to the time when I was State Defense Director in Ohio, and remember blacking out all the steel mills in the Ohio Valley. Our lack of support to that basic industry today has brought on a devastation that is 10 times worse than what could have happened if the Axis powers would have been successful.

This is the sad reality we face. I believe the future of our economy and, indeed, the future of our independence and way of life depend on our ability to reverse the decline we have allowed to occur.

THE DE-INDUSTRIALIZATION OF AMERICA

The decimation that the industrial heart of this country has suffered in recent years is as serious as any I've seen in the more than seven decades of my life. I've been deeply involved in venture financing of our heavy industries for 55 years, 27 of them in the boardrooms of major banking institutions, and it is my conviction that the basic industries making up the economic backbone of the states between the Appalachians and the Sierras are in a race for survival.

Worse, at the very time our industry needs an infusion of revitalizing capital, Americans have grown hesitant to invest. Our heavy deficit picture and the threatening economic future have cast a heavy pall over long-range confidence, a confidence that is absolutely essential for anyone to invest precious capital to revitalize the basic industry that made this country what it is.

This country is facing threats, both internal and external, as serious as any it has ever faced. Just at a time when political and economic pressure on our national strength are increasing worldwide, the industrial base of that strength—our productive capacity—is withering under the combined pressures of subsidized imports, low wage rates in developing countries, and obsolete, deteriorating physical plants at home.

To meet these threats, many of our businesses have been forced to invest in manufacturing facilities abroad. And, with understandable caution, these businesses are tying up what capital remains in relatively unproductive, but safely liquid, short-term cash investment vehicles.

In short, we are experiencing an emigration of industrial capacity and capital from our shores, with a resulting decline in long-term economic vitality.

INFORMATION AND SERVICE CANNOT BUILD A NATION

While many pundits and experts may prefer to rationalize this weakening of our basic industries as a natural result of "new wave" economics, and America's inevitable evolution into an "information economy," these theories remain rationalizations only, ignoring the basic realities of economic life. There are even some who cheer the disappearance of our smokestack industries, reading "smokestack" to mean they are, by nature, poisonous and unsightly blights on the nation.

These attitudes are as mistaken as they are dangerous to our future. In the words of Lee A Iacocca, Chairman of Chrysler Corp., "We cannot afford to become a nation of video arcades, drive-in banks and McDonald's hamburger stands." And yet, this is what is happening. The recent economic "recovery" was paced by the service industries—retail sales were up 10.5% with almost no increase in our manufacturing output.

As the Chicago Tribune recently coined the issue:

"A recovery cannot be sustained by services alone. Services need something to service; if the economy is a train, industry is the locomotive."

Our basic manufacturing industries, in short, are essential components of our economic health. They are the engines of the ship of state.

We must ask, and ask again, two critical questions of our "service economy" proponents:

(1) Where is our assurance that loss of our capacity to produce basic commodities like steel, copper and textiles is healthy and beneficial,

We do, after all, inhabit a world that has already sent us reeling under restriction of the petroleum we could no longer supply internally. What is there to keep the same thing from happening with other commodities?

(2) What proof do we have that an economy based primarily on service and information has the robustness and flexibility needed to weather the major changes of the next 20 years?

This nation, indeed, every nation, builds and operates on a physical infrastructure. Computer software, for example, has yet to provide its own wire and steel, housing and power, or even hardware. Infrastructure depreciates. Physical plant needs evolve and grow. Where is the proof we will have the flexibility to meet those needs if we must depend entirely on the productivity and creativity of other nations?

We have no such assurance. There is no such proof. And until there is, it seems clear to me that our economic health—if not our survival—will continue to depend on maintaining a healthy, growing, broadly based industrial potential.

REBUILDING AMERICA HAS BEEN DELAYED TOO LONG

We need to take dramatic, positive action now to save and rebuild our industrial infrastructure. We need more than six cuts alone. We need a well-defined, stable, long-range capital investment program to revitalize America's basic industries.

We have already waited too long. My adopted state of West Virginia has been forced to labor under a billion-dollar deficit caused, in great measure, by a failure to invest in and develop cost-effective coal desulphurization processes. The steel and heavy metal industries are facing tremendous competition from government-subsidzied plants abroad, without the venture capital to improve their own capacity. Other examples can be found in almost every basic industry.

POLITICAL REALTIES MUST BE FACED

It seems clear that a coordinated program is required, but we must be realistic. In order to be both economically effective and politically feasible, an undertaking of this magnitude and importance must meet certain essential criteria:

It must not add to the pressure on the national treasury nor increase the deficit.

It must be funded in a manner politically acceptable at home.

It must not precipitate a protectionist reaction among our international trading partners.

Its mandate must be long-term, bi-partisan, and independent of politics or pressures from special interest groups.

It must be administered in such a manner that there will be no doubt its fairness or equitability.

It must have a mechanism that will assure available funds are applied judiciously, and in proportion to need.

ONE POSSIBLE ANSWER: A REPRISE OF THE RECONSTRUCTION FINANCE CORPORATION

All of these criteria could be met by the creation of a funding vehicle, which I will call an *Industrial Reinvestment Corporation*. This IRC could be designed around the successful experience with the Reconstruction Finance Corporation, a vehicle conceived by President Herbert Hoover, implemented in the New Deal legislation of President Roosevelt. The RFC functioned from the Depression into the 50's and proved to be a successful reconstruction program for industry and the country.

Following the RFC model, the *Industrial Reinvestment Corporation* could be organized under the Federal Reserve System on national and district levels, administering investment of a revolving fund financed through an import tax.

This tax, which could be gradually introduced over a period of years to reach a level of 5% to 10%, would be applied on the retail level to products manufactured beyond our shores. With wise and careful design, the IRC could fulfill all of these criteria:

(1) No Deficit Increase—It would not add to the deficit because it would be self-funding through the import tax.

(2) Political Acceptability—The tax rate proposed is a relative minor one. Because alternative, non-taxed domestic products will usually be available—with the tax applied, at a competitive price—the tax is neither mandatory nor regressive.

(3) Non-Protectionist—This tax is not a tariff, has no effect on international balance of payments, nor is it large enough to have a significant impact on sales of imported products. This tax is not intended to penalize our trading allies, but to increase the productivity and welfare of the American people so that, in the end, they can become more rather than less involved in free trade with other countries. As this country produces, and as this country becomes self-sufficient economically, so does the rest of the world.

Foreign governments will, of course, feel this retail tax in their own economies and

may be tempted to retaliate with comparable taxes or import tariffs. Despite the massive generosity of the American people over the years since World War I, our trading allies are likely to remember only their immediate interest. Thus, on a practical level, we should consider adjusting our ongoing subsidies, grant and loans to lessen the impact of this tax on other economies.

(4) Stable and Non-Partisan—The IRC could be administered by a national board appointed by the President, approved by the Senate, and placed within the Federal Reserve System to assure independence from partisan politics and the inevitable pressure from business, consumer groups, labor, and abroad. This board would receive recommendations from Regional Boards created in the various Federal Reserve Districts, whose sole function would be to *recommend* action to the National Board, which, alone, would be responsible for all decisions.

Stability could be assured by chartering the IRC for a 20 to 25 year period, and instituting staggered director terms, four to six years in duration.

(5) Fair and Equitable—*The national and regional boards could be composed equally of members of the Federal Reserve System, the banking industry, industrialists, labor leaders, and government-appointed consumer representatives, assuring adequate representation by all major economic sectors in our society.*

Penalties for attempting to bring undue influence on the board should be written into the creating legislation to underline the national commitment to keep the IRC independent impartial, and equitable.

(6) Judicious Application—Funds collected by the tax would be earmarked according to industrial classification, to be dedicated to investment in the industries effected. Taxes collected on steel imports, for example, would generate capital investment funds for the steel industry. Clearly, the greater the intensity of foreign competition, the larger the resulting fund, assuring application in proportion to need.

Fairness could further be guaranteed by a monitoring body, consisting perhaps of appointees from the three branches of government. To minimize the possibility of outside pressure, the National Board would make its deliberations in closed sessions which are observed by this monitoring body.

(Education: A certain small percentage of the overall fund could also be set aside for the purpose of encouraging and supporting technical education in basic industry. At the same time that we are promoting the long-range viability of our industrial infrastructure, we should be encouraging the development of one of its major assets—the young men and women who will make them work. The benefit of funding education through the IRC is its essential independence from political pressure and changes of administration. This educational funding, perhaps provided on a matching basis by industry could be used both to support educational programs and as scholarships for the students. We should also take a lesson from our friends the Japanese and support the travel of our future industrial leaders through nations possessing the technological leadership we wish to regain.)

PROBLEMS THAT NEED ADDRESSING

Obviously there are many more details that need to be worked out. There, are, for example, domestic companies that have been forced to send manufacturing facilities overseas by the very problem the IRC is attempting to alleviate. These companies would have to be equitably and fairly treated.

Also, ways would have to be found to make the IRC as productive as possible during the initial period while the fund is being built. Government seed money, on a loan basis, might be required. I have mentioned a 5% to 10% tax level, but these are suggestions only. The actual rates—and any "production repatriation" tax incentives—are, of course, best determined by tax experts close to the Administration and Congress.

These issues are sensitive, and the alternatives are myriad. But complexity is no justification for inaction. The richness of options provides us with an unmatched opportunity which will not last forever. We must begin thinking about how to reverse America's industrial decline—and then we must act.

The Industrial Reinvestment Corporation is merely one man's suggestion for solving one of the most serious problems America has ever faced. During years of heavy involvement with political, government, and eleemosynary activities throughout the 50 states—as well as the four years I was responsible, directly and indirectly, for the financing of the Republican Party—I learned that this country has the creativity it needs to solve problems in many acceptable ways.

Senator Robert Byrd, for example, has introduced legislation to create a National investment Corp., which would make capital investments in basic heavy industries. I am making this recommendation as another alternative only. His approach could be equally viable.

A REDIRECTION OF THE SHIP OF STATE

The ship of state of ours is powered by mighty and powerful engines—our heavy industry, coupled with our natural resources—but those engines have been neglected and forgotten.

Today, the economic seas are treacherous and uncertain, and those who sail upon them are vulnerable and open to attack. There is no time to ignore the powerful heart of our nation.

Herbert Hoover and Franklin D. Roosevelt had the foresight and understanding to propel a recovery of our iron and steel industries through the Reconstruction Finance Corporation. They created a program *(key features of the Act are included here for information)* for coordinating the banks and all Federal Reserve Districts to rehabilitate heavy industry, iron and steel, mining, and all vital industries. The RFC proved effective and self-supporting—one of the few, if not the only, government program in history to pay for itself.

Where are such leaders today? With the exception of a few special plants and several financing institutions, our government has failed to provide a plan or structure to support heavy industry. In fact, the tax plan introduced in 1985 was almost punitive in its attitude toward basic industry. The plan as presented would remove important depreciation provisions that have been vital to the growth of our capital facilities.

Our industry is strained and weakened. Our managers are becoming demoralized by overwhelming problems and the seeming unconcern on the part of their government leaders.

But I believe our citizens and our business leaders are ready to roll up their sleeves and revitalize this economy if our political leaders take command of this ship of state, refit it for the mission ahead, and set a certain course.

It can be done. It must be done. The time to act is now.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 1985—CONFERENCE REPORT

Mr. MURKOWSKI. Mr. President, I submit a report of the committee of conference on S. 947 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 947) to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. METZENBAUM. Mr. President, is the OPIC conference report up at this moment?

The PRESIDING OFFICER. The Senator is correct.

Mr. METZENBAUM. Mr. President, I was awaiting my time to speak because I assumed the manager of the conference report would be saying something. If not, I am prepared to address myself to the issue.

Mr. MURKOWSKI. Mr. President, I move its adoption.

I defer to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, I rise in strong opposition to the conference report to extend the authorization for the Overseas Private Investment Corporation through 1988.

The Senate had adopted my amendment to curtail the OPIC reauthorization to 18 months and to require GAO, in the meantime, to report to Congress on the impact of OPIC's activities on domestic jobs within 1 year.

I understand the requirement for the GAO report is still in the conference report, but the conferees saw fit to extend the life of OPIC for 3 years, instead of 18 months as contained in the Senate-passed version.

Mr. President, I can understand some things around here, but I do not understand that. I do not understand why our conferees capitulated on this issue and brought back to us an extension for 3 years, when we had agreed

that it would be a year and a half. There is no logical reason for it. Not too long ago, the Senate voted to help American textile workers by limiting foreign imports. The House did the same thing, presumably to save American jobs. What OPIC does is help export American jobs overseas. This Senator believes it is time for us to give this entire issue a reevaluation.

This is absurd, Mr. President. Either we believe in protecting jobs of Americans or we do not. Yet here we are today, adopting a conference report which goes in exactly the opposite direction.

What is the use of coming out here and having this big hullabaloo that we had for a number of weeks about protecting American jobs? The distinguished Senators from South Carolina led that effort and tried to attach their amendment to a number of issues. Nor did the Senate indicate its concern for protecting American jobs. Then we roll over and go to sleep. We fall dead.

It is the same way we deal with Gramm-Rudman around here. We make all these big speeches about balancing the budget and what we are going to do and Gramm-Rudman is going to save the Nation. Then we come out here on the floor and in our committees and pass bill after bill giving away millions and billions of dollars of taxpayers' money. We just do not have the courage to stand up when some of the pressure lobbyists show up around the floor of the U.S. Senate.

That is exactly what is involved in this issue, Mr. President.

The Overseas Private Investment Corporation insures U.S. multinational companies and banks on their investments against the risks of war, expropriation, currency inconvertibility, and civil strife. By doing so, however, OPIC encourages the export of U.S. jobs, technology, and capital overseas.

According to AFL-CIO estimates, OPIC-supported business ventures over the past 4 years have resulted in a loss of more than 500,000 American jobs.

I do not believe it is wrong for the United States to promote economic and social development in less developed countries. That is human policy.

But I do object to a policy which cares not one IOTA about the true needs of foreign nations but merely paves the way for some U.S. companies to set up production overseas so that these companies can turn around and compete with those U.S. firms who have stayed put and continue their operations in this country.

In a November 5 report issued by the House Government Operations Committee, the authors state that OPIC "has not effectively implemented statutory mandates that requires it to emphasize investments in the poorest LDC's [less developed countries]."

In 1984, slightly more than 6 percent of OPIC's total projects were located in Africa. However, approximately 80 percent of the projects for this same year were located in Latin America, East Asia, or Europe; 24 percent of these projects were undertaken in 6 countries: Taiwan, Korea, Turkey, Portugal, Brazil, and Saudi Arabia.

Saudi Arabia? Taiwan? Korea? Who is kidding whom? Are these poor less-developed countries or, in the case of the latter two, are these two countries that are day-by-day, hour-by-hour, week-by-week, month-by-month, taking jobs of American workers?

Not only is OPIC promoting projects and investments in some of the wealthier countries, it is also aiding the very same countries which provide us with our stiffest trade competition.

It is an absurd policy on the part of our Government.

Last year, the United States had a trade deficit of more than $5.5 billion with Brazil. OPIC projects in that country, however, amounted to $439 million. Last year we had a $4 billion deficit with Korea—OPIC projects in that country amounted to $309 million. Last year, we had an $11 billion deficit with Taiwan—yet OPIC insured $346 million worth of projects.

What kind of logic is this? What kind of thinking is this? Where does the Senate come off agreeing to this kind of thing? I did not propose that we terminate OPIC immediately. I did propose that we have an evaluation and that we make another determination as to whether we should continue the authorizing of OPIC for a period of 18 months. So, instead, our conferees extended that to 3 years. It was a wrong decision, a very, very wrong decision.

Consider the impact OPIC-supported projects have on specific domestic industries.

In manufactured goods, the United States has gone from a surplus of some $5 billion in 1981 to a deficit of $89 billion last year.

During this period exports fell 7 percent while imports of manufactured goods shot up an incredible 55 percent.

Today there are almost 1 million fewer jobs in manufacturing than there were 4 years ago.

Yet, unbelievably, 40 percent of OPIC's projects involved investment in overseas manufacturers industries.

In fiscal year 1984, OPIC insured a company in Korea which manufacturers magnetic recording heads. OPIC also helped a company in Korea expand its semiconductor business. Can you believe it? Can you believe that we would be insuring a company in Korea to take jobs in the semiconductor business which, without any question, takes jobs away from Americans and hurts our own semiconductor business? Magnetic recording heads in Korea. That kind of competition drives our businesses into bankruptcy.

In Brazil, OPIC backed a company which manufacturers electrical conductors.

The point is clear, at a time when domestic investment was desperately needed, OPIC helped facilitate $13.1 billion of U.S. investment overseas.

We talk about imports killing American jobs and then turn around land vote to continue for another 3 years a program which exports more American jobs overseas.

This is dead wrong.

This conference report should be rejected.

Mr. President, I believe that I shall at an appropriate time ask for a rollcall vote on this conference report. I will not do so at this moment.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I had indicated just a moment ago that I might ask for a rollcall vote. I think that would be somewhat inappropriate at this hour, without having given adequate notice. I am also a realist enough to know that I would definitely not prevail. Under the circumstances, I will not demand a rollcall and have no objection to the Senate proceeding in connection with the conference report.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HECHT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HECHT. Mr. President, a few moments ago, in my office, I heard the distinguished Senator from Ohio mention my name and the name of Senator JESSE HELMS. On December 5, 1985, I spoke in this hallowed Chamber, and I should like to reiterate what I said on that day. It is a short statement, and I wish to read it:

In reply to the distinguished Senator from Ohio, in this past week many top Jewish attorneys, international attorneys, met on my behalf. I asked them to analyze the Genocide Treaty. It was their unanimous opinion, for which I will have proper documentation, and not being an attorney, I will not speak on the merits of what they have come forth with, to date. However, it is their opinion that the Genocide Treaty would not be in

the best interest of the State of Israel or the United States of America.

Mr. President, we are in the closing days of the 1985 session. If the Genocide Treaty is taken up in 1986, I will be fully prepared to debate the treaty.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECESS UNTIL 11:15 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate stand in recess until 11:15 a.m. today.

There being no objection, the Senate recessed at 9:53 a.m. until 11:15 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. GORTON).

The PRESIDING OFFICER. The Presiding Officer as Senator from the State of Washington suggests the absence of a quorum.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(During the quorum call Mr. ROTH and Mr. WALLOP occupied the chair.)

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. QUAYLE). Without objection, it is so ordered.

WHITE EARTH RESERVATION LAND SETTLEMENT ACT OF 1985

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar Order No. 422, S. 1396, the White Earth Indian Reservation bill.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1396) to settle unresolved claims relating to certain allotted Indian lands on the White Earth Reservation, to remove clouds from the titles to certain lands, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Minnesota?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Indian Affairs, with an amendment to strike out all after the enacting clause and insert the following:

That this Act may be cited as the "White Earth Reservation Land Settlement Act of 1985".

SEC. 2. The Congress finds that—

(1) claims on behalf of Indian allottees or heirs and the White Earth Band involving substantial amounts of land within the White Earth Indian Reservation in Minnesota are the subject of existing and potential lawsuits involving many and diverse interests in Minnesota, and are creating great hardship and uncertainty for government, Indian communities, and non-Indian communities;

(2) the lawsuits and uncertainty will result in great expense and expenditure of time, and could have a profound negative impact on the social and well-being of everyone on the reservation;

(3) the White Earth Band of Chippewa Indians, State of Minnesota, along with its political subdivisions, and other interested parties have made diligent efforts to fashion a settlement to these claims, and the Federal Government, by providing the assistance specified in this Act, will make possible the implementation of a permanent settlement with regard to these claims;

(4) past United States laws and policies have contributed to the uncertainty surrounding the claims;

(5) it is in the long-term interest of the United States, State of Minnesota, White Earth Band, Indians, and non-Indians for the United States to assist in the implementation of a fair and equitable settlement of these claims; and

(6) this Act will settle unresolved legal uncertainties relating to these claims.

SEC. 3. For purposes of this Act:

(a) "Allotment" shall mean an allocation of land on the White Earth Reservation, Minnesota, granted, pursuant to the Act of January 14, 1889 (25 Stat. 642), and the Act of February 8, 1887 (24 Stat. 388), to a Chippewa Indian.

(b) "Allottee" shall mean the recipient of an allotment.

(c) "Full blood" shall mean a Chippewa Indian of the White Earth Reservation, Minnesota, who was designated as a full blood Indian on the roll approved by the United States District Court for the District of Minnesota on October 1, 1920, or who was so designated by a decree of a Federal court of competent jurisdiction; it shall also refer to an individual who is not designated on said roll but who is the biological child of two full blood parents so designated on the roll or of one full blood parent so designated on the roll and one parent who was an Indian enrolled in any other federally recognized Indian tribe, band, or community.

(d) "Inherited" shall mean received as a result of testate or intestate succession or any combination of testate or intestate succession, which succession shall be determined by the Secretary of the Interior or his authorized representative.

(e) "Mixed blood" shall mean a Chippewa Indian of the White Earth Reservation, Minnesota, who was designated as a mixed blood Indian on the roll approved by the United States District Court of Minnesota on October 1, 1920, unless designated a full blood by decree of a Federal court of competent jurisdiction; it shall also refer to any descendants of an individual who was listed on said roll providing the descendant was not a full blood under the definition in subsection (c) of this section. The term "mixed blood" shall not include an Indian enrolled in any federally recognized Indian tribe, band, or community other than the White Earth Band.

(f) "Tax forfeited" shall mean an allotment which, pursuant to State law, was declared forfeited for nonpayment of real property taxes and purportedly transferred directly to the State of Minnesota or to private parties or governmental entities.

(g) "Majority" shall mean the age of twenty-one years or older.

(h) "Secretary" shall mean the Secretary of the Interior or his/or her authorized representative.

(i) "Trust period" shall mean the period during which the United States held an allotment in trust for the allottee or the allottee's heirs. For the purpose of this Act, the Executive Order Numbered 4642 of May 5, 1927, Executive Order Numbered 5768 of December 10, 1931, and Executive Order Numbered 5953 of November 23, 1932, shall be deemed to have extended trust periods on all allotments or interests therein the trust periods for which would otherwise have expired in 1927, 1932, or 1933, notwithstanding the issuance of any fee patents for which there were no applications, and if such allotments were not specifically exempted from the Executive orders; and the Indian Reorganization Act of June 18, 1934, shall be deemed to have extended indefinitely trust periods on all allotments or interests therein the trust periods for which would otherwise have expired on June 18, 1934, or at any time thereafter. Said Executive orders and Act shall be deemed not to have extended the trust period for allotments or interests which were sold or mortgaged by adult mixed bloods, by non-Indians, or with the approval of the Secretary, or for allotments or interests which were sold or mortgaged by anyone where such sale or mortgage was the subject of litigation in Federal court which proceeded to a judgment on the merits and where the outcome of such litigation did not vacate or void said sale or mortgage.

(j) "Interest", except where such item is used in conjunction with "compound", shall mean a fractional holding, less than the whole, held in an allotment.

(k) "Adult" shall mean having attained the age of majority.

(l) "Heir" shall mean one who received or was entitled to receive an allotment or interest as a result of testate or intestate succession under applicable Federal or Minnesota law.

(m) "Transfer" includes but is not limited to any voluntary or involuntary sale, mortgage, tax forfeiture or conveyance pursuant to State law; any transaction the purpose of which was to effect a sale, mortgage, tax forfeiture or conveyance pursuant to State law; any Act, event, or circumstance that resulted in a change of title to, possession of, dominion over, or control of an allotment or interest therein.

SEC. 4. (a) The provisions of this Act shall apply to the following allotments:

(1) allotments which were never sold or mortgaged by the allottees or by their heirs and which were tax forfeited during the trust period;

(2) allotments which were sold or mortgaged during the trust period, without the approval of the Secretary, by the allottees prior to having attained majority, and were never again sold or mortgaged either by the allottees upon their having attained majority or by heirs of the allottees;

(3) allotments which were sold or mortgaged during the trust period by full blood allottees without the approval of the Secretary, and were never again the subject of a sale or mortgage by heirs of the allottees; and

(4) allotments which were never sold or mortgaged by the allottees, but which subsequent to the deaths of the allottees, purportedly were sold or mortgaged, during the trust period, by administrators, executors, or representatives, operating under authority from State courts, and were never again the subject of a sale or mortgage by heirs of the allottees.

(b) The provisions of this Act shall also apply to the following allotments or interests in allotments:

(1) allotments or interests which were inherited by full or mixed bloods who never sold or mortgaged their allotments or interests or by Indians enrolled in other federally recognized Indian tribes, bands, or communities who never sold or mortgaged their allotments or interests, where the allotments or interests were tax forfeited during the trust period;

(2) allotments or interests which were inherited by mixed bloods under the age of majority and which were sold or mortgaged during the trust period without the approval of the Secretary prior to such mixed bloods having attained majority, but which were never again sold or mortgaged by them upon having attained majority or by their heirs;

(3) allotments or interests which were inherited by full bloods or by Indians enrolled in other federally recognized Indian tribes, bands, or communities, who sold or mortgaged such allotments or interests during the trust period without the approval of the Secretary;

(4) allotments or interests which were inherited by full or mixed bloods who never sold or mortgaged their allotments or interests, but which, subsequent to the deaths of such heirs, were sold or mortgaged during the trust period by administrators, operating under authority from State courts;

(5) allotments or interests which were owned by allottees or which were inherited by full or mixed bloods for whom guardians were appointed by State courts, which guardians sold or mortgaged the allotments or interests during the trust period without the approval of the Secretary;

(6) interests which were inherited by full or mixed bloods who never sold or mortgaged their interests during the trust period, even though other interests in the same allotment were sold by other heirs where the land comprising the allotment has been claimed in full by other parties adversely to the full or mixed bloods who never sold or mortgaged their interests; and

(7) allotments or interests which were inherited by full or mixed bloods or by Indians enrolled in other federally recognized Indian tribes, bands, or communities which were never sold or mortgaged during the trust period but which were purportedly distributed by State court probate proceedings to other individuals.

(c) This Act shall not apply to—

(1) any allotment or interest the sale or mortgage of which was the subject of litigation which proceeded to a judgment on the merits in Federal courts and where the outcome of such litigation was other than vacating and voiding such sale or mortgage;

(2) any allotment or interest which was tax forfeited subsequent to the date on which the tax exemption was declared by a Federal court to have expired;

(3) any allotment or interest which was sold, mortgaged, or tax forfeited after the expiration of the trust period; or

(4) any allotment or interest which was sold or mortgaged at any time by an adult mixed blood Indian.

Nothing in this Act is intended to question the validity of the transactions relating to allotments or interests as described in section 4(c), and such allotments and interests are declared to be outside the scope of this Act.

SEC. 5. (a) Any determination of the heirs of any person holding an allotment or interest, made by the courts of the State of Minnesota, which is filed with the proper county recording officer prior to May 9, 1979, shall be deemed to have effectively transferred the title of the decedent in the allotment or interest to the heirs so determined unless a separate determination of heirs has been made by the Secretary before the effective date of this Act and such determination has been filed with the proper county recording officer within six months after the effective date of this Act. Nothing in this subsection shall be construed to remove any allotment described in section 4 from the compensation provided for in the Act.

(b) The proper county recording officer is the county recorder of the county in which the allotment or interest is located if the title has not been registered pursuant to Minnesota law. If the title has been so registered, the proper county recording officer shall be the Registrar of Titles in the county in which the allotment or interest is located.

(c) As to any allotment which was granted to an allottee who had died prior to the selection date of the allotment, the granting of such allotment is hereby ratified and confirmed, and shall be of the same effect as if the allotment had been selected by the allottee before the allottee's death: Provided, That the White Earth Band of Chippewa Indians shall be compensated for such allotments in the manner provided in sections 6, 7, and 8.

(d) As to any allotment that was made under the provisions of the Treaty of March 19, 1867 (16 Stat. 719), and which was reallotted under the provisions of the Act of January 14, 1889 (25 Stat. 642), such reallotment is hereby ratified and confirmed.

SEC. 6. (a) As soon as the conditions set forth in section 10 of this Act have been met, the Secretary shall publish a certification in the Federal Register that such conditions have been met. After such publication, any allotment or interest which the Secretary, in accordance with this Act, determines falls within the provisions of sections 4(a), 4(b), or 5(c), the tax forfeiture, sale, mortgage, or other transfer, as described therein, shall be deemed to have been made in accordance with the Constitution and all laws of the United States specifically applicable to transfers of allotments or interests held by the United States in trust for Indians, and Congress hereby does approve and ratify any such transfer effective as of the date of said transfer, subject to the provisions of section 6(c). Compensation for loss of allotments or interests resulting from this approval and ratification shall be determined and processed according to the provisions of section 8.

(b) By virtue of the approval and ratification of transfers of allotments or interests therein effected by this section, all claims against the United States, the State of Minnesota or any subdivisions thereof, or any other person or entity, by the White Earth Band, its members, or by any other Indian tribe or Indian, or any successors in interest thereof, arising out of, and at the time of or subsequent to, the transfers described in sections 4(a), 4(b), or 5(c) and based on any interest in or nontreaty rights involving such allotments or interests therein, shall be deemed never to have existed as of the date of the transfer, subject to the provisions of this Act.

(c) Notwithstanding any provision of law other than the provisions of this section, any action in any court to recover title or damages relating to transactions described in sections 4(a), 4(b), 5(a) or 5(c), shall be forever barred unless the complaint is filed not later than one-hundred and eighty days following enactment of this Act, or prior to the publication required by section 6(a) whichever occurs later in time: Provided, That immediately upon the date of enactment of this Act any such action on behalf of the White Earth Band of Chippewa Indians shall be forever barred, unless the publication required by section 6(a) does not take place within two years of the date of enactment of this Act in which case the bar of any such action on behalf of the White Earth Band of Chippewa Indians shall be deemed lifted and nullified: Provided further, That the Secretary shall not issue to the White Earth Band any report rejecting litigation nor submit to Congress any legislation report pursuant to section 2415 of title 28, United States Code, relating to transactions described in sections 4(a), 4(b), 5(a) or 5(c) of this Act, until and unless the bar against actions on behalf of the White Earth Band is lifted and nullified. Any such action filed within the time period allowed by this subsection shall not be barred; however, the filing of any such action by an allottee, heir, or others entitled to compensation under this Act shall bar such allottee, heir, or others from receiving compensation pursuant to the provisions of section 8. The United States District Court for the District of Minnesota shall have exclusive jurisdiction over any such action otherwise properly filed within the time allowed by this subsection.

(d) This section shall not bar an heir, allottee, or any other person entitled to compensation under this Act from maintaining an action, based on the transactions described in sections 4(a), 4(b), 5(a), or 5(c), against the United States in the Claims Court pursuant to the Tucker Act, section 1491 of title 28, United States Code, challenging the constitutional adequacy of the compensation provisions of section 8(a) as they apply to a particular allotment or interest: Provided, That such action shall be filed with the Claims Court not later than one hundred and eighty days after the issuance of the notice of the Secretary's compensation determination as provided in section 8(c). If such an action is not filed within the one-hundred-and-eighty-day period, it shall be forever barred. The United States hereby waives any sovereign immunity defense it may have to such an action but does not waive any other defenses it may have to such action. The filing of an action by any heir, allottee, or any other person under the provisions of this section shall bar such person forever from receiving compensation pursuant to the provisions of section 8.

SEC. 7. (a) The Secretary is hereby authorized to and shall diligently investigate to the maximum extent practicable all White Earth allotments and shall determine which allotments or interest fall within any of the provisions of sections 4(a), 4(b), or 5(c). As to all such allotments or interests deter-

mined to be within the provisions of sections 4(a), 4(b), or 5(c), the Secretary shall prepare lists of such allotments or interests, which shall include allotment number, land description, and allottee's name, in English and Ojibway where available. A first list shall be published within one hundred and eighty days after the date of enactment of this Act in the Federal Register; in a newspaper of general circulation in Mahnomen County, Minnesota; in a newspaper of general circulation in Becker County, Minnesota; in a newspaper of general circulation in Clearwater County, Minnesota; in one newspaper of general circulation in metropolitan Minneapolis-Saint Paul; and, in the Secretary's discretion, in any appropriate band or tribal newspaper. Publication in the required newspapers shall take place no later than thirty days after publication in the Federal Register.

(b) Any tribe, band, or group of Indians, or any individual shall have one year after the date of publication in the Federal Register to submit to the Secretary any additional allotments or interests which the tribe, band, group, or individual believes should fall within any of the provisions of section 4(a), 4(b), or 5(c). The Secretary, without such submissions, may also independently determine that additional allotments or interests fall within such provisions. Any additional allotments or interests submitted to the Secretary shall be accompanied by a statement identifying the allotment or interest and its land description and summarizing the reasons why it should be added to the list required by this section.

(c) The Secretary shall determine which additional allotments or interests fall within the provisions of the sections 4(a), 4(b), or 5(c), and not later than five hundred and forty days of the date of publication of the Secretary's first list in the Federal Register, the Secretary shall publish a second list in the Federal Register and previously required newspapers of the allotments or interests the Secretary has determined should be added to the first published list.

(d) Any determination made by the Secretary under this section to include an allotment or interest on the first list required by the section to be published in the Federal Register may be judicially reviewed pursuant to the Administrative Procedure Act not later than ninety days of the publication date of the first list of the Federal Register. Any such action not filed within such ninety-day period shall be forever barred. Any determination made by the Secretary to include an allotment or interest on the second list required by this section to be published in the Federal Register, or any determination made by the Secretary not to include an allotment or interest on such list, may be judicially reviewed pursuant to the Administrative Procedure Act within ninety days of the publication date of the second list in the Federal Register. Any such action not filed within such ninety-day period shall be forever barred. Exclusive jurisdiction over actions under this subdivision is hereby rested in the United States District Court for the District of Minnesota.

SEC. 8. (a) Compensation for a loss of an allotment or interest shall be the fair market value of the land interest therein as of the date of tax forfeiture, sale, allotment, mortgage, or other transfer described in sections 4(a), 4(b), or 5(c), less any compensation actually received, plus interest compounded annually at 5 per centum from the date of said loss of an allotment or interest until the date of enactment of this Act, and at the general rate of interest earned by United States Department of the Interior funds thereafter. A determination of compensation actually received shall be supported by federal, state, or local public documents filed contemporaneously with the transaction or by clear and convincing evidence. Compensation actually received shall not be subtracted from the fair market value in any instance where an allotment or interest was sold or mortgaged by a full or mixed blood, under the age of eighteen years, or in any instance where there is prima facie evidence that fraud occurred in a sale or mortgage. No compensation for loss of an allotment or interest relating to transfers described in section 4(b) shall be granted to any person or the heirs of such person where such allotment or interest was received pursuant to State court probate proceedings and where also it has been or is determined by the Secretary that such person or heirs were not entitled to inherit the allotment or interest.

(b) For the purpose of this section, the date of transfer applicable to interests described in section 4(b)(6) shall be the last date on which any interest in the subject allotment was transferred by document of record by any other heir of the allottee; and the date of transfer applicable to allotments described in section 5(c) shall be the selection date. For purposes of this section, the Secretary shall establish the fair market value of various types of land for various years, which shall govern the compensation payable under this section unless a claimant demonstrates that a particular allotment or interest had a value materially different from the value established by the Secretary.

(c) The Secretary shall provide written notice of the Secretary's compensation determination to the allottees or heirs entitled thereto. Such notice shall describe the basis for the Secretary's determination, the applicable time limits for judicial review of the determination, and the process whereby such compensation will be distributed. The Secretary shall proceed to make such heirship determinations as may be necessary to provide the notice required by this section: Provided, That the Secretary shall accept as conclusive evidence of heirship any determination of the courts of the State of Minnesota as provided in section 5(a) of this Act: Provided further, That the Secretary shall give written notice only to those allottees or heirs whose addresses can be ascertained by reasonable and diligent efforts; otherwise such notice shall be given by publication in the Federal Register.

(d) The Secretary's administrative determination of the appropriate amount of compensation computed pursuant to the provisions of this Act may be judicially reviewed pursuant to the Administrative Procedure Act not later one hundred and eighty days after the issuance of notice as aforesaid; after such time the Secretary's determination shall be conclusive and all judicial review shall be barred. Exclusive jurisdiction over any such action is hereby vested in the United States District Court for the District of Minnesota.

(e) Once a compensation determination has become conclusive according to the provisions of subsection (d), the Secretary shall certify such determination to the Secretary of the Treasury and such conclusive determination shall be treated as a final judgment, award or, compromise settlement under the provisions of title 31, United States Code, section 1304. The Secretary of the Treasury is authorized and directed to pay out of the funds in the Treasury into a separate interest bearing White Earth Settlement Fund account the amount certified by the Secretary of the Interior in each case. The Secretary of the Interior shall then make a diligent effort to locate each allottee or heir; however, if, after two years from the date on which a determination becomes conclusive an allottee or heir cannot be located, the Secretary of the Interior shall declare the amount owing to such allottee or heir forfeited.

(f) Any and all amounts forfeited pursuant to subsection (e) together with the interest accumulated thereon, pursuant to section 8 shall be transferred annually to the fund established under section 12 for the White Earth Band.

SEC. 9. The Secretary shall determine the heirs, if heretofore undetermined, or modify the inventory of an existing heirship determination of any full or mixed blood or Indian enrolled in any other federally recognized Indian tribe, band, or community, where appropriate for the purposes of this Act: Provided, That the Secretary shall accept any determination of heirship by the courts of the State of Minnesota as provided in section 5(a) of this Act.

SEC. 10. (a) The provisions of section 6 of this Act shall take effect upon the publication in the Federal Register by the Secretary of certification that the following conditions have been satisfied:

(1) The State of Minnesota, in accordance with Laws of Minnesota 1984, chapter 539, has entered into an agreement with the Secretary providing for the transfer of ten thousand acres of land within the exterior boundaries of the White Earth Reservation to the United States to hold in trust for the White Earth Band of Chippewa Indians as the State's contribution to the settlement provided for by this Act. The Secretary shall not enter into such an agreement until the Secretary determines, or the authorized governing body of the band certifies to the Secretary in writing, that the agreement will result in the transfer of ten thousand acres which possess reasonable value for the White Earth Band, including but not limited to value for agricultural, recreational, forestry, commercial, residential, industrial, or general land consolidation purposes. The land transferred pursuant to this subsection shall be accepted by the United States subject to all existing accesses, roads, easements, rights of way, or similar uses unless the Governor and Attorney General of the State of Minnesota certify in writing to the Secretary the State's intent to abandon such uses on a particular parcel.

(2) The State, in accordance with the Laws of Minnesota 1984, chapter 539, has appropriated $500,000 for the purpose of providing the United States with technical and computer assistance for implementing the settlement provided for in this Act.

(3) The United States has appropriated $6,600,000 for economic development for the benefit of the White Earth Band of Chippewa Indians.

(b) Upon final acceptance by the Secretary, the land referred to in subsection (a)(1) shall be deemed to have been reserved as of the date of the establishment of the White Earth Reservation and to be part of the trust land of the White Earth Reservation for all purposes.

SEC. 11. Nothing in this Act is intended to alter the jurisdiction currently possessed by the White Earth Band of Chippewa Indians, the State of Minnesota, or the United States over Indians or non-Indians within the exte-

rior boundaries of the White Earth Reservation.

SEC. 12. (a) There is established in the Treasury of the United States a fund to be known as the White Earth Economic Development and Tribal Government Fund. Money in this Fund shall be held in trust by the United States for the White Earth Band of Chippewa Indians, and shall be invested and managed by the Secretary in the same manner as tribal trust funds pursuant to the Act of June 24, 1938 (25 U.S.C. 162a).

(b) The White Earth Economic Development and Tribal Government Fund shall consist of—

(1) money received by the White Earth Band as compensation pursuant to section 8; and

(2) money received by the White Earth Band as a result of amounts forfeited pursuant to section 8(f); and

(3) money received as an appropriation pursuant to section 15; and

(4) income accruing on such sums.

Income accruing to the White Earth Economic Development and Tribal Government Fund shall, without further appropriation, be available for expenditure as provided in subsection (c).

(c) Income from the fund may be used by the authorized governing body of the band for band administration. Principal and income may be used by the authorized governing body of the band for economic development, land acquisition, and investments: Provided, however, That under no circumstances shall any portion of the moneys described in subsection (b) be used for per capita payments to any members of the band: Provided further, That none of the funds described in subsection (b) shall be expended by the governing body of the band until—

(1) such body has adopted a band financial ordinance and investment plan for the use of such funds; and

(2) such body has submitted to the Secretary a waiver of liability on the part of the United States for any loss resulting from the use of such funds; and

(3) the Secretary has approved the band financial ordinance and investment plan. The Secretary shall approve or reject in writing such ordinance and plan within sixty days of the date it is mailed or otherwise submitted to him: Provided, That such ordinance and plan shall be deemed approved if, sixty days after submission, the Secretary has not so approved or rejected it. The Secretary shall approve the ordinance and plan if it adequately contains the element specified in section 12(d).

SEC. 13. Notwithstanding any other law to the contrary, the United States grants its permission to the State of Minnesota to transfer land to the White Earth Band as described in section 10(a)(1) which prior to the date of enactment of this Act may have been obtained by the State pursuant to other Federal law or with Federal assistance. Any restrictions or conditions imposed by any other Federal law or regulation on the transfer of such land are hereby waived and removed.

SEC. 14. Not later than five years, or as soon as possible, after the date of enactment of this Act, the Secretary shall make all determinations, provide all notices, and complete the administrative work necessary to accomplish the objectives of this Act. The Secretary shall give priority in making compensation determinations and payments under this Act to original allottees and elderly heirs. The Secretary shall submit a report by January 1 of each year to the chairman of the House of Representatives Committee on Interior and Insular Affairs and the chairman of the Senate Committee on Indian Affairs, which report shall summarize the administrative progress to date and shall estimate the amount and nature of work left to be done.

SEC. 15. (a) There are hereby authorized to be appropriated to the White Earth Band $6,600,000 as a grant to be expended as provided in section 12.

SEC. 16. None of the moneys which are distributed under this Act shall be subject to Federal or State income taxes or be considered as income or resources in determining eligibility for or the amount of assistance under the Social Security Act or any other federally assisted program.

SEC. 17. The Secretary is authorized, if so requested by the authorized governing body of the White Earth Band, to exchange any of the land which is transferred to the United States as described in section 10(a)(1) for any other land within the exterior boundaries of the White Earth Reservation which is owned by the United States, the State of Minnesota, or any of the State's political subdivisions. Nothing in this section shall be deemed to require an exchange not agreed to by all parties to the exchange.

SEC. 18. Any lands acquired by the White Earth Band within the exterior boundaries of the White Earth Reservation with funds referred to in section 12, or by the Secretary pursuant to section 17, shall be held in trust by the United States. Such lands shall be deemed to have been reserved from the date of the establishment of said reservation and to be part of the trust land of the White Earth Band for all purposes.

Mr. BOSCHWITZ. Mr. President, I rise in support of this bill. It is a bill that Senator DURENBERGER and I offered in June 1985, and that we have offered in earlier sessions of Congress, as well.

It deals with a very difficult and complex land claim problem that exists on the White Earth Reservation in Minnesota. Over 100,000 acres of land on the reservation are subject to claims. Our bill would provide compensation to the Indian allottees or their heirs while, at the same time, removing the clouds from the titles of the affected lands.

The bill has a long history, Mr. President, I have spoken on it before. The history of the activities that give rise to the bill go back into the last century.

This is a bill that is supported not only by senator DURENBERGER and myself, but it is supported by the Governor of Minnesota, by the attorney general, and by the majority leader of the senate in Minnesota, all Democrats.

This has very wide bipartisan support. It is supported, indeed, by the chairman of the White Earth Band of Chippewa Indians and really by all State and Federal elected officials.

It has been negotiated and renegotiated and fine-tuned over a period of years. It would end some very vexatious title problems. It would make substantial funds available to economic development of the reservation. It would give the allotees an opportunity to collect.

It will provide clearance for very broad searches that we conducted at the cost of millions of dollars with findings for allottees—and we advised them of their rights. It would indeed give those allottees something they otherwise would undoubtedly not receive because they would have to work their way arduously through the courts. It would be a long and difficult process.

We seek to make that process more equitable, fairer, and more expeditious because so often the delays that are associated with legal proceedings really remove some of the justice that is sought.

I know my friend from Montana who has shown extraordinary interest in this bill will speak on it, and is of a different mind. I respect this position.

I yield the floor and reserve the balance of my time.

The PRESIDING OFFICER. Who yields time?

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. I yield myself such time as I may use.

Mr. President, the basic issue here is whether or not the bill, S. 1396, will resolve the problems that have been briefly described by my friend from Minnesota.

The issue simply put is if the problems are going to be solved on who owns the land, is it going to be done in a manner that is just, correct, and fair?

We have a situation where there is an 854,000-acre reservation located in Minnesota for the Chippewa band called the White Earth Reservation. Of that 854,000 acres, 92,000 was determined to be the school land that was owned by the State for the schools. That left 762,000 acres of land on the White Earth Indian Reservation that was available for allotment.

The present status of that 762,000-acre reservation is this: about 56,000 acres are owned by the tribe, and a very few number of allotees, but the total Indian ownership out of the original 762,000 acres is 6 percent of what it started out to be.

It is strange that the State of Minnesota, besides the school land, now owns some 165,000 acres out of those 762,000 acres. The balance of it is considered to be privately owned.

So the real question before the Senate right now—if we are going to resolve what happened between that point when there were 762,000 acres of Indian reservation available for allotments to members of the Chippewas living at White Earth, and now has dwindled down to 56,000 acres left in Indian ownership—is all that preceded

in between correct and lawful? The injustices that started to occur, where the land was going out of Indian ownership, seemed to begin in 1906. But let me give you some of the historical background of this.

By a treaty proclaimed in 1865 the United States set aside certain land described in the treaty for the use of the Minnesota Chippewas. In 1867 that land was found not to be suitable for agriculture, and therefore the Chippewas ceded it back to the United States in exchange for several promises.

They ceded to the United States a much greater amount than 762,000 acres. But these were the promises of that particular treaty: That the White Earth Reservation area be set aside for the Chippewas in order to provide a suitable farming region for said band.

The President issued an executive order in 1870 to fulfill the treaties of 1865 and 1867. The question came up on whether or not after a survey of the reservation, what uses they were going to make of the land. Was the land going to be cultivated? The Government thought it ought to be cultivated. So they said any male or female Chippewa shall have 10 acres of land under cultivation. When that happens such Indians shall be entitled to receive a certificate showing him or her to be entitled to 40 acres of land.

This went through a process, and eventually it reached a point where a full 160 acres might be certified to any one Indian. Allotments of various size portions of the reservations were made to the individual Indians in accordance with the treaties. However, they were made according to the terms of the Nelson Act in 1889, that provided for allotments to individual Indians according to the terms of another act of Congress of 1887. That was the General Allotment Act. By 1887, much of the land set aside for Indian reservations had begun to attract the attention of white settlers who sought to acquire the land for themselves.

Congress then passed the previous act that I mentioned, the General Allotment Act, which authorized the division of reservation land among individual Indians. This provided for even more allotments so they could get an additional 80 acres of agricultural land up to 160 acres.

What the law called for then—this is perhaps the beginning of the crucial points—was that the Secretary of the Interior had to issue patents. The patents were in trust. What do I mean by that? I mean what the law provided was that the allotted land was designated. The Indian could occupy it. But the Indian was not allowed to sell the land, and the land was not allowed to be taxed. It was exempt from taxation.

The question of what the restrictions were on selling the land was part of what is termed a trust responsibility of the U.S. Government. So the document that was given to the Indian for the allotment was not a deed as we know it. In other words, it was not a fee patent. It was a trust patent. That is a term that the Government used all through this whole process of issuing allotments to Indians.

The trust patent contained the two major points I mentioned—that is, it could not be sold unless the Indian went through a procedure getting permission to sell because it was held in trust for the Indian.

Second, the trust patent protected the Indian from any taxes being imposed by any level of government, whether county, State, or Federal.

The purpose of doing that was to assure that the Indian allottees somehow, having been granted by the United States the opportunity to own and develop land, would not fall through the cracks. In other words, there was great concern that somehow if the Indian owned the land outright, if there was not any trust status, that he or she would be duped and would soon lose the land. There were plenty of examples to demonstrate that that was the case.

So we have a legal technicality. The land was allotted to them. They could not sell it without coming out from underneath the trust status. That issue has provided most of the questions of whether land transactions were properly handled on White Earth.

But the second point must not be forgotten. The second point is that the Indian land would not be subject to county or State taxes. Immediately that raises the issue if the State of Minnesota now owns some 165,000 acres of what used to be Indian allotment land, how have they happened to acquire any of that land through tax forfeiture.

It would be illegal if the lands did not come out from under the Trust Act patent.

The records of the Department of the Interior are to the effect that these allotments were issued under a document that is called a trust patent.

The face of the trust patent is sort of boilerplate language that the land will be held in trust and will not be sold as long as it is held in trust by the U.S. Government. The question of whether or not States or counties can tax Indian land has been subject to many court cases and in all instances, so far as I have been able to determine, the courts have found that while the land is held in trust status it will not be subject to State or county taxes, unless the Indian would expressly agree to it.

I will be offering some amendments to this bill. One of them deals with the question of whether or not the State of Minnesota has acquired through tax forfeiture Indian land that was illegally or unlawfully acquired through that process.

The complicating factor that involved this problem in a considerable amount of controversy both in and out of court was an amendment back in 1906 and again renewed in 1907, which is known as the Clapp amendment. It has not been found to be very clear and courts cannot determine that it removed the trust status of the land. Therefore, for many Indians who had not applied to have their land removed from trust status and a fee patent issued, the effect of the amendment is that after it was passed most of the Indian allotment land was recorded in the three counties under the ownership of non-Indians.

Reviewing the history on this, after the first Clapp amendment of 1906 and the second one of 1907, the pressure had built for access to the Indian lands and particularly for the timber that was on those Indian lands. During the first 3 weeks the Clapp amendment was in effect, Becker County, one of the three counties located within the White Earth Indian Reservation, alone recorded over 250 mortgages of Indian land. Three timber companies particularly were noted for their activity on the reservation. I do not know whether it is necessary to name them or put that into the RECORD. The prices paid for the timber were below those established for comparative sales within the adjoining area.

Obviously, this land had not reached much agricultural development by 1906 or 1907 or 1908, but the timber was considered valuable and the timber companies in the area were anxious to gain the land simply for the value of the timber.

It became a scandal. The White Earth Reservation did have valuable timber. Each member of an Indian family was an eligible allottee. Allotments were given to all of the Indians that applied, as should be done under the treaty. The question then came up, because of the Clapp amendment, which referred to the capability of mixed blood—that is not full blood but mixed blood Chippewas—whether they were the ones who were supposed to get the land taken out of trust and, therefore, be capable of legally selling the land to a non-Indian.

As a result of this sort of stampede to gather up all the Indians possible and secure their land and get a title recorded in the county courthouse, there was an investigation by President Theodore Roosevelt. Warren C. Moorhead was selected to be appointed to the Board of Indian Commissioners. He was selected by President Theodore Roosevelt to try to determine whether or not what they were hearing about what was going on at

White Earth was scandalous and unfair to the Indians.

Mr. Moorhead went to the White Earth. He collected 117 affidavits representing over 1 million dollars' worth of property that had passed from Indian hands. He felt compelled to get out of the White Earth area by that time since there were some perceived threats against his physical well-being. So he secured an armed escort and got out of there.

When he presented his evidence in Washington to the Board of Indian Commissioners, they then directed a further investigation in 1909.

Moorhead returned in 1909 accompanied by a person named Edward Linnen, who was a regular experienced Indian Office Inspector. They later submitted their report where they found that over 90 percent of the lands allotted to the full-blood Chippewa Indians on White Earth had either been sold or mortgaged.

Fully 80 percent of the land on the reservation had passed into private ownership.

The effect of the Clapp amendment was to say, well, it is all right for mixed-blood Chippewas to sell their land, but full bloods could not. That is what Clapp intended, presumably, in his amendment.

That required a great deal of pondering by the Department of the Interior and Congress itself. Over a period of 10 years, they set about to determine how many of these Indian people were of mixed blood and how many of them were of full blood, in order to carry out what is known as the Clapp amendment, which would allow, purportedly, the sale of land by those Indians who were of mixed blood.

I have to make a point, Mr. President, and I think it is a point that cannot be ignored. All of the documents of the Department of the Interior failed to show where any great amount of Indian allottee land ever passed out of trust status.

In order for it to pass out of trust status, it was determined both under the Clapp Act and other acts of Congress that there had to be a mechanism where the Indian asked the Department of the Interior to remove the trust status. All the documents I have been able to review clearly show that the document that was awarded to the Indians for the allotment was simply a trust patent. I stress "trust." On its face, it said that the land described would be held in trust by the United States, meaning that it could not be sold by the Indian as long as it was in that trust status, nor could it be taxed. So the two key relevant points are there: Was the action taken by the U.S. Government following the Clapp amendment and other acts of Congress lawful in terms of alienating the ownership of the land from the Indians? Was it brought out from under trust? I can find no indication of very many instances where that was the case.

Looking at all of the available material, looking back on the title of the land through the courthouses and trying to get an assessment of all the transactions that transpired, you get back to the key point, did it come out of trust? The answer seems to be that relatively very few allotments ever came out of trust status and therefore, under the law, could not be lawfully passed to another individual except by inheritance.

The proper procedure to apply to have the trust status removed was not followed and the legal point remains: Was there or was there not the capability of the Indians to sell their land and therefore ownership pass on to another individual? That has created a great amount of concern among those who now believe that they do own the land because they have a deed recorded in the courthouse of whatever county they live in and hope it is a good deed.

The other point about how does the State ever acquire this land seems to indicate that the State acquired the land unlawfully. If an Indian allottee does not give his or her consent to pay taxes, it is clearly unlawful for the State to acquire the land through the tax forfeiture mechanism. Therefore, the State has not lawfully extinguished the title of the original Indian allottees or their heirs.

There is a second point that does not involve as much land but that is clearly unlawful, too. That is, that an Indian minor could not dispose of his land. Also, trust lands acquired through probate of some kind under State auspices was not legal either. As long as it is under trust status, the probate status of an Indian's allottee land must be under the supervision of the Federal Government because that is part of the trust responsibility.

Mr. President, before I go any further on this, I think I have raised enough questions in anybody's mind as to what is the solution of all this. Let me point out that there are a number of reasons why this bill is really not the proper vehicle to solve the problems.

The testimony before the Indian Affairs Committee on November 17, 1983, by the office of the attorney general of the State of Minnesota, submitted data regarding these claims by Indian heirs or Indian allottees. There are very few of the original allottees still alive, but their original heirs can make some claim to the land they feel was unlawfully taken from them. The attorney general of Minnesota told us that there were 948 land files which the Bureau of Indian Affairs considered active—that was in 1983—and that these claims affected a total of 100,000 acres in the 3 counties. The breakdown of claim categories provided by the State differs in descriptive terms from that used by the Department of the Interior's field solicitor, but I am going to recite here those figures that were provided by the State of Minnesota.

In category A, unapproved trust land sales—that is, the number filed—are 526. That is, they are claims.

The second category B, improperly tax forfeited land files, again the number of claims is 222.

On improper probates, there are 107 files or claims.

On forced fee patents, there are 88 files or claims. That, with three minor categories, each numbering 2, 2, and 1, adds up to 948 and the total acreage adds up to slightly over 100,000 acres.

The Justice Department has said it will not initiate clouded title litigation on all of these files but the Federal Government still considers all 948 files to involve serious legal problems which cloud the current land titles.

The general ownership breakdown of the 100,000-plus acres at risk is approximately as follows: Privately, there are 65,900 acres; the State or counties account for 28,800 acres, and the United States has 5,000 of those acres. The county breakdown of the 100,000 acres at risk is approximately as follows: Mahnomen has 46,000 acres, Becker has 39,000 acres, and Clearwater has 14,000 acres.

The Department of the Interior has formally requested the U.S. Justice Department to sue the State and counties in order to get back the titles to approximately 7,000 acres of land.

All of this land—and that is 7,000 acres—involves alleged improper tax forfeiture.

Also in the same category of alleged improper tax forfeiture is approximately 12,500 acres of land held by private citizens. The total amount of land within the original 35-township White Earth Reservation, as I earlier stated, is 854,000 acres. I earlier identified that some 90,000 acres was set aside for school purposes by the State, but I think the more important part is how much is still retained by the State—well over 200,000 acres—which would, of course, include the 90,000 acres that is held for school land. The 90,000 acres held for school land has not ever been subject to any question at all by anybody, and so we can leave that aside. It is the other 100,000 acres that has been acquired by the State. There is a considerable question as to how the State could have ever acquired that amount of land on a lawful basis.

The bill before us says that the State will give 10,000 acres back to the tribe. On what basis they decided it would be 10,000 acres, I am not sure. But it seems rather self-serving for the State of Minnesota to say, "Well, we

will give back 10,000 acres of the 100,000 acres that is at risk" when it is questionable as to whether they acquired any of it lawfully.

As I have earlier stated, I shall offer an amendment to have that considered separately, how the State acquired it. If they had not acquired it lawfully, it seems to me that the proper situation would be for the State to return it to the tribe.

There are a number of people who oppose this bill in the State of Minnesota. No. 1, the Indians oppose the bill, the ones who are involved, the White Earth Indians. Their tribal council speaking for them opposes the bill. They oppose the bill because they think it is an unfair settlement.

There are a number of other groups that oppose it, and while I am not familiar with these groups, I will list them and describe what I know about them.

The United Townships Association sent this letter as of November 21:

DEAR SENATOR: The United Townships Association is comprised of the thirty-two townships within the boundaries of the White Earth Reservation thru joint powers agreements. We are the voice responsible only to the residents both Indian and non-Indian of White Earth. S-1396 was introduced without the input necessary by the people who live with the repurcussions of any legislation passed pertaining to this reservation.

We feel that S-1396 with its amendments, is unconstitutional, a political mockery, using legislation to pay off tribal government with no legitimate claim, while failing to adequately investigate or compensate the original property owners or their heirs. It also fails to protect the current landowners, who are innocent third parties, caught between shifting Federal Indian Policy.

If all the politics were thrown out of this mess and an honest effort made to settle land claims that would clear titles the U.T.A. would support and endorse it.

Please vote against S-1396.

Respectfully,

ROBERT J. BRUNS,
U.T.A. Chairman.

We have a very recent telegram from the tribal council expressing again their reluctance to have this bill become law. It is dated the 9th of this month.

The group called The People's Land, a group from White Earth, MN, sent us a letter detailing in length their opposition to the bill.

We have been contacted by a group known as Anishinabe Akeeng of White Earth opposing enactment of the bill. This is a group that represents the heirs of the Indian allottees.

The group called Minnesota Public Interest Research located in Minneapolis sent us this letter dated December 9 of this year:

MINNESOTA PUBLIC INTEREST RESEARCH GROUP,
Minneapolis, MN, December 9, 1985.

DEAR ELECTED OFFICIAL: The Minnesota Public Interest Research Group (MPIRG) is extremely concerned that proposed legislation affecting the White Earth Chippewa Reservation in our state may pass the Senate and move to the House this week.

MPIRG, respresenting 50,000 members in the state, strongly opposes Senate Bill 1396 and House Resolution 2678 on grounds that the proposed legislation is unfair and may be unconstitutional.

The bill has no official Indian backing. The White Earth Tribal Council and the Minnesota Chippewa Tribal Executive Committee both passed unanimous resolutions in opposition. Two groups representing Indian heirs and claimants to apparently illegally taken land have testified and demonstrated against the bill, and even the Minneapolis Area Office of the Bureau of Indian Affairs registered its opposition. The Minnesota League of Women Voters similarly is on record against the bill.

MPIRG urges a vote against S. 1396 and H.R. 2678 so that a more satisfactory resolution of the White Earth claims dispute can be worked out.

We have enclosed our own coverage of this important, timely and precedent-setting issue.

Thank you,

KRISTAN BLAKE,
Executive Director.
JOHN H. RYKHUS, JR.,
Chair, MPIRG Board of Directors.

The Minnesota Public Interest Research Group mentioned the League of Women Voters of Minnesota, and we were contacted yesterday by them to alert us to the fact that:

The League of Women Voters for Minnesota asks Governor Perpich, Senators Boschwitz and Durenberger, and Attorney General Humphrey to stop and listen. We ask these public officials to halt actions to pass S. 1396, and to meet with and listen to the White Earth Indian people. It is most important to all in Minnesota that agreement be reached with and not for, Indian people. Quick, unilateral decisions have hurt all citizens of Minnesota in the past. Please take this opportunity to work out a fair and reasonable solution concerning the White Earth Indian Reservation.

Mr. President, I ask unanimous consent that these communications be printed in the RECORD.

There being no objection, the communications were ordered to be printed in the RECORD, as follows:

[Telegram]

WHITE EARTH, MN,
December 9, 1985.

Senator JOHN MELCHER,
Senate Select Committee on Indian Affairs, Capitol One, DC.

Contrary to what your office might have heard from the White Earth Reservation Tribal Council, that they now support S. 1396 by a special tribal council meeting is not true.

The White Earth Reservation Tribal Council still confirms total opposition to Senate bill 1396 and, hopefully, your office will support us in our strong opposition to this bill.

Sincerely,

JERRY RAWLEY,
Secretary-Treasurer, White Earth Reservation Tribal Council.

WHITE EARTH ANISHINABE NATION,
White Earth, MN.

DEAR FRIENDS: S. 1396 is on its way out of the Senate Select Committee on Indian Affairs after a close 5-4 vote. We are asking that you oppose this bill, and the companion legislation HR 2673. These bills are proposed by Senators Boschwitz and Durenberger and Representative Arlan Stangeland—all of Minnesota. And these bills are opposed by the White Earth Tribal Council, the Minnesota Chippewa Tribe, Anishinabe Akeeng (the Coalition of Heirs and Allottees to White Earth lands), and the Area Director of the Minnesota Agency-Bureau of Indian Affairs.

This legislation is known as the White Earth Reservation Land Settlement Act of 1985 and will terminate Indian title to allotted lands within our reservation. The White Earth Indian reservation is the site of the largest internal reservation land claim in the United States. This condition comes from a series of illegal transactions which resulted in the transfer of our allotted lands to non-Indian interests. Particularly, these lands have been transferred through illegal tax forfeitures, minor sales, full-blood sales, and a great number of unconscionable contracts. Under the federal USC 25 Section 2415 investigation, many of these claims were documented, however, the investigation was cut short before it could be completed, and the full scale of the problem identified.

This bill "approves and ratifies" the transfer of these allotments to non-Indian interests, and ". . . By virtue of the approval and ratification of transfers . . . all claims against the United States, the State of Minnesota or . . . any person or entity by the White Earth Band, its members . . . is lifted and nullified . . ." White Earth Indian heirs who have been identified as legal heirs to these allotments in question would receive "compensation", and the White Earth band would also receive monetary settlements. However, any legal claims not settled within 180 days from the enactment of this bill would be terminated and barred. The anticipated price tag for this "settlement" is $11.4 million for heirs, $6.6 million for the White Earth band, and necessary monies for the Bureau of Indian Affairs to complete these activities.

There are a number of significant problems with this bill, and reasons why the White Earth people oppose it so strongly. To point them out to you, let me summarize the significant conflicts in this bill.

1. There are very serious constitutional infringements in this bill. First of all, the lands in question are individual Indian allotments which have transferred lands to non-Indian landholders who now have "clouded title". To "remove the cloud from these titles" by terminating Indian title to these lands is to terminate private property rights for a private interest. This is not a valid public purpose for a Fifth Amendment taking. This is, indeed, a dangerous notion. Second—there is a question of due process and due compensation. In Section 8 subsection (e) of the bill, ". . . The Secretary of Interior shall then make a diligent effort to locate each allottee or heir; however, if after two years from the date on which a determination becomes conclusive an allottee or heir cannot be located, the Secretary of the Interior shall declare the amount owing to such allottee or heir forfeited . . ." This is a very important point for several reasons. First of all, the Bureau of Indian Affairs has, for all practical purposes not probated the estates of the majority of White Earth people for 40-60 years. For instance, an 85 year old heir recently received notification of an interest in lands of his grand-

mother, on which the last transaction was in 1922. In other words, for over 60 years, he has not been notified of his interest in this land. Basically, how can heirs have a due process if the majority of the heirs have not been notified of any interests and claims in their allotments for 60 years? We do not believe that the majority of interests in these cases will be protected, or afforded any just process whatsoever.

2. Since the 2415 investigation was not completed, the full scale of the illegal activities has not been outlined, yet the bill purports to terminate all these claims without an informed basis for settlement. As a simple example, the Bills—H.R. 2678 and S. 1396 define a "Full Blood" (in Section 3(c)) as those so designated on the 1920 Blood Roll. It is well documented that this 1920 Blood Roll has major discrepancies and was basically a tool in which many "full bloods" were designated "mixed bloods", in order to facilitate sale of their allotments. The 1920 Blood Roll is inaccurate, and basing an Act of Congress on this misleading and, indeed, illegal list, is a disservice to all Americans.

3. The long term economic effect of this legislation will be disastrous for the White Earth people, and in the long term not solve the economic problems of non-Indian landholders on the reservation. We have documented that over the years, economic dependency has increased for the White Earth people, and indeed, with a huge refugee population of 21,000 (out of 24,000 enrolled members), we are refugees without a land base in our own land. While Americans debate the fate of "Boat People", and refugees from the Eastern block, Central America, and elsewhere, we do not see it as a positive step to further alienate the first Americans from our own lands. To further destroy our land base is to further the destruction of our people—and this is economically disastrous for not only Indian people, but the non-Indian community as well. Second, there is over $9 million worth of advertised property for sale on the reservation. We do not see that "clearing clouds to titles" makes this property marketable, or that there will be an instant real estate boom on the reservation. Non-Indians looking to buy property are not likely to purchase on the reservation, if property is available elsewhere for the same price. We must look to a more long term solution to help these non-Indian people sell their property—and at the same time work with the White Earth people to consolidate our land base.

These are just three of the many concerns we would like to point out to you. We would like to have you join us in opposing these dangerous legislative proposals, and work for a more just future on White Earth, and the many other reservations facing the same kind of problems.

We have an alternative proposal we would like to offer in the next session of Congress. We believe that this proposal is more just, and will answer the long term needs of the non-Indian and Indian alike. We also know that this proposal will have the consent of the Indian people—a necessary component of an Indian settlement.

Our legislative proposal has several components. The first component involves those lands held by the state, county and federal governments on the reservation. We believe that these lands could be returned to the White Earth band to be held in Band trust for our future generations. This amounts to almost 200,000 acres of land, and we believe that our people are capable of, as we have for thousands of years, taking care of our lands. A second component would be to the benefit of the non-Indian landholder on the reservation, who is pushing to get "clear title", in order to sell their lands to someone else. We propose something similar to the Boundary Waters Canoe Area project, in that a fund would be established to purchase these lands from the non-Indian, and return them to Band Trust for our future generations. Other pieces of our proposal include to complete the investigation, so that all our people may know the truth about our history, and from there make a clear path for the future.

S. 1396 is dangerously close to moving to the Senate Floor, and HR 2678 will follow. This is not an issue of the "Democrats or the Republicans," this is an issue of taking private property rights for an invalid purpose, and for literally forcing a settlement without the consent of the Indian people. We beg you to join us, and help us save our reservation. It is all we have left. Stop S. 1396 and HR 2678.

Megwetch,

WINONA LADUKE,
(For Anishinabe Akeeng).

WHITE EARTH RESERVATION TRIBAL COUNCIL: RESOLUTION NO. 001-85-018

Whereas, the White Earth Reservation Tribal Council is the duly elected governing body of the White Earth Indian Reservation; and

Whereas, the White Earth Reservation Tribal Council has determined that its mission is to promote the general well-being and protection of the rights of the constituents; and

Whereas, H.R. 2678 was introduced in the United States House of Representatives on June 5th, 1985, by Mr. Stangeland and was referred to the Committee on Interior and Insular Affairs; and

Whereas, the bill is proposed to be cited as the "White Earth Reservation Land Settlement Act of 1985" and purports to settle claims relating to certain allotted Indian lands on the White Earth Reservation and to remove clouds from titles to certain lands, in contravention to the interests of Indian heirs and members of the White Earth Band; and

Whereas, sections 3(a), 3(b) and 4(c) relate to invalid tax forfeitures and other illegal sales, mortgages, and transfers of allotments and Section 5(a)(1) attempts, in return for a "compensation determination" to deem said transfers to have been made in accordance with the Constitution and laws of the United States applicable to the transfer of allotments and to ratify said transfers as of the date of transfer, when in fact said transfers were in contravention of the Constitution and laws of the United States applicable to the transfer of allotments; and

Whereas, the bill also proposes that any action attacking title to land based on the lack of an heirship determination by the Secretary of the Interior with regard to any allotment or interest that may appear on the "Federal Register list" under section 6 of the bill would be forever barred unless the complaint were filed prior to enactment of the act, and bars an action under the Tucker Act, 1346(a)(2) and 1491 of title 28, United States Code unless a person entitled to compensation under the Act files the complaint within one hundred and eighty days of the issuance of the notice of the Secretary's compensation determination, and bars actions pursuant to the Tucker Act section 1491, title 28, United States Code, to the Claims Court unless filed in the Claims Court within one hundred and eighty days of the final judgment of a court of competent jurisdiction; and

Whereas, the bill proposes that any tribe, band, or group of Indians or any individual shall have only one year after the "Federal Register list" that would be published under the bill, to submit to the Secretary any additional allotments or interests which should fall within the provisions of section 3(a), 3(b), 4(b), or 4(c), and the bill lists other limitations and time periods, despite the fact that the United States Department of the Interior has responsibility to probate the estates of many allottees whose estates were invalidly probated in State courts, and the United States could not conceivably carry out this responsibility within the time periods contained in the bill, which would foreclose the claims of rightful heirs that could be determined; and

Whereas, Section 7(a) of the proposed bill provides that compensation for loss of an allotment or interest shall be the fair market value of the land or interest therein as of the date of tax forfeiture, sale, allotment, mortgage, or other transfer or other transfer described in the bill, plus interest at 5 per centum, and under Section 7(b) of the bill the date of transfer applicable to interests described in section 3(b)(6) is proposed to be the last date on which any interest in the subject allotment was transferred by document of record by any other heir of the allottee; and

Whereas, the bill constitutes an attempt at a current taking by statute of the beneficial interests of the Indian heirs, without just compensation and without a valid public purpose, and fails to protect and preserve the beneficial interests of the heirs that are entitled to the lands that should be in trust, and along with the time limits and other provisions of the bill denies the heirs due process of law and equal protection of law and equal protection of law under the United States Constitution, and violates numerous federal laws relating to the allotment of Indian lands, when as a matter of law the United States should be vigilant to the enforcement of statutes designed for the protection of Indian lands; and

Whereas, in the Zay Zah case the Minnesota Supreme Court held that trust patents issued for White Earth Allotments created vested rights which Congress could not abrogate without consent, and that the Department of the Interior, not the State courts, had jurisdiction and responsibility to determine the heirs of deceased White Earth Chippewas and to distribute their trust estates; and

Whereas, H.R. 2678 seeks to ratify and confirm unconstitutional and unlawful sales and transfers of allotments on the White Earth Reservation and in effect attempts to overrule the Zay Zah case and attempts to further implement and ratify the wrongful uses and perpetrations under the Clapp Amendment of 1906, in violation of law and federal policy and the Indian Reorganization Act of 1934 which was dedicated federal law for the permanent protection of trust properties; and

Whereas, at a meeting with the heirs and members of the White Earth Band on May 13, 1985, the Tribal Council voted to rescind any prior support for the proposed bill and to oppose the bill: Now, therefore, be it

Resolved, That the White Earth Tribal Council opposes H.R. 2678, and the companion bill by Mr. Boschwitz, and rescinds any prior support for the proposal or bill.

PRESS RELEASE

On November 7, the Senate Select Committee on Indian Affairs sent out of committee S. 1396, or "The White Earth Land Claims Settlement Act of 1985". After a close vote of 5-4, and over strong constitutional questions raised by Senators John Melcher (MT), and Quentin Burdick (ND), Senator Mark Andrews (ND) pushed for the bill to be passed out of committee. Minutes after the approval of the bill, some 28 persons were arrested at Senator Rudy Boschwitz's St. Paul office for obstructing access to the office. These people, the majority Native people from White Earth and Minneapolis, opposed the legislation. S. 1396 has been proposed by Senator Rudy Boschwitz and Dave Durenberger from Minnesota.

Although the bill passed out of the Committee, there is still strong opposition to the legislation, and Anishinabe Akeeng, the coalition of heirs and allottees to White Earth lands, plans on waging a strong battle to stop what Akeeng members call "the railroad of the bill". Anishinabe Akeeng has actively opposed the legislation, and successfully for the past three years averted the passage of the bill. Unfortunately Arlan Stangeland, Rudy Boschwitz and Dave Durenberger have "utilized a number of dishonourable tactics", as observers have noted, in attempting to push the legislation through. In the last session of Congress, for instance, the two bills were placed as riders on continuing appropriations bills, just in the last minutes of the session. Fortunately, John Melcher and Sidney Yates removed the bills from the later passed appropriations bills. Anishinabe Akeeng members are concerned that this type of action is not used in the upcoming weeks in Congress.

At the Tribal level, White Earth Tribal Council representatives, on a number of occasions considered accepting the "settlement" proposal, since federal and state officials told the tribe this was "the best possible offer". Anishinabe Akeeng member Marvin Manypenny noted that "they always tell us this is the 'best possible offer', and every year they 'up the offer'." They said (federal and state officials) this was the best and only offer when the "settlement" was for $5 million. And they keep saying this is the best possible offer when they want to return 10,000 acres of land, and around $20 million. The truth is that they are getting away with the bank. Even this $17 million is pretty cheap for 200,000 acres of land, not to mention the hardships, death, suffering, timber, and everything else they have taken from us. We say White Earth is Not for Sale".

Each time the Tribal Council has considered the proposal, and tentatively accepted any proposal, Anishinabe Akeeng and community members have forced a change in the Council's position. In May of 1985, the Council once again passed a resolution opposing the legislation totally. However, the Tribal Chairman, Chip Wadena, acted unilaterally and convened negotiations in Washington October 30 of this year. As a result of his "negotiations", amendments were placed on the Boschwitz bill, and constituted the basis on which the bill was passed out of committee in the "mark up" session. On November 7, Wadena was confronted by members of the Minnesota Chippewa Tribe Tribal Executive Committee and Anishinabe Akeeng at the Intertribal Meeting at Grand Portage reservation. These people pointed out that these activities were illegal and violated both the constitution of the White Earth Tribal Council and the Minnesota Chippewa Tribe. One Tribal Chairman noted that "he could never go against a Council resolution, even if he disagreed with it." Other members simply pointed to the fact that these activities were illegal under tribal law. "We intend to continue our work in the protection of civil and tribal rights in our community," said Dale Hanks, one of the Anishinabe Akeeng members at the meeting. "We will continue to confront the Chairman particularly as the abuse of power by the Chairman endangers our national land base."

In addition, 28 persons were arrested on the Skyway at Senator Rudy Boschwitz's office in St. Paul, one hour after the bill had passed from committee. Convening with a pipe ceremony and prayer song at 9:00, approximately 125 persons from White Earth, farm groups, and the peace and justice communities congregated at the Senator's office. At 11:00, 28 people were arrested as they protested the forwarding of repressive legislation on White Earth.

Anishinabe Akeeng members are working to block the bill in the Senate. "We urge people to support Senator Melcher in putting a hold on the bill in the Senate, and we are asking that people aid us in opposing HR 2678 (the companion bill) in the House Interior and Insular Affairs Committee." Dale Hanks notes. Morris Udall (AZ) chairs that Committee. Akeeng hopes to stop the bill prior to this session of Congress, in which case state enabling legislation would expire, and Akeeng members hope that "more just" negotiators would take place. "Simply put," Marvin Manypenny states, "White Earth is Not for Sale, and we consider these bills a railroading of repressive legislation."

Mr. MELCHER. Mr. President, I wish to take a few more minutes to dwell on two points. It has been the policy of Congress, the policy of the Department of Interior, and the policy of the Department of Justice for some 50 to 80 years that in settling Indian land problems a consensus is reached before recommended bills are passed by Congress. That consensus has not been reached in this instance. I realize all of the stress that is upon my friends, Senator BOSCHWITZ and Senator DURENBERGER. I have sympathy for the people on White Earth, whether they are Indian or non-Indian, who desire a clear definition of whose land is whose. But this bill, if it becomes law, places in jeopardy that longstanding principle of reaching a consensus.

The Senate Indian Affairs Committee handles many bills of this nature, and the practice has always been to reach that consensus where you get this tribe, the Justice Department, the Department of Interior, the non-Indians, and the State involved to agree that it is a good settlement. In this instance, we have the State of Minnesota, for its own reasons, being satisfied with this type of solution.

I think any Governor would be hard pressed if it ended up with 100,000 acres of Indian land coming into the ownership of the State, probably unlawfully. A Governor of a State would be hard pressed to say, "Let's give it back." So the Governor of Minnesota and the State legislature say, "Let's give back 10,000 acres. Let's give back at least one-tenth of what we have."

That is sort of a tithing in reverse. The tithing is not satisfactory to a lot of people, including the people in Minnesota about whom I just talked and whose statements I have just asked to have printed in the RECORD, and it certainly is not satisfactory to the Indian claimants.

Mr. President, I think that lack of consensus is a point that should automatically determine that this bill should not pass. That has not happened. By a vote of 5 to 4 in the Indian Affairs Committee, this bill was reported as it is.

We have asked the Justice Department to advise us on the propriety of this bill. They deferred to Interior, and Interior, I suppose out of exasperation, just said, "Well, if Congress passes the bill, we will try to fulfill the requirements of this bill," which hardly addresses the basic points.

However, if the bill is going to pass, I believe it is essential to offer some amendments, and I hope they will be accepted, at least to improve the bill. I will offer the first one.

AMENDMENT NO. 1414

(Purpose: To extend the time for White Earth heirs and allottees to file claims)

Mr. MELCHER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana [Mr. MELCHER] proposes an amendment numbered 1414:

On page 36, line 16, delete the words "one-hundred and eighty days" and insert in lieu thereof the following: "eighteen months".

Mr. MELCHER. Mr. President, the amendment simply provides this: The bill permits 6 months for the allottees and their heirs to file claims. Section 6 of the bill is an attempt to settle the claims by litigation. In other words, if this bill is going to be constitutional, it has to have section 6. In the bill, they want to allow just 6 months for allottees or their heirs to file claims.

Many of the potential claimants, whether they are heirs or allottees, have yet to be identified. Therefore, that 6-month opportunity to file claims is pretty unrealistic. In order to file the claim, they will have to be aware that they can. Second, they will probably want to discuss this with legal counsel, to see what the procedure is.

I offer this amendment in order to make this bill a little more workable. It is a very simple amendment, easily understood, and I hope it can be accepted. It is simply changing 6 months to 18 months, which I believe is a more realistic timeframe for making a determination on the merits of these claims

of any of the allottees or their heirs to see whether they have some justifiable reason to enter their claims.

Mr. President, I reserve the remainder of my time.

Mr. BOSCHWITZ. Mr. President, the so-called "statute of limitation" period in the bill has been the subject of extensive negotiation and debate for several years. The 6-month-minimum period in the current bill is a compromise that accommodates various concerns. It should not be extended.

The dual purpose of this settlement bill is to clear legal uncertainties from current land titles and to provide compensation and other benefits to Indians as atonement for the policies that caused the land uncertainties. One purpose should not be accomplished without the other. Land titles should not be cleared without compensation being assured. Likewise, compensation should not be given if titles are not appropriately cleared.

The 6-month limitation for the initiation of land title lawsuits is designed to ensure that both purposes of the bill are accomplished at about the same time. It also is added protection against constitutional attacks on the bill.

There is a strong argument that land titles be cleared immediately upon passage of the bill. That is the way S. 1396 originally was drafted. A compromise period that was worked out between the State, the counties, and the White Earth Tribal Council contained a 3-month minimum statute of limitations period. The Senate committee extended that to 6 months.

I did not support the increase to 6 months and will not support the bill if it is greater than 6 months.

The title problems should not be extended indefinitely—that is what we are trying to correct—or else the reason for the legislation disappears. The White Earth Band as well as individual allottees and heirs are getting substantial benefits out of this bill—probably greater than they would receive from the courts. The flip side of that coin is that current landholders get benefits in a reasonable timeframe as well.

Allottees and heirs have already had 5 or more years to file title actions since the current land disputes have become public. A 6-month-limitation period will not adversely affect the rights of any Indian who wants to litigate for title.

The Senate Select Committee made a recommendation of a 6-month period. I am not at all pleased about that, but understand compromises must be made. I urge my colleagues to oppose any extension.

Mr. MELCHER. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

The yeas and nays were not ordered.

Mr. MELCHER. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BOSCHWITZ. Mr. President, I move to table the amendment of the Senator from Montana.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I ask for the yeas and nays on this motion.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Minnesota to lay on the table the amendment of the Senator from Montana.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER] and the Senator from Utah [Mr. HATCH] are necessarily absent.

I further announced that, if present and voting, the Senator from Utah [Mr. HATCH] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES] is absent because of illiness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 58, nays 37, as follows:

[Rollcall Vote No. 372 Leg.]

NOT VOTING—5

Chiles	Goldwater	Stennis
East	Hatch	

So the motion to lay on the table was agreed to.

Mr. BOSCHWITZ. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS. Mr. President, S. 1396 was introduced by Senator BOSCHWITZ and Senator DURENBERGER on June 27, 1985. The purpose of the bill is to settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation and to remove clouds from the titles to approximately 110,000 acres of land situated within the reservation. The Select Committee on Indian Affairs held hearings on this bill on September 11, 1985. On November 7, 1985, the committee, by a divided vote, ordered the bill reported with a recommendation for its enactment with an amendment in the nature of a substitute.

The bill would retroactively ratify land transactions by which individual Indian allottees became divested of ownership of their trust allotment. This ratification would become effective only after first, the State of Minnesota has entered into an agreement with the Secretary of the Interior providing for transfer of 10,000 acres of land from the State to the Secretary for the benefit of White Earth Band of Chippewa Indians; second, the State appropriates $500,000 for the purpose of assisting in the implementation of this act; and, third, the Congress has appropriated $6.6 million for an economic development fund for the band. The bill provides for compensation of allottees or their heirs to be provided in accordance with a legislative formula, and such claim will be treated as a final judgment, award, or compromise settlement against the United States under the provisions of section 1304 of title 31, United States Code. Compensation for loss of an al-

lotment or interest shall be the fair market value of the land as of the date the land passed out of Indian ownership, less any compensation actually received, plus interest compounded annually at 5 per centum from the date of loss.

The proposed ratification would not effect any action in any court—State of Federal—to recover title or damages relating to land transactions proposed to be ratified if a complaint for such title and damages is filed in court within 180 days from the date of enactment of this act or before Congress appropriates the funds authorized in this legislation and the other conditions spelled out above have been met, whichever is later in time. In addition, if an heir, allottee, or any other person entitled to compensaton under this legislation elects, he or she may bring an action in the U.S. Claims Court to challenge the constitutional adequacy of the compensation determination of the Secretary as it relates to any particular claim. In either case, if the claimant files for title in a court of law or if the claimant elects to sue the United States in the claims court, such claimant will be barred from receiving compensation from the settlement fund established by this bill.

Mr. President, this is a troublesome piece of legislation. On the one hand, we are extinguishing identified or potential claims of individual Indians to titles to lands within the White Earth Reservation without the consent of the individual Indian claimant and without the expressed consent or concurrence of the Council of the White Earth Band of Chippewa Indians. On the other hand, the claims that are being estinguished are exactly that—claims—not proven entitlements. In fact, as one examines the claims and the legal theories upon which they rest, it appears that many of these claims rest on questionable legal grounds and could well be lost if prosecuted to their final conclusion in the courts.

It is because of the questionable nature of these claims that I believe this legislation is in the best interests of the individual members of the White Earth Band of Chippewas and in the best interests of the Band itself. I believe also that this legislation is in the best interests of the United States itself for a number of reasons: First, I believe it does justice to the individual Indian claimants by providing a process for compensation for losses without requiring final adjudication of the claims; second, it establishes an economic development fund of $6.6 million for the White Earth Band which can be used, among other things, for rebuilding the land base within the reservation; and, third from the standpoint of the United States it eliminates the need for protracted litigation of a vast number of claims which would place a heavy financial burden on the department of the Interior, the Department of Justice and on the courts.

And, Mr. President, it does justice to the non-Indian owners of property on the White Earth Indian Reservation by removing clouds on titles to lands which in many cases have been held by the families for many years, thus allowing these persons to sell or mortgage their property, obtain loans for agricultural purposes, and avoid protracted litigation at their own personal expense.

Mr. President, I would like to say what this legislation does not do. Contrary to concerns expressed by some of the opponents to this legislation, this is not termination legislation. The return of 10,000 acres of land to tribal ownership and the provision of a $6.6 million economic development fund for the White Earth Band is a strong reaffirmation of support for tribal government. Nothing in the bill will effect any reduction or diminishment of the reservation boundaries, and nothing in the bill will affect in any way the jurisdiction of the White Earth Band of Chippewa of the jurisdiction of the State, the counties or the municipalities within the boundaries of the reservation.

Finally, Mr. President, I would like to point out that this legislation will have limited precedential value. The vast majority of the claims at White Earth arise because of a Federal statute that is applicable only to this one reservation. I refer to the Clapp Act of 1906 in which Congress attempted to remove all restrictions from the trust properties of any Indian person having the slightest degree of non-Indian ancestry. It is the effects of this act that lead to the great bulk of the claims addressed in this legislation.

Mr. President, because of these facts, I have concluded that this legislation is in the best interest of all concerned and I support the enactment of this bill.

Mr. DURENBERGER. Mr. President, today I rise in support of S. 1396, the White Earth Reservation Land Settlement Act of 1985. This legislation, introduced by my distinguished colleague from Minnesota [Mr. BOSCHWITZ] and me, is the product of many years of discussion, and will resolve once and for all the complex legal questions surrounding land ownership on the White Earth Reservation in my home State of Minnesota.

Several different types of disputes involving over 100,000 acres of land have resulted from conflicting congressional and Executive actions beginning nearly 100 years ago.

In 1902, White Earth Reservation land was allotted to tribe members pursuant to the Nelson Act of 1889, with the parcels held in trust by the United States for the individual allottees. In 1906, Congress passed the Burke Act which conferred outright ownership to the Indians, removed all restrictions to sale of the land, and made the property nontaxable. That same year, however, Congress adopted the Clapp amendment, removing taxation restrictions from land held by mixed bloods. As a result, counties began to assess taxes on mixed blood property, and forced those who failed to pay taxes to forfeit their land. Now, 75 years later, the courts have held that all of these congressional actions abrogated the Indians' rights without compensation. So the forfeited land, much of which is currently held by private citizens, is now subject to claim.

Another type of claim has resulted from inconsistent rulings from the Interior Department solicitors. In 1915, the solicitors ruled that the Federal Government was not responsible for determining the heirs of deceased White Earth Indians and distributing the deceased's trust estates, so the State and counties took responsibility for probating. In 1979, however, the solicitor reversed the earlier ruling, stating that these probates were, in fact, the responsibility of the Federal Government. Any land sold by heirs that was determined by the State and county probates, therefore, is now subject to claim.

The last type of claim is a result of conflicting Federal and State interpretation of the age of majority for females. When land transactions took place, the Minnesota age of majority was—and still is—18. The Federal age of majority, however, was 21. According to Federal law, land sales by minors needs the approval of the Secretary of the Interior, but many sales by female Indians between the ages of 18 and 21 were made without the Secretary's approval. Titles to land sold by these 18- to 21-year-old women are now clouded.

The counties in Minnesota and the State are not to blame for existing land disputes. They were simply adhering to the law as it was written. In this case, the blame falls on the Federal Government, so the Federal Government has a duty to help resolve those disputes and to bear most of the settlement costs. By passing S. 1396, we put forth an equitable solution and accept our financial responsibility to the heirs.

As amended by the Senate Select Committee on Indian Affairs, the White Earth Reservation Land Settlement Act will remove the clouds from the titles of land held by private citizens, thereby allowing current landowners to do with their property as they wish. It will provide Indian heirs an estimated $10.4 million in compensation for land, with an additional $6.6

million going to the White Earth Band for economic development. Finally, it will affirm legislation passed by the State of Minnesota providing 10,000 acres of State and county land to the White Earth Band.

I believe this settlement is the fairest, most desirable way to resolve the White Earth dispute, because litigation—the only other alternative—is too costly both socially and financially. Litigation would cause scars within Minnesota that would take years to heal. But more importantly, there is a strong possibility that the heirs could walk out of court with no compensation whatsoever. Attorneys familiar with the matter say that it is questionable whether a court would honor claims resulting from State and county probates or minor sales.

The legislation before us resulted from debates that were sparked by my bill in the 98th Congress, S. 885. My legislation was intended to be a focal point for discussion on how to best resolve the White Earth problem, and was successful in that respect. Over the past 2 years, myself, Senator BOSCHWITZ, Congressman STANGELAND, the Indian Affairs Committees of both bodies, the Department of the Interior, the Office of Management and Budget, representatives of the White Earth Band, and the attorney general of Minnesota have all been working together to design this solution. Through all of our struggles, I was reminded of a very important lesson I learned when practicing law in Minnesota: A good compromise will leave both sides equally unhappy.

My distinguished colleague from Montana Senator MELCHER, remains dissatisfied with S. 1396, so has introduced several amendments to the bill. He truly believes his amendments will improve the settlement. I do not agree. They will only delay the clearing of clouded land titles and the distribution of compensation to heirs, and will encourage the costly litigation this bill is intended to avoid. If this body agrees to any of Senator MELCHER'S amendments, our years of effort designing such a delicate compromise will be wasted. This is the last opportunity we have to resolve the White Earth land disputes. Therefore, I urge my colleagues to oppose any amendments to this measure.

Other colleagues of mine have expressed concern over the constitutionality of the bill. But after carefully reviewing S. 1396, the Justice Department and the American Law Division of the Congressional Research Service have determined that it is constitutionally sound. I am satisfied with their conclusion.

S. 1396 is needed and needed now. At the close of 1985, the land set-aside by the Minnesota Legislature will revert back to the State and this settlement will dissolve. It may not be a perfect solution, but I believe it is the most reasonable solution available. I strongly urge my colleagues to support this measure.

ORDER OF PROCEDURE

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. PRESSLER). The majority leader is recognized.

Mr. DOLE. Mr. President, it is my understanding that there may be a possibility of bringing up the nomination of Otis R. Bowen to be Secretary of HHS.

I know a number of my colleagues are particularly interested, and of course Dr. Bowen is quite interested. We are in the process now of visiting with the distinguished minority leader about this.

If my colleagues will wait for just a moment or two, we can advise them on that nomination. There will be a vote on the nomination.

I hope to make an announcement no later than 3 p.m. as to whether there will be any more votes after that vote today. We are currently waiting for conference reports.

We have the White Earth Indian Reservation which may be taken up later today. If that is the only vote, we can delay that until tomorrow.

So I hope to make an announcement by 3:30, or no later than 4 o'clock so you may make plans for the evening. That is part of our new quality-of-life approach. [Laughter.]

Mr. NICKLES. Will the majority leader yield?

Mr. DOLE. I am happy to yield.

Mr. NICKLES. Mr. President, is it the intention of the majority leader, hope or desire, that we will be able to finish the reconciliation package?

Mr. DOLE. Yes.

Mr. MELCHER. Mr. President, will the majority leader yield?

Mr. DOLE. Yes.

Mr. MELCHER. Are we going to be on the Executive Calendar?

Mr. DOLE. Hopefully, sometime today. Does the Senator mean other than Dr. Bowen's nomination? Excuse me. Yes.

Mr. MELCHER. Then I would appreciate it if the majority leader would set it aside in such a way that we do not automatically go back on it when we get through, because I think I will be over there in the farm bill conference.

Mr. BOSCHWITZ. Mr. President, will the majority leader yield?

Mr. DOLE. Yes.

Mr. BOSCHWITZ. I hope that the bill which we just considered will not require any more yeas and nays. This vote seems to indicate where the vote will be. However, this bill has been passed and sent to the House. If the Senator from Montana will agree that no further yeas and nays are necessary, I certainly will be happy to agree to that.

Mr. MELCHER. Mr. President, will the majority leader yield?

I can understand the desire of my friend from Minnesota. But I think it is too early to make that sort of judgment as to final doomsday sort of judgment.

Mr. BOSCHWITZ. I will say to the majority leader that we are very desirous of passing this bill today. I will not ask for any rollcall votes. Hopefully none will occur.

Mr. DOLE. Mr. President, I know both Senators are concerned. It is a difficult judgment because they are both conferees on the House-Senate conference on the farm bill.

I hope that after we get through the next section, which is cotton and rice, and then sugar and peanuts, that there may be other areas where those two Senators do not have a direct interest. Maybe we can come back and finish this bill this afternoon.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session in order to consider the nomination of Otis R. Bowen to be Secretary of Health and Human Services.

There being no objection, the Senate proceeded to the consideration of executive business.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

NOMINATION OF OTIS R. BOWEN TO BE SECRETARY OF HEALTH AND HUMAN SERVICES

The PRESIDING OFFICER. The nomination will be stated.

The legislative clerk read the nomination of Otis R. Bowen of Indiana, to be Secretary of Health and Human Services.

Mr. DOLE. Mr. President, it is not uncommon for nominees to be well suited for the positions they will ultimately hold. But rarely is there a person so eminently qualified as Otis Bowen is to be Secretary of the Department of Health and Human Services.

Because HHS is one of the largest Federal departments, and has the biggest budget, the person who heads the Department must be an exceptional manager. I can think of no better preparation for running HHS than being the chief executive of a large and diverse State. And as Governor of Indiana, a job he held for 8 years, Otis Bowen proved himself time and again a competent and effective administrator.

Otis Bowen has continued his public service, serving as Chairman of the 1982 Advisory Council on Social Security and a member of the President's

Advisory Committee on Federalism. He now serves on Senator LUGAR'S Federal Judiciary Appointments Commission.

Enhancing his expertise in running a large and complex bureaucracy, is Dr. Bowen's experience as both a practitioner and a teacher of family medicine. The Department of Health and Human Services sets Federal Government policy on all matters concerning health care. It is one of the chief missions of the Department, one of greatest concern to all Americans. And to have someone at the helm of the Department, who has had personal experience as a physician and a professor of medicine will provide the administration with critical knowledge in developing health policy and increase the American public's faith in the administration's health agenda.

I know that all of the Members of the Senate Finance Committee were impressed and reassured after Dr. Bowen's appearance before the panel. And I fully concur with Chairman PACKWOOD'S assessment that "this man does not have a blemish."

Mr. President, I wish that all nominees who came before the Senate could present the kind of credentials Dr. Bowen will bring to this job.

As we all know, HHS will be facing real challenges in the months ahead as the Department confronts severe budget constraints. So it is very important that we confirm Dr. Bowen now, so he can be in place at HHS as the new year cycle begins.

Mr. QUAYLE. Mr. President, it is with a great deal of personal pleasure and pride that I rise today in support of the nomination of former Indiana Governor, Otis R. "Doc" Bowen, M.D., to become the Secretary of the U.S. Department of Health and Human Services.

When the White House announced his nomination, Doc Bowen was described as a "triple crown" nominee. I could not agree more. Governor Bowen is uniquely qualified for this demanding post by virtue of his political experience, his demonstrated administrative competence and his expertise as a physician.

I am confident that Doc Bowen will be able to meet successfully the rigorous challenges presented by this position. The administrative problems and politically sensitive issues that the Secretary of Health and Human Services must face on a daily basis are awesome, and I am convinced that Governor Bowen is one of the very few individuals capable of taking on a task of such magnitude.

Doc Bowen has shown great skill as both a political leader and administrator throughout his career, which has included 14 years in the Indiana General Assembly, where he was Speaker of the House for 6 years, and two distinguished terms as Governor of Indiana. By virtue of his record as chief executive of the Hoosier State over an 8-year period, Governor Bowen remains today one of the most popular public servants in the history of Indiana.

Doc Bowen has been a practicing physician for 44 years, including 26 years as a family doctor in his home town of Bremen. He has regularly contributed articles to medical journals, and most recently he has been Lester D. Bibler Professor of Family Medicine and Director of Family Practice Education at the Indiana University School of Medicine in Indianapolis. As chairman of President Reagan's Advisory Council on Social Security, he demonstrated his knowledge of the problems confronting the Federal Medicare and Medicaid Programs, which he will be charged with administering as Secretary of Health and Human Services. In addition, Governor Bowen showed his ability to devise innovative and successful solutions to the problem of escalating health-care costs when he worked with the Indiana General Assembly in 1975 to enact a law to curb medical malpractice costs that has been used as a model by a number of States.

When confirmed, Doc Bowen will become the first physician to head the Federal agency that has such enormous influence over health policy in this country. I believe that his medical background and his reputation in the medical community make him ideally suited to lead the Department of Health and Human Services during a time that is one of the most turbulent the health-care industry has ever known in our country.

I believe President Reagan chose Doc Bowen because he is the best person for the job. It's that simple. There is no doubt in my mind that time will prove that the President was right. I urge my colleagues to support the President's nominee.

Mr. SIMPSON. Mr. President, I wish to express my strong support for the nomination of Dr. Otis Bowen to the position of Secretary of the Department of Health and Human Services.

"Doc" Bowen brings to this post an impressive background of government service and an equally important and impressive medical career.

His experience as a State legislator and two-term Govenror of Indiana prepare him well for the massive bureaucracy over which he will preside at the Department of Health and Human Services. The Department is one of the largest components of the Federal Government—with jurisdiction over the massive Federal health insurance programs, Medicare and Medicaid, Social Security, public assistance, and a whole host of social programs. In addition to consuming a major portion of the entitlement and discretionary funds of the U.S. Treasury, the Department of Health and Human Services is often the site of thoughtful and impassioned debate on some of the most controversial social issues facing this Nation.

The challenges inherent in this Cabinet post are difficult ones and I am confident that Dr. Bowen will meet them well.

In addition, he clearly will bring to these often difficult and controversial decisions a strong dedication to and sensitivity for his fellow human beings—as he has so ably demonstrated through the practice of family medicine.

I have enjoyed meeting him. He brings warmth and good humor to the task. I wish him well.

I am pleased that the Senate Labor and Human Resources Committee moved swiftly to consider this fine nomination and that I can join today in voting in favor of Dr. Bowen's confirmation.

Mr. DURENBERGER. Mr. President, I rise today in support of this nomination. I am fortunate to have known the nominee for Health and Human Services [HHS] Secretary for over 15 years. I have worked with him both when he was Governor of Indiana and the chairman of a major HHS Study Group on Medicare. Otis Bowen is highly qualified and will make an exemplary Secretary.

Doc Bowen understands and is committed to health systems reform. Unlike any other area of major Federal Government expenditure, the health-care system is in the process of "cleaning its house" and putting it in proper order.

The economic incentives under cost-based reimbursement for Medicare fueled a medical establishment where "more is always considered better." Well, Medicare discovered that isn't always the case, and health-care reform is based on changing that long held notion. It will be good to have an old family practitioner in the driver's seat at HHS who understands the conservative practice of medicine.

I would also point out that reform can lead to cost savings but it does not come for free. With Gramm-Rudman it is going to be difficult to keep up the momentum for reform as we cut back and freeze. I am not confident that we can prevent budget policy from derailing health care reform. At least now in Doc Bowen we have a person who understands health care and can represent the reformist argument.

Doc Bowen is a particularly good choice because of his experience in running a State government. He knows federalism and brings to the job commonsense experience in the State role. He has been in the trenches. He will not lose sight of the National Government's responsibility to subsidize

the Nation's human services needs. He will not fall prey to the temptation to say human problems are someone else's responsibility.

I look forward to the next 3 years because Otis Bowen will be at the Humphrey Building. When Dick Schweiker and Margaret Heckler stood watch over at HHS, change in Federal policy toward Medicare and other health programs were set in motion and have led to real reforms in this Nation's health care system. The progress of the past will be matched and improved on under the leadership of Doc Bowen.

I wish him luck and promise him my full support in his new job.

Mr. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Otis R. Bowen, of Indiana, to be Secretary of Health and Human Services? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Utah [Mr. HATCH] are necessarily absent.

I further announce that, if present and voting, the Senator from Utah [Mr. HATCH] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 93, nays 2, as follows:

[Rollcall Vote No. 373 Ex.]

Bingaman	Helms

NOT VOTING—5

Chiles	Goldwater	Stennis
East	Hatch	

So the nomination was confirmed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. SIMON. Mr. President, will the majority leader yield?

Mr. DOLE. I will be happy to yield.

Mr. SIMON. Does the majority leader have any feel for what might be the schedule? Can we plan on being away from here Saturday and Sunday? Is there any hope of concluding tomorrow night or where do we stand?

Mr. DOLE. Mr. President, if the Senator will yield, let me take it a day at a time. Today is Thursday. We hope to be able to announce by 4 o'clock whether there will be any more votes today. We are waiting on conference reports with the exception of the White Earth Indian Reservation bill, which could require one additional vote before 4:30 today. I do not anticipate any business after that today. So I think Senators can plan on this evening being vote free.

Again, there are a lot of ongoing conferences. Members really need that time uninterrupted, if possible, to work on the conferences.

Tomorrow we have a possibility in the morning of taking up the House-passed farm credit bill with an amendment, not a conference report. But we are now in the process of clearing all Senators on each side who had amendments on the Senate-passed farm credit bill. So we hope to do that tomorrow.

There are a number of other items we can consider by unanimous consent tomorrow—maybe the nuclear waste compact and a number of nominations on the Executive Calendar. Then we will be waiting for the farm bill conference report, the continuing resolution conference report, and the reconciliation conference report. There will be three conference reports, and I do not know precisely when they will be completed. We hope to finish the farm bill conference tonight. We are advised by staff it will take tomorrow, Saturday, and Sunday just to draft the conference report. So I cannot be more specific. But I guess, unless something unexpected happens, there would not be any votes on Saturday, but there could be votes on Monday, and possibly Tuesday.

Mr. SIMON. I thank the majority leader.

Mr. BYRD. Mr. President, may I ask the distinguished majority leader a follow-on question. If there are, indeed, no rollcall votes after 4 o'clock today and with the deadline being midnight tonight, with the result if no continuing resolution is enacted and signed by the President, no conference by tomorrow morning, I take it the Federal workers would be asked to stay home or go home. Does the distinguished majority leader contemplate final action on the continuing resolution before 4 o'clock today or does he contemplate instead a short-term continuing resolution which would carry us over and, if so, to when?

Mr. DOLE. Mr. President, let me first say, as I understand it, there is no chance that we can do the long-term continuing resolution by this evening. I have just been in consultation with the distinguished chairman of the Appropriations Committee, and he was talking about a very short continuing resolution extension. My hope is it would not go beyond Monday at midnight. I do not know whether the distinguished minority leader shares that view. But if it goes to Wednesday, we probably will be around on Wednesday. But if it goes to Monday, we will complete our work on Monday.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, as in legislative session, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond 3:15 p.m., with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROPOSED OBJECTION TO MEASURES RELATED TO LOW-LEVEL RADIOACTIVE WASTE

Mr. BOREN. Mr. President, it was mentioned a while ago that there might be an attempt to bring up the low-level radioactive waste compacts or legislation dealing with that subject. I serve notice that there would be an objection lodged by me if that were done.

As Senators will recall, that was the vehicle on which we attached the

amendment dealing with political action committees. The measure is still pending on the calendar. There are related measures to it.

This Senator would object to the movement of any of those vehicles dealing with low-level radioactive waste until such time as the political action committee amendment comes back before the Senate.

So I just want to put my colleagues on notice that an objection will be lodged to any unanimous-consent attempt to move to either of the particular pieces of legislation, any related proposals, that would enable a conference committee to act on that subject matter, without our revisiting the political action committee amendment.

I think that has been mentioned by the majority leader as a possible item for discussion before we go out. I am talking about the low-level nuclear radioactive waste subject matter. I just wanted to inform my colleagues that if there were an attempt to move to that subject matter, whatever the bill number, an objection would be lodged by this Senator to doing that.

Mr. SIMPSON. Mr. President, as often occurs in this arena, I wish to inquire: I ask the Senator from Oklahoma whether he is commenting that if the low-level waste compact issue were to come before the Senate, he would object to its being handled until we have dealt with the PAC issue on that measure. Is that what he is saying?

Mr. BOREN. That is correct.

When we were given that as the vehicle on which to attach the amendment, the reason we selected that vehicle was that we were told it would be a vehicle on which there would be the necessity of taking some action. Our amendment was not tabled. Our amendment is pending on that particular piece of legislation.

There is a whole bundle of compacts and resolutions, as I understand it. There is more than one piece of legislation that would have to be married, ultimately, to take action on that matter.

All this Senator was saying is that this is a subject on which this Senator would lodge an objection. I would not want the Senate to be able to go around us on that matter by acting on another bill number or another resolution number or on some legislation that came from the House on that subject matter, since that is the subject on which we attached the political action committee amendment.

So there would be objection lodged here. I am not saying forever. I am just saying that it would be between now and the Christmas recess, because I was told at the time we voted on the campaign reform issue on the floor that we would be revisiting that issue within a reasonable timeframe early next year. Of course, we would wait to see what progress is made on that subject at that time.

I am simply making that statement as it applies to now and the Christmas recess. It is not a statement that holds for all time but simply between now and then.

Mr. SIMPSON. Mr. President, I share with my colleague from Oklahoma that there are many of us working very diligently on the low-level waste compact issue. It is a very serious issue.

There are six Members of our body, of various political faiths, who represent three States which are the repositories of low-level, and often high-level, nuclear waste—the Senators from Washington, South Carolina, and Nevada.

I can only tell the Senator this, so that we all hear it, so that it is clearly said: The Governors of those three States, two of whom are of the political faith of the Senator from Oklahoma and one of mine, have indicated to us that on January 1 they will shut down the shop, and the generators can go wherever they wish to go with their waste capacity.

I do not want anyone to miss what is out there. I just want my good colleague from Oklahoma, who is a very thoughtful person, to know that, if we are going to deal with the political action committee issue on a low-level waste measure—and I want everyone to know what the results of that will be in the United States of America. Legislators will meet in January in those three States, and they may not even wait for that. The three Governors will shut down their facilities, and that will be all. That is the prospect. I want the Senator from Oklahoma to be aware of that. Thirty-seven States are deeply affected here.

Mr. BOREN. I thank the Senator for his comments. I do understand those facts fully. That is the reason why this Senator and others chose that particular vehicle on which we agreed to attach and consider the amendment, as opposed to the Compact of Free Association, which we were told had to be passed that particular day. We were dealing with the possibility of attaching it to that particular vehicle.

We were then offered this other vehicle, and we were told it was on the "must" list of legislation. That is why we did select it. We understood that there was a necessity to deal with that matter in a timely fashion, and that is the reason why we did accept that vehicle.

It is very possible that if we were offered another vehicle, or if we were to be given a time agreement as to when the matter that failed to be tabled on the Senate floor were to be brought up again, other negotiations could be reached. But at least until we are assured of a time certain in which that matter would return to the Senate floor under a time agreement, on an appropriate vehicle, this Senator would be constrained to object.

I am sure that comes as no surprise. This has been communicated ever since we had that particular matter pending. We had been notified by the Cloakroom that it had been mentioned three or four times, and since we have continually made known that there would be objection, I wanted to say it on the floor. That was our understanding from the time we agreed in the first time agreement. We agreed that we would not put the PAC amendment on the Compact of Free Association vehicle. We agreed to put it on the low-level radioactive waste legislation. That was the understanding from the beginning.

We had no understanding as to whether or not that bill would be pulled down prior to the Christmas recess or whether we would proceed. The decision obviously was made, once that amendment was not tabled, that that piece of legislation would be pulled down.

All those who worked with me on the amendment and who cosponsored the amendment had the clear understanding that we were attaching it not to a dead horse but to one that needed to move at some point in time, and that is the reason why we accepted that vehicle.

So, of course, I would be constrained to object to it moving on some other vehicle.

You see, there are a series of other related measures to it, and if we were to take care of all of the problems in all of the States and allow them to be taken care of by separate pieces of legislation, we would then have no leverage to assure that the body returned to that amendment short of a time agreement certain which, certainly, if the leadership desired to explore that with me, not at this time—I did not really rise to get into this discussion at this time—but just to raise a warning flag so it would not catch anyone by surprise if on Monday or tomorrow there was an attempt made to move to it. I did want it to be known and on behalf of all the cosponsors of the amendment that I would be constrained to object.

Our leadership has been aware of that for many days, and I think that has been communicated, but I just wanted to do so in fairness, and perhaps there is some other way of dealing with it, but we could not afford to allow either that piece of legislation—of course, if we return to that particular item, the PAC amendment would be the pending order of business as it was not tabled, but if we turned to some of the other items which also deal with separate elements and perhaps separate States in terms of com-

pacts on this subject or the House legislation on this subject, we would potentially give away our oportunity to be sure that we returned to this subject matter.

Mr. SIMPSON. Mr. President, I would be interested I think at this time on a couple of things just for clarity. I try to find that occasionally in this remarkable arena that we slog along in here in a sea of verbosity. Am I missing something? I wonder how many of the cosponsors of the PAC amendment, and there are many on both sides of the aisle, would wish to block the compact that 37 States of the Union have already approved, when they know that the repositories in 3 States after the first of the year—whether we are here or not are very clearly saying to us with some feeling that they are going to reject all low-level waste from the United States of America coming into their three repositories.

There is a House-passed bill that has compacts in it. There is the low-level waste issue which Senator JOHNSTON, Senator MCCLURE, Senator STAFFORD, Senator THURMOND, and Senator EVANS are working on, on both sides of the aisle, and I must say that I am a bit puzzled—I am not here and will not be in a position of negotiating for the majority leader with the Senator from Oklahoma. The leader can do that magnificently, but I am very puzzled when I look at the CONGRESSIONAL RECORD of December 3, when the Senator from Oklahoma clearly said and asked the question of the majority leader wondering whether there was an "assurance that early next year, say by the first of March or sometimes along those lines, we would have an opportunity to bring either the pending matter, which will remain on the calendar, or the recommendation of the committee, whatever they come out with on the campaign reform, one or the other back to the full Senate for our consideration?"

The majority leader at that time said that he would do that. He could not make a firm commitment, but he said that hearings would be held and we would be back on this issue with some vehicle. And the Senator from Oklahoma appreciated those remarks, indicated his strong expression that the Senate was going to endeavor to act on this in due course next year and that this vote would give us the impetus to do that.

I would hope that would be where the Senator from Oklahoma might still be.

Mr. BOREN. Mr. President, I appreciate the comments of my colleague from Wyoming, and I hope I have been clear and not roundabout in what I have said, because it was the intention of the Senator to be absolutely clear and straightforward with candor. That is the only reason I rose on the floor rather than just have a private communication. In private communications I have given for days now that there would be objection lodged on this side of the aisle. It is now made on the floor. I made it straightforward, candid, and public in this matter, and that is the reason the Senator rose to explain.

The Senator from Wyoming is certainly right in expressing his quotation from me expressing appreciation of the majority leader for those assurances. I do feel that appreciation. I am glad he is going to endeavor to have us come back to that issue.

But what the Senator from Wyoming has said in public is exactly what was said to us in the cloakroom the time we negotiated the time agreement on the PAC amendment. This is a very necessary piece of legislation. They will not give you a piece of your legislation on which to attach his amendment. That was not necessary. There is going to be action on that in timely fashion or these States will have difficulty or could refuse to continue to accept these kinds of materials. That was exactly what was said to us and that is exactly the reason we chose this vehicle and it is also exactly the reason this Senator would be constrained to allow that horse to leave the barn, so to speak, without the PAC amendment attached on it riding it on to the President's desk.

So that is exactly the case. The Senator from Oklahoma understands it. The Senator from Oklahoma will not presume to speak on the question of raising objection for anyone else but himself. The Senator from Oklahoma simply says that he will object as one Senator, that the leadership on this side has been informed of this objection, that there will not be unanimous consent possible on any of the vehicles either the House bill or any related subject matters, until either the PAC amendment has been disposed of or until as we fully understood at the time we agreed to this vehicle or unless there is some other substitute time agreement entered into.

The Senator says this not to be argumentative. I appreciate the position of the Senator from Wyoming for whom I have the greatest of respect, and that is the reason the Senator from Oklahoma is being absolutely candid so there can be no misunderstanding of my position.

I do understand all of the elements involved. I do understand the States involved. And that was made clear to us at the time we negotiated the time agreement.

So, I am aware of all the facts that the Senator from Wyoming has just recited on the floor, and knowing all of those facts, knowing that we do have an amendment attached to a vehicle that makes it meaningful, that is the reason that the Senator would feel constrained to let that vehicle leave the station without us on board.

Mr. SIMPSON. Mr. President, that is a thorough and appreciated review by my friend from Oklahoma, who came here to this Chamber when I did in 1978.

I would just suggest to him that if we do resolve this, and I think we are very close to presenting the low-level nuclear waste compacts to the body—that if the Senator from Oklahoma wishes to persist in objections to the low-level waste transitional legislation—then in accordance with the spirit of this season of the year and the remembrance of Charles Dickens and the Christmas Carol, I hunch that he will be visited by three spirits, and the first will be the Governor of his State, the second will be representatives of the Governors of the entire United States, and the third will embody the Senators from the three States that take these repository leftovers, and they will be telling us that on January 1 they are out of business, and I will leave that to the Senator from Oklahoma as to how he wishes to handle that in context with the political action committees of the world.

I yield the floor.

Mr. BOREN. Mr. President, I thank my colleague from Wyoming and I can only say that I hope the spirit of Christmas Future is farsighted enough for us to realize the importance of dealing with the subject of campaign reform and that this Senator is certainly open to any proposals that the leadership on the other side might wish to make that might enable us to resolve the matter and move forward.

He does not have a closed mind on that subject, and I am sure the distinguished majority leader whip will convey that to the majority leader. It is very possible some arrangement can be made. That is the reason that this Senator wanted to raise the red flag that there is a problem now, not wait until the last minutes when there is no opportunity to discuss trying to find some way to do this but to let it be known now that there is a problem, make sure it is known and known publicly as well as privately so that we might work in a constructive fashion on it, and I am perfectly open to that.

I thank the Chair, and I suggest the absence of a quorum.

Mr. THURMOND. Mr. President, will the distinguished Senator yield?

Mr. BOREN. I am happy to yield. I have yielded the floor.

Mr. THURMOND. Mr. President, I have had the highest respect for the able and distinguished Senator from Oklahoma ever since he has been here, and I implore him now not to upset the arrangements that have been worked out here or about to be worked out to handle this serious and sensitive situation.

Three States in the Nation now have been taking all the low-level nuclear waste. Washington State, Nevada, and my State of South Carolina. The Governors of these States, because of the demand of the peoples of these States, are going to close these three sites January 1. And where is the low-level nulcear waste going, where is it going from Oklahoma, where is it going from Kansas, where is it going from any other State in the Nation? Those are the only three States that we have to take it.

And there has been a long and difficult task to work this out. We have been working for the last 2 years trying to get this matter settled and finally we are on the eve of the settlement of it here and if the Senator from Oklahoma insists on offering an amendment here, it could upset the entire matter that has been worked on here for several years.

Mr. President, I do hope that the distinguished Senator will reconsider this matter. I was under the impression that arrangements had been made that he would offer this next spring and it would be considered then. But to attach it now to one of these compacts could cause tremendous confusion. It could cause this entire arrangement to go down the drain and all the States of the Nation would suffer.

I say all the States, because only three take this low-level nuclear waste and every State is affected by this. You have generating waste from utilities, hospital waste, you have waste from so many sources that has to go somewhere.

Where is it going? It is now going to three States. We are sick and tired of taking all the waste in the whole United States in these three States. We worked out an arrangement, finally, after long arrangements, with much work and talent going into it, and much consideration having been given to it. And now to have this upset here at the last moment will certainly create a situation in this country that could be detrimental to all the people of this Nation.

I hope that the distinguished Senator from Oklahoma will not press this matter, because it is a situation that could cause a catastrophe and it should be avoided.

Mr. BOREN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ARMSTRONG). Without objection, it is so ordered.

IRS COLLECTION DEFICIENCIES

Mr. SPECTER. Mr. President, as we approach January 1986, when Federal income tax filings will begin for calendar year 1985, I consider it important to call to the attention of my colleagues in the Congress, and the public generally—through the CONGRESSIONAL RECORD—the serious existing deficiencies in the Internal Revenue Service's collection system which threaten the future of voluntary tax compliance. Hearings in Pennsylvania and Washington, DC, plus an incisive General Accounting Office report, show massive deficiencies in the Internal Revenue Service's Regional Office in Philadelphia and elsewhere around the Nation.

The facts show:

First, IRS has no adequate record system to authenticate the filing of returns, requests for refunds or other documents delivered to IRS;

Second, IRS lacks the capacity and perhaps even the interest to respond to taxpayers' inquiries on outstanding problems;

Third, IRS's top management has failed to respond to warnings of these serious problems; and

Fourth, there is reason to doubt that top IRS officials have formulated a plan to correct 1985's errors in order to solve the problems in handling the 1986 returns.

If U.S. taxpayers are to have confidence in and a willingness to comply with our tax laws, such deficiencies must be promptly corrected. Billions of dollars of revenue are at stake. The results of hearings and the GAO report demonstrate that Congress must be vigilant in its oversight function of the Internal Revenue Service if such problems are to be corrected.

My own concern on this subject arose in January 1985 when I wrote to Commissioner Egger regarding the computer breakdown at the Philadelphia Center in the fall of 1984. This unprecedented breakdown resulted in thousands of threatening letters erroneously being generated to area businesses which had, in fact, obeyed the law and did not deserve such warnings of imminent property and bank account seizure.

Unfortunately, following this unhappy event, circumstances went from bad to worse at the Philadelphia IRS Service Center, and apparently, at centers throughout the country. My office was deluged by telephone calls and letters from Pennsylvanians who were awaiting refunds, and who were unable even to establish contact with the service center due to inadequate phone lines to service these rightfully irate taxpayers.

In April, I visited the Philadelphia Center in an effort to understand the ongoing problems experienced by the IRS in processing the unacceptable backup of returns. Not satisfied with the information learned from this visit, nor by Commissioner Egger's repeated and unfulfilled promises that all timely filed returns would promptly be processed with expected refunds, Senator HEINZ and I conducted a series of hearings/taxpayer forums throughout Pennsylvania. These events, through the summer and fall months—Philadelphia in June, Pittsburgh in July, and Scranton and Harrisburg in October—produced concerned taxpayers experiencing great financial stress as a result of long awaited refund checks earmarked for specific purposes—for honeymoons, children's camps, home mortgage payments, and home renovation.

Commissioner Egger had an opportunity to respond to these problems at a hearing before the Judiciary Subcommittee on Administrative Practice and Procedure in Washington, DC, on November 19. The Commissioner stated that new management policies were being introduced at the IRS which will stress the quality of taxpayer service given by employees over the production quotas achieved by those same employees. Although some encouragement may be taken from such plans to introduce "sensitivity training," Commissioner Egger's initiatives must be more detailed, concrete and far reaching.

This reluctance on the part of Commissioner Egger and the IRS to face squarely the issues and problems raised during the past year is deeply disturbing. A totally candid confrontation is necessary in order to organize future operations and to arrange for contingency plans. This type of candid awareness is now absent in the IRS. Commissioner Egger's responses to questions posed at the November 19, 1985 Washington hearing further indicate that such an awareness has long been absent from collective IRS thinking.

One example of this is shown by the Commissioner's repeated unwillingness to acknowledge the severe plight of the computer operation in all 10 service centers for the 1985 season, despite the fact that testimony shows notification by his staff, almost 1 full year in advance, that "massive backlogs" could result. Yet even during the midst of this crisis, Commissioner Egger reassured the House Ways and Means Committee on March 11, 1985, that these were "transitional problems," a "shakedown period" of "working out the bugs in the equipment." A definite change of approach and attitude by the IRS is needed if such problems are to be avoided in the future.

Last spring the Philadelphia IRS Center was burdened by up to 50,000 telephone calls per day. At that time, this inundation of an office system with only 53 telephone lines threat-

ened the city of Philadelphia with severe cutbacks and possibly complete stoppage of telephone service. Yet Commissioner Egger's testimony shows that, although similar problems may occur once again next season, the present plans to improve telephone service do not create an ability to handle even a significant portion of such telephone calls. Clearly a better contingency plan must be derived to prevent a recurrence of last year's telephone disaster. The very least courtesy to which a taxpayer is entitled is an answer to a telephone call, and hopefully, a person on the other end who has the capability to respond to and solve the problem raised.

The Commissioner has belatedly decided to rescind the IRS policy of emphasizing large refunds first in order to cut down on interest payments. Clearly this policy did not achieve its purpose. A recent GAO report on the Philadelphia Center, released by Senator HEINZ and myself on November 26, shows that this emphasis reduced productivity at the Philadelphia Center by as much as 50 percent in some processing categories. Further, since late refunds and interest thereon reached all time highs last year—46.9 percent more refunds paid to date, and 48.5 percent more interest paid on refunds with a 56.4-percent higher amount—no reduction in refund payments was achieved.

The GAO report pointed out other glaring difficulties. Checks totaling hundreds of thousands of dollars were discovered in trash barrels as the result of only 2 days of reports and investigations. Workers wearied by 80-hour workweeks, and weeks of work without breaks, were found discarding returns and/or failing to ensure that all contents were removed from envelopes. The taxpayers who testified before us about the inability of the IRS to trace their original return—and sometimes their second or third filed duplicate return—can hardly be comforted by such reports, despite the obvious exhaustion of the employees. These taxpayers were also suffering from exhaustion, and from frustration and righteous anger over the loss of their documents and the failure of the tax system this year.

The GAO findings consistently indicate that the Philadelphia Center was this year's "IRS neglected step-child." Although this Center received only 8 percent of returns filed nationwide, it received over 50 percent of the duplicate returns filed this year. The Philadelphia Center also represented over 25 percent of those returns with interest on refunds, and over 33 percent of the total interest paid nationally. Of returns requiring adjustment or error corrections, the Philadelphia Center represented 20 percent of the national total, and over 25 percent of the national total of documents remaining in the inventory files.

These statistics indicate gross mismanagement, callous indifference to the rights of taxpayers and a total wasteland in the Philadelphia Internal Revenue Service office. Commissioner Egger must do more than promise "quality over quantity" in order to rectify this madness. Careful analysis must be performed and detailed programs for immediate improvement must be instituted. No such program has yet been revealed, or even intimated.

The 1986 tax filing season is only 4 short weeks away. The Congress must maintain vigilant watch on the IRS's progress with needed reforms. The campaign for improvement must begin right now—the mishaps and woes of the 1985 season must never be repeated.

Mr. President, in a series of articles written by Mr. Arthur Howe, the Philadelphia Inquirer has performed an important public service in exposing and reporting on the deficiencies of the Internal Revenue Service.

These articles appear in the Inquirer on the following dates:

1. November 27, 1985—"IRS reforms demanded by Heinz and Specter;"
2. November 26, 1985—"Three federal probes outline breakdown at the IRS;"
3. November 20, 1985—"IRS to alter employee-reward system;"
4. November 19, 1985—"IRS plans major reforms of troubled collection system;"
5. November 18, 1985—"IRS knew processing crunch loomed, report says;"
6. November 18, 1985—"IRS to scrap its ailing, $103 million computer system;"
7. November 4, 1985—"Memos detail mishandling of IRS forms;"
8. August 7, 1985—"IRS to help collect bad student loans;"
9. August 5, 1985—"How the IRS acquired its troubled computers;"
10. August 4, 1985—"Why the besieged IRS may not recover for years;"
11. July 12, 1985—"IRS worker indicted in file-dumping;"
12. June 29, 1985—"Heinz proposes IRS time limit;"
13. June 28, 1985—"Senators will hold a hearing today on problems at IRS Service Center;"
14. June 27, 1985—"IRS cutting down interest on overdue refund checks;"
15. June 23, 1985—"IRS giveth as well as taketh away;"
16. June 18, 1985—"3 lawmakers demand quick action by IRS;"
17. June 16, 1985—"The IRS is muscling those who have spoken out on it;"
18. June 11, 1985—"The wait for refunds continues;"
19. April 16, 1985—"IRS union says problems will delay many refunds;"
20. April 11, 1985—"IRS chief says most refunds will arrive on time;"
21. March 31, 1985—"Why tax files get forgotten at Phila. center;"
22. March 27, 1985—"Tax-return backlog grown in wake of computer woes;"
23. March 12, 1985—"Hearing told of IRS ills."

In order that a fuller statement of these important problems may be presented to my colleagues in the Senate, I ask unanimous consent that the following selected articles be included in the CONGRESSIONAL RECORD:

1. November 26, 1985—"Three federal probes outline breakdown at the IRS;"
2. November 18, 1985—"IRS knew processing crunch loomed, report says;"
3. August 5, 1985—"How the IRS acquired its troubled computers;"
4. August 4, 1985—"Why the besieged IRS may not recover for years."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Philadelphia Inquirer, Nov. 26, 1985]

THREE FEDERAL PROBES OUTLINE BREAKDOWN AT THE IRS

(By Arthur Howe)

The Internal Revenue Service suffered a near-collapse of morale, motivation and management control over much of its vast workload this year, three recently completed federal investigations conclude.

Reports on the investigations are being distributed to key congressional leaders this week.

The investigations—two by the General Accounting Office (GAO) and one from an IRS internal unit—were ordered in the spring after a series of articles in The Inquirer disclosed bureaucratic disarray and destruction of tax documents in IRS offices in Philadelphia.

The three resulting reports confirm that the breadth and depth of the agency's tax-processing breakdown this year reached almost immeasurable proportions.

Inventory chaos inside tax centers caused hundreds of thousands of unread tax returns to be sent inadvertently into long-term storage, while a similar number of other tax returns were lost because inexperienced workers failed to type identifying numbers into the computer tracking system.

Hundreds of millions of dollars in individual and business tax payments made last year were still not credited to accounts as of April—while the IRS computer system disgorged hundreds of thousands of erroneous delinquency and penalty notices to more than 500,000 taxpayers nationwide. Another $2.7 billion in tax payments from 687,000 taxpayers was not credited to the government's tax accounts for at least three weeks last spring.

And while IRS senior officials were vehemently denying reports that frustrated employees were deliberately destroying tax documents, on April 26 investigators in the Philadelphia service center found dozens of unprocessed tax returns and tax payments totaling hundreds of thousands of dollars in a trash barrel outside the service center in Northeast Philadelphia.

Days earlier, a mailroom clerk in the same center was discovered "continually disposing taxpayer forms and checks in the wastepaper basket."

The two GAO probes focused on IRS tax-processing centers in Philadelphia, Austin, Texas, and Fresno, Calif. The IRS's internal affairs probe dealt with the agency's 10 tax-processing centers around the nation.

It concluded that critical management controls in tax-processing centers broke down, causing mass confusion with so many unprocessed tax documents clogging hallways and aisles that a fire marshal was called into one West Coast service center.

The number of erroneous notices sent to taxpayers grew so alarmingly that IRS officials at one point in early spring gave up sending out a million notices because they feared most were incorrect.

COMPUTER PROBLEMS

Moreover, the IRS's own investigation concluded that the agency's installation of its new computer system was so ill-managed and incomplete that at the beginning of the year, the tax collection agency "was unable to correctly process the simplest of tax returns."

But a balky computer system was not principally to blame for this year's chaos, the three reports say. Rather, the problems were the result of human failure.

Thousands of IRS workers—many of them inexperienced, ill-trained and physically exhausted from working overtime for weeks on end with no time off—were unable to correctly enter tax data into the computer system for as many as 28 percent of the tax returns they processed.

The agency's senior managers, based in Washington, away from the chaos in the regional tax-processing centers, were unable to detect the volume of erroneous notices sent to the public or the crisis in morale among the workers.

Nor were they able to respond to the growing crisis until it was too late.

COMPLIANCE AFFECTED

"The service's overall compliance program has been adversely affected," warned the IRS internal affairs group.

Prompted by senior congressional leaders, the IRS has begun implementing plans to change a wide array of its management practices and operating procedures, from installing a new system for controlling its inventory of magnetic computer tapes to revising a flawed tax payment booklet used by businesses.

The agency has also begun revising is employee-compensation system to reward workers who commit few errors and has removed tax-processing procedures that were perceived as inequitable by taxpayers and legislators.

But IRS investigators concluded, "there are still many areas that require additional corrective action," among them implementing a system to provide management with better information to evaluate service-center activity. The IRS says it is trying to devise such a system.

As much as anything, the IRS was plagued by sloppy workmanship this year.

In the Philadelphia service center on Roosevelt Boulevard not even the new computer was hooked up correctly. GAO investigators found that because power lines to some computers were crossed with other electric lines leading to motors inside the computer, IRS workers had to wait as long as 15 minutes for the computer to respond to instructions, the GAO found.

79 PERCENT OF ERRORS

One sample of returns delayed in the IRS processing pipeline found that 79 percent of the discrepanices between taxpayer calculations and IRS computers were caused by IRS typists.

The high rate of typing errors at the Philadelphia service center delayed for months processing on some 159,433 tax returns, investigators said. At one point last spring so many returns backed up in the service center awaiting error resolution that the center ran out of metal carts and had to use canvas mail hampers to hold the documents.

IRS carelessness with bank deposits caused unknown numbers of taxpayers across the country to receive erroneous delinquency and penalty notices. In two unidentified service centers, IRS investigators counted 923 instances between January and March where Treasury deposit bank records did not balance with IRS records of the amount deposited.

The discrepancies involved millions of taxpayer dollars.

"For example, we identified seven deposits prepared between April 21 and May 15, 1985, that contained composite bank discrepancies totaling $1,081,293," the IRS investigators wrote.

Another analysis of 19 other bank discrepancies in May found that IRS accountants feel little compulsion to resolve these errors. All the discrepancies had been awaiting resolution for periods ranging from 20 months to 2¼ years.

MANY DELAYS

The processing of individual tax returns this year was fraught with months-long delays, employee confusion and equipment breakdowns.

Problems began during the first week in January when the computer was unusable for days on end and undertrained employees struggled to understand new, untested computer programs, investigators found.

Result: Through the first eight months of the year, IRS internal auditors determined that processing on 10 percent of tax returns was delayed for six months, and 33 percent waited three months.

On average, the agency's new computer system was unusable 26 percent of the time through the first 10 months of this year, investigators found. In January it was unusable 52 percent of the time, and in February it couldn't be used 29 percent of the time. In July and August, reliability improved to 88 percent and 89 percent of working days, investigators said.

Because of persistent glitches in computer programs, data from blocks of 100 or less returns would frequently get "hung," in the tax-processing pipeline, meaning that data from the returns could not be recorded by the computer system. Although IRS supervisors were aware of the problems, they often failed to resolve them, investigators from the GAO found.

"As a result, such blocks of returns were passed to files as though they cleared the computer system"—when, in fact, the information from the returns had disappeared. As a result, the returns were lost in the service center's massive inventory of documents.

PROBLEMS COMPOUNDED

Moreover, the service centers' so-called "document locator" system often failed this year because of a large number of errors made by typists entering the identifying numbers of documents into the computer system, investigators said. Problems were compounded because magnetic tapes containing tax data twice were sometimes processed twice.

IRS investigators quoted one unnamed supervisor in an error resolution department as saying that confusion over the whereabouts of tax documents was so extensive that before June only half of the returns needing correction could be found.

Confusion during the tax-processing season also extended into personnel departments of the IRS. In the Fresno service center, IRS managers lost track of the number of hours employees had worked this year. In June, two computer reports offered two different numbers—with the discrepancy totaling 46,000 hours. In the Austin service center, managers failed to issue paychecks to employees on time on a number of occasions.

Another factor contributing to breakdowns this year was insufficient training of employees and a lack of experienced workers.

For example, of 193 Philadelphia tax examiners trying to resolve errors that prevented returns from being posted to the computer system, 170 were newly hired or detailed from other departments, investigators said. Moreover, most of the workers were trained to handle only two types of unpostable conditions, they said.

HIGH ATTRITION

In both Austin and Fresno, the attrition rate of temporary employees reached 80 percent. In late January, those centers had not yet received employee-training material, such as handbooks and training manuals. Supervisors in the data entry branches were unable to answer certain questions from workers because they did not receive training material on the new computer system until March 18—three months into the processing year.

After it arrived at service centers, the training material in some cases contributed to the agency's troubles. Some sample problems contained incorrect solutions, leading employees to commit similar errors on taxpayer documents.

In Austin, a practice computer tape did not work, so trainees could only listen to instructions in classrooms and never practice on a computer system, GAO investigators found.

Another handbook instructing workers how to resolve errors on tax returns that do not post to the agency's computer system was delayed for months. Reason: The IRS's Washington office did not decide until March who was responsible for writing this document, IRS internal investigators found.

In August 1984, the IRS began a program to identify and give priority to processing tax returns that required large refunds, The Inquirer disclosed last spring. The program was an attempt to reduce anticipated interest expense, but the job of identifying those returns requiring large refunds consumed an inordinate amount of computer time and depressed overall productivity by 50 percent in regional error-resolution offices, according to the GAO.

In early June, IRS officials in Philadelphia established a special office to expedite the processing of tax returns that had already been delayed for months. Initially, 33 people were assigned to the task. By mid-July, an additional 19 examiners from the Philadelphia district office as well as everyone from the adjustments branch at the service center were thrown into the effort. By mid-September, persistent processing delays required that 72 more people to be assigned to process the 35,959 original refund-due returns still in the Philadelphia service center at that time.

As of Aug. 9, 225,459 individuals had been forced to file duplicate returns. But more than half this number—120,997—were filed at the Philadelphia service center by taxpayers in Pennsylvania, Delaware, Maryland and Washington.

By Oct. 5, the number of duplicate returns processed in the Philadelphia IRS service center had grown to 160,909.

DUPLICATES LOST

Government investigator confirmed that the IRS even managed to lose duplicate returns. As of Sept. 20, IRS could not find 2,592 of the 93,924 duplicate returns whose status had been researched.

Interest payment for late refunds was higher in Philadelphia than any other service center in the nation, the investigation found. As of Aug. 31, the center had paid some $14 million in interest, compared with $3 million at the same time last year. Nationally, as of Nov. 1, the IRS has paid $46.1 million in interest to 2.1 million taxpayers, compared with $27.1 million to 1.5 million tapayers last year, the IRS said.

The GAO investigators uncovered several instances of mishandling of documents in the Philadelphia service center.

CHECKS IN TRASH

On April 26, a janitor spotted unprocessed tax returns with checks in trash headed for the Philadelphia incinerator. A weekend search found 36 individual tax returns, and 24 estimated tax forms, 94 taxpayer checks totaling $333,440 and 47 other documents as well. One of the checks was for $68,000 investigators said.

Several days later, on April 30, an IRS internal affairs investigator selected three brown envelopes from a trash barrel in the service center's mail room. One envelope contained a check for $2,500. The IRS internal investigators found that employees and managers in the mail room carelessly failed to open many documents or follow IRS quality procedures on the control of paperwork.

The workers appeared exhausted, investigators said. In fact, three of 19 employees opening mail had worked for 19, 17 and 14 consecutive days respectively, and their supervisors had each worked 80-hour weeks previously.

One of the mailroom clerks was caught "continually disposing of taxpayers forms and checks in the wastepaper basket." After being first "counseled by her supervisor" she was fired in June when it was determined that her performance on the job was "not satisfactory."

GAO investigators also confirmed that in July 1984, 35 Form 1040 tax returns were found in a trask can in the women's restroom. Five days later, 57 tax returns were found by a custodian in another restroom trash can.

Other instances of document mishandling at the Philadelphia service center in earlier years included instances of tax returns intentionally misfiled, employees destroying hundreds of taxpayer letters and transcripts without reading them, employees intentionally throwing taxpayers returns, W-2 forms, and taxpayer correspondence in waste baskets, and employees being ordered by their supervisor to destroy photocopies of income tax returns to boost individual performance records.

RECORD INVENTORIES

Inventories of unprocessed documents grew to record levels in most service centers this year, investigators found.

One IRS internal analysis of documents in the nation's tax-processing centers found 500,000 documents from 1984 and earlier still awaiting attention in April. These documents included more than $347 million in business tax payments and $230 million in individual payments—a total of $577 million that had not been credited to individual accounts while hundreds of thousands of erroneous delinquency notices on these same accounts were issued.

In Philadelphia, the number of returns in "block out of balance" (BOOB) status, under which tax-return information in the computer system did not balance because of transcription errors by IRS employees, became 34 times as high as last year. This delayed hundreds of thousands of returns in the processing pipeline, the IRS said.

As of Sept. 11, 17,718 timely filed returns were marooned in BOOB status, GAO investigators said. Processing of an additional 18,241 returns was suspended because they were awaiting resolution of various other errors.

Record numbers of individual and business tax returns also failed to clear processing because of IRS typing or coding errors or taxpayer errors in recording Social Security numbers.

The Philadelphia service center had insufficient number of tape drives to resolve such unpostable problems and backups created weeks-long delays in pulling documents from files. The backlog of unpostable tax filings numbered 340,044 on Nov. 2.

The Philadelphia service center also is still having trouble reading a flood of mail from taxpayers who were reaching to IRS mistakes earlier this year. While the center is processing about 40,000 taxpayer inquiries each week, new inquiries are arriving at a similar rate. As of Nov. 2, there were 189,841 taxpayer letters awaiting IRS attention.

IRS KNEW PROCESSING CRUNCH LOOMED, REPORT SAYS

(By Arthur Howe)

Senior officials of the Internal Revenue Service saw this year's tax processing disaster coming years ago but failed to take effective action to avert computer breakdowns that disrupted the lives of millions of taxpayers.

That is the conclusion of a still-secret investigative report highly critical of the IRS produced by staff investigators for the House Appropriations Committee at the end of last month.

The IRS recently won significant budget increases from the Appropriations Committee to pay for increased manpower and new computer equipment to overcome massive computer and operational problems. Those problems significantly delayed the processing of millions of tax returns and crippled other IRS tax-collection and recordkeeping operations this year.

Among the conclusions of the committee investigators:

The new $103 million Sperry Univac computer system suffered massive breakdowns this year, in part because IRS officials tried to program it to perform many extra jobs in direct violation of an earlier congressional order that the new system only replace existing hardware and perform no new tasks.

Senior IRS officials should have canceled a contract to buy the computer system from Sperry Corp. after it repeatedly failed prepurchase tests.

Despite numerous internal recommendations to the contrary, the IRS shut down its computer systems development office in late 1982—a critical point for the design and development of the new system. The shutdown deprived the agency of an important source of technical support for the massive project.

Senior IRS officials ignored accumulating evidence that the new system would not be ready to handle this year's tax returns. Elements of the new computer system were not delivered to IRS regional processing centers until weeks before the crush of 1984 tax returns in January. Some critical software used to process tax returns failed to arrive at some regional centers until after tax returns had begun arriving in late January.

Despite repeated, clear warnings from IRS technical experts, including the assistant IRS commissioner in charge of computer operations, that the new system would be incapable of handling the expected volume of tax returns, no provision was made for backup systems or staffing.

Senior IRS officials confirmed in interviews last week that the IRS foresaw this year's tax-processing disaster at least eight months before the system was installed in October 1984.

"March or April of 1984 was when we pretty much had confirmation that what occurred in October was going to happen," said Assistant Commissioner Thomas Laycock, who heads computer operations.

In March 1984, Laycock issued a memorandum to the Treasury Department saying that the IRS had so grossly overestimated the tax-processing speed of its new system that massive backlogs would result and would "seriously limit the IRS's ability to accomplish its mission. This situation will rapidly deteriorate further unless appropriate remedial action is taken immediately."

Other government computer officials cautioned that the new system would take as much as 12 to 15 times longer than planned to process the agency's huge workload.

Two days after the computer began operation, between Oct. 1 and Oct. 3, 1984, computer malfunctions and employee neglect at the Philadelphia service center caused the loss of records reporting the payment of almost $300 million in taxes, resulting in erroneous dunning notices and threats of seizure being sent to more than 26,000 businesses in the mid-Atlantic area.

Then, during the next 12 months, the errant system operating with inefficient programs and insufficient testing, delayed refunds for millions of taxpayers and caused the loss of thousands of tax returns in service centers. At least 15,000 taxpayers are still awaiting refunds from the Philadelphia service center—seven months after the April 15 filing deadline.

The computer problems also caused hundreds of thousands of other taxpayers to receive erroneous refunds and delinquency notices, as well as resulting in unjustified threats and unwarranted liens against property.

Additionally, massive backlogs of unanswered inquires and uncorrected errors bottlenecked in service centers nationwide because the computer system was often useless. The volume of uncompleted work is still near record highs, the IRS says.

Laycock and other IRS officials insist that they were forced to install the new Sperry system before the 1985 tax processing season because the aging Honeywell and Control Data equipment in service centers was no longer serviceable. So outdated was this equipment that computer room employees had to jerry-rig replacement parts from local Radio Shack computer hardware, they say.

But the Appropriations Committee report challenges the need for installing the equipment at that time by quoting service center directors as urging that the installation be delayed.

"This repudiation applied to service centers ranging in size from Cincinnati to Fresno, from the smallest to the largest, and suggests the havoc wreaked upon the service centers, many of whose officials had advocated delay, need not have occurred," the report said.

The installation was not only premature, but it capped a four-year series of IRS computer management bungles, costly oversights and deluded expectations, the investigators concluded.

"From its inception, the effort had been replete with serious problems, including a system software controversy, the vendor's [Sperry] failure to deliver a communications processor early in the contract, several internal recommendations to declare the vendor in default, a 1982 stop-delivery order, three post-award benchmarks [performance tests] and both hardware and software performance problems. [The new system] stumbled from one difficulty to another, warnings about capacity abounded, optimistic projections remained unmet, and its costs were escalating."

Sperry has declined to comment about the situation with the IRS.

Until recently, IRS Commissioner Roscoe L. Egger Jr. has described the agency's computer problems as routine, working out unavoidable "bugs" in the Sperry system and the agency's new software programs.

"There is simply no way to avoid a shakedown period for working out the bugs in the equipment, the software and the procedures for operation of any new system," Egger said in testimony before the House Ways and Means subcommittee on oversight on March 11.

But by early 1984, sufficient evidence existed within the IRS to warrant killing the entire project, the Appropriations Committee concluded.

"By April 1984, items of evidence had surfaced within IRS which, individually and cumulatively, should have been sufficient to alert a receptive and informed management that [the new system] was a ship headed for shoals," wrote the investigators.

COMMITMENT

The huge system was installed in October 1984, largely because senior IRS officials in Washington had committed themselves to the project and did not want to develop a contingency course of action, the investigators said.

IRS senior managers "would neither be deterred from that goal nor brook any serious objection to it," the report said. Mention of any possible alternative action was "an untouchable subject" that no one dared to bring up, the report added.

"A top level IRS executive commented that his job was to support the organization, not to question the administration," the report said.

In the four years before installation, IRS officials added 17 major data-processing functions to the computer system, significantly altering its configuration and processing capabilities. The system was revised to include programs to store tax records that were once on microfilm and to allow auditors to place information directly into the system. The new system can cross-check information from various tax returns and allow IRS workers to correct errors on computer screens or retrieve other data that was once stored on paper.

In 1978, Congress approved only a 50 percent increase in computer power for the IRS to replace existing equipment, fearing that the agency might become Big Brother intruding on privacy with a massive store of information about taxpayers. The agency was not allowed to "enhance" or use its computers in radically different ways.

The Appropriations report concludes that not only did the IRS substantially enhance its computer system, it never fully informed Congress of the complex changes, the investigators say.

The new applications drained the capacity of the ordered Sperry equipment so much that at the beginning of this year, the agency's data-processing requirement had already exceeded its projected capacity for 1988.

DIFFICULT TO PLAN

"The original equipment would probably have done the job it was supposed to do. But the size of the job changed before the equipment was ever installed," Laycock said. He added that it was difficult to plan for sufficient computer capacity because the requirements kept increasing each year.

"We were trying to hit a moving target that is growing," he said.

One contributing factor to the IRS disarray this year was that in December 1982, the IRS abolished its Systems Development Office, which was its basic management tool for planning and coordinating the conversion, the Appropriations Committee found.

"IRS abolished the Systems Development Office and failed to replace it with any similar function or designate anyone as program manager by title or function," the investigators said.

One result: The equipment was installed without sufficient testing, without working software programs and without a backup system or contingency plan in case of failure, the Appropriations investigators found. In the Philadelphia service center, for instance, the computer system began operating before being intergrated, tested or introduced to employees in training classes, they said.

"The program was allowed to continue . . . as though success was a distinct responsibility. In January 1985, the reality could no longer be minimized. IRS was not fully prepared to begin the 1985 processing year nor able to correctly process the simplest of tax returns," the investigators said.

Along with installing the computer system, IRS programmers had the gargantuan task of rewriting 1.5 million lines of computer programming in a new computer language—Common Business Oriented Language, or COBAL. Assigned to the job were 300 newly hired, inexperienced programmers, IRS officials have said.

IRS was warned in 1981 by its own special computer task force that such a huge conversion to the new language system was "highly likely to delay and complicate this conversion."

In fact, the rewriting of the computer software programs continued through much of this year while poorly written programs caused massive slowdowns and unknown numbers of tax processing errors.

For instance, at the Fresno, Calif., tax processing center and other IRS installations, critical tax processing software programs needed to process taxes did not arrive until Jan. 21, the investors said. Those programs that did arrive were "very poor quality"—so bad, in fact, that it took the IRS three months to rewrite them sufficiently to match the speed of the previous computer system.

A "DISASTER"

And a computerized software program to audit tax returns, called Audit Information Management System (AIMS), was described in limited tests as replete with errors, a "disaster" that caused some taxpayer data to disappear, the report said.

"The AIMS executive control language was only about 75 percent correct, and the program is still experiencing problems in 1985 which, in some cases, are difficult to even identify," the report said.

The IRS' Laycock said the agency has solved many of its software glitches, and has increased the speed for updating taxpayer information, a task normally done on weekends to allow employees time to process incoming tax documents during the week. Through much of this year, updating took two to three days longer in many service centers, thereby causing huge bottlenecks of work—exactly the scenerio envisioned by Laycock in his March 1984 memorandum to the Treasury Department.

In 1982, and IRS internal study faulted the agency for having no comprehensive data-processing plan, and no mechanism for overseeing its implementation, evaluation or updating, the investigators said. Moreover, the agency still does not have a comprehensive plan, they contend.

"Nor does it have an organization in place with an approved charter and fixed responsibility to develop such a plan," the Appropriations investigators said. The investigators quoted unnamed IRS officials as describing the agency's existing data processing plans as "rudimentary at best."

IRS officials in Washington, however, have already begun planning for a comprehensive new computer system that will be implemented in the 1990s. Moreover, the agency has already met with members of Congress to inform them of the agency's plan.

In a report compiled in July, the investigators questioned why the IRS chose the Sperry system over a competing Hitachi system, especially because the Sperry computers failed or did poorly on several IRS tests. The company also used an unorthodox computer code called Fieldata to help its machines pass a 1981 operation test and then changed the code's structure, making the computers less efficient, the investigators found.

"AURA OF SECRECY"

Sperry surrounded its testing with "an aura of secrecy, and created a feeling of unease" in the IRS computer evaluation team, the investigators said.

On July 30, 1981, a memorandum recommending that the IRS declare the Sperry contract in default was sent to Egger. The reason given was a projection that an additional $54 million worth of equipment was needed to make the Sperry equipment as efficient as it appeared in early tests, the investigators said.

In June 1982, Sperry's equipment failed another test using a more common language code, the investigators said. On July 1, the Sperry contract was canceled because of noncompliance and use of "non-standard" software, according to the investigators.

Then on August 11, 1982, Egger and the president of Sperry met in Washington with other IRS officials present. Later that month, a second post-award test of the equipment was held in the IRS's Memphis service center.

The Sperry equipment passed this test—"by the skin of its teeth," the investigators said, quoting IRS officials.

HOW THE IRS ACQUIRED ITS TROUBLED COMPUTERS

(By Arthur Howe)

Two groups of federal investigators are reviewing the purchase by the Internal Revenue Service of its new $103 million computer network—described by some government officials as "colossal computerized disaster."

Since last fall, the General Accounting Office (GAO), the investigative arm of Congress, and a team of investigators from the House Appropriations Committee have been examining events that led to the IRS's decision in June 1981 to buy computer systems for the 10 regional tax processing centers from Sperry Corp.

Based on IRS documents and interviews with agency employees, the investigators have aready learned that:

To speed the processing of data to pass an operating test in early 1981, Sperry technicians used an unconventional cumputer operating code that has not been used by the computers in actual operations at the IRS regional service centers.

In an important performance test conducted after the contract was awarded to Sperry, the company's computers failed to meet IRS technical performance requirements.

IRS officials on July 1, 1982, threatened to block installation of the Sperry systems because they feared that the company's computers did not have sufficent capacity or information processing speed to sort and examine 100 million tax forms.

A year before the Sperry Univac computers were installed in the regional processing centers in October 1984, IRS officials correctly predicted that the new system would probably cause breakdowns and backlogs because it did not possess sufficient capacity.

"It was those early phases that led us to the conclusion" that assumptions about the computers capacity were not correct, said Thomas J. Laycock, the IRS's assistant commissioner of computer services, during an interview last week.

A spokesman for Sperry said in a prepared statement issued last week in response to inquiries that "any allegations of improprieties in the purchase of the Sperry computer system by the IRS would prove to be unsupportable."

Sperry, which has its headquarters in New York, is the world's fourth-largest manufacturer of computers, through its Univac division based in Blue Bell, Montgomery County.

John F. Horton, vice president and general manager of Sperry Federal Systems in MacLean, Va., the Sperry operation responsible for marketing the company's computer systems to the federal government, said Sperry had observed all the correct procurement procedures in obtaining the IRS contract.

He characterized the bidding process as "free and open competition" and said the company won the contract" after passing all requirements of the subject request for proposal. Furthermore, the disappointed competition filed no protest over the Sperry award."

According to IRS officials, the Sperry machines failed an important processing test that was conducted in the IRS's Memphis service center in June 1982.

Two months later, "they barely passed" another bench mark test of operating capacity, Laycock said. But the performance was sufficient to convince IRS officials to purchase the Sperry system, after Sperry agreed to supply $10 million worth of additional free equipment to enhance the machine's capacity, he said.

"When they passed in August of 1982, that satisfied us that with additional equipment the Sperry was adequate to do the job as originally bench marked," Laycock said.

Sperry won the contract to supply the IRS computers despite the fact that a competing computer from Hitachi Ltd. was "technically far superior," according to GAO investigators.

The investigators said the IRS's decision was based largely on the price difference—$103 million for the Sperry systems compared with $160 million for the Hitachi.

Hitachi marketing representatives have declined to comment publicly on the IRS's contract award to Sperry.

The IRS computer system, called SCRS for Service Center Replacement System, is intended to analyze electronic tax data, separate mathematically correct returns from those that contain errors and compile a data bank of all present and prior tax transactions.

Each regional computer system records data on computer tapes and sends the data to the IRS's National Computer Center in Martinsburg, W.Va., for further analysis. Each regional computer system has eight million characters of memory and can perform up to eight million operations a second.

Since January, however, IRS officials have blamed the computer for processing delays that resulted in an estimated $8 billion in refunds being withheld from millions of taxpayers for periods ranging from several days to seven months.

As of July 16, an estimated 6.3 million returns remained to be processed, and by the end of July, about 116,000 taxpayers in the mid-Atlantic region were still awaiting refunds on tax returns filed as early as January.

The cumulative economic effect of these delays was to depress personal spending—as well as economic growth measured by the gross National Product—during the first quarter of this year.

IRS computer glitches have also resulted in the misplacement of hundreds of thousands of tax returns in service centers and the disgorging of unknown millions of erroneous notices and threats of property seizure to individual and business taxpayers. Thousands of other taxpayers have received excessive or erroneous refunds from the government as a result of computer problems.

In one instance in October, the IRS computer in the Philadelphia service center failed to record $300 million in withholding tax payments made to the IRS by more then 26,000 businesses. The businesses subsequently received erroneous notices of tax delinquency from the IRS.

Additionally, the insuficent capacity of the new computer systems has saddled the IRS service centers with a massive backlog of unprocessed work—from unresolved tax returns errors to uncollected taxes—that threatens to undermine the stability of the tax collection system.

Publicly, IRS Commissioner Roscoe L. Egger Jr. has declared that none of the problems with the Sperry system or its software could be foreseen.

"Despite careful planning and scale model testing, you cannot know how a high-volume date processing system will work until you actually place the high volume on the system," he said in testimony before the House Ways and Means subcommittee on oversight in May.

But Laycock and other IRS officials recently conceded in interviews that tests conducted in the IRS's Memphis service center in the fall of 1983 indicated that the machines were prone to breakdowns and future capacity problems.

"We were concerned that as growth occurred that we might have to bring in more equipment," Laycock said.

Additionally, an IRS "management summary" on the new computer system stated that IRS officials knew in January 1984—10 months before installation—that the Sperry computers would create severe capacity problem, beginning in October, in each of the agency's 10 service centers.

The major problem was that the computer was unable to complete its undate of the data base of taxpayer information during weekends. As a result, the update had to continue during the week, making the computer unavailable for other task processing task.

The IRS memo said additional pressure would be placed on the computer systems next year, when an additional seven million tax returns are expected to be filed, and in 1987, when 13 million more than the current level are expected.

The document said that because the present system was not efficient enough to handle the mammoth tax processing load, an additional computer system needed to be acquired and installed at an IRS test site by this August.

A House Appropriations subcommittee has voted to provide $50 million for additional IRS computer capacity, but no purchase decision has been made to date.

The first hint that the Sperry systems would not be able to handle the IRS's massive tax processing workload came during initial tests conducted at Sperry's Minnesota laboratories in March 1981 when several attempts were required before the system was able to pass a simulated IRS tax processing test, GAO investigators say.

IRS officials and investigators say that Sperry, in order to make the system operate more efficiently in the tests, used an unorthodox "field data" information-processing code that allowed the computer to perform certain information-processing tasks three times faster than it could using a more standard code, IRS officials and investigators say.

It later became clear to the IRS that the systems would be set up to use only a more conventional information processing code called ASCII, for American Standard Code for Information Interchange.

In June 1982 the IRS ordered Sperry to run another data processing test on its computer using ASCII code. The computer failed the test, investigators and IRS officials say.

On July 1, 1982, a contract administration officer of the IRS, Frederick Martin, wrote a letter to Sperry saying that all work on the contract was to be discontinued because IRS officials feared the system did not have sufficient processing capacity. Laycock said in a recent interview that the IRS considered canceling the contract altogether.

"There was some consideration of what we would do if Sperry was not responsive," Laycock said.

A week after Martin's letter, Sperry wrote back, promising that the IRS could solve any potential capacity problems with its new computer by using $10 million worth of

disk drives and additional Central Processing Units (CPUs) to process information. Sperry said that it would allow the IRS to use the units free of charge.

The IRS, under pressure to install a computer system to replace its aging Honeywell and Control Data machines, accepted the offer. The single biggest motivating reason, say investigators, was that the $103 million system was $57 million cheaper than a rival Hitachi system.

"The Hitachi system did every everything perfectly, but the IRS based 8 percent of its contact decision on price," a GAO official said.

The massive computer breakdowns and slowdowns during this year's tax processing is projected to cost the IRS at least $200 million—and possibly as much as $400 million—for interest on late refunds, overtime pay for employees and other costs related to the hectic tax season, congressional aides say.

A tragic comedy of errors accompanied the installation and early efforts to operate the Sperry system.

Sperry was late with deliveries of some of its equipment, according to the IRS and GAO investigators. Mainframe computers in Memphis and Atlanta had to be sent back to Sperry because IRS technicians could not start them.

A number of the computers' tape drives, manufactured by the now-bankrupt Storage Technology Corp., made constant errors recording tax data and broke down, IRS officials and GAO investigators say. Such errors caused the loss in October of the $300 million in business tax payments.

One computer program that enabled crashed computers to resume operations failed mysteriously—stranding workers for days without a computer system.

An alarming discovery occurred in April 1984, after a team of 300 IRS programmers rewrote the ageny's entire tax processing software into a computer language called COBOL. Altogether, 1,500 software programs containing 3.5 million lines of code were written.

IRS officials subsequently learned that the Sperry computer would only run half as fast as needed when operated with the new COBOL programs written by its employees.

"The IRS did not realistically calulate the effect of converting to COBOL. They were way too optimistic. They thought COBOL would reduce the amount of computer resources that they would use, but it's had the opposite effect," said one GAO computer specialist.

The IRS undertook a crash program early last year to rewrite again the 1,500 computer programs in hopes of making them more efficient in manipulating data. But this left little time for testing the software.

"The emphasis was on completing the software in time for the taxprocessing season rather than testing it," a government investigator said.

The untested program produced an unknown number of errors in processing tax information this year. Many programming errors took weeks, even months, to locate, IRS officials concede.

Government investigators attribute the IRS's myriad computer problems to the inexperience of its managers in selecting and operating a vast computer system. "Many of these guys have very little technical background," one GAO investigator said.

Despite indications that the computer was likely to encounter problems, IRS failed to operate its old Honeywell and Data General system as a backup in case of an emergency. Commissioner Egger has said there were insufficient funds to operate the backup system.

[From the Philadelphia Inquirer, Aug. 4, 1985]

WHY THE BESIEGED IRS MAY NOT RECOVER FOR YEARS

(By Arthur Howe)

The Internal Revenue Service is facing massive computer and management problems that are threatening the stability of the nation's tax collection system.

The crisis first became visible earlier this year when an extraordinary backlog of unprocessed 1984 tax returns began piling up. It has since spread to virtually every aspect of the agency's operations.

As IRS workers have diverted their attention to the mountain of unprocessed returns, the agency has performed fewer and fewer tax audits while the numbers of tax delinquents and the amounts they owe the U.S. Government have soared.

Meanwhile, backlogs of unanswered inquiries from taxpayers and uncorrected tax-record errors have grown dramatically.

The volume of uncompleted work is expected to remain at record levels in coming months as more and more tax cases with computer and other errors emerge from this year's hectic tax-processing season.

As a result, the IRS could be overwhelmed by next year's flood of tax returns before it is able to resolve this year's problems, government investigators and congressional staff members fear.

"We're doing everything we can to prevent that from happening," said Thomas J. Laycock, assistant commissioner for computer services. "We piled up backlogs quickly as a result of processing many more returns later than expected. There is much effort going on now to try and figure out ways for that not to happen."

But government investigators and some congressional observers say it will be difficult for the agency to overcome its operating and management problems. As they see it, the agency is caught in a vicious cycle.

Even if the IRS is able to catch up with this year's work, it will likely be swamped again next year because its new $103 million network of computer systems is incapable of efficiently handling the agency's steadily mounting workload of increasingly complex tax filings. The IRS must process seven million more tax returns next year than the 96 million tax returns filed this year and 13 million more than this year in 1987.

"There is no assurance that the inventory backlogs will be reduced soon or that the computer system will be able to efficiently handle the service center's workload during the 1986 processing year," said a confidential General Accounting Office report, completed in June.

IRS Commissioner Roscoe L. Egger, Jr. concedes that there are management problems within the agency. He has ordered a senior IRS task force to study "every facet of the 1985 filing season, identifying every possible problem they can find and recommending ways to solve them."

Sen. John Heinz (R., Pa.), among others, believes the IRS will never be able to solve its management problems. "I don't think they have the management to do the job," he said.

The statistical evidence from the IRS of its massive operational difficulties is overwhelming:

As of July 16, the IRS had failed to complete processing of an estimated 6.3 million individual 1984 tax returns—many of them filed with the agency as early as January. In the agency's Philadelphia regional service center alone, the processing of 845,000 tax returns had not been completed by the end of July—with about 116,000 of this number still due refunds despite previous assurances by Egger that all refunds would be mailed by Aug. 1.

Of the returns that have not been completed processed, 4.9 million individual and business tax filings—roughly three times the number last year—are stuck in the IRS's processing pipeline because of errors by IRS workers in transcribing tax data, glitches on the computers and lost tax documents. By far, the single largest backlog of these error-plagued tax filings—952,726—are in the Philadelphia service center.

As of June 30, the agency's revenue officers were trying to collect $7.4 billion from one million delinquent taxpayers, a 19 percent jump in the number of delinquent taxpayers from the same date last year. The agency's backlog of incomplete investigations of delinquent taxpayers totaled 862,041 as of the same date, involving an estimated $4.3 billion in uncollected taxes—or almost triple the 324,000 pending investigations at the end of March.

Across the country, a record 1.6 million business and individual taxpayers—a threefold increase since April 1—were waiting on July 5 for the IRS to read letters from them regarding erroneous notices, lost tax payments and disagreements on tax bills. The current backlog of unanswered correspondence is twice the size of last summer's backlog. In the Philadelphia service center, 208,927 letters await opening—the most of any of the other 10 regional service centers.

And at a time when voluntary tax compliance is eroding severely, the agency is conducting far fewer audits—about 12 returns per 1,000, compared with 14 returns per 1,000 last year and 20 per 1,000 in 1980.

The IRS's current management dilemma was spawned in a sprawling nationwide bureaucracy coordinated in Washington by agency officials who have rarely visited—except on occasional tours—any of the agency's 10 regional service centers where work on many millions of tax filings is done each year.

The management flaws were exacerbated by the problem-plagued computer systems installed last fall in 10 regional IRS service centers.

The agency's difficulties with the computer systems have been immense. Last spring, for instance, the massive task of converting the computers' 1,500 programs—a volume of computer code larger than the one used by NASA to control the space shuttle—went to hundreds of newly hired workers with little or no experience in programming.

Result: What was intended to be the most sophisticated system ever produced for electronically processing taxes has been error prone, continually breaking down, and operating at half the speed of the agency's prior system.

"What you get when you take good experienced programmers and what you get when you hire people off the street are two different things," Laycock said.

As the IRS has struggled to solve its computer problems, morale at the regional service centers has plummeted. Turnover is so high that workers in some service centers are offered $100 for each new employee they recruit.

Meanwhile, IRS managers in Washington and in regional offices around the country

have been handicapped in their struggle to understand and deal with the agency's massive operational problems because they have not been able to get timely and accurate measurements of the problems, including the volume of errors, numbers of lost tax returns or even the size of the backlog of unfinished work.

Operational difficulties with the IRS's Sperry Univac 1100/84 computer systems have abounded.

Conversion to the new system was delayed for a month last September because the 3.5 million lines of newly written programs were discovered to be replete with errors and inefficiencies.

During this conversion period, little work could be done on the backlog of tax cases awaiting collection, examination or error correction. The disruption also means that service center workers had less time to acquaint themselves with the new system before the processing of 1984 tax returns began.

CAPACITY PROBLEMS

Once operating, the computers did not possess the capacity to handle the centers' vast workload, service center workers discovered.

The systems' rewritten software was still cumbersome, erratic and error prone. Programs that failed to capture information during the processing of tax returns had to be run over and over, which prevented other computer programs from running on schedule, IRS officials say.

Moreover, the new computer systems required more magnetic tapes to run than had been anticipated—so many, in fact, that several regional services centers were on the verge of running out of tapes in the middle of the tax processing season, say investigators and workers. The use of more tapes slowed down the schedule of work on the computers and created information storage and retrieval backups, workers say.

By far, the largest problem occurred in the part of the system that consolidates, analyzes and updates data on the computers' "master file." Because these functions require so much of the computers' capacity to manipulate data, the IRS performs these functions on weekends to avoid disrupting work during the week.

ACCESS PROBLEMS

Since last fall, however, it has taken the new computers an average of twice as long as scheduled to perform the weekend data update; occasionally, it has taken an entire week, according to government investigators and IRS executives. Result: IRS workers cannot use the system for auditing, pursuing delinquent taxes, resolving errors and other tasks associated with sorting and examining millions of tax reports.

For instance, at the IRS regional processing center in Fresno, Calif., workers in the correspondence and tax adjustments division, where taxpayers' problems are solved, could only use the computer for an average of six hours per week this spring, compared with 26 hours per week last year. General Accounting Office investigators found in a study of problems at that center.

In the Philadelphia service center, repeated and lengthy shutdowns of the computer caused hundreds of thousands of business and individual returns to back up in various departments this spring and frustrated unknown numbers of taxpayers who were unable to get information about their tax returns from the computer system.

Because the IRS's computers are often unavailable, the service centers have been unable to process three-fourths of all tax information sent to them over the first six months of this year on magnetic tapes by banks, large corporations, government agencies and payroll firms, according to IRS sources.

Result: The IRS has since early April used a compatible Univac system in Harrisburg owned by the Pennsylvania Department of Welfare to process enormous volumes of tax information from regional centers across the nation.

The most visible aspect of the agency's computer problems has been the lengthy delays in processing millions of 1984 individual tax returns.

Almost four months after the tax filing deadline, the IRS says it still cannot say with any precision how many 1984 returns have yet to be successfully processed. It also does not know how many individuals are still awaiting refunds, or how much interest it must pay on the late refunds.

The agency's estimate that it still has not processed 6.3 million of the 97.7 million individual returns filed this year is based on statistical inference.

In the Philadephia service center, 1.46 million tax returns remained to be processed as of July 12, the IRS estimates. Of that number, an estimated 116,000 taxpayers from throughout the mid-Atlantic region were still awaiting refunds, according to regional spokesman Dan Seklecki.

IRS Commissioner Egger admits he is troubled by the lack of precise information concerning the numbers of unprocessed tax returns and individuals awaiting refunds. In testimony June 22 before the House subcommittee on oversight, he said he could not explain how an estimated number of 1.1 million then-unprocessed returns of taxpayers due refunds corresponded to other IRS inventory data.

Rep. J.J. Pickle (D, Texas), chairman of the House subcommittee, labeled Egger's statistical estimates "double talk."

BREAKDOWNS

The lack of information concerning the unprocessed tax returns is attributable in part to breakdowns in the agency's computerized inventory-tracking system. In some service centers, this led to hundreds of thousands of tax returns being sent inadvertently to warehouses this spring without being processed, according to government investigators and IRS sources.

For example, exactly one month before the April 15 filing deadline, workers in the Fresno, Calif., service center were searching for 115,508 individual income tax returns believed stored in the center's warehouse without being processed.

The IRS recently ordered each of the service centers to complete an inventory of its warehouses and storage areas to determine how many unprocessed returns may be languishing there.

Millions of other tax returns are mired in the agency's tax-processing system because of computer or human error in handing.

Across the country, an estimated 4,906,370 individual and business tax filings nationwide are in either "unpostable" or "error resolution" status—meaning that they will remain suspended for weeks, even months, in the service center until IRS workers can examine each case to determine why tax information could not be entered into the computer system.

Of the 3,770,000 returns in unpostable status, 1,852,992 were filed by individuals, a 90 percent increase over a year before. The remaining 1,650,218 returns were filed by businesses, a threefold increase over last year.

Many of these returns are in "BOOB" status, an IRS acronym for "block out of balance." These are large groups of tax returns that fail to balance against other computer data because the arithmetic is incorrect, or because the number used to locate a document is incorrect or nonexistent. During the tax season, in fact, the IRS made no provision to verify that document location numbers were transcribed into the computer correctly-thereby adding to the problem, according to IRS sources.

INABILITY TO CHECK

The expanding backlogs of BOOB returns meant that normal accounting checks could not be performed for days.

As a result, locating the actual returns to check for errors was often impossible. In centers such as Philadelphia and Fresno, this resulted in carts of returns spread haphazardly throughout the center.

"Carts with returns were scattered all over the [Fresno] center," said one government investigator, in a confidential report. "Because the unit was not able to find a large number of documents, it had to periodically check the warehouse to determine if the returns had been sent there by mistake.

Additionally, hundreds of thousands of business returns entered unpostable status because the IRS did not provide businesses with the proper preprinted Federal Tax Deposit coupon booklet. The coupons are read by electronic scanners. IRS spokesmen said that an independent printer hired to produce the coupons has been consistently backlogged since early last year.

A memo from IRS headquarters in late March said: "Reorder requests have far exceeded our original estimates . . . This has caused inventories to exceed the contractor's capacity."

Resolving unpostable business or individual tax cases on the new computer systems can be an exhausting process. Many are sent to the IRS's error-resolution department, where IRS workers must often correspond with the taxpayer to check a Social Security number or confirm a payment.

The sluggishness of the new computers makes this process very slow: Now, only 34 erroneous cases can be researched by an IRS worker in an hour, compared with 87 cases per hour with the IRS's previous computer system, according to a General Accounting Office internal report.

At the Philadelphia service center, the volume of erroneous tax cases awaiting resolution dwarfs that of any other service center: 430,086 cases, many filed by small businesses. The second largest in inventory of erroneous cases—120,385—is in the Atlanta service center.

IRS officials will not explain publicly why such a large volume of erroneous tax cases exists in the Philadelphia service center. Privately, however, IRS officials attribute the problem to "sloppy workmanship" at the center on Roosevelt Boulevard.

"What we are talking about here is a very large number of errors being created—just sloppy workmanship," said one IRS worker, who asked to not be identified.

While the volume of tax cases in unpostable or error-resolution status builds, hundreds of thousands of erroneous IRS delinquency and penalty notices have been disgorged by the agency's computer systems. Reason: The IRS has no method of verifying that delinquency and penalty notices are actually valid. Nor does the agency

measure the numbers or types of delinquency notices it mails.

IRS spokemen publicly say that the agency is not aware of any systemic problem creating erroneous notices.

But government investigators found that in some service centers, workers in the IRS collections department did not receive computer tapes needed to research and halt potentially erroneous refunds to taxpayers until March.

ERRONEOUS REFUNDS

And because the computer could not identify the location of other returns at service centers, the agency issued unknown millions of dollars in erroneous refunds to individuals, General Accounting Office investigators found.

Across the nation, businesses and tax practitioners have reported in recent months that a steady flow of erroneous notices has been issued by the IRS to taxpayers for much of the last six months.

Examples abound: In May, the IRS tried to erroneously seize the assets of the Bank of Alex Brown in central California—despite six letters attempting to resolve the matter.

"Let your imagination wander and think of any conceivable [return] posting error, and it has happened many times," said Jim Smith, president of The Payroll People, a Fresno, Calif., company that handles employee payrolls for banks and their clients. He said that 31 percent of his clients were in some type of IRS penalty status.

A Philadelphia lawyer, Pamela P. Cohen, frustrated over the IRS's loss of her payments and failure to read correspondence, wrote the agency recently: "The performance of your agency goes beyond mere incompetence. I have spent an enormous amount of time in the last two and one half years attempting to rectify your errors. I have now reached a breaking point."

The steady stream of erroneous notices and other mistakes in the tax-processing system have boomeranged on the IRS regional service centers in recent months, swelling inventories of cases needing individual IRS adjustments.

The backlog of adjustments cases on July 5 in service centers nationwide was an estimated 1,578,833 tax cases—a volume that is nearly twice the level of a year ago. Most of these cases result when taxpayers write the IRS to protest a bill, or lost payment, or failure by the IRS to process a return.

In the mid-Atlantic region, the backlog of tax cases awaiting adjustments at the Philadelphia regional center is an estimated 208,927, the highest in the nation and 2½ times the same figure last year.

Roughly 35 percent to 50 percent of these cases have been awaiting IRS resolution for more than a month, according to General Accounting Office investigators. But many cases in error resolution can take years to resolve.

In the Philadelphia service center, "disastrous" delays were created this year in trying to adjust cases because mail from businesses and individuals was sent to examiners in unsorted batches, according to the GAO investigators. The problem: "The person trained to deal with individuals' correspondence did not know the specifics for business," a GAO investigator found.

One nagging problem. The IRS's computer data bases are only available to adjustment workers for a handful of hours through much of the tax-processing season, making it difficult to retrieve information or adjust cases to resolve problems.

"The amount of time the [computer] system has been up and available has been cut in half since the introduction of the new computer system," reported to GAO.

IRS's biggest current worry is that it will have to adjust a very large number of tax returns in coming months because of errors created during the hectic tax-processing season.

"It could be a ticking time bomb" said one IRS official in Philadelphia. GAO investigators found that IRS supervisors had no idea how many errors were being created in the processing of tax returns during the tax filing season because no "quality assurance" reports were issued.

Moreover, the backlog of cases awaiting processing is so large now that IRS workers have no way of identifying systemic problems until they work through their inventory.

COLLECTION PROBLEMS

More financially significant is the limited amount of computer time and insufficent number of computer terminals in the IRS's delinquent-tax collection division, where billions of dollars in back taxes are collected each year.

At the end of June, revenue officers nationwide had collected $300 million less than last year, or a decline of about 12 percent. IRS officials concede that a persistent problem is that revenue officers can-not get access to computers to get tax information on delinquents.

In some service centers, such as Fresno, the collection of delinquent taxes is backlogged severely.

The Fresno computer's data based was only available one full, 12-hour day during the five-month period from January to May, according to the GAO. On other days that it was available, it could only be used a few hours at a time. Result: Inventories of uncollected delinquent tax accounts there have increased to an estimated 154,000 acounts in April from 60,000 in June 1984, thereby depriving the government of an estimated $470 million.

Moreover, during the January to May period, the IRS's computerized tax-collection system was not available for weeks. "During this time, about 40 to 45 collections staff were essentially unproductive in processing case closures, and were instead used to perform routine filing and other clerical functions," the GAO reports.

In addition to generating hundreds of thousands of erroneous delinquency notices, the computer snafus this year have delayed issuance of unknown numbers of valid delinquency notices.

At least 114,700 delinquency notices were scheduled to be sent to West Coast taxpayers in January, but they were delayed so they could be researched for errors. In mid-May they were delayed a second time. Before they can be sent they must be reprocessed to check against money received since January, investigators say.

The IRS's computer woes are compounded by a growing workload, a shrinking number of workers and high turnover in all the regional service centers and district offices.

Over the last decade, the IRS's workload has increased by 46 percent to 179 million tax filings. At the same time, the IRS staff has grown from 84,300 to 86,500—less than 3 percent growth.

In some instances, the shortage of workers has contributed directly to lost tax revenue.

In the backlogged Fresno, Calif., service center, a staff of 375 examiners is responsible for a job that the IRS considers should be handled by 502 workers. Result: An estimated $18.8 million could not be collected this year from 60,000 delinquent taxpayers identified in an audit program with the state of California, according to a confidential GAO report. The revenues will be lost forever because a six-year statute of limitations has expired.

In another Fresno program, a reduction of staff has resulted in the delayed assessments of an estimated $145 million in taxes plus interest and penalties from about 29,000 nonfilers, according to the GAO investigators.

Nationwide, the IRS's audit program also has been backlogged by computer problems in the service centers and an insufficient number of examiners and service center employees. The examination staff has grown by only 4.8 percent in the last decade despite growing complexity of tax filings and a 46 percent increase in the number of tax returns.

One problem: Auditors say they must routinely delay scheduled audits because they cannot obtain copies of tax returns from the overworked service center staff. The backlog also expanded during the first half of the year, because examiners in the service centers were reassigned to other tax-processing duties to get refunds processed in time.

Result: Halfway through the year, the IRS has only completed 871,000 audits of business and individual tax returns, according to figures released by the agency. This compares with 1,135,533 completed as of Sept. 30, 1984, the IRS reported.

The IRS says it currently intends to audit only 1.2 percent of all returns this year, compared with 2.6 percent in 1976. Commissioner Egger recently said that auditing returns "is no longer a first priority" of the agency.

From now on, Egger said, the agency will stress "quality" workmanship in processing taxes.

This will be a challenge: While the number of workers at the IRS shrinks in face of budget cuts, the level of skill among tax processers is also failing, according to GAO investigations. The IRS has severe problems training and keeping qualified employees, especially computer programmers and operators.

"They can't keep them. As fast as they get them trained in computer programming or operations, they go off to the private sector where they can get more money," said one congressional investigator.

Throughout the agency, turnover is high and morale is low—in part because of a grinding work schedule and huge backlogs of work. In Philadelphia tax-adjustment divisions, for instance, there were 60 vacancies in April out of a staff of 245 full-and part-time workers, according to the GAO.

The low morale and volume of work contributed to employees in the service centers in Andover, Mass., Austin, Texas, and Fresno destroying taxpayers documents this year to meet IRS's production quotas, according to officials of the Treasury Employees Union, a labor group that represents the 92,000 IRS workers nationwide.

In the Fresno center, 60,000 taxpayer documents were destroyed early this year before taxpayers could be notified that their returns had been processed, the IRS says. Workers say they were ordered to destroy the documents—"D-code" them, in IRS parlance—because the computers were unavailable to finish the work.

In Andover an IRS employee was indicted recently for taking home 500 corporate tax

returns and an unkown number of other documents and destroying them to meet production goals.

Work within the Philadelphia service center is especially stressful. Many of the 2,500 employees there are still working 10-to 13-hour days six and seven days a week, still trying to process 1984 tax returns, according to the employees' union.

"It's still a zoo here. People are working from 7 in the morning until 10 o'clock at night and the work is still pilling up," one union official said.

Mr. SPECTER. I thank the Chair.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ANDREWS. Mr. President, I ask unanimous consent that we leave morning business and return to the Legislative Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

WHITE EARTH RESERVATION LAND SETTLEMENT ACT OF 1985

The Senate continued consideration of the bill (S. 1396).

Mr. ANDREWS. Mr. President, I understand the legislative business is S. 1396?

The PRESIDING OFFICER. The Senator is correct.

Mr. ANDREWS. Mr. President, I suggest the absence of a quorum and I ask unanimous consent that the time involved in the quorum be charged equally to both sides.

The PRESIDING OFFICER. Is there objection to the request of the Senator that the time be charged equally? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, we just previously rejected an amendment to extend the time for filing a claim for title and damages by any of the Indian allottees and their heirs at White Earth. I think the amendment should have been accepted. I think the fact that it was rejected is damaging to the bill.

The point is that every individual Indian or non-Indian, every citizen of the United States, of course has the opportunity to go to court if they want to challenge the question of whether or not some piece of land is not theirs. Obviously, that is a common practice.

But the question is, Is this a common procedure or is this a series of events that are reflected in the necessity for this bill as proposed by the proponents of the bill?

It is a very uncommon situation. We have 800-and-some-thousand acres of Indian reservation that has shrunk to 56,000 acres in less than 100 years, all in this century, I might point out, during the last 80 years.

So the situation is questionable whether or not the title from the Indian allottees was transferred lawfully. The scandals that have occurred and caused several investigations by the Government starting with President Theodore Roosevelt speaks to that point. It not only was unusual, but it was considered to have been highly damaging to the interests of the Indians involved.

In the bill, in order to overcome an obstacle of constitutionality of the act itself, there is a provision that allottees or their heirs can bring suits in court only within 6 months after passage of the act.

The amendment I offered was to make it somewhat reasonable by making the timeframe 18 months. That was not acceptable, and that has been rejected by the Senate.

The burden that that places on the bill has to do with the question of constitutionality of the act itself. Congress has the plenary power to set by statute conditions of allotments and the procedure by which allotments can be moved from the trust status. That is so patents in fee, or clear title, can be issued to the allottees.

That, in my judgment, was not done properly under the Clapp amendment which has led to a series of lawsuits since that time involving the proper ownership of the Indian allotted lands.

But on the question of constitutionality, the Justice Department has responded to the effect that the constitutional question can be resolved as long as there is an opportunity for the allottees to go to court, and through their claims and actions, have the court to determine that the land is still theirs because their title to the land was not extinguished.

But what the bill has done is to make such a narrow opportunity to do that that I question whether it was good judgment on the part of the proponents of the bill to recommend rejection of the amendment, because I think then they raise the question of whether or not a fair and practical opportunity will be available for the allottees or their heirs to seek redress in court.

Let me point out to you the Justice Department reasoning on this point.

In the report on another bill, S. 885, which is an earlier version of S. 1396, we noted that S. 885 would present constitutional difficulties if it was interpreted to legislate a taking without providing for just compensation or due process for some claims by Indian allottees to land associated with the White Earth Reservation. However, we noted that this difficulty did not necessarily render the bill unconstitutional because of the existence of the Tucker Act, which provides a general right to recover just compensation for the taking of property. The Tucker Act remedy likely existed for any taking caused by S. 885. So even though the bill presented no fatal constitutional infirmity, it was recommended that an explicit reference to the Tucker Act be made in the proposed statute to remove any risk that a court might hold it unconstitutional.

S. 1396 has addressed the taking issue by explicitly providing in subsections 6(d) and 6(e) a Tucker Act remedy to any person entitled to just compensation for the loss of his property.

Now, it is to that point that the amendment was addressed. This bill, S. 1396, the successor to S. 885, does provide that opportunity for the Indian allottees or their heirs to make claims in court and to attempt to either get the property back or get just compensation for the use of their property and damages.

The amendment that I offered would have provided a reasonable period of time for that to occur. I think 6 months is unreasonable. Eighteen months, true, is an arbitrary figure but it would appear to me to be more reasonable and, therefore, to satisfy the question that is raised by the Tucker Act much more adequately than the bill does.

However, I only make this point now to say that I believe a further remedy should be made available in the bill to make sure that Indian allottees or their heirs do have this opportunity. That goes to the point of whether or not there is some legal assistance provided to the Indian allottees or their heirs.

I believe now, if we are going to have that window of opportunity available for only 6 months, that this amendment which I was prepared to offer, even if the 18-month window of opportunity had been accepted, but, having rejected the 18-month window of opportunity, I think it is even more essential now that this amendment be accepted. The amendment will provide that, on the application of any allottee or heir seeking to file claim under the provisions in the bill, which is in subsection (c), the United States shall provide legal advice and assistance regarding the merits of the claim. Then if the United States determines the claim has legal merit, and if the allottee or heir elects to proceed with the filing of a legal claim for title or dam-

ages under subsection (c) of the bill, the United States shall, on request, act as attorney for the claimant.

Mr. President, I point out to the Senate that we are getting into territory where if you do things wrong you have not done anything. The trust responsibility of the United States for Indian lands is something that has been clearly established by law and has also been established by numerous court cases. There are a number of claims reviewed by the Department of the Interior in the Solicitor's Office that have been found to have merit.

Now, there is a serious possibility that the land that has ended up in State control on the basis of tax forfeitures is clearly an unlawful taking. The proponents of the bill state that they would like to have the bill passed so it can clear up this mess.

Well, I offer this amendment to assist them to help clear up the mess. All of those claims that are being reviewed by the Department of the Interior and found to have merit are not claims that can be shuffled off to the side and forgotten.

Mr. ANDREWS. Mr. President, will my colleague yield?

Mr. MELCHER. Yes, I yield.

Mr. ANDREWS. Mr. President, I would like to announce, at the request of the majority leader, that there will be no further rollcall votes today—75 Senators are in conferences at this moment—that is, there will be no further rollcall votes today if my unanimous-consent request, which I am about to make, will be granted.

That unanimous-consent request is that any votes ordered on this legislation be held over until 12 noon tomorrow.

Mr. DURENBERGER. Reserving the right to object.

Mr. MELCHER. Reserving the right to object. I believe we better check on our side.

The PRESIDING OFFICER. The Senator from Minnesota reserves the right to object.

Mr. DURENBERGER. Mr. President, reserving the right to object. When we were on the floor—I address this issue to the manager of the bill—on Thursday last week, we were talked out of considering the bill at that time. We have been back here on various occasions and each time there seems to be a conference getting in the way of consideration of this bill.

Having been frustrated 2 years running at the end of the session from the consideration of this bill, I think it is inappropriate, either on the side of the majority or on the side of the offerer of the amendments to this bill, on which we have worked out a 4-hour time agreement, to suggest that the bill be delayed for another 24-hour period of time. Our concern, obviously, is that if we wait to have any votes on this bill until the time suggested by the manager of the bill under the unanimous-consent proposal that we have a vote, there will not be time to consider the bill, pass it in the House, go to conference on any points of disagreement, and to pass a bill.

THE PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota?

Mr. MELCHER. Mr. President, reserving the right to object. We are attempting to check on this side with the Democratic leader.

Mr. ANDREWS. Mr. President, let me then, on behalf of the majority leader, make the statement that there will be no further rollcall votes today, period.

The PRESIDING OFFICER. Does the Senator withdraw his unanimous-consent request?

Mr. ANDREWS. Under the circumstances, I believe it is the appropriate thing to do. I withdraw the unanimous-consent request.

Mr. President, I had hoped, by making the unanimous-consent request, we could allow the debate on this bill to continue to final passage so that we did not have that many hours to chew up tomorrow. I believe most people feel that that would make sense.

But, because of the unique combination of the various conferences going on and the need for Senators to be elsewhere, if there is objection to that unanimous-consent request, quite obviously, when we get to a point of a vote, if a vote is ordered, we will withhold.

Mr. DURENBERGER. Will the manager of the bill, standing in for the majority leader of the Senate, yield to me for a question?

Mr. ANDREWS. I yield.

Mr. DURENBERGER. The manager of this bill, and the majority leader's stand-in in the proposition that there will be no votes today, is an expert on matters such as the one we are considering. He has had years of experience in passage of legislation such as that before us. It is through his good graces and that of his colleagues on the committee that this bill is before us now. So I hesitate to propound a question that would be critical of the chairman's judgment in this regard.

However, the concerns of the two Senators from Minnesota, besides the fact that they happen to be in the same majority in this body as the majority leader, that they happen to be involved in the same conference committees that are referred to by the stand-in for the majority leader, our deepest concern is for the people of our State, whose interests are represented in this bill and whose interests have been contested by the Senator from Montana for the last 2 years, in each case at the end of the session.

Can the chairman of the committee guarantee to both of the Senators from Minnesota that the legislation, if debated under the time agreement, voted upon under the time agreement, and if the votes were to come sometime on Friday, could the chairman of the committee guarantee passage of this bill prior to the recess of the Senate and the House and in such form as it could be signed by the President?

Mr. ANDREWS. Mr. President, that is a very fair question. Let me state unequivocally that I was speaking for the majority leader when I made the statement that there would be no further rollcall votes today. Only the majority leader can make that statement, as the Senator knows so well.

I was speaking as chairman of the committee handling the bill under consideration, because I knew of the interest of the Senator from Minnesota in the bill and also the request of the Senator from Montana that it be debated during the daylight hours. The debate is going on.

I understand the need for expeditious action, so I added, on my own, the unanimous-consent request which I felt would be the best way of facilitating its final passage, with those votes to occur between 12 noon and 1 tomorrow. Before I made that unanimous-consent request, I contacted, of course, the ranking Democratic member of this committee, the Senator from Montana. I did not, of course, clear it on both sides of the aisle. Obviously, I did not clear it with the Senator from Minnesota.

I thought I was expediting things and that if we could get that unanimous-consent request approved, we would have a vote certain tomorrow between 12 and 1 on any amendment and final passage of this bill if they were ordered. That would, I believe, meet the needs of the Senate and meet the needs of the State of Minnesota and others that we come to a final resolution.

Mr. DURENBERGER. With all due respect to my colleague, I still did not hear an answer to my question. I understand there can be a resolution of whatever problem it is that faces the majority leader in his desire not to hold any more votes, even though it is only 9 minutes after 4 in the afternoon; I can understand the response as being an accommodation of some kind to some interests, which is, as far as I can tell, as yet unstated by the representative of the majority leader.

However, it is not responsive to the question which I have propounded to the chairman of the committee, and that is whether of not, by delaying the vote on final passage until at the latest 1 p.m. on Friday, December 13, a day on which it is possible we will recess, whether or not it is possible that we will have lost the opportunity to pass this legislation.

Mr. ANDREWS. Mr. President, let me point out to my good friend from Minnesota that a delay from this afternoon to tomorrow is not as desirable, from the standpoint of getting this legislation passed through the House, as passing it today. Passing it today is not nearly as desirable as having it passed a week ago.

All I was trying to do was make sure it did not proceed beyond tomorrow noon. And, given the request of the majority leader that there will be no further rollcall votes today, I thought the best way of expediting the final disposition of this legislation would be to ask that unanimous-consent request.

But it is not imperative that we have that unanimous consent, and I think it propitious that I withdraw the unanimous-consent request at the present time having made the announcement on behalf of the majority leader that there will be no further rollcall votes. We will meet that problem when we come to it.

I think it probably makes a great deal of sense, Mr. President, to let the debate proceed.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. I understand the situation as it exists here on the floor. So there is yet another possible appeal on this matter. And that is our friend from Montana and we had one vote on this. I think it was quite decisive in its outcome.

Mr. MELCHER. Mr. President, might I inquire how I lost the floor?

Mr. BOSCHWITZ. So I ask our friend——

Mr. MELCHER. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. On consultation with those following the proceedings, the Chair recalls that the Senator did not lose his right to the floor because he did not have the floor. The Senator from North Dakota was recognized to propound a unanimous-consent agreement. He yielded the floor. The Chair recognized the Senator from Minnesota.

Mr. MELCHER. Mr. President, I must point out that I indeed had the floor. I was speaking on the amendment that I am about to propose. I yielded to my friend from North Dakota to propound a unanimous-consent request. I did not know that I was losing my right to the floor. I ask unanimous consent to retain it. But I think, Mr. President, that is not the proper way to go when we yield for a unanimous-consent request so it can be propounded on behalf of the majority leader. We should not lose our right to the floor.

Mr. BOSCHWITZ. I yield the floor in the event the Senator from Montana wishes the floor. I was going to suggest to the Senator from Montana the fact that rollcall votes are put off until tomorrow—if I may have the attention of the Senator from Montana. We can still achieve the end that he wished, and that we wished, of expediting this legislation. He wanted to see to it that we debate in the daylight hours on this bill. Perhaps the Senator from Montana would be agreeable not to require further rollcall votes inasmuch as we already had one, and inasmuch as I think it was quite decisive.

I know it is not the Senator's fault. He is living up to the agreement to be sure. It is being thoroughly examined in the daylight hours as requested. If he will accommodate the two Senators from Minnesota and not require further rollcall votes, we perhaps could proceed along a little quicker.

I appeal to my friend from Montana.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. Preident, I have noted around here that every time you start a unanimous-consent request, it takes more time to find out nothing is going to happen on the unanimous consent than it does to proceed with trying to get up an amendment, and finding out whether we can resolve the problems in the bill.

I will proceed again with the amendment that I was about to propose.

The amendment simply seeks to establish that when the allottee or heir seeks to file a claim under subsection (c) of this bill, the United States shall provide legal service and assistance regarding the merits of the claim and if the United States determines the claim has legal merit, and it the allottee or heir elects to proceed with the filing of legal claim for title or damage under subsection (c) of this bill, then the United States shall, on request, act as attorney for the plaintiff.

This is a very usual procedure, and a matter of trust responsibility.

Mr. BOSCHWITZ. Will the Senator yield?

Mr. MELCHER. I will be glad to yield, without losing my right to the floor, to my friend from Minnesota.

Mr. BOSCHWITZ. I know the Senator was busy, was talking to the Parliamentarian, and otherwise occupied when I asked the question. The Senator was anxious to make his case in daylight hours. We certainly have accommodated the Senator, and he has the right to ask for those things. He has the right, indeed, to ask for rollcall votes.

I just asked a moment ago, since the senior Senator from Minnesota and myself are anxious to move this along so as not to lose the opportunity of having House consideration before this portion of the 99th Congress expires. I wonder if he would be agreeable not to require any further rollcall votes until the amendments are on final passage? We have had one rollcall vote. I think it was quite decisive.

Mr. MELCHER. Mr. President, obviously, if I might respond to my friend from Minnesota, this is a reasonable amendment as I have asserted. If the Senators, as proponents of the legislation, accept the amendment, I do not want a rollcall vote. I hope the Senators are looking at the amendment and will let me know one way or the other.

But I have outlined the question of constitutionality as it is seen by the Justice Department because this amendment and the one preceding it speak to that point. The Justice Department thinks the question of constitutionality can be satisfied as long as those claimants—in this case, Indian allottees and their heirs—can seek remedy in court. If that is taken care of through a Tucker Act remedy—what the Justice Department refers to—the act is constitutional.

There is a question of limiting the time for utilization of that constitutional privilege. I believe that would be a fifth amendment question on whether it is a due process or unlawful taking, and, therefore, did not meet due process. That cannot be extinguished.

So by setting a 6-month window of opportunity to file such a claim, the bill itself may have created a constitutional problem. I sought to at least alleviate a part of that by making the window of opportunity 18 months. That amendment was rejected.

I hope this amendment will not be rejected because this one goes directly to the point of whether or not legal assistance will be provided on claims to those land titles that were lost to the Indian allottees because of a tax foreclosure by the State. Many are now being reviewed by the Department of Interior's Solicitor's Office and have been determined to have legal merit. This is an attempt, a very honest attempt, to help the bill because there is a trust responsibility. You cannot ignore it. And the United States has to exercise it.

If the claimants do have some claims which have been found to have legal merit by the United States, this amendment will indeed help to carry out that trust responsibility.

If it is the intention of the Senator from Minnesota to make sure that something happens that is good and ends litigation after this bill is enacted, this amendment would be a wise one to accept.

AMENDMENT NO. 1415

Mr. MELCHER. Mr. President, I send the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. MELCHER] proposes an amendment numbered 1415.

On page 38, after line 10, insert the following new subsection:

"(e) On application of any allottee or heir seeking to file a claim under subsection (c) of this section, the United States shall provide legal advice and assistance regarding the merits of the claim if—

(1) the United States determines the claim has legal merit, and

(2) the allottee or heir elects to proceed with filing a legal claim for title or damages under subsection (c) of this section,

the United States shall, on request, act as attorney for the claimant."

Mr. MELCHER. Mr. President, I know the Senators have been examining the amendment. There is no question but that the United States is ready, willing, and able to provide this type of assistance. The Department of Justice has been involved in the White Earth situation for nearly 70 years. After the Clapp amendment they actually established a local office in Minnesota to handle Indian suits in equity to recover lost lands. The primary agency that carries out the trust responsibility is the Department of the Interior, but the legal arm of the trust is the U.S. Department of Justice. Between these two agencies there is plenty of expertise on hand to proceed with these claims.

I certainly urge adoption of my amendment.

Mr. President, I must remind my good friends from Minnesota that in order to untangle what they are attempting to untangle in this legislation, this is a rather key amendment because the question of trust responsibility, which admittedly in all of the records and all of the court cases that have been involved before, has been clearly demonstrated to have been lacking. To reject this amendment would be tantamount to setting not only a precedent against the trust responsibility, but it would be questioned in court and would serve as a basis for questioning the entire scope of the bill and the entire effect of the bill itself.

I urge my friends from Minnesota not to reject the amendment.

Mr. DURENBERGER. Mr. President, as I indicated in my opening statement and as my colleague indicated in his arguments earlier on this bill, the matters raised by our colleague from Montana have been raised before by a variety of people in a variety of ways. The bill has been well thought out and the issue of litigation has certainly been considered.

We have the opinion of all the various groups I referred to in my opening statement who have been trying to come to a conclusion with regard to this bill, that the proposal embodied in the amendment by the Senator from Montana would defeat the entire purpose of the settlement and should be rejected.

The main reason the amendment should not be part of the bill is that it is entirely contrary to the goal of ending the title controversy to the land which is involved here once and for all.

The purpose of the bill that we are considering, S. 1396, is very simply to prevent litigation. This amendment provokes litigation.

The purpose of S. 1396 is to save the Indians, the Indians' heirs, the tribal council, private citizens, the United States, the State of Minnesota, and the counties involved—everyone—social, economic, and financial costs of expensive and in these kinds of cases explosive litigation.

The amendment by the Senator from Montana assures that such costs will be incurred because if by law we must start to encourage and assure land litigation we might as well stop all kinds of settlement talk. That is the purpose of the Senator's amendment, to kill a settlement which discourages lawsuits.

Mr. President, this bill is being considered under a time agreement which requires that amendments be germane and relevant. I make the point of order that the pending amendment by the Senator from Montana is not germane.

The PRESIDING OFFICER. The Chair will rule the point of order is well taken. The amendment falls.

Mr. MELCHER. Mr. President, I appeal the ruling of the Chair.

Mr. DURENBERGER. Mr. President, I move to table the appeal.

Mr. MELCHER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. DURENBERGER. Mr. President, I ask unanimous consent that we set aside the amendment and the motions pursuant to that amendment by the Senator from Montana [Mr. MELCHER] until a time tomorrow which is agreeable between myself and the Senator from Montana which we might propose for a vote on the tabling amendment, on which we would agree at some later time today or tomorrow; and that at the time that we come back to this matter, there be 10 minutes for the proponents of the motion to table and 10 minutes for the opponents of the motion to table before any vote on the motion to table.

Mr. MELCHER. Reserving the right to object, Mr. President, and I shall not object, I just want to clarify something. Is the unanimous-consent request to vote on tabling the amendment or tabling the appeal from the ruling of the Chair?

Mr. DURENBERGER. Mr. President, it is on the latter.

The PRESIDING OFFICER. The pending motion is on the question of appealing the ruling of the Chair and the motion to table that appeal.

Mr. DURENBERGER. And the unanimous-consent request I have proposed?

The PRESIDING OFFICER. Without objection from the Senator from Montana, it is so ordered.

Mr. MELCHER. Mr. President, I mentioned several times that the State of Minnesota is holding land—I guess the proper term is acquired—has acquired land which was formerly Indian allotment land on the White Earth Indian Reservation.

In my State, we have quite a few Indian reservations, but I am not aware of any instance where the State of Montana acquired land on any reservation of any consequence at all. I earlier stated that when the boundaries of the White Earth Reservation were drawn, it was 854,000 acres. That was in an Executive order of President Hayes. Immediately, 92,000 acres of that was identified within the exterior boundaries of that reservation as State land. I assume that that was school land. The ordinary procedure in States like Minnesota and my own State is that two sections in every township are reserved by the State for the purpose of public school education.

So taking that 92,000 acres off, the land was somewhere in the neighborhood of 760,000 acres. That has dwindled down to 56,000 acres still under Indian ownership. But the most peculiar part about all this mess is that the state of Minnesota has 165,000 acres that was never part of anybody else's land except the Indians. One hundred thousand acres of that is at risk.

Now, that is what has been identified by the Solicitor General's Office of the Department of the Interior. What they mean by that is simply that the title belonging to the State is at risk because it was Indian allotment land. There is question about whether the title of the Indian allottee was ever extinguished. The bill does state that the State of Minnesota will return 10,000 acres to the tribe. The legislature of the State of Minnesota has said the State will return 10,000 acres to the tribe if there is a White Earth settlement bill, such as the one

we are working on today, passed this year.

Now, there has been a statement made that Governor Perpich would like to see this cleared up, he is very much for the bill; that the attorney general, Skip Humphrey, the son of our dear, beloved colleague Hubert Humphrey, would like to see this cleared up, and well they might. But on what terms? Have Congress legislate that everything is hunky-dory for the State of Minnesota to have that land and give one-tenth of it back—title in reverse of some type? That is strange to me. So I would like to correct that.

During the past 6 years, the Department of the Interior has been very diligently trying to identify that part of the land which was stripped from Indian allottees by tax forfeiture procedures to see whether those Indian allottees and their heirs have a valid claim. They have identified 100,000 acres which they say is at risk. I suggest in this amendment—and I will send it to the desk in a moment, Mr. President—that the State of Minnesota shall enter into an agreement with the Secretary providing for the transfer of that amount of land within the boundary of the reservation which is determined by the U.S. Department of Justice to have been acquired by the State of Minnesota through tax forfeiture by any of transactions described in the bill in sections 4(a) and 4(b).

We assume that a sizable portion of that 100,000 acres is in this category, not just 10,000. The Solicitor General's Office through their field staff has advised us that in their best estimate it is between 60,000 and 75,000 acres.

Now, if we are going to quiet title action to extinguish any valid claim of any of the Indian allottees and their heirs by passing this bill, surely the least we can do is make sure, through the efforts of the Department of the Interior, that we are not denying to Indian allottees land that is justly theirs and for which title could never have been extinguished through tax forfeiture.

Earlier in the day I mentioned that there is not any question about land that is held in trust for Indians not being subject to State or local taxes. That has been resolved in so many court cases it would be almost dilatory for me to recite that long list. That has been clearly established.

An attempt to work with the State of Minnesota, probably spending more time and many more dollars than the State has ever spent, the U.S. Government through the Department of the Interior's Solicitor's Office, has had a battery of people working to find out which claims have merit on this very point, tax forfeiture. I suggest that there is no way of denying justice on that. This bill will not deny justice on that.

I offer this amendment as a clarifying amendment to make sure that in passing the bill we are not insulting our own integrity, or insulting justice, by causing a new round of injustice to occur. I hope the amendment could be accepted and I entrust to the good judgment of the proponents of the bill that they will review the amendment carefully to see whether or not it is wise to accept it.

AMENDMENT NO. 1416

(Purpose: To provide for the transfer of certain lands to the White Earth Reservation from the State of Minnesota in settlement of certain claims)

Mr. MELCHER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. MELCHER] proposes an amendment numbered 1416.

Mr. MELCHER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 44, delete lines 13 through 25 and insert in lieu thereof the following:

"(1) The State of Minnesota shall enter into an agreement with the Secretary providing for the transfer of that amount of land which is determined by the United States Department of Justice to have been acquired by the State of Minnesota within the current exterior boundaries of the White Earth Reservation of Chippewa Indians through tax forfeiture of any lands which fall within any of the transactions described in Sec. 4(a) and (b) as the State's contribution to the settlement provided for by this Act. The Secretary shall not enter into such an agreement until the Secretary determines, or the authorized governing body of the band certifies to the Secretary in writing, that the agreement will result in the transfer of such amount of land which possess reasonable value for the"

Mr. MELCHER. Mr. President, I think I have adequately described the amendment. If my friend from Minnesota has any questions on it, I would be delighted to answer them.

My amendment requires that the amount of land transferred by the State will correspond to the total amount of land acquired by the State through tax forfeiture.

There are many cases that support the vested property right of an allottee from tax exemption including:

Glacier County v. *United States*, 99 F. 2d 733, 734, (9th Cir. 1938); *United States* v. *Nez Perce County*, 95 F. 2d 232, 234-35 (9th Cir. 1938); *Board of Commissioners of Caddo County* v. *United States*, 87 F. 2d 55, 56 (10th Cir. 1936); *United States* v. *Benewah County*, 290 F. 2d 628, 631 (9th Cir. 1923); *Morrow* v. *United States*, 243 F. 2d 854, 855-56 (8th Cir. 1917); *United States* v. *Ferry County*, 39 F. Supp. 1008, 1012 (E.D. Wash. 1941); *United States* v. *Board of Commissioners of Pawnee County*, 13 F. Supp. 641, 642 (N.D.Okla. 1936); *United States* v. *Board of Commissioners of Comanche County*, 6 F. Supp. 401, 402, 403 (W.D.Okla. 1934); See also *Mahnomen County* v. *United States*, 319 U.S. 474, 476-77, 63 S.Ct. 1254, 87 L.Ed. 1527 (1943); *Kirkwood* v. *Arenas*, 243 F. 2d 863, 869 (9th Cir. 1957); *State* v. *Zay Zah*, 259 N.W. 2d 580, 584-85 (Minn 1977).

In the Zay Zah case, decided by the Minnesota Supreme Court, the court reasoned that since the land in question retained its immunity from taxation, despite the Clapp amendment, it also retained all of the aspects that go with the trust status of land, including the Indian's right not to have it made alienable without his consent. The court reasoned:

The vested right to be free from State taxation must derive from somewhere, and its only possible source was the trust patent itself. After all, it is the land which is exempt from property tax, not the individual who happens to own or possess the land at any given time. . . . If the Clapp amendment was ineffective to destroy the tax exemption during this period, it must also have been ineffective to destroy the legal source of that exemption, namely, the trusteeship established by the patent.

Thus, since the trust relationship remained intact, then any restrictions on alienation still stood. If it is unconstitutional to tax trust land without just compensation under the fifth amendment, then it is clearly unconstitutional to remove that land from trust without due process; that is, application by and consent of the Indian allottee. Thus, all of the land was restricted from alienation during the trust period and, if we are going to settle the claims in question, then the State of Minnesota should be required, at a minimum, to return an amount of lands that is equal to the amount acquired in violation of law.

Mr. President, I suspect I should add, to emphasize what I previously said, that the designated period of trust of allotments on the White Earth Reservation never expired because a succession of Executive orders and statutes extended trust periods on these allotted lands indeffinitely. Congress showed through the allotments—and it has been reaffirmed in numerous court cases—that these allotments were tax free until a fee patent was issued. And that simply did not occur. Fee patents were not issued. While the trust continues, an individual Indian's property interest in an allotment acquired by virtue of the Federal Government's declaration of trust includes the tax-exempt feature.

Mr. DURENBERGER. Mr. President, I rise in opposition to the amendment. My recollection of all the events leading up to the formulation of the original bill that I introduced, S. 885, which I have already referred to, in the previous Congress, and the succes-

sor bill, 1396 in this Congress, may fail me a little, but it is my distinct recollection that the figure 10,000, 10,000 acres to be provided to the tribe by the State of Minnesota, was a figure that was arrived by negotiation with the White Earth Band prior to the introduction of any legislation.

I indicated in my earlier statement that I did not intend my first bill to in effect memorialize an agreement among the parties but merely to stimulate the parties to arrive at a decision with which all could live. But it is my recollection that when we got to S. 1396, we in effect were in a position whereby then we were memoralizing, if that is the right word, an agreement, a compromise, as I indicated earlier, that had been worked out among all the parties involved. The agreement that the State of Minnesota would seek authorization from its legislature to convey title to 10,000 acres of land to the White Earth Band was part of that agreement, and the White Earth Band was part of that agreement as well.

So I find it a little difficult to even consider that it would be a compromise to add another 9,000 acres to an agreement which was entered into on behalf of the State of Minnesota by representatives of that State, other than myself, that had been pressed for by the Governor of the State; by the attorney general of the State, the chief law enforcement officer of the State; and agreed to by the Senate and the House of Representatives, the legislative body of that State.

The rationale of the amendment, even though I have listened carefully to the arguments of the Senator from Montana, still escapes me. I hate to characterize it as an effort to punish Minnesota for following the clear working of an act of Congress, but the effect of the amendment, if it were agreed to, would only be to upset a very delicate balance that this bill represents, and possibly kill the bill in its entirety.

Let me make a couple of things clear in this regard.

Local governments in Minnesota did not start taxing allotted land on their own or because of a State law. Land was taxed because the U.S. Congress said it was subject to taxation. The U.S. Congress, in the act of March 1, 1907 (34 Statutes, page 1034) stated with undeniable clarity:

> That all restrictions as to . . . taxation for allotments within the White Earth Reservation in the State of Minnesota, heretofore or hereafter held by adult mixed-blood Indians, *are hereby removed* * * *.

So the taxation of allotted land was undertaken pursuant to congressional authority.

My colleague from Montana implies that the State of Minnesota was wrong for taxing land, but I think he is wrong. The Senator from Montana is wrong in another respect. He likes to assume that if the category of tax-forfeited claims, which is about one-fifth of the total land in dispute, went to court, the Indian allottees or their heirs would surely win the land back. That, too, is not necessarily true.

Although the Department of the Interior now questions the validity of tax forfeitures resulting from that 1907 U.S. law which I just cited, the courts have not yet issued any final judgments on the legal theories involved. I am told that there are good arguments that many of the tax forfeitures may have been completely valid and constitutional.

I do not think that the attempt of the Senator from Montana to double the cost of settlement to the State of Minnesota is justified, either historically or legally, with regard to these kinds of disputes.

Mr. President, there is an even more important reason for rejecting this last-minute effort to grossly alter the terms of this legislation. S. 1396 is the product of more than 2 years of negotiation and compromise. A whole host of legal and practical factors have been delicately balanced in the bill as it now appears. Minnesota's contribution to this settlement has been debated, has been agreed upon, has been redebated, and has been passed, as I indicated earlier—by an act of the legislature—and has been termed fair, proper, and acceptable by representatives of the U.S. Department of the Interior, the Office of Management and Budget, the Senate Select Committee on Indian Affairs, and the House Interior Committee.

So the State of Minnesota already—on its own—has exhibited its good faith and passed legislation authorizing the transfer of 10,000 acres to the White Earth Band and the provision of $500,000 of technical assistance to the Department of the Interior as part of a settlement package. That State bill was passed more than 1½ years ago—and not without opposition as being too much; and the only opposition to it, I guess, was that it was too much, in light of the legalities of the claims, in light of the fact that the Federal Government's role was primary in the events which led to the land disputes.

Mr. President, this is a serious amendment. It is a crippling amendment, because the State legislation authorizing participation in the settlement expires on December 31 of this year. Because his amendment so drastically alters the compromise reached on the bill, it would kill it.

For that reason, on behalf of my colleague, the principal author of this bill, and myself, I must oppose the amendment of the distinguished Senator from Montana.

Mr. MELCHER. Mr. President, I am not going to prolong the debate on this much longer, because this is a very clear, easily understood amendment. It is subject to whatever the will of the Senate is, and that will determine the outcome of the amendment.

However, I must say this to my good friend from Minnesota: There is no compromise on this. There was no compromise worked out. Ten thousand acres was suggested to the tribe: "We are the State of Minnesota. We will give you 10,000 acres back." They said, "No."

It was not hard to think that would be much of a compromise. They never agreed to it. They rejected it outright.

The amendment seeks only to return that land that is found to have been acquired by the State of Minnesota unlawfully. The citizens of no State, in my judgment, want to create a situation to retain land once they have been advised that they have unlawfully denied somebody the right to their land. I do not think there is any such State out of the 50. I do not think Minnesota is that way, either.

It is for that reason that I suspect that the several public service groups in the State of Minnesota have recommended that the bill be defeated and that there be some way of negotiating a settlement that is not shameful.

This settlement does not extinguish the true, legitimate rights of some of the Indians and their heirs.

I think that was the intent of the League of Women Voters of Minnesota, when they passed their resolution in November and so advised us—I believe it was only yesterday or the day before. I was surprised that my friend from Minnesota did not seem to be aware of that resolution. I think that was the purpose of the Minnesota League of Women Voters in saying that the bill should not be passed, that it should be worked out, and that there should be some more just, proper way of handling this mess on White Earth and correcting it.

So in that vein I have offered this amendment regarding the State land because, of all the land that has shown up in someone else's ownership that had been Indian allottee land, that land which the State acquired by tax forfeiture clearly sticks out like a sore thumb. That should not have happened.

Congress has never stated in the Clapp amendment or any other act of Congress that you can take the Indian land and immediately start taxing. Apparently that was done. But, in order to do that, the trust responsibility would have to be extinguished. There is no indication on most of the land, now controlled by the State—I hesitate to say owned by the State, because I question how much of it is properly owned by the State—that titles simply were extinguished because the trust responsibility was not

extinguished and the Indians did not have fee patent. Therefore, the land could not be taxed unless the Indian voluntarily asked to be taxed, and there is no evidence of that either.

So until land is removed from trust and there is a fee patent issued, no tax liability can occur without the Indian expressly volunteering to pay State or local taxes.

On that basis, I offer this amendment to clarify and straighten out one of the serious flaws in the bill. I hope it can be accepted.

I suggest that we are probably not going to vote on this tonight. I am sure we are not going to vote on it tonight. I suggest to my two friends from Minnesota that they review this carefully.

What the State legislature said in providing 10,000 acres to be returned to the Indian allottees is not really the question. The question is how much of it should be returned to the Indian allottees and what should be the just compensation involved.

This would help the bill if it were adopted. Clearly, the State of Minnesota does not want to own land if it holds it unlawfully. The question of whether or not there are meritorious claims will not be resolved by anything in the bill. By adopting this amendment, you can push to conclusion those investigations and those determinations that are now taking place by the Interior Department solicitors on whether or not Indian claims are valid on the basis that the land was taken from them by tax forfeitures.

Madam President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Is there a sufficient second? There is not a sufficient second.

Mr. MELCHER. Madam President, I make a parliamentary inquiry. If we are through debating the bill up to this point is there a question of going into morning business until we can complete action on this bill later tomorrow?

The PRESIDING OFFICER. Is the Senator making that unanimous-consent request?

Mr. MELCHER. That should be my friend from Minnesota making that kind of request.

Perhaps I could clarify it with my friend from Minnesota. I have no desire to attempt to utilize all 4 hours that has been allotted for this bill. I am certainly not suggesting that we sit around here trying to use that up.

If the Senator is concerned about that, I think we can reach a very prompt agreement on when we can. We have already one vote ordered, I believe. Am I correct, Madam President? Have we one vote ordered for tomorrow by unanimous consent?

The PRESIDING OFFICER. No. The yeas and nays have not been ordered, I say to the Senator from Montana.

Mr. MELCHER. Madam President, I am inquiring if we have not by unanimous consent already agreed to a vote to occur sometime tomorrow.

The PRESIDING OFFICER. Yes, the Senator is correct.

Mr. MELCHER. In light of that, if my friend from Minnesota is concerned about just sitting here to use up time and has no urge on his own behalf to debate further or has no request for others coming to the floor to debate, I suggest that we yield back almost all of our time and let the vote on this occur tomorrow along with the other vote and get done with it.

Mr. DURENBERGER. Madam President, my colleague from Montana has certainly a good sense for my body language. Even though I cannot observe the outdoors, someone made the observation that we are no longer on daylight time.

Mr. MELCHER. That is right. It is too late to be.

Mr. DURENBERGER. If I understand my colleague from Montana correctly, we have already agreed that there would be a vote on tomorrow at a time yet to be agreed upon because of some problems involving at least the majority side on a motion that I made. And the Senator from Montana is now proposing that vote be followed in a unanimous-consent request by a vote on his amendment which I may well move to table, and so it was with the possible consent of the Senator from Montana that it might be a vote on my motion to table his amendment, and let me inquire of the Senator from Montana. Is it his thought then that with the exception of the 10 minutes reserved on each side for the vote on my original motion, he would be prepared to yield back all time on the bill, S. 1396, if we yield back all time on our side, and to go to final passage on that bill as a third element of the unanimous-consent request?

Mr. MELCHER. Madam President, will the Senator yield?

Mr. DURENBERGER. I will yield for the purpose of the Senator responding.

Mr. MELCHER. I respond to my friend from Minnesota. I think the concern he is expressing is if we are going to yield back time on the 4 hours that was allotted for this bill. My answer to that is yes. I have no desire to state more than I have already stated on this amendment, and I have no further amendments, I might say to my friend from Minnesota. This is all the amendments I expect to offer.

So I am prepared to yield back all but a very minimal amount of time just so we can have time to clearly state what the pending amendment is about prior to the vote and another short wrapup of the entire bill just prior to its passage.

I would suggest to my friend, if all of this works out that we are going to do this tomorrow, then perhaps I would like to renew my request to my two friends from Minnesota to be careful they review both amendments. They might find there is more merit than they so far have allowed in their remarks and might have some different ideas about the merits of the amendment tomorrow.

But, nevertheless, I very much want to make it clear that I have no desire to just have us sitting here this evening just to use up that time. I think we are in a position where the majority leader does not want any more votes to occur tonight, for reasons that are probably meritorious. I do not know what the reasons are, but if it were not for that, I would be ready for all the pending votes and final passage.

I only suggest that we yield back the time so that that still is not hanging out there, which seems to be of a concern to my friend from Minnesota.

Mr. DURENBERGER. Madam President, I would then suggest to my colleague—and I see the minority leader is also on the floor and we can draw on his expertise as well—that we might consider entering into a unanimous-consent agreement that we would turn to the consideration of this bill at 10:30 a.m. tomorrow; that there be 20 minutes equally divided on the motion to table the appeal of the decision of the Chair, which is the tabling motion I referred to earlier; that there be 10 minutes equally divided on what I believe is amendment numbered 1416, the amendment last submitted by the Senator from Montana; that there then be 20 minutes equally divided on final passage; and that the votes, if they are to occur, on the motion to table, on the disposition of amendment No. 1416, and on final passage, occur back to back. I suggest that as a possible unanimous-consent agreement.

The PRESIDING OFFICER. Is there any objection?

Mr. BYRD. Madam President, reserving the right to object, I would like to see this request in writing.

Mr. MELCHER. Madam President, also reserving the right to object, I only want to mention the farm bill conference is meeting. I would want to be able to be there at any crucial time. I do not know about 10:30. I would attempt to ascertain when that would permit me to be there. But I think the time suggested by my friend is probably a pretty good time. He might want to make it a little bit earlier, at 10 o'clock; I am not sure.

Mr. DURENBERGER. I would say to my colleague, I am informed by the representatives of the majority leader

that were he here he would indicate that it is not possible for the Senate to vote on tomorrow prior to 11:30, so that it would be his advice to us, in propounding this unanimous-consent agreement, that we consider the first of our votes under the agreement not occur prior to 11:30.

Mr. MELCHER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. COHEN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE GLENN AMENDMENT ON NUCLEAR TECHNOLOGY CERTIFICATION

Mr. COHEN. Madam President, I take the floor this evening to alert my colleagues about what is going on with respect to the appropriations conference right now. Several days ago, Senator GLENN offered an amendment to the continuing resolution that would do something that is very modest. It would require the President of the United States, with respect to the agreement for nuclear cooperation he had negotiated with the People's Republic of China, to certify to the Congress that IAEA standards or their equivalent would be met. That is something quite modest; it does not impose a serious burden upon the Chinese or upon the United States. Apparently, that reflected the sentiment of Members of this body; by a vote, as I recall, of some 59 to 28, an attempt to table Senator GLENN's amendment was defeated.

So, by a 2-to-1 margin, the Members of this body went on record in favor of the proposal of the Senator from Ohio.

Since that time, Mr. President, the phone lines have virtually been burning up in this town. The White House has been on the phone calling Members of the Senate and the House. Calls have been coming from Ambassador Kennedy from someplace across the globe. There is a full-court press underway right now to lobby the members of the Appropriations subconference and full conference with such intimidations as: "If the Glenn amendment is retained, that will spell the defeat and the doom of the nuclear pact that was negotiated"; or, "If the Glenn amendment stays on the continuing resolution, the President will veto the entire bill as a result of its inclusion"; or that "This will set relations with the Chinese back years"; that "The French will get the contracts." We now have a number of nuclear industrial contractors calling my office, and I assume Senator GLENN's office, at this time.

So the full-court press is on to try to persuade the members of the Appropriatons Committee to reject the vote that was taken so overwhelmingly in this body. They point to the fact that the House has no similar provision. Interesting. An interesting procedure occurred in the House of Representatives. They brought the Senate version to the House floor on a closed rule so no amendments were possible and now cite the fact that the House did not support the Glenn amendment. Of course; they were never allowed to consider it. So they have used every single device available to them to try to defeat a measure which, as I indicated at the beginning, is quite modest—not only quite modest, but quite important to the future of nuclear nonproliferation efforts throughout the world.

As I said the other day, I found it ironic, to say the least, that the same administration which went so public in condemning the policy of the People's Republic of China for dealing with their population explosion did not really concern itself too much with what that condemnation was going to do in terms of United States-China relations. They did not hesitate to condemn the Chinese publicly about their birth control proposals or programs. To me, that certainly was far more provocative and inflammatory than the amendment of the Senator from Ohio. And yet they have negotiated an agreement which is about as vague as anything that I have seen. I was concerned about this, as was Senator GLENN, during the course of a hearing before the Senate Governmental Affairs Committee's Subcommittee on Nuclear Proliferation I asked the Arms Control and Disarmament Agency exactly what sort of protections do we have. I will read the questions that I posed to Mr. Lewis Dunn, ACDA Assistant Director for Nuclear and Weapons Control:

Q. S.J. Res. 238, approving the U.S.-PRC Nuclear Cooperation Agreement, bars the licensing of any export to the PRC under the Agreement until the President certifies to the Congress that the reciprocal monitoring arrangements "have been designed to be effective in ensuring that (exports) shall be used solely for intended peaceful purposes."

What monitoring arrangements does ACDA consider to be required to "be effective in ensuring" that exports are used solely for their stated end use?

Do the Department of Defense and the various members of the intelligence community agree?

A. Article 8 of the Agreement for Cooperation with the People's Republic of China provides that the parties will establish bilateral mutually-acceptable arrangements for exchanges of information and visits to material, facilities, and components. At such time as the Agreement enters into force, the Executive Branch will begin the process of consulting with China on this matter. It is, therefore, premature to be specific about the details of these arrangements.

Madam President, it is premature to be specific about the details of these arrangements? What arrangements? All we have agreed to do is to talk about it sometime in the future. As Senator GLENN pointed out so clearly just the other day, the People's Republic of China did not hesitate to negotiate a bilateral agreement with Japan or Argentina and Brazil in which it accepts IAEA safeguards. It has agreed to the acceptable standards with those three countries. Somehow it has objected to meeting those standards with the United States. Our response has been, "Well, they are a nuclear power; therefore, we don't have to negotiate, we are not required to negotiate such safeguards. We do not have to do that because they are a nuclear power."

Well, there are degrees, I assume, of nuclear power. I suppose if someone constructs a nuclear bomb from their chemistry kit and literature they read, that makes them a nuclear power.

What we want to know is what in fact are the Chinese people going to be doing with the technology we are transferring, and are there sufficient safeguards that will preclude, or at least help prevent any transfer of that technology to other countries.

Now, up until very recently, P.R.C. was quite clear in terms of their policies. They were in favor of nuclear proliferation, particularly to Third World countries, absolutely in favor of it. I recognize that many of these comments came during the great Cultural Revolution and during the reign of Chairman Mao. But following Mao there still were policies and statements, up until almost a year ago, which indicated they still favored a policy of proliferation and did not want to see the nuclear club limited and made to exclusive. Since that time, they have moderated that position somewhat.

But I would suggest that members of the Appropriations Committee take a very careful look at some of the information that has been furnished to the Foreign Relations Committee, and hopefully to the House as well, regarding what the actual policies and programs have been of the P.R.C. It may be that they have in fact changed their way of thinking; that they intend to restrict the flow of this technology to other countries. If this international group has any meaning whatsoever and is dedicated to the nonproliferation of weapons, then it seems to me we are undercutting that agency by operating on a bilateral basis and agreeing with a power such as the Chinese that we can have something which is to be effective but apparently will be less effective than the IAEA standards.

That in turn raises another question. If, in fact, you can have something which is effective, but that does not measure up to the IAEA standards, then what we are saying is the IAEA standards are too high, that we do not need that level of protection. Therefore, those countries who have agreed to abide by that may come back and try to renegotiate.

I assume that South Africa and other countries might come in and say, "We don't need to meet those standards. You, yourself, have just entered into an agreement with the Chinese saying you have something that's effective, yet does not measure up to the IAEA standards."

I think we are setting a very dangerous precedent. It is an unnecessary one. We are going to negotiate sometime in the future—after this agreement becomes effective. All Senator GLENN is asking for is, as you negotiate what the standards are going to be, simply certify to us that either the Chinese have measured up to the IAEA standards or their equivalent. But do not come back with an agreement on monitoring arrangements that is something less than IAEA and say it is effective, because what you will have done is undermine the entire International Atomic Energy Agency and, I think, done a great discredit to our attempts to curb this threat of nuclear proliferation.

Madam President, I wanted our colleagues to be aware of what is happening. The halls are packed. The phone lines are jammed. Everybody is trying to persuade members of the Appropriations Committee that doom is going to follow if the Glenn amendment passes. It does very little, I might say, in terms of its total impact. It is fairly modest. It is not as stringent as the other three requirements that he would have insisted upon had the measure passed the Foreign Relations Committee as he had drafted it or had we had an opportunity to debate it on the floor of the Senate. So he has imposed very little burden upon the President of the United States, very little burden upon the Chinese people. But, rather than having something that is vague and ambiguous to be negotiated later, all we are looking for is a very simple statement and one that I think we have a moral obligation to insist upon.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, I followed the remarks of the distinguished Senator from Maine very carefully. He is right on target. I do not have the longest tenure in the Senate of the United States, but I have been here 11 years and only rarely in those 11 years have I seen what I term a real full court press on lobbying from the administration. Last night that included Ambassador Kennedy making calls from Brazil, included newspaper reports this morning of cables from our Ambassador in Beijing quoting the Chinese that if this amendment stayed in it was going to shoot this agreement down. It included meetings with an Assistant Secretary of State all over Capitol Hill today. And late this afternoon we were threatened directly with a White House veto of the continuing resolution if it includes this amendment with regard to China.

Mr. President, I can only conclude that there must be something secret they have agreed to which we do not know about yet. This is a very simple, straightforward amendment that strengthens what was passed in the Senate Foreign Relations Committee, strengthens what was passed in the House of Representatives. It is so simple and straightforward and right. It is what we have agreed to ourselves and what other nations that we do nuclear business with have also agreed to. It is what we agreed to with the Canadians a short time ago when they wanted to sell some nuclear equipment in this country. We agreed to IAEA safeguards. In the language of the amendment we ask for IAEA safeguards or their essential equivalent.

I can only conclude that there must be something secret that was negotiated out there that we are not aware of, because this amendment is so simple and straightforward. It does not require negotiations that are not already provided for in the agreement.

In my 11 years here, I have never seen so much nonsense and gobbledygook and misrepresentation about very small, straightforward, strengthening language for an agreement that has been negotiated.

When the agreement was sent up here, I thought there were four areas that needed strengthening. One dealt with verification of peaceful uses. That is the one we are dealing with now. The others were U.S. consent rights—in other words third party transfers, and so on—another was a statement of Chinese nonproliferation policies, which the distinguished Senator from Maine already mentioned and which I will refer to again in a few minutes. Also, they would agree that future U.S. export laws would apply.

I wanted to strengthen those four areas. I submitted a bill to that effect. The Senate Foreign Relations Committee took it, watered it down, redid it. I thought they made it much weaker.

But, in fashioning this amendment, I dropped three of those four areas and just concentrated on the one I thought had the greatest worldwide importance, because the world has become accustomed to IAEA safeguards as the norm for nuclear monitoring, so that material and equipment is not misused.

I submitted this to the Foreign Relations Committee, and they passed their resolution and it came to the floor. That is where we took on this process of adding to it in order to strengthen it a little so that we do not undercut the other 130 nations that have agreed to IAEA safeguards and use them.

Even the People's Republic of China has signed agreements with Argentina, Brazil, and Japan on which full IAEA safeguards are in place now. They agreed to it. It is nothing new.

The Japanese negotiated it, the Brazilians negotiated it, and the Argentines negotiated it, and our people say the Chinese were "adamant". Isn't that terrible?

Here is the language they came back with as to how they are going to deal with verification of peaceful uses:

> The parties will use diplomatic channels to establish mutually acceptable arrangements for exchanges of information and visits subject to this agreeemnt.

That very clearly states that the agreement requires that there be further negotiations. That is not finalized. We have not agreed that it is finalized. It says right there that we will have other arrangements for exchanges of information and visits.

What did we provide in our amendment? We provided one thing: We say that when those negotiations take place, all we ask is that the verfication norm we use for every other country in the world—which we have used with our close neighbor and good ally and friend, Canada—that IAEA safeguards or their equivalent be put in, instead of the language that was used in the Foreign Relations Committee, which simply says that we will make arrangements that will be "effective."

That is the word that is used. What is "effective?" "Effective" to the rest of the world means IAEA safeguards or their equivalency, and that is exactly what we have asked for. To do anything less than that means that we are treating China, which has been volatile in their foreign policy, which has had two changes in government and direction over the last 15 years, better than any of our closest allies.

Let me tell you about their nonproliferation policy, going clear back to 1963. This was Chinese policy as reported in the Peking Review, an official statement:

> Whether or not nuclear weapons help peace depends on who possesses them. It is detrimental to peace if they are in the hands of imperialist countries; it helps peace if they are in the hands of socialist countries. It must not be said indiscriminately that the danger of nuclear war increases along with the increase in nuclear powers. . . . Nuclear weapons in the possession of a socialist country are always a means of defense against nuclear blackmail

and nuclear war. So long as the imperialists refuse to ban nuclear weapons, the greater the number of socialist countries possessing them, the better the guarantee of world peace.

In other words, their policy was that they wanted to spread nuclear weapons to more countries as long as they were Communist nations, the socialist nations of the world. Then, in 1966, Zhou En Lai stated that the draft Nuclear Nonproliferation Treaty [NPT] was "a great conspiracy against all peace-loving countries and people."

In 1981, a Chinese delegate declared to the U.N. Commission on Disarmament that a comprehensive test ban "Can only tie the hands of those countries with weaker defense capabilities. . . ."

So that they have had a pro-proliferation stance. They wanted to spread nuclear weapons.

It was not until January of 1984 that they finally came out with this statement, made by Premier Zhad Ziyang:

. . . We by no means favor nuclear proliferation, nor do we engage in such proliferation by helping other countries to develop nuclear weapons.

That was the first time in Chinese history that they came out against the proliferation of nuclear weapons. But their behavior since then has raised some questions, and that is one of the motivations for our amendment.

This is so simple that I cannot understand the pressure being put on the conference committee.

I cannot figure out exactly why this has become such an important matter to the administration, when it is such a simple thing we are asking for: just that we put the same kinds of monitoring capability on the equipment or technology we will send that are used in all other nations with IAEA inspections and materials accounting practices. Nothing more than that whatsoever.

The distinguished Senator from Maine, who has worked with me long and hard on this, brought up several other matters.

Let me ask this question:

Why should we demand safeguards of the Chinese when they are already a weapon state and do not need our technology to make weapons?

The answer is that it is not true that our equipment and technology would not be useful in the Chinese weapons program. We will be sending electronic equipment and computer codes that will be useful to the People's Republic of China in modernizing their production reactors for making plutonium and for improving their nuclear sub reactors.

In addition, anyone who has followed developments in the international nonproliferation regime over the past decade knows how sensitive the question of discrimination between weapon states and nonweapon states over safeguards has become.

If we do not demand safeguards of the Chinese, then we are saying to India, Israel, South Africa, and others, "All you have to do is declare yourself a nuclear weapons state and we will be glad to send you nuclear equipment and technology without safeguards." We are saying to the other 130 nations: "Don't worry about it. We didn't mean we're going to be tough about this or we're going to provide leadership."

What we are saying is that when the going gets tough, we will give in. We will not even have the same safeguards Brazil and Argentina obtained from China, even though our technology is far beyond theirs.

We went through a difficult period with India a few years ago, and our relationship is still suffering, because of the misunderstandings about our nuclear agreement that occurred there.

Another question might be this: What if the People's Republic of China will not accept safeguards? Will we not be better off having influence over the Chinese nuclear program by trading with them if the agreement goes down the tubes?

That is the old, traditional argument, Mr. President. I think it has no validity.

The logical conclusion of this argument is that we should have no requirements for nuclear trade at all so we can just put this equipment, this technology out all over the world and influence everyone's policy by nuclear trade.

We did have a much looser policy on nuclear trade until the mid-1970's, and there was so much concern about this that we passed the Nuclear Non-Proliferation Act of 1978. That was basically my legislation.

We decided then while we were trying to scale down our nuclear weapons stockpiles with the Soviet Union it made common sense to try to prevent the spread of nuclear weapons to more countries around the world while we were trying to get contol of this problem that is already too big. So we took the lead in saying no, we will not just try and proliferate this technology and equipment around the world. What we will try to do is use government-to-government leadership. We will provide that kind of leadership and say to the rest of the world this is so important, it is more important than business as usual.

We have the lobbyists out all over Capitol Hill tonight for the nuclear industry. I can guarantee you that. They have been ringing my phone off the hook and the phones of dozens of other Senators that I talked to and Senator COHEN referred to that.

Mr. COHEN. The lights are out in my office.

Mr. GLENN. The lights are on, I can guarantee you, for the dollars.

Let me say this. I am not against this agreement. I favor trade with China. I favor nuclear trade with China. I said that right from the start.

I have been a friend of China all these years. I worked on our China relationship the entire time I was on the Foreign Relations Committee. I lived in China for 6 months at the end of World War II.

I give in to no one on my interest in China, and I want to see this agreement go through. But I want to see it go on the right basis.

I do not want to see our standards watered down in order to send nuclear equipment to China, that has had a history, rumors at least, of helping other countries to make nuclear weapons, and those statements have been made in this Chamber by some Senators here. I will not repeat those statements. The information I have on that was classified. I do not plan to either substantiate or deny what has been said before. But the rumors are out there. We know that they are more than rumors I'll go that far at least.

When other nations can negotiate with them and get safeguards in their agreement, and we come back and say we cannot, and put on a full court press, I am puzzled. I do not know whether this has gotten to be a matter of macho, perhaps because I brought it up, perhaps because Senator COHEN brought it up, because we made an issue out of this. We believe we are doing something important for the future security of the United States. But all at once they have gotten their heels dug in over there and they are opposing this for reasons which make no sense.

All it does is strengthen what passed the Senate of the United States in committee and on the floor and has now passed the House of Representatives.

All we say is that where they say "effective," we define effectiveness to be what the world says effectiveness is in this monitoring area, and that is basically the IAEA standards and procedures.

Yet the White House says that we are going to tear this thing apart, that that may result in a veto of the continuing resolution, that it is going to wreck our relationship with China.

I repeat, there must be something here that we are not being told, if it is going to wreck it, because the agreement already provides for talks to discuss what verification will be.

We are not asking that that be changed. We are just saying when the get to having the talks that they are going to have that the standard for effectiveness be what the rest of the world accepts.

Mr. COHEN. Mr. President, will the Senator yield?

Mr. GLENN. I yield.

Mr. COHEN. I wonder if the Senator has had a chance to see the item in today's Washington Post where it has a quote from the Foreign Ministry of China that says the modification by Senator GLENN raises unreasonable demands of the United States side to unilaterally change some substantial provisions of the pact and any unilateral-imposed additional provisions beyond the agreement are completely unacceptable.

We have to question; first, whether or not it raised unreasonable demands by the United States. According to the U.S. administration, they have not reached that position yet. They have not reached that point in time, because there have been no negotiations that we are aware of as to exactly what standards are going to be imposed. So for the Chinese Foreign Ministry to complain how we unilaterally have raised unreasonable demands really is a false issue because no demands have been made because they have not taken up negotiations yet.

Mr. GLENN. I do not know what the Chinese are being told, does the Senator?

Mr. COHEN. I do not know if they are being told what is in the Glenn amendment.

Mr. GLENN. I do not think they are, either.

Mr. COHEN. Mr. President, if I could just go further. The Senator touched upon the issue of misunderstandings with India and what that has done. I would simply point out that the Senator from Ohio and I worked on the matter with India as well. I think we were equally unsuccessful in what we were trying to do at that time and this led to misunderstanding.

I raised this issue with Mr. Adelman sometime ago when he came before our subcommittee and asked him what his experience was when there has been disagreement between two major countries over the interpretation of a treaty provision, or in this case, an agreement. Mr. Adelman, who certainly has had some experience with ACDA said: "My experience has been that they just talk about it forever until the accusing party decides to forget it. It has not been a happy experience."

And that is precisely the point. It has not been a happy experience when you have agreements that are left ambiguous, where each side might be free to interpret it according to its own wishes, and it results ultimately in a misunderstanding and the breach of the agreement. When it comes later it causes a much deeper anxiety and regret.

So I would say if there is going to be any misunderstanding, better to have it now, better to have the misunderstanding right now and to clarify it, rather than run the risk of undertaking this agreement. If, in fact, they are successful in shearing away the Glenn amendment from the continuing resolution, if they intimidate the conferees with these threats of veto or charges that it is going to jeopardize our entire relationship with China, that will not be the end of this matter. That will not be a silver bullet in the heart of the Glenn amendment, because it is going to come back. The Glenn amendment will come back in January. It will be introduced as separate and free standing legislation. It will be attached to any and every vehicle we can conceive of in order to finally define what sort of standards are going to be agreed to, because we do not want any misunderstandings. We do not want any misunderstandings a year from now or 2 years from now when the issue finally crystalizes and they say, "We are sorry; we have a different interpretation."

So I want to put everyone on notice that I am hoping that the conferees will not cave in to the White House and to the outside pressure. But if they do, this is not the end of the matter. It will be back in January, February, March, and April, and on into next year and the year thereafter.

Mr. GLENN. I can only say amen to what the distinguished Senator from Maine just said because this is not something that is going to go away. It is not that we dislike the Chinese. We want to work with them. We want to do it on the basis of solid trust. We want to do it on the basis of being able to verify what use is being made of American-supplied technology and equipment.

Mr. President, this is not something new for the State Department or for our Government. Back in 1982 a report by Bernard Gwertzman of the New York Times reported in an article on the front page. I read in part.

> State Department officials said that discussions on a possible agreement had been held privately with Chinese officials and have up to now been hampered by China's refusal to sign the treaty banning the proliferation of nuclear weapons or to join the International Atomic Energy Agency and abide by its safeguards. China already has nuclear weapons, but the Administration . . .

Listen to this—

> is insisting that China allow inspection to demonstrate that any help from the United States be used strictly for nuclear power.

That shows our State Department's own concern back there. They wanted safeguards then.

What happened? Who caved in? Who gave up on these demands? Japan, Brazil, and Argentina get full IAEA safeguards and we cannot even get the equivalency written into the bill from the Congress of the United States.

The administration is claiming all sorts of things about how this is going to dump arrangements, wreck nuclear cooperation with the People's Republic of China.

Mr. President, the Washington Post this morning had an editorial that discussed this issue. It is an editorial, and I will not read it all.

I ask unanimous consent that it be printed in the RECORD immediately following our remarks and our comments here by the distinguished Senator from Maine and myself because I think it puts it right on the head.

The PRESIDING OFFICER. Without objection it is so ordered.

(See Exhibit 1.)

Mr. GLENN. Mr. President, it says that we are committed to making sure that our technology and equipment does not get misused, and that is all that we have brought up on this.

The editorial also urges in the last paragraph to do exactly what the Senator from Maine has said.

I will quote it:

> It's a reasonable and conventional requirement. If it's not enacted with the continuing resolution, the Senate will need to return to it next year.

And I could not agree more.

I hope that our conferees are going to hang tough on this, are going to insist on this. We had a 59-to-28 vote here in the Senate of the United States on this matter. The Senate expressed its will on that and I do not think there is any doubt that it is in the best interest of our country. In fact, I think it is in the best interest of China, because it means that, once we have this in place, there can be no misunderstanding. We can go ahead knowing the Chinese are going to be cooperative with us in making certain our material or our technology or our equipment is not misused.

We are much more likely to cooperate on a free and open basis with China if we have that kind of a standard from which to start. We know that kind of effectiveness is guaranteed. And we are much more likely to expand this nuclear relationship to the greater benefit of China than we ever would if we do not have such an agreement.

So let me just recap again. This amendment should be adopted because it insures there will be adequate verification of peaceful uses for U.S. nuclear exports to China. We are using standards and methods recognized by more than 130 nations, both weapons states and nonweapons states. We do it with Canada. They asked for IAEA safeguards when we trade with Canada. We do the same thing with them and also Australia.

It does not require any new discussions with the Chinese. That is one of

the canards that has been bandied about today, that this requires us to open up the whole negotiating process again. Nothing could be further from the truth. The negotiating process is already provided for. All we are trying to do is set a standard when they get to those negotiations. And it is not an unacceptable standard. It is one that 130 other nations of this world accept.

Mr. COHEN. If the Senator will yield, what happens to the existing standards? If we come up with a different standards for China, what happens to the IAEA standard at that point?

Mr. GLENN. To answer the distinguished Senator's question, and it is a very good question, I think we will be sending a message to the entire world that the IAEA system is tougher than it needs to be. This is a step backward in United States support for the nonproliferation regime, and will be greeted with pleasure by counties like Libya, Iraq, South Africa, and Pakistan.

It means, that if countries really want to get nuclear cooperation from us, the best things they can do is make nuclear weapons and then we will give them more technology with even less safeguards than we have with them right now.

So opposition to the amendment does not make any sense at all. It undercuts what we have tried to do for the last 10 years or more under IAEA and under the nonfproliferation treaty. There is no reason for it, because all we are saying is, in this negotiation that the State Department has to go through anyway by their on agreement, we are just providing a standard for them. We think it strengthens the international nonproliferation regime and it asks nothing of the Chinese we are not already doing ourselves.

Senate Joint Resolution. 238 only requires that the arrangement be "effective," but it provides no definition of "effective," no standard of effectiveness. This amendment provides the standard. It is both reasonable and universally recognized. It is the worldwide standard.

Mr. COHEN. Mr. President, if I could interrupt the Senator. What, in the Senator's judgment, would happen if, after the negotiations were completed and the administration came back and said that this is the standard we have agreed will provide for the effective oversight and we, as members of Foreign Relations, Armed Services, Intelligence, or whatever committees, or the full body itself, say, "We don't think they measure up?" What do we do at that point, when we have the complete agreement and everybody is ready to go and it comes back to the Senate and we say, "We disagree with you. We don't think these are as effective as they are required to be and, therefore, we reject them"? What happens then?

Mr. GLENN. Mr. President, I say to my colleague, at that point we really would have a diplomatic crisis, because then we made an agreement, they had the facilities probably going into place at that time, and we are saying, "No, you just stop whatever it is you already started."

We are at the stage right now where we are setting those rules for the future. It is where we went wrong with India years ago. Let us not make that same mistake twice.

Will there be an adverse effect on United States-China relations? I do not think there will, because this agreement provides for additional negotiations on verification arrangements. All we do is say that IAEA safeguards, or their equivalent, must be made the mode of verification. China is a member of IAEA now. It does not mean their facilities are under safeguard. They have not yet declared which facilities will be under safeguards once they designate it. But they are members of IAEA. They are familiar with it.

If they want our technology, I think they have to agree to safeguards. Every other weapons state—the United States, United Kingdom, France, Union of Soviet Socialist Republics—has some of their peaceful nuclear facilities under safeguards. None of it is burdensome. We do it in our country. We have some of our facilities under IAEA safeguards. The least we can do is have them do the same thing.

Mr. COHEN. If the Senator will yield, I would just like to remind our colleagues that the Senate passed the Glenn amendment by a margin of 2 to 1; 2 to 1 in favor of this very modest provision. The House of Representatives did not have that opportunity to even consider either the Glenn amendment or a variation of the Glenn amendment. So they have no record of being either for or against this. But the Senate is on record 2 to 1 in favor. The House has not been given the opportunity to consider such an amendment.

I hope that our conferees will take that into account, that the House in no way expressed a dissent or disagreement with the Glenn amendment, but, rather, were precluded by their own rules and procedures from ever considering it.

So we have one House very strongly in favor and the other House not having considered it. I think it would be a great travesty if our conferees simply would cave in to the pressure being generated by the White House at this time.

Mr. GLENN. I could not agree with my colleagues more. He has had a long record of distinguished work in this area of nonproliferation, one of which the people of Maine should be proud of, and I know they are. We have worked together on a lot of these things. On this one, it seems so clear to me, unless there is something secret that none of us have been told here, unless there is something causing this full court press that we are not aware of, then it just is common sense that we put this minimal restriction on.

So I do not want to carry on at any more length tonight, except to ask the conferees, who are meeting this evening as we speak or will meet shortly, to ask them to consider the editorial that was in the Washington Post today.

I say to them, as my distinguished colleague from Maine has said already, that this is not an issue that is going to go away. If this is not put on now, I can assure you it is going to be on some legislation after the first of the year and may be repeated. It is going to be less advantageous as time goes by, because, as time goes by, it would probably be more disruptive than if it was passed now. It is time to require this minimum level of verification, through IAEA safeguards.

I repeat, once again, just to wrap up, this does not require new negotiations with the Chinese. I do not care what the State Department says; I do not care if Ambassador Kennedy calls back from Brazil warning people that to open this whole thing up again would be disastrous. It does not require new negotiations not already programmed. The agreement they signed provides for that.

It says, and I will quote it once more:

> The parties will use diplomatic channels to establish mutually acceptable arrangements for exchanges of information and visits subject to this agreement.

It is all prospective. That arrangement has to be made. All we are saying with this is:

> Please, when you negotiate, Mr. President, negotiate something that is at least equivalent to IAEA safeguards.

It is not going to wreck Chinese relations. All it does is say we are going to treat China the way every other nation of this world is treated in nuclear trade. We do not see why they should be made an exception when their track record is not that good in proliferation of nuclear weapons.

So, Mr. President, unless my distinguished colleague has more to say on this, I think we have pretty well laid out what the situation is. I hope the conferees from the House will not just stay locked in on this. I hope they would recede to the Senate position on this, because, to me, it just makes so much sense that we put the Chinese in the same position we do our other nuclear trading partners.

And that guarantees a very solid Chinese-American relationship for the future, and that is exactly what I want

to see. I want this to go through but on the proper basis.

EXHIBIT 1

WHETHER TO TRUST CHINA

In the Senate, uneasiness seems to be increasing over the nuclear agreement with China. The agreement is now in effect, and under it American manufacturers will be able to sell power reactors and related technology to the Chinese. In return the Chinese have pledged not to divert it to military uses or help any other country—Pakistan, for example—to build nuclear weapons. But the United States will have no reliable way of knowing how faithfully the Chinese abide by their commitment.

Sen. John Glenn of Ohio has brought up this uncomfortable reality several times recently, and each time a few more senators have joined him. This week they were a majority. On Monday he succeeded in attaching a brief and useful paragraph on this subject to Congress' end-of-session continuing resolution on federal spending. The Senate leadership tried to set the Glenn amendment aside but, when it came to the roll call, they lost by 28 votes to 59. The amendment probably won't survive in the final legislation, because the conference is going to try to throw out everything not strictly related to spending. But those 58 senators voting with Mr. Glenn represented a remarkably wide range of both parties from right to left, and they are right.

When the United States sells nuclear reactors to other countries, it insists on safeguards—the system of international inspections and materials accounting that is administered by the International Atomic Energy Agency. In the Chinese agreement, there is no reference to safeguards. The United States has settled there for substantially less rigorous assurances.

The administration argues that it considers the Chinese commitments to be dependable, and that they will tie China securely into the worldwide effort to prevent further proliferation of nuclear weapons. The Glenn amendment, according to the administration, would force renegotiation of the whole agreement and broadly damage relations with China. That is not a trivial case. China has often behaved badly in the past in regard to spreading nuclear technology around, and even its relatively loose promises to the United States representing important progress in arms control.

But, Sen. Glenn asks, does it make any sense to sell nuclear technology to China under less demanding rules than, say, to Japan? Why trust China more than our allies? He argues that this agreement will become a precedent for a general relaxation of the world's nuclear control standards, and he's right. The Glenn amendment would simply apply safeguards to any nuclear technology that the United States sends China. It's a reasonable and conventional requirement. If it's not enacted with the continuing resolution, the Senate will need to return to it next year.

Mr. GLENN. I yield the floor.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 1986

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the continuing resolution.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.J. Res. 476) making further continuing appropriations for fiscal year 1986.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. HATFIELD. Mr. President, we have reached a point in funding activities where we have to take additional action other than the continuing resolution which we are now currently operating under that expires at midnight tonight. I would like to make a brief report as to precisely where we are in the current continuing resolution that has been in conference since yesterday afternoon.

We have made excellent progress. We have tentatively approved 10 of the 13 appropriation bills. We have finished the work on foreign operations which will then be taken up at our next meeting, and we expect to complete the work on the military of the defense appropriations bill—by the way, this is the bill, the appropriation bill that we are in conference on wrapped into the continuing resolution. We expect to finish that tomorrow about this time.

We will also complete the Interior appropriation bill. Again, we are negotiating with the House the bill as reported by the Senate, and as reported and passed by the House.

I want to also report that we have been working with the White House representatives on each of these appropriation chapters in the continuing resolution beginning with agriculture, State-Justice-Commerce, foreign operations, transportation, Treasury-Post Office, HUD, energy-water, and we have in each case that we have approved reached the benchmark target figure that was in a document sent to the committee by the Director of OMB representing the President of the United States as to the figure that would be acceptable, and therefore would be signed into law.

In addition to the figures represented by these benchmarks, we had a so-called hit list of a number of language provisions in the continuing resolution, and project provisions which the White House indicated would be subject to further consideration before they would sign the continuing resolution. And as a consequence, we have been working along that parallel track between these matters of language and, as well, dollar benchmarks.

I am satisfied that we have progressed to the point where I feel very certain that we can complete the continuing resolution by Monday. As I say, the Defense Subcommittee expects to complete its work by tomorrow night—Friday night. The Interior expects to complete its work by later this evening. That would mean that the full committee would reconvene to consider the reports of these subcommittees as well as some continuing resolution issues which are over and above the committee bills that have been negotiated.

I assume that meeting will occur on Monday, hopefully early, but maybe not until early afternoon. I do not anticipate that it would take the full committee more than 2 to 3 hours at the most to resolve those issues, and then put the bill to conference perhaps later that night, or later that afternoon, and complete the continuing resolution and have assurance that the President will sign it once the committee reports are adopted by both the House and the Senate.

The House of Representatives now has sent to us, therefore, a shorttime extension to Monday at 6 p.m. The incentive, of course, and the prod, the leverage, whatever you want to call it, is there to complete therefore everything by 6 o'clock on Monday night. We may run over an hour or two, or we may do it even before 6 o'clock. But at least we now have before us an opportunity to bridge this gap that will start at midnight tonight. And I do not think any of us want to get into that situation of furloughing employees, or whatever. That is a potential if we do not take action on this short-term extension of the continuing resolution.

Mr. President, that is the report to the body from the appropriations conference on the continuing resolution, and as well which I have checked this matter with Senator STENNIS, the ranking member of the committee. Senator STENNIS has approved the extension incorporated in this resolution representing the minority of the committee, or the Democratic side of the committee. And I am therefore calling it up at this time for action by this body.

Mr. President, there have been some inquiries concerning the expiration of a number of taxes that concern Members of this body, a retirement tax, a tax relating to retirement, a tobacco tax, and one other that I cannot think of at the moment that people have inquired as to whether or not we should amend this by putting them on this bill. I communicated with the House leadership on this matter, and the House leadership has now drafted a resolution that is being discussed on the floor at this very moment incorporating those three taxes in a separate standing extension resolution.

So that for those who have made inquiry about whether we should try to amend this short-term resolution, the House has now taken the action on a parallel track. That will be over to us within one-half hour for us to act upon. Therefore, it will not be neces-

sary to amend the continuing resolution.

I am told the chairman of the House Ways and Means Committee, Mr. DAN ROSTENKOWSKI, had been asked concerning this question when the short-term continuing resolution was discussed over with the Democratic leadership in the House. He indicated it was his preference to handle this in a separate standing vehicle, and therefore, that matter will be taken care of in that way so we do not have to concern ourselves with amending the resolution before us.

I have informed the chairman of the Finance Committee of the Senate about this development, and I informed those parties who have inquired of me about whether they should seek to place an amendment on this resolution. So that they are aware this other vehicle is in process coming to us to handle those concerns.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oregon.

Mr. HATFIELD. Mr. President, I move the adoption of the continuing resolution.

The PRESIDING OFFICER. Are there further amendments? If not, the question is on the third reading of the continuing resolution.

The joint resolution (H.J. Res. 476) was ordered to a third reading, was read the third time, and passed.

Mr. HATFIELD. I move to reconsider the vote by which the resolution was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STATUS REPORT ON RECONCILIATION

Mr. DOMENICI. Mr. President, I want to give a sort of status report about the reconciliation subconferences. I understand that this morning, there appeared to be a rejuvenation of the spirit with reference to reconciliation and that this even got a little more concerted and maybe a little stronger by noon today. I was wondering, myself, why. We have tried on our side to tell the chairmen of these various subcommittees that it is very important that we get the reconciliation bill passed. Now it appears that there is a growing understanding of the significance of reconciliation, with the increase in economic prosperity, the upturn in the major economic indicators that started about 4 or 5 weeks ago. I understand that it is logical for many of the chairmen and ranking members who have received information on the economics to assume if the reconciliation bill is passed and signed by the President such that it causes savings consistent with those required in the budget resolution, it would indeed have a significant impact on whether or not we have to sequester $20 billion annualized come January 15.

Many of us thought the reconciliation bill would have no impact on that, that that was a sort of given. It turns out now that the economic indicators are good enough that the deficit might be reduced substantially and if we reduce it yet further with the reconciliation bill, we might not have to sequester the entire amount mandated by Gramm-Rudman and that, therefore, the social programs—programs on the nondefense side—would get hit less in that first sequester in January and defense would get hit less. If that occurs, it seems that almost everybody in Congress would think that is something we should try to accomplish.

Mr. President, I am merely reporting that I do not have exact numbers but for those who are questioning whether or not we should do reconciliation, there is a practical reason to do it. It seems now both the House and the Senate have said we will try to do it. I understand the House is going to stay in next week hoping we will finish on reconciliation. I am informed that it could indeed reduce the amount of sequestration on nondefense and defense programs required in January and February under the automatic provisions of Gramm-Rudman. I think that makes our efforts extremely worthwhile and I hope we will complete it.

I hope the staff and those who are concerned about reconciliation will inquire and that the chairmen and ranking members of these various subconferences, if they have questions, will confer and talk to us and others because I think it would have a significant impact on what happens to programs by way of automatic cuts in January if we can complete the reconciliation before we go out.

Mr. President, I yield the floor.

WHITE EARTH RESERVATION LAND SETTLEMENT ACT OF 1985

UNANIMOUS CONSENT AGREEMENT

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that following morning business tomorrow and not before 11:15 a.m., the Senate resume the consideration of S. 1396, the White Earth Indian bill, and that there be 20 minutes of debate on amendment No. 1415, to be equally divided between the Senator from Montana [Mr. MELCHER] and myself or our designees to permit debate on the Durenberger motion to table the Melcher motion to appeal the ruling of the Chair that the Melcher amendment No. 1415 was not germane.

I further ask unanimous consent that following the debate in relation to amendment No. 1415, there be 10 minutes of debate to be equally divided in the same fashion as described above on amendment 1416 and that at the conclusion or yielding back of time, the Senate proceed to a vote in relation to the Melcher amendment No. 1416 without any intervening action.

I also ask unanimous consent that there be 10 minutes of debate on the bill to be equally divided in the same fashion as described above, and that there be no other amendments in order with the exception of the above-mentioned amendments and the committee-reported substitute.

I further ask unanimous consent that there be 10 minutes of debate on any debatable motions, appeals, or points of order if such be submitted to the Senate, and that no motion to recommit be in order and the agreement be in the usual form.

Mr. BYRD. Mr. President, reserving the right to object.

Mr. BOSCHWITZ. Mr. President, I wish to amend the unanimous-consent request slightly where it stated, "I further ask unanimous consent that following the debate in relation to amendment No. 1415." At that point, I add the following three words, "and its disposition."

Mr. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TOBACCO EXCISE TAX AND CERTAIN OTHER TAXES

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of H.R. 3918, the tobacco excise tax.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3918) to extend until December 18, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provi-

sions, and borrowing authority under the railroad unemployment insurance program.

Mr. PACKWOOD. I ask unanimous consent that the bill be considered to have been read the first and second times and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

Are there amendments? If there be no amendments to be proposed, the question is on the third reading of the bill.

The bill (H.R. 3918) was read the third time and passed.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. PACKWOOD. Mr. President, I inquire of the minority leader if he is in a position to pass the following calendar items: Calendar No. 446, (H.R. 784); Calendar No. 470 (S.J. Res. 214); and Calendar No. 471 (S.J. Res. 215).

Mr. BYRD. Mr. President, I am pleased to inform the distinguished acting majority leader that all of the items are cleared on this side of the aisle for immediate consideration.

PANAMA CANAL COMMISSION AUTHORIZATION ACT, FISCAL YEAR 1986

The Senate proceeded to consider the bill (H.R. 1784) to authorize appropriations for fiscal year 1986 for the operation and maintenance of the Panama Canal, and for other purposes, which had been reported from the Committee on Armed Services, with an amendment:

On page 6, strike line 24, through and including line 4 on page 7, and insert the following:

Section 5 and Section 6 of the Act shall be effective as of October 1, 1985.

So as to make the bill read:

H.R. 1784

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Panama Canal Commission Authorization Act, Fiscal Year 1986".

SEC. 2. OPERATING EXPENSES.

There is authorized to be appropriated from the Panama Canal Commission Fund to the Panama Canal Commission (hereafter in this Act referred to as the "Commission") for the fiscal year beginning October 1, 1985, not more than $436,784,000, for necessary expenses of the Commission incurred under the Panama Canal Act of 1979 (Public Law 96-70; 22 U.S.C. 3601 et seq.), including expenses for—

(1) the hire of passanger motor vehicles and aircraft;

(2) the purchase of passenger motor vehicles as may be necessary for fiscal year 1986, the number and price of which may not exceed the amount provided in appropriation Acts; except that large heavy duty passenger sedans used to transport employees of the Commission across the Isthmus of Panama may be purchased for the fiscal year 1986 without regard to price limitations set forth in applicable regulations of any department or agency of the United States;

(3) official receptions and representation expenses, except that not more than $33,000 may be made available for such expenses, of which (A) not more than $8,000 may be made available for such expenses of the Supervisory Board of the Commission, and (B) not more than $25,000 may be made available for such expenses of the Administrator of the Commission;

(4) the procurement of expert and consultant services as provided in section 3109 of title 5, United States Code;

(5) a residence for the Administrator of the Commission;

(6) uniforms, or allowances therefore, as authorized by sections 5901 and 5902 of title 5, United States Code;

(7) disbursements by the Administrator of the Commission for employee recreation and community projects; and

(8) the operations of guide services.

SEC 3. CAPITAL OUTLAY.

Of any funds appropriated pursuant to section 2 of this Act, not more than $26,500,000 (which is authorized to remain available until expended) may be made available for the acquisition, construction, replacement, and improvement of facilities, structures, and equipment required by the Commission.

SEC. 4. AUTHORIZATION OF ADDITIONAL APPROPRIATIONS.

In addition to the amount authorized to be appropriated by section 2 of this Act, there are authorized to be appropriated to the Commission for the fiscal year 1986 such amounts as may be necessary for—

(1) increases in salary, pay, retirement, and other employee benefits provided by law;

(2) covering payments to Panama under paragraph 4(a) of article XIII of the Panama Canal Treaty of 1977, as provided by section 1341(a) of the Panama Canal Act of 1979 (22 U.S.C. 3751(a)); and

(3) increased costs for fuel.

SEC. 5. BENEFITS FOR CERTAIN EMPLOYEES.

(a) EDUCATIONAL TRAVEL BENEFITS.—Section 1207(b)(2) of the Panama Canal Act of 1979 (22 U.S.C. 3647(b)(2)) is amended by striking out "one round trip" and inserting in lieu thereof "two round trips".

(b) TRAVEL AND TRANSPORTATION EXPENSES.—

(1) EXPENSES ALLOWABLE.—Subchapter I of chapter 2 of title I of the Panama Canal Act of 1979 (22 U.S.C. 3641 et seq.) is amended by adding at the end thereof the following:

"TRAVEL AND TRANSPORTATION EXPENSES

"SEC. 1210. The Commission may pay the expenses of vacation leave travel for an employee of the Commission to whom section 1206 of this Act applies and for transportation of employee's family from the employee's post of duty in Panama to the place of the employee's actual residence at the time of appointment to the post of duty. The authorization of expenses under this section shall be in accordance with subchapter II of chapter 57 of title 5, United States Code, and the regulations issued under that subchapter, except that the Commission may prescribe required periods of service notwithstanding section 5722 of title 5, United States Code, and the regulations issued under subchapter II of chapter 57 of such title.".

(2) CLERICAL AMENDMENT.—The table of contents of the Panama Canal Act of 1979 is amended by inserting after the item relating to section 1209 the following:

"1210. Travel and transportation expenses.".

(c) USE OF APPROPRIATIONS FOR HEALTH CARE AND EDUCATIONAL SERVICES.—Section 1321(e) of the Panama Canal Act of 1979 (22 U.S.C. 3731(e)) is amended to read as follows:

"(e) The appropriations or funds of the Commission, or of any other department or agency of the United States conducting operations in the Republic of Panama, shall be available to defray the cost of—

"(1) health care services to elderly or disabled persons who were eligible to receive such services before the effective date of this Act, less amounts payable by such persons, and

(2) educational services provided by schools in the Republic of Panama, which are not operated by the United States, to employees of the Commission who are citizens of the United States and persons who were receiving such services at the expense of the Canal Zone Government before the effective date of this Act.".

SEC. 6. COMPENSATION FOR NON-GOVERNMENT BOARD MEMBERS.

Section 1102(b) of the Panama Canal Act of 1979 (22 U.S.C. 3612(b)) is amended in the last sentence by inserting immediately before the period at the end thereof the following: ", except that, in addition to such travel or transportation expenses, members of the Board who hold no other office with either the Government of the United States or the Republic of Panama for which they receive pay are authorized to be compensated at the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule under section 5332 of title 5, United States Code, for each day during which they are traveling to or from or attending meetings of the Board as provided in subsection (c) of this section".

SEC. 7. NOTIFICATION OF TRANSFER OF PROPERTY.

Section 1504(b) of the Panama Canal Act of 1979 (22 U.S.C. 3784(b)) is amended in the second sentence by striking out "At least 180 days before" and inserting in lieu thereof "Before".

SEC. 8. EFFECTIVE DATE.

Section 5 and Section 6 of the Act shall be effective as of October 1, 1985.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time. The bill was read the third time, and passed.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REAPPOINTMENT OF CARLISLE H. HUMELSINE TO THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

The joint resolution (S.J. Res. 214) to provide for the reappointment of Carlisle H. Humelsine as a citizen regent of the Board of Regents of the Smithsonian Institution, was considered, ordered to be engrossed for a third reading, read the third time and passed as follows:

S. J. RES. 214

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress, which will occur by the expiration of the term of Carlisle H. Humelsine of Virginia on March 13, 1986, be filled by the reappointment of the present incumbent. The appointment is for a term of six years and shall take effect on the day after the current term expires.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REAPPOINTMENT OF WILLIAM G. BOWEN TO THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

The joint resolution (S.J. Res. 215) to provide for the reappointment of William G. Bowen as a citizen regent of the Board of Regents of the Smithsonian Institution, was considered, ordered to be engrossed for a third reading, read the third time and passed; as follows:

S.J. RES. 215

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress, which will occur by the expiration of the term of William G. Bowen of New Jersey on March 13, 1986, be filled by the reappointment of the present incumbent. The appointment is for a term of six years and shall take effect on the day after the current term expires.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

KENTUCKY WILDERNESS ACT

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of H.R. 1627, the Kentucky wilderness bill, which was received from the House today.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be considered as having been read the first and second times. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 1627) to designate certain national forest system lands in the State of Kentucky for inclusion into the National Wilderness Preservation System, to release other forest lands for multiple use management, and for other purposes.

The Senate proceeded to consider the bill.

Mr. MCCONNELL Mr. President, I am pleased to join my distinguished colleague from Kentucky, Senator FORD, as an original cosponsor of S. 703, "The Kentucky Wilderness Act of 1985," which is being debated here on the floor today. The response this proposal has evoked within the Kentucky environmental community shows me that it is universally supported and environmentally sound and deserves favorable consideration by the Senate. I thank the distinguished majority and minority leaders for permitting such prompt action on this important legislation.

The so-called Clifty Wilderness bill would designate a 12,000-acre tract of the Daniel Boone National Forest as a wilderness area, which would ensure that this area would be preserved in its pristine state for generations to come. This bill also would bar future exploration for oil and gas, which makes considerable sense to me since a Bureau of Mines study has concluded that the Clifty area has practically no value whatsoever for mineral purposes. Conservation of our natural resources must be of the highest priority and legal constraints must be enacted which prevent abuse and misuse of wilderness resources.

This particular legislation accomplishes a number of worthy objectives. For example, protection of wildlife and the natural watershed of the area will be maintained through a comprehensive long-term plan. Even more significant, tourists will be able to enjoy this Kentucky treasure free from the distraction of road construction, logging, and oil and gas exploration. The Clifty Wilderness bill also provides an important glimpse of Kentucky's natural heritage before man's intervention.

This bill is supported by a number of groups, including the Kentucky Wilderness Society, the Sierra Club, Audubon Society, the Kentucky Conservation Committee, Elkhorn Paddlers, Appalachia-Science in the Public Interest and the Tennessee Citizens for Wilderness Planning. Many of these groups testified in support of this measure in a Senate Agriculture Committee hearing that I chaired on November 13 of this year. Environmental advocates have sought wilderness designation for the Clifty area for years and I am delighted that we are close to enacting this landmark legislation for Kentucky's natural resources.

I urge my colleagues to support this very important measure.

Mr. FORD. Mr. President, H.R. 1627 which cleared the House of Representatives on December 9 is consistent with the language of S. 703, a bill I introduced on March 20 of this year.

The Kentucky Wilderness Act, which the bill is called, will extend wilderness protection to some 13,300 acres in the Clifty Creek Area of Kentucky's Red River Gorge. The Red River Gorge Area is cherished by nature lovers in Kentucky and throughout the region. The Red River Gorge Area has become an extremely popular area, if not overly popular. The Clifty Creek Area is the only major section of the area which remains in its natural state. Passage of this act will add an additional component to the Red River Gorge and will increase its value as a scientific, cultural, recreational, and economic resource for the area.

I know of no serious, or organized opposition to this bill. It is gratifying to be able to speak in support of legislation which enjoys such broad support.

The USDA supports enactment of this legislation, as does the Governor of Kentucky, Martha Layne Collins. H.R. 1627 was supported by Congressmen CHRIS PERKINS, ROMANO MAZZOLI, LARRY HOPKINS, WILLIAM NATCHER, and CARROLL HUBBARD.

The Cumberland Chapter of the Sierra Club supports this measure, as does the Kentucky Wilderness Coalition, the Wilderness Society, the Kentucky Conservation Council, the Kentucky Audubon Council, and the Kentucky Forest Industries Association.

All too often, we in Congress are caught up on an atmosphere that seems as if we are perpetually putting out fires, turning from one crisis to another. It is unfortunate that the nature of our business runs to that extreme.

Passage of the Clifty Wilderness bill happens to be one of those provisions that is all too often overlooked because of the nature of our business. I think that it is important that we take the time to reflect on the long-term significance of what this bill will do.

From the very beginning of this Nation, wilderness has always been a part of the American culture and heritage. Wilderness has deep symbolic and spiritual value; a place where people can go, a place one can go to relive the past, or escape temporarily from the hustle and bustle of every day life or simply to enjoy the abundance of nature.

Passage of S. 703, the Clifty Wilderness bill will ensure that approximately 12,000 acres of the 673,000-acre Daniel Boone National Forest is set

aside, in its natural state. The area will be protected and preserved by law. The important point here is that while the area today is protected and, in fact, enjoyed by large groups of visitors, this bill will guarantee that it remain in its natural state for generations to come.

The Clifty area contains a high concentration of prehistoric sites which offer a unique opportunity for the study of the prehistoric cultures of the Eastern United States. The rock shelters of the area have been used by humans for protection from the elements for thousands of years. These rock shelters provide a dry, protected climate which has preserved many normally perishable artifacts such as seeds, nuts, textiles and leather tools. Such conditions are found in few other locations in the East. Archaeologists have documented evidence of prehistoric occupation of the gorge dating back to approximately 8000 B.C. This timespan covers three of the four traditons that make up the usual chronology for North American Prehistory, the Archaic, Woodland, and Fort Ancient cultures.

The unique vegatative community in Clifty also provides opoprtunity to study rare examples of the old growth mixed with forestrail plant life that escaped the ravages of the early timber industry. The orientation of the land forms as well as the protected microenvironments found in the Northern valleys of Clifty have allowed the establishment and protection of some species normally associated with the extreme Southern region of the country. The successive advances and retreats of the continental glaciers caused northern species to "Migrate" into the area, and today some remain in selected sites. As many as 550 different plant species representing 100 families and 304 generations, including several rate species have been identified in the Clifty area. More recently, indications are that the floral community may include up to 750 species of flowering plants, along with 170 mosses, about 70 varieties of watermosses and 2,000 to 3,000 fungi.

When Lyndon Johnson signed the Wilderness Act on September 3, 1964, the United States became the first Nation ever to set up a system for the recognition and preservation of its scenic natural resources. I am proud of the uniqueness of the wilderness preservation systen in this Nation.

The U.S. Department of Agriculture has recommended, after its second extensive Roadless Area Review and Evaluation, known as RARE II, that this area be designated as wilderness. The roadless area studies under RARE I and RARE II represent a complete and thorough analysis of the need for this wilderness designation. However, the Clifty area is currently in a state of limbo, with its future undecided. The local residents and the communities affected deserve to have this issue resolved.

The favorable consideration by the Senate on the Clifty Wilderness bill will finalize an important piece of legislation which should have been passed long ago.

Mr. HELMS. Mr. President, I will not object to the passage of the Kentucky wilderness bill. However, I do want to clarify one point in the bill.

There are two references in the bill to the exemption from release language, of an area left in further planning. I have been told by the Senators from Kentucky that it is not their intention to create a new management category of further planning, but to simply allow the management of this area to continue in their present state, until the Forest Service has had an opportunity to finalize and implement their recommendations for this area under the land management plan.

My point is, that the approval of this measure does not constitute a precedent for the establishment of further planning areas as a new category of land management practice in the National Forest System.

Mr. FORD. Mr. President, the Senator from North Carolina is correct. There is one area that remained in further planning at the conclusion of the RARE II study. That area is named "Troublesome." The plan is for this area to be transferred to the Corps of Engineers, and then to the Park Service. We were concerned that a congressional recommendation to release this tract for multiple use management might jeopardize the future consideration of this area for wilderness by the Park Service.

Mr. HELMS. Mr. President, I want to thank the distinguished Senators from Kentucky for their understanding in this matter. It was my intention to have the Committee on Agriculture, Nutrition, and Forestry consider the Kentucky wilderness bill this year, however, the committee has been spending all of its time on the farm bill.

Senator MCCONNELL, who is a member of the Committee on Agriculture, Nutrition, and Forestry, did conduct hearings on the bill, and there appear to be no substantive problems with the bill, other than the further planning matter that we have discussed.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 1627) was ordered to a third reading, was read the third time, and passed.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORITY OF THE SUPREME COURT POLICE

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate turn to H.R. 3914 dealing with the Supreme Court police, which was received from the House today.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The bill will be considered as having been read the first and second times, and the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3914) to preserve the authority of the Supreme Court police to provide protective services for Justices and Court personnel.

The Senate proceeded to consider the bill.

AMENDMENT NO. 1417

Mr. PACKWOOD. Mr. President, I send to the desk an amendment in the nature of a substitute on behalf of Senator THURMOND.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oregon [Mr. PACKWOOD], for Mr. THURMOND, proposes an amendment numbered 1417.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

That the Act entitled "An Act relating to the policing of the building and grounds of the Supreme Court of the United States", as approved August 18, 1949 (40 U.S.C. § 13f), section 9(c) of such Act as added by the Act of December 29, 1982 (Public Law 97-390; 96 Stat. 1958), is amended to read as follows:

"(c) The authority created under subsection (a)(2) shall expire one year after the date of enactment of this subsection.

"The Marshal of the Supreme Court shall report annually to the Congress on March 1 regarding the administrative cost of carrying out his duties under such subsection. Duties under subsection (a)(2)(A) of this section with respect to an official guest of the Supreme Court in any part of the United States (other than the District of Columbia, Maryland, and Virginia) shall be authorized in writing by the Chief Justice of the United States or an Associate Justice of the Supreme Court, if such duties require the carrying of firearms under subsection (a)(5) of this section."

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the amendment in the nature of a substitute.

The amendment (No. 1417) was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 3914, as amended) was passed.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REENROLLMENT OF H.R 3003

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate turn to House Concurrent Resolution 247 regarding the enrollment of H.R. 3003.

The PRESIDING OFFICER. Without objection, it is so ordered. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (H. Con. Res. 247) requesting the President to return the enrolled bill (H.R. 3003) relating to the conveyance of certain land located in the State of Maryland to the Maryland National Capital Park and Planning Commission, and providing for its reenrollment with technical corrections.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (H. Con. Res. 247) was agreed to.

The PRESIDING OFFICER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay the motion to reconsider on the table.

The motion to lay on the table was agreed to.

COMMENDING THE GOVERNMENT OF IRELAND AND THE GOVERNMENT OF THE UNITED KINGDOM

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 477, Senate Concurrent Resolution 93.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 93) commending the Government of Ireland and the Government of the United Kingdom for reaching agreement on measures which will lay the foundation for a just, durable, and peaceful solution to the problems of Northern Ireland.

The text of the concurrent resolution is as follows:

S. CON. RES. 93

Whereas all peace-loving people desire a just and lasting solution to the problems of Northern Ireland;

Whereas violence and terrorism in Northern Ireland and all those who support it should be strongly condemned, and the effort to achieve peace and reconciliation through political means should be supported;

Whereas the report of the New Ireland Forum of May 2, 1984, which condemned violence and those who support it, made an important contribution to the Anglo-Irish negotiations over the past year;

Whereas the Prime Ministers of Ireland and the United Kingdom signed an agreement in Hillsborough, Northern Ireland, on November 15, 1985, which provides a basis for progress towards peace, stability, and an end to violence in Northern Ireland;

Whereas this agreement provides for an unprecedented role for the Government of Ireland in relation to Northern Ireland;

Whereas this agreement affirms that any change in the status of Northern Ireland would only come about with the consent of the majority of the people of Northern Ireland;

Whereas this agreement declares that, if in the future a majority of the people of Northern Ireland clearly wish for and formally consent to the establishment of a united Ireland, the Governments of Ireland and the United Kingdom will introduce and support in the respective Parliaments legislation to give effect to that wish;

Whereas the agreement envisages the possibility of securing international support to promote the economic and social development of those areas of both parts of Ireland which have suffered most severely from the consequences of violence of recent years;

Whereas the Parliaments of Ireland and the United Kingdom have given their solemn and respectful approval to this historic agreement;

Whereas on August 30, 1977, President Carter stated that in the event of a peaceful settlement in Northern Ireland, "the U.S. Government would be prepared to join with others to see how additional job-creating investment could be encouraged to the benefit of all the people in Northern Ireland";

Whereas on November 15, 1985, President Reagan stated that "I will be working closely with the Congress in a bipartisan effort to find tangible ways for the United States to lend practical support to this important agreement"; and

Whereas this agreement should be supported by all those who seek peace, stability, and an end to violence in Northern Ireland and the reconciliation of the two major traditions in Ireland: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That (a) the Congress commends the Government of Ireland and the Government of the United Kingdom for their achievement in reaching an agreement which charts a way towards peace, stability, and an end to violence in Northern Ireland.

(b) The Congress declares its willingness to work with the President in supporting the Anglo-Irish agreement through appropriate United States assistance, including economic and financial support, to promote the economic and social development of those areas of both parts of Ireland which have suffered most severely from the consequences of the violence of recent years.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President.

Mr. LUGAR. Mr. President, I wish to express my support for House Concurrent Resolution 239 commending the Government of Ireland and the Government of the United Kingdom for their achievement in reaching an agreement on measures which we hope will lay the foundation for a just, durable, and peaceful solution to the problems in Northern Ireland. The Committee on Foreign Relations of the Senate reported out a similar resolution on December 10, 1985, which I introduced on behalf of myself and Senators DOLE, PELL, KENNEDY, MOYNIHAN, KERRY, and BIDEN.

The Prime Minister of Ireland and the Prime Minister of the United Kingdom signed an agreement on November 15, 1985, which provides the basis for progress toward peace, stability, and an end to violence in Northern Ireland. The Parliaments of Ireland and the United Kingdom have subsequently given their approval to this historic agreement. The United States has consistently condemned all forms of violence and terrorism in Northern Ireland. At the same time, successive Presidents have pledged American support for efforts to bring about a just and lasting solution to the problems afflicting Northern Ireland. In response to the conclusion of the Anglo-Irish Agreement of November 15, 1985, President Reagan stated that "I will be working closely with the Congress in a bipartisan effort to find tangible ways for the United States to lend practical support to this important agreement."

Mr. President, this resolution expresses congressional support for the Anglo-Irish Agreement of November 15, 1985, which charts a way toward peace and stability, and an end to violence in Northern Ireland, and declares the willingness of the Congress to work with the President in supporting this agreement through appropriate forms of assistance in order to promote the economic and social development of those areas of Ireland which have suffered most severely from the consequences of the violence in recent years.

Mr. President, it is my hope that Members of the Senate will join in this expression of support for the Anglo-Irish Agreement and in a commitment to make a positive contribution toward the implementation of this historic accord.

This expression of congressional willingness to be supportive of the peace effort in Northern Ireland should not be construed as a formal commitment to authorize specific

forms or amounts of assistance. Such decisions regarding assistance may be taken next year on the merits of any request presented by the administration. At a time of congressional action on the Gramm-Rudman-Hollings amendment as well as continuing efforts to reduce the deficit, our contribution to the reconstruction of Northern Ireland may be seen by some as symbolic and certainly cannot substitute for the efforts of the governments and peoples of the Republic of Ireland and the United Kingdom.

Mr. PELL. Mr. President, on November 15 the Governments of Ireland and the United Kingdom, culminating months of Anglo-Irish negotiations, entered into an agreement of potentially historic consequence concerning the future of Northern Ireland. Signed at Hillsborough in Northern Ireland, the agreement represents an enlightened statesmanship on the part of both London and Belfast.

Perhaps the most significant provision was Prime Minister Thatcher's agreement to allow the Government of Ireland a formal consultative role on questions pertaining to the peace and future of Northern Ireland. But Prime Minister Fitzgerald also contributed profoundly, by acceding to the principle that any change in the status of Northern Ireland shall come about only with the consent of the majority of its people.

The purpose of the resolution before us, which has already passed the House, is to commend the two governments for their achievement and to express the disposition of Congress to work with the President in supporting the new Anglo-Irish agreement through appropriate United States assistance to promote economic and social development in those areas of Northern Ireland and the Republic of Ireland which have suffered most severely from the violence of recent years. Such an American posture was expressed by President Carter in 1977 and again by President Reagan last month.

Our action today will demonstrate that Congress stands squarely behind a policy of promoting a brighter future for Northern Ireland through the peaceful means of economic progress and a reliance on democratic institutions.

At the same time, I fully concur with the sentiments expressed by the chairman of the Committee on Foreign Relations with regard to the role of the Congress in supporting the peace effort in Northern Ireland.

Mr. KENNEDY. Mr. President, I support the resolution before us commending the historic agreement signed by the Prime Ministers of Ireland and Great Britain on November 15, 1985. The House voted last Monday by an overwhelming margin of 380 to 1 to approve an identical resolution and it is my hope that the Senate will act promptly to pass this important measure by an equally overwhelming endorsement.

All of us hope that this agreement will come to represent a turning of the tide in Northern Ireland—a turning away from violence and terrorism and toward a peaceful and permanent settlement of the tragic conflict that has wracked the province for so long. The new agreement is faithful to the far-reaching principles set forth in the report of the "New Ireland Forum" in 1984; it lays the foundation for reconciliation not only between the nationalist and unionist traditions in Northern Ireland, but among all the peoples of Ireland. I am particularly encouraged by the British Government's acceptance of an unprecedented official role for the Irish Government in the day-to-day affairs of Northern Ireland.

The resolution before us commends these much needed and long overdue steps toward ending the crisis in Northern Ireland. It reaffirms our unequivocal condemnation of violence, and of all those who support it, as a means of achieving political goals.

The resolution also affirms, in one of its most important provisions, the willingness of Congress to support the Anglo-Irish agreement through appropriate assistance—economic and financial. Americans of every religious and political persuasion have expressed their concern over the continued bloodshed in Northern Ireland. We have repeatedly condemned all those—in our own country and in other lands—who provide support by word or deed to those engaged in violence. Now at last, our country has a positive and constructive role to play in aiding those on all sides who seek peace and reconciliation among all the peoples of Ireland.

As long ago as 1977, President Carter stated that the United States stands ready to encourage investment in Northern Ireland once a settlement is achieved. And last month, on the day the new agreement was signed, President Reagan expressed his willingness to cooperate with Congress in a bipartisan effort to provide support.

It is my hope that Congress and the administration will work closely and quickly with the Irish and British Governments to provide substantial assistance to facilitate the cause of peace and economic recovery in both parts of Ireland scarred by the tragic violence of the past two decades.

I urge support for this resolution now, as a vote of confidence in this historic Anglo-Irish Agreement; and I look forward to working with my colleagues to fashion a constructive aid package early in the next session of the Congress, in order that we may do our best in the United States to maximize the possibilities for the success of this new beginning.

COMMENDING THE GOVERNMENT OF IRELAND AND THE GOVERNMENT OF THE UNITED KINGDOM

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 478, House Concurrent Resolution 239, the House companion bill reported by the Foreign Relations Committee today.

The PRESIDING OFFICER. The concurrent resolution will be read by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 239) commending the Government of Ireland and the Government of the United Kingdom for reaching agreement on measures which will lay the foundation for a just durable, and peaceful solution to the problems of Northern Ireland.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 239) was agreed to.

The preamble was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that Senate Concurrent Resolution 93, a resolution commending the Governments of Ireland and the United Kindom, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONDOLENCES TO THE GOLDWATER FAMILY

Mr. PACKWOOD. Mr. President, I send to the desk a resolution with reference to the extension of condolences to the Goldwater family and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 273) expressing condolences to the Goldwater Family.

Whereas, Peggy Goldwater was the much loved and trusted partner of Barry Goldwater for 51 years; and

Whereas, as a leading light in the Republican party, the support and encouragement of her husband was essential to the pursuit of his public career; and

Whereas, she made significant public service contributions of her own, through volunteer work; and

Whereas, as a devoted wife, mother and grandmother she personified the very best in American life; and

Whereas, the legacy she left not only her family, but the nation will endure for years to come;

Be it resolved, that the Senate expresses its most sincere condolences to Barry Goldwater and the entire Goldwater family.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

The preamble was agreed to.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the names of all Senators be added as cosponsors of the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

DAIRY PRICE SUPPORT EXTENSION

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of H.R. 3919, dairy price supports.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3919) to extend temporarily the dairy price support program and certain food stamp program provisions, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3919) was ordered to a third reading, was read the third time, and passed.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE PLIGHT OF SOVIET JEWS

Mr. PELL. Mr. President, on Friday, December 13, the Rhode Island Women's Plea for Soviet Jewry will dedicate its Shabbat to recognizing the plight of Soviet Jews. Faced at every turn by discrimination and the denial of basic freedoms, Soviet Jews have been openly cheated of the human rights recognized under international law and granted them by the Soviet Union's status as a signatory of the Helsinki Final Act and a party to the United Nations Charter. I join the Women's Plea for Soviet Jewry in protesting this denial of human rights and the Soviet Union's blatant disregard of its commitments in the human rights area. In my view, there can be no better time to voice this protest than this week of Chanukah, the Jewish festival of freedom.

Evidence in recent years has pointed to an increase in the amount of discrimination experienced by Soviet Jews, especially in the areas of education and employment. Since 1980, the Soviet Government has stepped up its campaign against Jews who exercise their right of religious worship and who participate in Jewish self-study groups. Jews who have attempted to organize unofficial Jewish religious study groups have been subjected to threats of arrests, harassment, house searches, surveillance, and other forms of intimidation. This treatment is akin to that received by Jewish activists in the dissident, human rights and emigration movements—men and women such as Anatoly Shcharansky, Iosif Begun, and Ida Nudel, to name only a few, who have endured unjust and inhumane treatment to secure human rights for themselves and their fellow citizens. In an effort to escape the anti-Semitic policies and practices of the Soviet Government, many Soviet Jews have turned to emigration as a means of self-preservation. But emigration is no longer a solution. In fact, Soviet Jewish emigration is in a steadily worsening state of crisis.

In 1979, a record 51,320 Jews were allowed to leave the Soviet Union. Since that time, however, the annual rate of Jewish emigration has fallen by staggering amounts: 21,471 in 1980; 9,447 in 1981; 2,688 in 1982; 1,314 in 1983; and finally a paltry 896 in 1984. In fact, the total number of Jews permitted to leave in the 6 years since 1979, 36,920, falls almost 15,000 short of the 1979 level alone. Based on the average monthly figure for the first 11 months, this year's total will be 1,104. This is certainly a far cry from the 50,000-plus of 6 years ago, especially in light of the 3 million Jews who remain in the Soviet Union, their lots in life declining in marked congruence with their emigration levels.

The frustration and despair of not being able to obtain an exit permit are compounded by the treatment which Soviet Jews receive after applying to emigrate. Many are removed from their jobs, evicted from their apartments, and subjected to constant harassment by the authorities.

Soviet Jews are crying out for our help. In the past, we have seen that the Soviet Union does respond to pressure of public opinion from the West. Once again, we must bring that pressure to bear on behalf of Soviet Jews and others who are denied basic rights and freedoms.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which was referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE RECEIVED DURING THE RECESS

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on December 11, 1985, during the recess of the Senate, received a message from the House of Representatives announcing that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the amendments of the House to the amendments of the Senate to the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker had signed the following enrolled joint resolution.

H.J. Res. 372. Joint resolution increasing the statutory limit on the public debt.

Under the authority of the order of the Senate of January 3, 1985, the enrolled joint resolution was signed on December 11, 1985, during the recess of the Senate, by the President pro tempore (Mr. THURMOND).

MESSAGES FROM THE HOUSE

At 9:05 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2391. An act to authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center;

H.R. 2403. An act to require that public buildings constructed or altered under the Public Buildings Act of 1959 comply, to the maximum extent feasible, with nationally recognized model codes and with local zoning laws and certain other laws;

H.R. 2542. An act designating the building located at 125 South State Street, Salt Lake City, UT, as the "Wallace F. Bennett Federal Building";

H.R. 2903. An act to designate the Federal Building and U.S. Post Office located in Philadelphia, PA, as the "Robert N.C. Nix,

Sr., Federal Building and United States Post Office"; and

H.R. 2962. An act to remove certain restrictions on the availability of office space for former Speakers of the House.

The message also announced that the House agrees to the amendment of the Senate to the preamble of the joint resolution (H.J. Res. 187) to approve the "Compact of Free Association," and for other purposes, and that the House agrees to the amendment of the Senate to the text of the joint resolution, with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 247. Concurrent resolution requesting the President to return the enrolled bill (H.R. 3003) relating to the conveyance of certain land located in the State of Maryland to the Maryland National Capital Park and Planning Commission and providing for its reenrollment with technical corrections.

At 2:29 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolutions, without amendment:

S.J. Res. 32. Joint resolution to authorize and request the President to designate September 21, 1986, as "Ethnic American Day"; and

S.J. Res. 213. Joint resolution to designate January 19 through January 25, 1986, "National Jaycee Week."

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 69. Concurrent resolution to recognize the National Camp Fire Organization for 75 years of service.

The message further announced that the House has passed the following bill and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 3914. An act to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel;

H.J. Res. 409. Joint resolution to direct the President to issue a proclamation designating February 16, 1986, as "Lithuanian Independence Day"; and

H.J. Res. 436. Joint resolution to designate 1986 as "Save for the U.S.A. Year," and for other purposes.

At 5:25 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 476. Joint resolution making further continuing appropriations for fiscal year 1986.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

S. 947. An act to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 7:02 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 80. Concurrent resolution to authorize the printing of 2,000 additional copies of the committee print of the Committee on Armed Services (99th Congress, 1st Session) entitled "Defense Organization: The Need for Change."

The message also announced that the House has agreed to the following concurrent resolution, with amendments, in which it requests the concurrence of the Senate:

S. Con. Res. 85. Concurrent resolution to authorize the compilation and printing of the Bicentennial Edition of the Biographical Directory of the U.S. Congress.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2651. An act to amend section 504 of the Alaska National Interest Lands Conservation Act to promote the development of mineral wealth in Alaska;

H.R. 3851. An act to amend section 901 of the Alaska National Interest Lands Conservation Act;

H.R. 3918. An act to extend until December 18, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program; and

H.R. 3919. An act to extend temporarily the dairy price support program and certain food stamp program provisions, and for other purposes.

The message also announced that the House has agreed to the following concurent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 230. Concurrent resolution authorizing printing of additional copies of the transcript of hearings entitled "1984: Civil Liberties and the National Security State."

MEASURES REFERRED

The following bills and joint resolutions were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2391. An act to authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center; to the Committee on Environment and Public Works.

H.R. 2403. An act to require that public buildings constructed or altered under the Public Buildings Act of 1959 comply, to the maximum extent feasible, with nationally recognized model codes and with local zoning laws and certain other laws; to the Committee on Environment and Public Works.

H.R. 2651. An act to amend section 504 of the Alaska National Interest Lands Conservation Act to promote the development of mineral wealth in Alaska; to the Committee on Energy and Natural Resources.

H.R. 2903. An act to designate the Federal Building and U.S. Post Office located in Philadelphia, PA, as the "Robert N.C. Nix, Sr., Federal Building and U.S. Post Office;" to the Committee on Environment and Public Works.

H.R. 2962. An act to remove certain restrictions on the availability of office space for former Speakers of the House; to the Committee on Environment and Public Works.

H.R. 3851, An act to amend section 901 of the Alaska National Interest Lands Conservation Act; to the Committee on Energy and Natural Resources.

H.J. Res. 409. Joint resolution to direct the President to issue a proclamation designating February 16, 1986, as "Lithuanian Independence Day"; to the Committee on the Judiciary.

H.J. Res. 436. Joint resolution to designate 1986 as "Save for the U.S.A. Year," and for other purposes; to the Committee on the Judiciary.

The following concurrent resolution was read and referred as indicated:

H. Con. Res. 230. A concurrent resolution authorizing the printing of additional copies of the transcript of hearings entitled 1984: Civil Liberties and the National Security State"; to the Committee on Rules and Administration.

MEASURES PLACED ON THE CALENDAR

The following bills were read the first and second times by unanimous consent, and placed on the calendar:

H.R. 2542. An act designating the building located at 125 South State Street, Salt Lake City, as the "Wallace F. Bennett Federal Building";

H.R. 3914. An act to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel.

The following concurrent resolution was read, and placed on the calendar:

H. Con. Res. 239. Concurrent resolution commending the Government of Ireland and the Government of the United Kingdom for reaching agreement on measures which will lay the foundation for a just, durable, and peaceful solution to the problems of Northern Ireland.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, December 12, 1985, she had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 238. Joint resolution relating to the approval and implementation of the

proposed agreement for nuclear cooperation between the United States and the People's Republic of China.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated.

EC-2113. A Communication from the Deputy Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report of the Department of the Army's proposed letter of offer to Korea for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-2114. A Communication from the Administrator of the Panama Canal Commission, transmitting, pursuant to law, a report and recommendation with respect to a claim for damages to a ship in the Panama Canal; to the Committee on Armed Services.

EC-2115. A Communication from the Secretary of Transportation, transmitting, pursuant to law, a request for approval of a project document allowing improvements to the Mike Monroney Aeronautical Center; to the Committee on Commerce, Science, and Transportation.

EC-2116. A Communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, a report on abnormal occurences at licensed nuclear facilities for the second calendar quarter of 1985; to the Committee on Environment and Public Works.

EC-2117. A Communication from the Chairman of the Prospective Payment Assessment Commission, transmitting, pursuant to law, a report on the adjustments made by the Secretary of Health and Human Services for the fiscal year 1986 Medicare prospective payment system; to the Committee on Finance.

EC-2118. A communication from the Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the semiannual report of the Office of Inspector General, Environmental Protection Agency for the period April 1 to September 30, 1985; to the Committee on Governmental Affairs.

EC-2119. A communication from the Deputy of the Central Intelligence Agency (Administration), transmitting, pursuant to law, notice of a deletion of the CIA records system "Library Open Literature Ready Reference File"; to the Committee on Governmental Affairs.

EC-2120. A communication from the Secretary of Education, transmitting, pursuant to law, notice that he and the Secretary of Labor have approved the plan for greater coordination between vocational education programs and apprenticeship training program; to the Committee on Labor and Human Resources.

EC-2121. A communication from the Secretary of Labor, transmitting pursuant to law, a report on the Department of Labor's enforcement activities under the Fair Labor Standards Act for the period October 1, 1983 through September 30, 1984, and other activities during calendar year 1984; to the Committee on Labor and Human Resources.

EC-2122. A communication from the Secretary of Agriculture and the Secretary of Energy, transmitting jointly, pursuant to law, a report on the Agricultural Barter Program; to the Committee on Agriculture Nutrition, and Forestry.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-541. A resolution adopted by the House of Representatives of the Commonwealth of Massachusetts; to the Committee on Environment and Public Works.

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES CONCERNING LEAD POISONING

"Whereas, the city of Boston, Department of Health and Hospitals has identified 28 discrete areas within the city of Boston, each averaging 2 to 3 city blocks in size, where 4.4 percent of the city's children at risk (ages 9 months to 6 years) reside, and there occurs nearly 30 percent of Boston's lead poisoning; and

"Whereas, in each of these discrete areas, an average of 33 children were found to have been lead poisoned over the last five years (approximately one out of four children at risk); and

"Whereas, the great majority—well over 90 percent—of lead poisoned children do not eat paint chips, but have very high levels of exposure to lead contaminated dust, soil, and paint in and around their homes; and

"Whereas, in these discrete areas, tested by the Environmental Protection Agency (EPA) and the Suffolk County Extension Services, soil samples average 2000 parts per million lead—three times the city average of 600-700 parts per million; and

"Whereas, the most severe effects of lead poisoning are: acute encephalopathy, seizures, coma, and death; and

"Whereas, moderately elevated blood lead levels are correlated with less obvious effects on central nervous system functions, such as intelligence, behavior control, fine motor coordination, neurological dysfunction, and motor impairment; therefore be it

"*Resolved*, That the Massachusetts House of Representatives hereby urges the Congress of the United States to exercise its best offices to prevent language in section 118.A.1. of H.R. 2817 (EPA Superfund bill) from becoming an obstacle to lead cleanups in residential areas in the city of Boston; ensure that the pilot program of lead-contaminated soil removal is incorporated into the Superfund Act by Senator Kennedy's amendment; and ensure that the EPA undertake immediate action to reduce this particularly dangerous environmental hazard to Boston area children; and be it futher

"*Resolved*, That a copy of these resolutions be forwarded by the Clerk of the House of Representatives to the Presiding Officer of each branch of the Congress and the Members thereof from the Commonwealth."

POM-542. A resolution adopted by the Greater Cleveland Chapter of the American Society for Training and Development favoring passage of H.R. 1356 and S. 558 by the Congress thereby continuing support for Employee Education Assistance; to the Committee on Finance.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Finance, with an amendment in the nature of a substitute and an amendment to the title:

S. 1912: A bill to provide for a 6-month extension of certain temporary provisions relating to the Internal Revenue Code of 1954 (Rept. No. 99-219).

By Mr. ROTH, from the Committee on Governmental Affairs, without amendment.

S. 1937: An original bill to restrict smoking to designated areas in all U.S. Government buildings (Rept. No. 99-220).

By Mr. ROTH, from the Committee on Governmental Affairs, without amendment.

H.R. 2694: A bill designating the U.S. Post Office Building located at 300 Packerland Drive, Green Bay, WI, as the "John W. Byrnes Post Office and Federal Building".

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

H.J. Res. 450: Joint resolution to authorize and request the President to issue a proclamation designating April 20 through 26, 1986, as "National Organ and Tissue Donor Awareness Week".

By Mrs. KASSEBAUM, from the Committee on Foreign Relations, without amendment and with a preamble:

S. Res. 271: An original resolution expressing the sense of the Senate regarding the furnishing of assistance for the Republic of Liberia, and for other purposes.

By Mr. LUGAR, from the Committee on Foreign Relations, without amendment:

S. 1831: A bill to amend the Arms Export Control Act to require that congressional vetoes of certain arms export proposals be enacted into law.

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment:

S. 1916: A bill to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

S.J. Res. 235: Joint resolution to designate the we of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week."

By Mr. LUGAR, from the Committee on Foreign Relations, without amendment and with a preamble:

S. Con. Res. 93: An original concurrent resolution commending the Government of Ireland and the Government of the United Kingdom for reaching agreement on measures which will lay the foundation for a just, durable, and peaceful solution to the problems of Northern Ireland.

Mrs. KASSEBAUM. Mr. President, I am reporting Senate Resolution 271, expressing the sense of the Senate regarding assistance to the Republic of Liberia.

This is an original resolution which I am reporting from the Committee on Foreign Relations. It was cosponsored by Senators DODD, KERRY, LUGAR, PELL, and EVANS, and approved unanimously by the committee.

Liberia recently had a national election in which serious questions were raised about the official result. Following an attempted coup, the Government of Liberia has also arrested prominent members of the political opposition.

American assistance to Liberia has totaled some $375 million since 1981,

which is the higest per capital level of assistance in sub-Saharan Africa. This high level of aid was justified on the grounds that it was necessary to encourage Head of State Doe to allow free and fair elections and return Liberia to civilian rule.

Now that serious doubts have been raised about Mr. Doe's commitment to these objectives, I believe that the United States should reassess its assistance programs in Liberia. We should do this because the rationale for our aid program has been called into question, because of the tight fiscal situation we are facing generally, and because we need to send a clear signal to Mr. Doe that we are dissatisfied with his actions. We cannot credibly press for democratic freedoms in countries such as South Africa and the Philippines if we don't do so in Liberia, with which we have long had a special relationship.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Duross Fitzpatrick, of Georgia, to be United States District Judge for the Middle District of Georgia;

Alan B. Johnson, of Wyoming, to be United States District Judge for the District fo Wyoming;

Harry D. Leineweber, of Illinois, to be United States District Judge for the Northern District of Illinois;

J. Spencer Letts, of California, to be United States District Judge for the Central District of California;

George H. Revercomb, of Virginia, to be United States District Judge for the District of Columbia;

Stanley Sporkin, of Maryland, to be United States District Judge for the District of Columbia;

Dickran M. Tevrizian, of California, to be United States District Judge for the Central District of California;

Arnold I. Burns, of New York, to be Associate Attorney General.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation:

Robert Elsner, of Alaska, to be a Member of the Marine Mammal Commission for the term expiring May 13, 1987;

Terrence M. Scanlon, of the District of Columbia, to be Chairman of the Consumer Product Safety Commission;

Alexander Hanson Good, of the District of Columbia, to be Director General of the United States and Foreign Commercial Services;

James J. Carey, of Illinois, to be a Federal Maritime Commissioner for the term expiring June 30, 1990.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. DANFORTH. Mr. President, also for the Committee on Commerce, Science, and Transportation, I report favorably two nomination lists in the Coast Guard which appeared in their entirety in the CONGRESSIONAL RECORDS of December 6 and 9, 1985, and, to save the expense of reprinting them on the Executive Calendar, ask that they lie at the Secretary's desk for the information of Senators.

By Mr. ROTH, from the Committee on Governmental Affairs:

Harold L. Cushenberry, Jr., of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for a term of fifteen years.

Michael L. Rankin, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for a term of fifteen years.

By Mr. MATHIAS, from the Committee on Rules and Administration:

Ralph E. Kennickell, Jr., of Virginia, to be Public Printer (Exec. Rept. No. 99-10).

By Mr. THURMOND, from the Committee on Armed Services:

Sylvester R. Foley, Jr., of Florida, to be an Assistant Secretary of Energy (Defense Programs);

Chapman B. Cox, of Virginia, to be an Assistant Secretary of Defense.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee on the Senate.)

Mr. THURMOND. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations.

Those identified with a single asterisk (*) are to be placed on the Executive Calendar. Those identified with a double asterisk (**) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of November 22, November 26, December 3, December 6, December 9, and December 11, 1985 at the end of the Senate proceedings.)

* In the Air Force Reserve there are 15 appointments to the grade of major general and below (list begins with William G. Work). (Ref. #764).

* Lieutenant General Robert L. Bergquist, U.S. Army, to be placed on the retired list. (Ref. #765).

* Vice Admiral William P. Lawrence, U.S. Navy, to be placed on the retired list. (Ref. #766).

* In the Navy there are 31 promotions to the permanent grade of rear admiral (lower half) (list begins with Phillip Don Smith). (Ref. #767).

* In the Navy there are 11 promotions to the permanent grade of rear admiral (lower half) (list begins with Russell Larry Marlor). (Ref. #768).

* Major General Richard A. Burpee, U.S. Air Force, to be lieutenant general. (Ref. #778).

* Vice Admiral Huntington Hardisty, U.S. Navy, to be reassigned. (Ref. #779).

* Rear Admiral James H. Webber, U.S. Navy, to be vice admiral. (Ref. #780).

** In the Air Force Reserve there are 2 appointments to the grade of lieutenant colonel (list begins with Donald R. Klein). (Ref. #781).

** In the Army there are 414 appointments to the grade of colonel and below (list begins with Mani Bala). (Ref. #782).

** In the Navy there are 747 promotions to the permanent grade of commander (list begins with Victor H. Ackley). (Ref. #783).

** In the Army Reserve there are 23 appointments to the grade of colonel and below (list begins with Benny L. Bachulis). (Ref. #792).

** In the Navy there is one promotion to the permanent grade of lieutenant commander (Donald F. Schoor II). (Ref. #800).

** In the Naval Reserve there are 48 appointments to the grade of permanent lieutenant (list begins with Briana M. Albert). (Ref. #801).

Total 1,297.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PROXMIRE:

S. 1927. A bill to provide for State regulation of the transportation of high level radioactive waste; to the Committee on Environment and Public Works.

By Mr. CRANSTON:

S. 1928. A bill to require the President to direct the Secretary of Defense, the Secretary of Health and Human Services, and the Administrator of Veterans' Affairs to submit to the appropriate Committees of the Congress a joint report addressing the question of the United States Government responsibility for providing benefits and services to individuals who served with certain voluntary organizations in support of the Armed Forces of the United States stationed in the Republic of Vietnam during the Vietnem era; to the Committee on Governmental Affairs.

By Mr. MATHIAS:

S. 1929. A bill entitled the "Passenger Ship Authorization Act"; to the Committee on Commerce, Science, and Transportation.

By Mr. SIMON:

S. 1930. A bill to amend title II of the Social Security Act to prohibit the payment of benefits thereunder to individuals who have been deported or ordered from the United States on account of certain activities conducted under the direction of or in association with the Nazi government of Germany during World War II; to the Committee on Finance.

By Mr. D'AMATO (for himself, Mr. GRAMM, Mr. DODD and Mr. HEINZ):

S. 1931. A bill to amend the Urban Mass Transportation Act of 1964 to require construction management oversight on major capital projects; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. BAUCUS:

S. 1932. A bill to amend the Internal Revenue Code of 1954 to impose an excise tax on television sets, the revenue from which to be deposited in the National Competitiveness Education Trust Fund for mathematics and science teachers scholarships and summer fellowships, and for other purposes; to the Committee on Finance.

By Mr. LEVIN:

S. 1933. A bill for the relief of James T. Walter; to the Committee on the Judiciary.

By Mr. HEINZ:

S. 1934. A bill to amend the Bank Export Services Act; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. STEVENS (for himself, Mr. GOLDWATER, Mr. PRESSLER, Mr. MURKOWSKI, and Mr. CHILES):

S. 1935. A bill to direct the Secretary of the department in which the Coast Guard is operating to cause certain vessels to be documented as vessels of the United States so as to be entitled to engage in the domestic coastwise trade, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. KERRY (for himself, Mr. DODD, Mr. KENNEDY, Mr. PELL, and Mr. SIMON):

S. 1936. A bill to amend title 23, United States Code, to provide for a uniform system for handicapped parking; to the Committee on Environment and Public Works.

By Mr. ROTH, from the Committee on Governmental Affairs:

S. 1937. An original bill to restrict smoking to designated areas in all United States Government buildings; placed on the calendar.

By Mr. HATFIELD (for himself, Mr. ZORINSKY, Mr. BYRD, Mr. NUNN, Mr. INOUYE, Mr. DURENBERGER, Mr. ROCKEFELLER, Mr. ANDREWS, Mr. KERRY, Mrs. HAWKINS, Mr. STENNIS, Mr. DOLE, Mr. HOLLINGS, Mr. MATHIAS, Mr. WEICKER, Mr. PROXMIRE, Mr. THURMOND, Mr. COCHRAN, and Mr. STAFFORD):

S.J. Res. 245. Joint resolution designating "National Epidermolysis Bullosa Awareness Week"; to the Committee on the Judiciary.

By Mr. DIXON (for himself, Mr. HEINZ, Mr. CRANSTON, Mr. RIEGLE, Mr. CHILES, Mr. NUNN, Mr. PRYOR, Mr. MATTINGLY, Mr. SIMON, Mr. MATSUNAGA, Mr. BUMPERS, Mr. STAFFORD, Mr. MOYNIHAN, Mr. HOLLINGS, Mr. ROCKEFELLER, Mr. EAGLETON, Mr. GLENN, Mr. WEICKER, Mr. KENNEDY, Mr. SPECTER, Mr. HARKIN, and Mrs. HAWKINS):

S.J. Res. 246. A joint resolution to designate May 25, 1986 as "Hands Across America Day", for the purpose of helping people to help themselves, and commending United Support of Artists for Africa and all participants for their efforts toward combating domestic hunger with a 4,000 mile human chain from coast to coast; to the Committee on the Judiciary.

By Mr. McCLURE (for himself, Mr. MOYNIHAN, Mr. LUGAR, Mr. BURDICK, Mr. SIMON, Mr. BRADLEY, Mr. ROCKEFELLER, Mr. MATSUNAGA, Mr. DIXON, Mr. COCHRAN, Mr. ZORINSKY, Mr. KERRY, Mr. NUNN, Mr. THURMOND, Mr. METZENBAUM, Mr. HATFIELD, Mr. PELL, Mr. D'AMATO, Mr. SYMMS, Mr. GARN, Mr. DURENBERGER, Mr. WARNER, Mr. WILSON, Mr. EAST, Mr. STENNIS, and Mr. DENTON):

S.J. Res. 247. A joint resolution to designate the week of June 1 through June 7, 1986 as "National Theatre Week"; to the Committee on the Judiciary.

By Mr. WARNER:

S.J. Res. 248. A joint resolution to designate the week of March 2, 1986 through March 8, 1986 as "National Young Writers' Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mrs. KASSEBAUM, from the Committee on Foreign Relations:

S. Res. 271. An original resolution expressing the sense of the Senate regarding the furnishing of assistance for the Republic of Liberia, and for other purposes; placed on the calendar.

By Mr. COHEN (for himself and Mr. TRIBLE):

S. Res. 272. A resolution relating to the potential consequences that the use of paint containing the chemical compound tributyltin may have on the marine environment; to the Committee on Environment and Public Works.

By Mr. PACKWOOD (for Mr. DOLE (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BAUCUS, Mr. BENTSEN, Mr. BIDEN, Mr. BINGAMAN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. BYRD, Mr. CHAFEE, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DIXON, Mr. DODD, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EAST, Mr. EVANS, Mr. EXON, Mr. FORD, Mr. GARN, Mr. GLENN, Mr. GORE, Mr. GORTON, Mr. GRAMM, Mr. GRASSLEY, Mr. HARKIN, Mr. HART, Mr. HATCH, Mr. HATFIELD, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HEINZ, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. INOUYE, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KASTEN, Mr. KENNEDY, Mr. KERRY, Mr. LAUTENBERG, Mr. LAXALT, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. LUGAR, Mr. MATHIAS, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. McCLURE, Mr. McCONNELL, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. PACKWOOD, Mr. PELL, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. QUAYLE, Mr. RIEGLE, Mr. ROCKEFELLER, Mr. ROTH, Mr. RUDMAN, Mr. SARBANES, Mr. SASSER, Mr. SIMON, Mr. SIMPSON, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. STEVENS, Mr. SYMMS, Mr. THURMOND, Mr. TRIBLE, Mr. WALLOP, Mr. WARNER, Mr. WEICKER, Mr. WILSON, AND Mr. ZORINSKY)):

S. Res. 273. A resolution expressing condolences to the Goldwater Family: considered and agreed to.

By Mr. LUGAR, from the Committee on Foreign Relations:

S. Con. Res. 93. An original concurrent resolution commending the Government of Ireland and the Government of the United Kingdom for reaching agreement on measures which will lay the foundation for a just, durable, and peaceful solution to the problems of Northern Ireland; placed on the calendar.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE:

S. 1927. A bill to provide for State regulation of the transportation of high level radioactive waste; to the Committee on Environment and Public Works.

TRANSPORTATION OF HIGH LEVEL RADIOACTIVE WASTE

Mr. PROXMIRE. Mr. President, today I am introducing legislation which establishes a new licensing program within the Nuclear Regulatory Commission for transportation of high-level nuclear waste and spent fuel. The bill also sets out the permissible role for States with regard to nuclear transportation regulation. An identical bill will be introduced in the other body by Representatives MOODY and OBEY.

This bill will not impede interstate shipments of nuclear wastes whether to permanent or interim storage facilities. Neither will it set up a burdensome process which should add greatly to the cost of the nuclear fuel cycle. Instead, it is a modest first step toward providing the public with the safety assurances necessary for confidence in any nuclear waste transportation program.

With passage of the Nuclear Waste Policy Act in 1982, Congress provided for a new program of waste disposal which would eventually result in significant new movements of high-level waste and spent fuel.

But even without this new legislation, large amounts of spent fuel already move by truck and train.

For example, multiple shipments of spent fuel currently travel through Wisconsin on the way from Minneapolis to interim storage in Illinois. Despite the desire of the State of Wisconsin to impose reasonable safety requirements on these shipments, a Federal court recently held that the State was preempted from such regulation by provisions of the Atomic Energy Act. According to the court, even in the absense of Federal rail safety regulations for nuclear waste, there was no permissible role for State regulation under the existing statute.

This restriction makes no sense. That's why I change it in my bill. After all, States, not the Federal Government, bear the responsibility for cleanup once accidents occur. Additionally States have traditionally been responsible for local health and safety regulation under their police powers.

Mr. President, my bill requires any person, company or governmental body shipping high-level waste or spent fuel to get a license from the Nuclear Regulatory Commission.

The license application must include information on emergency response and mitigation; hazard/risk assessment; environmental impact; alterna-

tive routes; notice to affected States; need for shipments, and; proof of financial responsibility in event of an accident.

Before the Nuclear Regulatory Commission can issue a license it must prepare an environmental assessment containing a comparison of the relative hazards and risks of alternative routes and transportation modes; evaluation of emergency preparedness; environmental features of the route; physical features of the route affecting site cleanup, and; potential health and safety affects.

The bill has one other important provision: It sets out the rights of States regarding nuclear waste transportation. Under its provisions, States and Indian tribes can implement requirements for: accident reporting; inspection; advance notice; user fees; cleanup procedures, and; other regulations which insure local health, safety, and environmental protection.

Mr. President, this legislation should be an essential part of any nuclear waste disposal program and I urge my colleagues on the Environment and Energy Committees to consider it as part of their current debates on nuclear insurance.

Mr. President, I ask unanimous consent that the text of this legislation be placed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1927

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Atomic Energy Act of 1954 is amended by inserting at the end thereof the following:

"CHAPTER 21. NUCLEAR WASTE TRANSFORMATION

"SEC. 311. DEFINITIONS.—For purposes of this chapter—

"(1) The terms 'high level radioactive waste', 'Indian tribe', 'State', 'repository', 'spent nuclear fuel', and 'test and evaluation facility', have the same meaning given such terms in section 2 of the Nuclear Wast Policy Act of 1982 (42 U.S.C. 10101);

"(2) the term 'corridor' means the area or route traversed by a particular mode of transportation; and

"(3) the term 'person' includes a government entity.

"SEC. 312. RESTRICTIONS ON TRANSPORTATION OF NUCLEAR WASTE.—

"a. No person may transport or be authorized by any Federal agency to transport any high level radioactive waste or spent nuclear fuel—

"(1) from the site at which such waste or fuel is located on the date of enactment of this chapter; or

"(2) from the site at which it is generated after such date,

to any facility site, repository, away from the reactor storage site, interim storage facility, monitored retrievable storage facility, or test and evaluation facility without receiving a license to transport such waste from the Commission as provided in this chapter.

"b. A license to transport waste or fuel required by subsection a. may be granted by the Commission upon application in accordance with this section. Each application shall include—

"(1) an emergency response and mitagation plan as provided in subsection c.;

"(2) a hazard/risk assessment of the corridor assessing the physical impacts that affect the risk of transporting in that corridor;

"(3) an environmental impact report, if required by the Commission;

"(4) an analysis of alternate routes, including a comparison of risks and hazards;

"(5) evidence that a notice of application has been sent to corridor States and affected Indian tribes, and that such States and Indian tribes have been consulted on route selection;

"(6) sufficient information to determine the need for the shipment of the waste or fuel; and

"(7) proof of financial responsibility.

"c. Each application for a license to transport high level radioactive waste or spent nuclear fuel shall include an emergency response and mitigation plan outlining procedures to be taken in the event of a release or potential release of radioactive waste. Such procedures shall include—

"(1) emergency tactics for investigation and monitoring;

"(2) emergency medical and hospital procedures;

"(3) containment and decontamination procedures for an accidental release of radioactive waste to the environment;

"(4) decontamination procedures for public and emergency response personnel;

"(5) cleanup procedures;

"(6) coordinated response procedures with affected States, tribal, and local entities; and

"(7) resource identification and accessibility.

"d. (1) Prior to issuing a license to transport high level radioactive waste or spent nuclear fuel, the Commission shall prepare an environmental assessment which shall include a detailed statement of the basis for the Commission's decision and the probable impacts. Such an environmental assessment shall include, at a minimum—

"(A) a comparison of the relative hazards and risks of alternative routes and modes;

"(B) an evaluation of the emergnecy preparedness of States, local communities, and affected Indian tribes along the selected route;

"(C) a description of the environmental features both human and natural, along with the selected route;

"(D) a description of the condition of the physical features along the route which might hinder recovery, containment and clean up of an accident involved in the transprotation of waste; and

"(E) an evaluation of the environmental and human health effects of a release of high level radioactive waste during transport.

"(2) To the extent necessary to protect public health and safety and the environment, the Commission shall impose reasonable and prudent restrictions on the shipper which will as a result of the environmental assessment, either minimize the risk of an incident or enhance the potential for containment and clean up of an incident.

"e. (1) The Commission may issue a license in conformance with this section, if it determines that the shipment or series of shipments meet all applicable Federal and State requirements.

"(2) The Commission may issue a license for a single shipment or for a series of shipments if—

"(A) all shipments in the series contain the same type of waste;

"(B) all shipments in the series use the same shipping containers, transportation vehicles and route; and

"(C) all shipments in the series occur within two years after issuance of the license.

"SEC. 313. EMERGENCY RESPONSE CAPABILITIES.—

"The Department of Energy, the Commission, the Department of Transportation, and the Federal Emergency Management Agency shall, in consultation with the States and affected Indian tribes, determine the emergency response capabilities of corridor States and affected Indian tribes with respect to the implementation of an emergency response and implementation plan prepared pursuant to section 312c. These Federal agencies, States, Indian tribes, and affected communities shall develop and exercise the emergency response and mitigation plan within twelve months of the date a license is granted pursuant to this chapter. No shipments may be made unless such plans are developed and periodically exercised.

"SEC. 314. AFFECT OF CHAPTER ON INDIAN TRIBES.—

"No Federal regulation shall preempt States and Indian tribes from imposing regulations for—

"(1) implementation of inspection, surveillance, and enforcement permits;

"(2) establishing fees designed to pay the cost of the State nuclear safety transportation programs;

"(3) accident and incident reporting;

"(4) advance notification of shipments;

"(5) designation of alternate routes;

"(6) identification of safe havens;

"(7) driver certification requirements; and

"(8) monitoring, containment, cleanup, and decontamination procedures.

"SEC. 315. EXEMPTION FROM TRANSPORTATION RESTRICTIONS.—

"The restrictions established in section 312 shall not apply to high level radioactive waste or spent nuclear fuel that is to be transported if the Commission certifies that there are compelling reasons of public health and safety or national security which necessitate the immediate transportation of the waste to another site or facility.".

By Mr. CRANSTON:

S. 1928. A bill to require the President to direct the Secretary of Defense, the Secretary of Health and Human Services, and the Administrator of Veterans' Affairs to submit to the appropriate Committees of the Congress a joint report addressing the question of United States Government responsibility for providing benefits and services to individuals who served with certain voluntary organizations in support of the Armed Forces of the United States stationed in the Republic of Vietnam during the Vietnam era; to the Committee on Governmental Affairs.

BENEFITS AND SERVICES TO CERTAIN INDIVIDUALS

Mr. CRANSTON. Mr. President, I am today introducing, for appropriate referral, S. 1928, legislation which is

designed to address the concerns of non-Federal civilians who served in Vietnam with voluntary organizations, such as the Red Cross and the USO, in support of U.S. military forces.

This legislation would require the Secretary of Defense, the Secretary of Health and Human Services, and the Administrator of Veterans' Affairs to submit to the Congress, not later than 180 days after the date of enactment, a joint report evaluating the question of U.S. Government responsibility, and alternative approaches, for providing Federal and other benefits, services, and assistance relating to disabilities that possibly result from the service of these civilians in Vietnam.

I first became aware of the concerns on non-Federal civilians who served in Vietnam in connection with my work on the Veterans' Affairs Committee regarding Vietnam veterans, particularly with reference to the veterans' concerns about exposure to agent orange. Several former workers with voluntary organizations have contacted me and others in the Congress and the executive branch to make the point that they were potentially exposed to many of the same environmental situations and shared many of the experiences of the members of the Armed Forces. These individuals have noted that, because so much of the Federal Government's efforts to respond to concerns regarding the possible long-term health effects of serving in Vietnam have involved an agency uniquely devoted to veterans—that is, the VA—they have been excluded from this process and from any access to health care or compensation that it might yield.

In view of the contributions that these individuals made to their country and of their concerns about the possible long-term health effects of their service in Vietnam that may be related to actions of the Federal Government, I believe that the Federal Government has a responsibility to evaluate the question of Federal responsibility and possible appropriate alternatives—Federal and non-Federal—for addressing these concerns. This is what the legislation I am introducing today would require.

Legislation very similar to this has twice been passed by the Senate in measures relating to veterans' benefits and services. The first such provision was in S. 2514 as reported by the Veterans' Affairs Committee in the last Congress and as passed by the Senate as part of H.R. 5618. The second time was earlier this year when such a provision was included in S. 876 as reported by the Veterans' Affairs Committee on July 8 and passed by the Senate in H.R. 505 on July 30.

Unfortunately, on both occasions, our colleagues in the House were unwilling to accept this provision, apparently because of a concern that its passage might somehow reflect a judgment regarding the military or nonmilitary status of groups of civilians who served in Vietnam and because they did not want the VA to take the lead on exploring this issue.

It has never been my intent to make any judgment relating to veteran status for these individuals; rather, I view the question of the extent to which the Federal Government may be responsible to these individuals and the need for an evaluation of alternatives for providing an avenue of redress for them, if necessary, as entirely separate from the issue of veteran status.

Indeed, on the question of veteran status for individuals who served during periods of war with nonmilitary organizations, I was a principal author of a provision in Public Law 95-202 pursuant to which the Department of Defense has established a Civilian Military Review Board—the entity which is responsible for weighing evidence and passing judgment as to whether a particular group's service to the country during a period of war was such that it should be considered military service for the purpose of receiving military benefits. Nothing in this legislation is designed to circumvent or influence that separate avenue of redress.

Mr. President, I believe strongly that the individuals who went to Vietnam with voluntary organizations in order to provide service and support to our Armed Forces deserve answers to the questions and concerns about the possible effects of that service. For too long, these individuals have been passed from one agency to another, one entity to another, always being told to look elsewhere for their answers. It is time the Federal Government, as a collective entity, sat down and tried to address these concerns. I solicit my colleagues cosponsorship of this measure, and I look forward to seeing it move forward on a timely basis.

Mr. President, I ask unanimous consent that the text of this measure be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1928

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the purpose of this Act is to provide a basis for the executive branch and the Congress to evaluate the question of United States Government responsibility, and alternative approaches, for providing overseas volunteer support personnel (not part of the Armed Forces) with Federal and other benefits and services (including, but not limited to, health care and monetary compensation) in connection with disabilities which may be related to their experiences during their service in the Republic of Vietnam in support of the activities of the Armed Forces of the United States during the Vietnam era.

(b) In order to carry out such purpose, the President shall direct the Secretary of Defense, the Secretary of Health and Human Services, and the Administrator of Veterans' Affairs, to submit to the appropriate committees of the Congress, not later than 180 days after the date of the enactment of this Act, a joint report on such question and shall include in such report various such alternative approaches (together with comments on the appropriateness and the advantages and disadvantages of each) and any recommendations by such officials for legislative and administrative action with respect thereto, for establishing a program for providing such benefits and services to such individuals.

(c) For the purpose of this section—

(1) the terms "Armed Forces" and "Vietnam era" have the meaning given such terms in section 101(10) and (29), respectively, of title 38, United States Code; and

(2) the term "overseas volunteer support personnel" means individuals who, for a period of at least thirty days during the Vietnam era, served in the Republic of Vietnam as employees of or volunteer workers with voluntary organizations determined by the Secretary of Defense to be organizations which provided significant assistance to the United States Armed Forces in the Republic of Vietnam during the Vietnam era.

By Mr. MATHIAS:

S. 1929. A bill entitled the "Passenger Ship Authorizaton Act"; to the Committee on Commerce, Science, and Transportation.

PASSENGER SHIP AUTHORIZATION ACT

● Mr. MATHIAS. Mr. President, today I am introducing the Passenger Ship Authorization Act that will allow the documentation of certain vessels as passenger vessels of the United States so that they can conduct coastwise trade. This bill is identical to H.R. 3262 introduced in the other body by my colleague in the Maryland delegation, Representative HELEN DELICH BENTLEY.

The legislation calls for the construction of the marine portions of new passenger ships in U.S. yards while the "hotel" portions of the vessels would be built overseas. Under present law, a ship constructed in this manner would not be able to trade between U.S. ports.

I would prefer that the entire job were to be done in Baltimore, but it is ancient wisdom that "half a loaf is better than none". On that principle I support the proposal embodied in this bill which will generate hundreds of jobs.

This bill is an attempt to address a major problem facing many domestic shipyards—the lack of commercial shipbuilding work. Yards now must rely on Government work to remain viable and that work is too scarce. An example is the shipbuilding industry in Maryland. Passage of the Passenger Ship Authorization Act would allow several hundred jobs to be created and help maintain our Nation's shipbuilding capacity.

Mr. President. I ask unanimous consent that the text of the bill appear in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1929

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law, the Secretary of the department in which the Coast Guard is operating shall cause any passenger vessel, as defined in section 613(a) of the Merchant Marine Act, 1963 (46 U.S.C. 1183(a)), with respect to which (i) all major structural components of its hull and superstructure are fabricated and assembled in the United States, and (ii) its propulsion and auxiliary machinery systems are installed and tested in the United States, to be documented as a vessel of the United States entitled to engage in the coastwise trade, so long as—

(1) such vessel is in compliance with all other requirements for vessels engaging in the coastwise trade;

(2) such vessel is owned by a citizen of the United States as defined in the applicable laws prescribing the qualifications for vessels to engage in the coastwise trade;

(3) for hire carriage in such trade is limited to passengers, and their accompanying baggage, personal property and motor vehicles; and

(4) the owner of such vessel is agreeable to contracting with the United States for inclusion of enhanced military features.

(b) The provisions of this section shall apply to any passenger vessel for which a building contract has been executed within two years after the date of enactment of this Act.●

By Mr. D'AMATO (for himself Mr. GRAMM, Mr. DODD, and Mr. HEINZ):

S. 1931. A bill to amend the Urban Mass Transportation Act of 1964 to require construction management oversight on major capital projects; to the Committee on Banking, Housing, and Urban Affairs.

MANAGEMENT OVERSIGHT ON MAJOR TRANSIT PROJECTS

● Mr. D'AMATO. Mr. President, I rise today to introduce a bill to correct serious gaps in Federal law regarding construction management oversight on major transit construction projects throughout the Nation.

This legislation is necessary in order to avoid wasting hard-earned taxpayer's dollars on projects that lack well-planned quality control and quality assurance procedures. Currently, no Federal requirements exist to mandate that prudent procedures be in place prior to the allocation of huge amounts of Federal moneys for major transit capital projects.

The 63d Street subway tunnel—the infamous Tunnel to Nowhere—now runs 3 miles straight into a dead end in Queens. It is more than 7 years behind schedule and has incurred cost overruns in excess of $653 million. Over the last 16 years, Federal funds have contributed more than 70 percent of the $807 million poured into this still incomplete project. In fact, the cost of operating and maintaining the 63rd Street tunnel would be so staggering that it may never be opened.

Despite initial ridership projections of 36,500 riders per day, current estimates for the tunnel are now only 2,800 daily riders with a mere 220 rush-hour riders. For the same money we could have given every potential rider an apartment in Manhattan costing $288,000 and eliminated their need to commute. The projected $123 per person daily cost of a rush-hour trip on the tunnel could provide a chauffeur driven limousine and door-to-door service for each of these favored few.

How was this allowed to happen?

The story is one of mismanagement and incompetence. The 63rd Street tunnel is a classic example of how not to spend Federal dollars. It started in 1968 as a proposed $154 million tunnel, to be opened by 1978, which would link up with a new Queens bypass project and enable subway riders to transfer from other commuter lines and zip easily and conveniently into the heart of Manhattan. The Queens bypass project has been shelved due to its billion-dollar price tag, and the nearly completed tunnel simply ends in Queens without any link to existing transit service.

All we have for our money is a hole in the ground that is unlikely ever to be put into service.

On April 21, 1985, I toured the tunnel and saw cracks, water leaks, corroded and worthless equipment, and a general state of disrepair. At my insistence, the Federal Government then stopped payment on all remaining funds for the tunnel and required an independent review of its condition. The outside firm is still studying the problem.

New York is not alone. Because there are no adequate Federal safeguards in place, other cities have produced their own white elephants. The Miami metrorail system has been built at a cost of $1 billion, $800 million of it Federal money. After monstrous costs overruns and design and quality control problems, it now serves a mere 20,000 people a day. It would have been cheaper to buy every rider his or her own limousine. In Detroit, a people mover is being built at a cost of $210 million. The project, plagued by design defects and cost overruns, now needs another $53 million in Federal funds.

We deserve a much better use of our tax dollars than boondoggle construction projects. We need a guarantee that we will do better in the future.

That is why I am introducing this legislation to require the Federal Government to exercise better control over these projects to stop them from getting out of hand. My bill requires local officials planning major construction projects to provide detailed management plans as a precondition for Federal funding. These plans will have to specify how quality control and quality assurance will be guaranteed and will have to demonstrate that the people managing the project are qualified to do so.

My bill also requires that plans include, at a minimum, the following items:

Well-planned budgets; comprehensive construction schedules; qualifications, responsibilities, and reporting relationships of construction management personnel; documented, systematic procedures for handling potentially costly construction change orders; materials testing policies and procedures; and criteria and procedures for systems operations testing.

My bill authorizes the Transportation Department to contract directly for the performance of construction management oversight. The Federal share of such contracts will be 100 percent. Federal oversight is necessary in order to review the sufficiency of construction management plans and to monitor transit authorities' adherence to these plans.

A November 2 Transportation Appropriations Subcommittee hearing I chaired revealed an immediate need to beef-up Federal oversight of multimillion-dollar projects around the Nation and to require detailed construction management plans. Boondoggle projects will continue to be built unless we act now to put reasonable standards in place.

Wasteful transit construction projects jeopardize the continuation of the Federal commitment to funding for public transit. Those who depend on public transportation—especially, the poor, the handicapped, and the elderly—must not be left without the means to get to work, to school, and to carry on their daily lives. Transit systems across the Nation rely upon Federal aid to construct major capital projects. The vast majority of these projects are worthwhile and provide transit riders with new, efficient, accessible, and affordable public transit services and local communities with economic revitalization and growth.

This prudent legislation will safeguard the continued Federal commitment to mass transit by ensuring that Federal funds are spent only on those projects for which satisfactory construction management plans exist. This requirement should have been in place years ago. Taxpayers deserve to receive a dollar's worth of value for every dollar's worth of work on our mass transportation systems.

We can, and we must, do better. I urge my colleagues to join me in putting some safeguards in place so that such massive and expensive boondog-

gles never happen again. My bill is a first step, an important first step, toward insuring that no more Federal transit aid is poured into useless holes in the ground.

Mr. President, I ask unanimous consent that this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1931

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new section:

"CONSTRUCTION MANAGEMENT

"SEC. 23. (a)(1) The Secretary is authorized to use Federal funds available under this Act, section 103(e)(4) of title 23, United States Code, and section 14(b) of the National Capital Transportation Act of 1969, in an amount determined by the Secretary, to contract directly for the performance of construction management oversight. The Federal share of any such contract shall be 100 per centum.

"(2) Each recipient of assistance under this Act, section 103(e)(4) of title 23, United States Code, or section 14(b) of the National Capital Transportation Act of 1969 shall provide a contractor chosen by the Secretary in accordance with paragraph (1) such access to its construction sites and records as may be reasonably be required.

"(b) As a condition of Federal financial assistance for a major capital project under this Act, section 103(e)(4) of title 23, United States Code, or section 14(b) of the National Capital Transportation Act of 1969, the Secretary shall require the recipient to prepare and, after approval by the Secretary, implement a construction management plan which meets the requirements of subsection (c).

"(c) At a minimum, a construction management plan shall provide for—

"(1) adequate recipient staff organization complete with well-defined reporting relationships, statements of functional responsibilities, job descriptions, and job qualifications;

"(2) a duly adopted budget covering the construction management organization, appropriate consultants, property acquisition, utility relocation, systems demonstration staff, audits, and such miscellaneous payments as the recipient may be prepared to justify;

"(3) a comprehensive construction schedule approved by both the recipient and the prime contractor on the project;

"(4) a document control procedure and recordkeeping system;

"(5) a change order procedure which includes a documented, systematic approach to the handling of construction change orders;

"(6) organizational structures, management skills, and staffing levels required throughout the construction phase;

"(7) quality control and quality assurance functions, procedures, and responsibilities for construction and for system installation and integration of system components;

"(8) materials testing policies and procedures;

"(9) internal plan implementation and reporting requirements; and

"(10) criteria and procedures to be used for testing the operational system or its major components.

"(d) Not later than 120 days after the date of enactment of this section, the Secretary shall issue guidelines or regulations to implement this section. Such guidelines or regulations shall define the term 'major capital project' for the purpose of subsection (b).".●

By Mr. BAUCUS:

S. 1932. A bill to amend the Internal Revenue Code of 1954 to impose an excise tax on television sets, the revenue from which to be deposited in the national competitiveness education trust fund for mathematics and science teachers scholarships and summer fellowships, and for other purposes; to the Committee on Finance.

NATIONAL COMPETITIVENESS EDUCATION ACT

Mr. BAUCUS. Mr. President, today I am introducing a trade bill. But it doesn't have anything to do with tariffs, quotas, or trade laws.

It has to do with education.

The bill would create two Federal teacher scholarship programs to improve math and science education in the United States.

Let me explain why this bill is so important to the future of U.S. trade.

THE TRADE CRISIS

Mr. President, America faces a trade crisis. We all know the statistics. Our international competitors are beating the daylights out of us. As a result, our trade deficit is getting larger each month.

Two important causes of our declining competitiveness are the high value of the dollar and unfair foreign trade practices. Both of these problems have received a lot of attention in this Chamber, as they should.

COMPETITIVENESS

But there's a third problem that has not received enough attention: America's declining productivity. In the end, we will need to produce our way out of the trade deficit. Unfortunately, our competitors are increasing their productivity faster than we are: Germany twice as fast; France five times as fast; and Japan six times as fast.

To reverse this trend and restore America's competitiveness, we must improve the quality of our labor force.

THE IMPORTANCE OF EDUCATION

In 1983, the National Commission on Excellence in Education released a report called "A Nation at Risk." The report said that our school system is being "eroded by a rising tide of mediocrity that threatens our very future as a nation."

Since then, there have been 180 different studies on the condition of education in our country. These studies all show that our declining academic performance is taking a toll on our Nation's labor force. Employers say that high school graduates just aren't prepared for the job market.

Mr. President, our children are the labor force of the next century.

If we give our children the best education and training, we will have the best, most productive labor force in the world. American industries will have the highly skilled employees they need to be competitive.

If we do not strengthen our educational system, the quality of our labor force will continue to decline and American industries will fall further behind their foreign competitors.

THE ANSWER IS TEACHERS

Many solutions have been offered as ways to improve our educational system. Some have recommended new programs for administrators, new programs for improving textbooks, and new programs for encouraging students to go to private school instead of public school.

But I think we all know one critical answer to the problem: Teachers.

Teachers are the key to the success or failure of America's educational system. There's nothing profound about that. It's obvious. Each of us can remember a teacher who made the difference.

In this respect, we can learn an important lesson from the Japanese. They have one of the best-trained work forces in the world. Japan's educational system is the single most important factor in that country's economic success. Japan puts its teachers on a pedestal. They are highly paid and highly respected.

America, in contrast, treats its teachers like second-class citizens, with low salaries and low prestige.

THE TEACHER SHORTAGE

As a result, we face a teacher shortage. Statistics show that we will need over a million new teachers by 1990.

The shortage is especially serious in the areas of math and science. The United States is competing in a world economy that demands more and more knowledge in areas of high technology. To meet this competition, America needs a labor force that has strong math and science skills.

But there aren't enough competent teachers to teach those skills. In the last 10 years, the number of people studying to be math teachers fell 79 percent. Those studying to be science teachers fell 64 percent. And only half of those students actually became teachers.

It's no mystery why this shortage has occurred. College graduates trained in math and science are being lured to high-paying jobs in industry. As a result, some of the people filling teaching positions don't have a strong enough math and science background. Our schools respond by teaching less math and science. That is not the answer. That just makes the problem worse.

To solve this problem, we need broad incentives to draw outstanding students into teaching positions. And we need to increase teachers' salaries to keep good teachers in the schools.

THE NATIONAL COMPETITIVENESS EDUCATION ACT

My bill addresses both of these needs.

First, it sets up a Federal scholarship program for top high school and college students who study math or science. In exchange for the scholarships, students would take teaching jobs for between 2 and 6 years after graduation, depending on the amount of scholarship the students received.

Second, the bill creates a fellowship program for math and science teachers, so that during summer vacation they can take additional courses to improve their skills and not have to worry about getting another job.

Together, these two programs would cost about $100 million a year.

To pay for them, the bill imposes a 2-percent excise tax on the manufacture of television sets. The tax would provide about $100 million a year for the two programs.

TV HINDERS EDUCATION

Mr. President, TV is part of the problem. During their first 16 years, American children watch almost 15,000 hours of TV—more time than they spend on anything else, except sleeping. Teachers are competing with "He-Man," "The A-Team," and "Monday Night Football" for their students' time. No wonder homework doesn't get done and students learn less.

Recent studies confirm what we've suspected all along—that there is a connection between the amount of time children spend watching TV and how well they do in school.

A 1977 report by the College Entrance Examination Board found that television viewing has been a cause of the decline in SAT scores in recent years. A 1980 research project by the California school system showed that students who watch a lot of TV score lower on achievement tests than students who watch little or no TV. Another study in 1982 that students who watch more than 10 hours of TV per week have worse grades than those who watch less than 10 hours.

The small excise tax in my bill would help offset this damage by allowing television importers and manufacturers to devote part of their profit to improving the U.S. educational system.

CONCLUSION

Mr. President, the world economy is at a turning point.

Twenty years ago, the United States had a huge edge in the world market. We are now losing that edge as other countries are becoming more and more competitive in the high-tech industries.

Without a well educated labor force, the United States will be unable to compete in the world economy in the years to come.

Mr. President, Benjamin Disraeli once said that "The youth of our Nation are the trustees of prosperity."

It's true. The most important investment this country can make is in its children.

Education is a big part of that investment. In fact, it's an obligation that we as a nation cannot afford to ignore.

Mr. President, I ask unanimous consent that the text of the bill and a summary of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL COMPETITIVENESS EDUCATION ACT

SUMMARY

This bill provides for the levy of a tax on all TV sets sold in the United States, the revenues from which would go into a trust fund to be used for the improvement of math and science education. Two primary factors support this proposal:

(1) There is a relationship between the amount of time kids spend watching TV and their academic achievement (suggested, for example, by a 1977 College Entrance Examination Board study); and

(2) We need better math/science education in order to be competitive with other nations, like Japan, Germany, and France, that have better math/science education.

OUTLINE OF BILL

The National Competitiveness Education Act will have two parts:

(1) National Math-Science Teachers Scholarships, which will consist of scholarships to outstanding students who agree to teach math or science when they graduate from college; and

(2) National Math-Science Teachers Summer Fellowships, to consist of summer fellowships worth $5,000 for top math/science teachers to update and improve their teaching skills.

PART I: TEACHERS SCHOLARSHIPS

This part would provide approximately 15,000 scholarships each year of up to $5,000 per year. Funding for the scholarships is allocated from the trust fund to the states in the form of grants. Winners of the scholarships would be chosen from among students who apply and who are in the top 10% of their current class. Winners would be chosen by a governor-appointed panel in each state. Upon college graduation, the "scholars" would pay back the scholarship by teaching math or science in public schools for at least two years.

REASONS FOR PART I

1. To encourage bright students into teaching
2. To give students who want to teach the financial opportunity to do so
3. To provide schools with access to a greater pool of talented applicants for math/science teaching positions.

PART II: TEACHERS SUMMER FELLOWSHIPS

This part would provide approximately 5000 selected teachers $5,000 to be used during the summer to improve their math/science teaching skills. Teachers would compete for the fellowships, and would be chosen at the state level by a governor-appointed panel. The fellowship guidelines are fairly loose: they could be used for going back to school, carrying out research projects (if the projects are directly related to improving math/science teaching), developing new math/science programs, or doing internships in business to learn applications of math/science skills.

REASONS FOR PART II

1. To recognize outstanding math/science teachers
2. To give teachers incentives to stay in teaching
3. To give teachers an opportunity to improve their teaching skills.

S. 1932

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Competitiveness Education Act".

TITLE I—EXCISE TAX ON TELEVISION SETS

SEC. 101. EXCISE TAX IMPOSED ON TELEVISION SETS.

(a) IN GENERAL.—Chapter 32 of the Internal Revenue Code of 1954 (relating to manufacturers excise taxes) is amended by inserting after subchapter B the following new subchapter:

"Subchapter C—Television Sets

"Sec. 4141. Imposition of tax.

"SEC. 4141. IMPOSITION OF TAX.

"There is hereby imposed upon the sales of any television set by the manufacturer, producer, or importer a tax equal to 2 percent of the price for which so sold.".

(b) CLERICAL AMENDMENT.—The table of subchapters of chapter 32 of the Internal Revenue Code of 1954 is amended by inserting after the item relating to subchapter B the following new item:

"Subchapter C. Television Sets.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to articles sold by the manufacturer, producer, or importer after December 31, 1986.

SEC. 102. TRANSFER OF TELEVISION SET EXCISE TAX REVENUES TO NATIONAL COMPETITIVENESS EDUCATION TRUST FUND.

(a) IN GENERAL.—Subchapter A of chapter 98 of the the Internal Revenue Code of 1954 (relating to Trust Fund Code) is amended by adding at the end thereof the following new section:

"SEC. 9505. NATIONAL COMPETITIVENESS EDUCATION TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'National Competitiveness Education Trust Fund', consisting of such amounts as may be appropriated, credited, or transferred to the National Competitiveness Education Trust Fund as provided in this section and section 9602(b) (relating to crediting of interest, etc.).

"(b) TRANSFERS TO NATIONAL COMPETITIVENESS EDUCATION TRUST FUND.—There are hereby appropriated to the National Competitiveness Education Trust Fund amounts equivalent to the taxes received in the Treasury after December 31, 1985, under section 4141.

"(c) EXPENDITURES FROM TRUST FUND.—Amounts in the National Competitiveness Education Trust Fund shall be available as

provided by appropriation Acts, for payment to the Secretary of Education to provide funds for title II of the National Competitiveness Education Act.".

(b) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new item:

"Sec. 9505. National Competitiveness Education Trust Fund.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1987.

TITLE II—PROGRAMS FUNDED BY NATIONAL COMPETITIVENESS EDUCATION TRUST FUND

PART A—NATIONAL MATHEMATICS AND SCIENCE TEACHERS SCHOLARSHIPS

SEC. 201. STATEMENT OF PURPOSE.

The purpose of this part is to make available, through grants to the States, scholarships to individuals each year who are outstanding secondary and postsecondary students and who demonstrate an interest in a teaching career in the fields of mathematics or science at the elementary school or secondary school level.

SEC. 202. ALLOTMENT OF FUNDS.

(a) GENERAL ALLOTMENT.—From the sums available pursuant to section 221(b) to carry out this part in any fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to such sums as the population of the State bears to the population of all States, except that no State shall receive less than one-half of 1 per centum of such sums.

(b) MOST RECENT DATA.—For the purpose of this section, the population of a State and of all States shall be determined by the most recently available data from the United States Census Bureau.

(c) REALLOTMENT.—If any State elects not to receive its allotment under this part, the Secretary shall reallot, among the remaining States, amounts from such State in accordance with subsection (a) of this section.

SEC. 203. GRANT APPLICATIONS.

(a) IN GENERAL.—The Secretary is authorized to make grants to States in accordance with the provisions of this part. In order to receive a grant under this part, a State shall submit an application at such time or times, in such manner, and containing such information as the Secretary may prescribe by regulation. Such application shall set forth a program of activities for carrying out the purposes set forth in section 201 in such detail as will enable the Secretary to determine the degree to which such program will accomplish such purposes.

(b) TERMS OF APPLICATIONS.—The Secretary shall approve an application only if the application—

(1) describes the selection criteria and procedures to be used by the State in the selection of scholarships under this part which satisfy the provisions of this part;

(2) designates the State agency to administer the program;

(3) describes the outreach effort the State agency intends to use to publicize the availability of the National Mathematics and Science Teachers Scholarships to secondary and postsecondary students in the State;

(4) provides assurances that each recipient eligible under section 205(c) who receives a mathematics or science, or both, scholarship shall enter into an agreement with the State agency under which the recipient shall—

(A) within the 10-year period after completing the postsecondary education for which the scholarship was awarded, teach mathematics or science, or both, for a period of not less than 2 years for each of the first 2 years for which assistance was received and 1 year for each additional year for which assistance was received in an elementary or secondary school of a local educational agency of such State, a public elementary or secondary school of such State, or a public educational program in such State, any of which may be selected by such State, but in no event shall any recipient be required to teach for less than 2 years or more than 6 years;

(B) provide the State agency evidence of compliance with section 206 as required by such agency; and

(C) repay all or part of a scholarship received under section 204 plus interest and, if applicable, reasonable collection fees, in compliance with regulations issued by the Secretary under section 207, in the event that the conditions of clause (A) are not complied with, except as provided for in section 208;

(5) provides that the agreement entered into with recipients shall fully disclose the terms and conditions under which assistance under this part is provided and under which payment may be required;

(6) provides assurances that the State agency will make particular efforts to attract students who express a willingness or desire to teach in schools having less than average academic results or serving large numbers of economically disadvantaged students; and

(7) provides assurances that National Mathematics and Science Teachers Scholarships will be awarded without regard to sex, race, handicapping condition, creed, or economic background.

(c) PROJECTED TEACHER NEEDS.—The selection criteria and procedures to be used by the State shall reflect the present and projected teacher needs of the State, including the demand for and supply of elementary and secondary teachers with training in the fields of mathematics and science.

(d) CONSULTATION.—In developing the selection criteria and procedures to be used by the State, the State shall solicit the views of State and local educational agencies and other interested parties. Such views—

(1) shall be solicited by means of—

(A) written comments; and

(B) publication of proposed selection criteria and procedures in final form for implementation; and

(2) may be solicited by means of—

(A) public hearings on the teaching needs of elementary and secondary schools in the State (including the number of new teachers needed, the expected supply of new teachers, and the shortages in the State of teachers with training in the fields of mathematics and science; or

(B) such other methods as the State may determine to be appropriate to gather information on such needs.

SEC. 204. AMOUNT AND DURATION OF AND RELATION TO OTHER ASSISTANCE.

(a) IN GENERAL.—Subject to subsection (b)(2), each recipient shall receive a scholarship not to exceed $5,000 for each academic year of postsecondary education for study in preparation to become an elementary or secondary mathematics or science teacher. No individual shall receive scholarship assistance for more than 4 years of postsecondary education, as determined by the State agency.

(b) LIMITATIONS ON SCHOLARSHIPS.—(1) Notwithstanding the provisions of title IV of the Higher Education Act of 1965, scholarship funds awarded pursuant to this part shall be considered in determining eligibility for student assistance under title IV of such Act.

(2) Scholarship assistance awarded by the statewide review panel established pursuant to section 205 to any individual in any given year, when added to assistance received under title IV of the Higher Education Act of 1965, shall not exceed the cost of attendance, as defined under section 482(d) of such Act, at the institution the individual is attending. If the amount of the scholarship assistance and assistance received under title IV of such Act, exceeds the cost of attendance, the scholarship shall be reduced by an amount equal to the amount by which the combined awards exceed the cost of attendance.

(3) No individual shall receive an award under this part, in any academic year, which shall exceed the cost of attendance, as defined under section 482(d) of the Higher Education Act of 1965, at the institution the individual is attending.

SEC. 205. SELECTION OF RECIPIENTS.

(a) STATEWIDE REVIEW PANEL.—Recipients of scholarships under this part shall be selected by a 7-member statewide review panel appointed by the Governor, acting in consultation with the State agency. The statewide review panel shall be respresentative of school administrators, teachers, and parents in the State.

(b) STUDENTS SELECTED.—(1) Selections of scholarship recipients shall be made—

(A) 25 per centum from among individuals entering the first year of any accredited mathematics or science teaching program in an institution of higher education;

(B) 25 per centum from among individuals entering the second year of such a program;

(C) 25 per centum from among individuals entering the third year of such a program; and

(D) 25 per centum from among individuals entering the fourth year of such a program;

(2) Each recipient selected under paragraph (1) shall rank in the top 10 per centum of such recipient's secondary or postsecondary class at the time of the selection.

(3) The statewide review panel shall develop additional criteria and procedures for the selection of recipients. Such criteria and procedures may include—

(A) secondary and postsecondary education grade point average;

(B) involvement in extracurricular activities;

(C) financial need;

(D) expression of interest in teaching as expressed in a written essay by the applicant; and

(E) letters of recommendation from teachers and others.

SEC. 206. SCHOLARSHIP CONDITIONS.

Recipients of scholarship assistance under this part shall continue to receive such scholarship payments only during such periods that the State agency finds that the recipient is—

(1) enrolled as a full-time student in an institution of higher education;

(2) pursuing a course of study leading to teacher certification in the fields of mathematics or science, or both; and

(3) maintaining satisfactory progress as determined by such institution of higher education.

SEC. 207. SCHOLARSHIP REPAYMENT PROVISIONS.

Recipients found by the State agency to be in noncompliance with the agreement entered into under section 203(b)(4) shall be required to repay a pro rata amount of the scholarship awards received, plus interest and, where applicable, reasonable collection fees, on a schedule and at a rate of interest to be prescribed by the Secretary by regulations issued pursuant to this part.

SEC. 208. EXCEPTIONS TO REPAYMENT PROVISIONS.

(a) IN GENERAL.—A recipient shall not be considered in violation of the agreement entered into pursuant to section 203(b)(4)(C) if the recipient—

(1) returns to a full-time course of study related to the field of mathematics or science teaching at an eligible institution of higher education;

(2) is serving, not in excess of 3 years, as a member of the armed services of the United States;

(3) is temporarily totally disabled for a period of time not to exceed 3 years as established by sworn affidavit of a qualified physician;

(4) is unable to secure employment for a period not to exceed 12 months by reason of the care required by a spouse who is disabled;

(5) is seeking and unable to find full-time employment for a single period not to exceed 12 months;

(6) is seeking and unable to find full-time employment as a mathematics or science teacher in a public elementary or secondary school; or

(7) satisfies the provisions of additional repayment exceptions that may be prescribed by the Secretary in regulations issues pursuant to this part.

(b) TOTAL DISABILITY.—A recipient shall be excused from repayment of any scholarship assistance received under this part if the recipient becomes permanently and totally disabled as established by sworn affidavit of a qualified physician.

PART B—MATHEMATICS AND SCIENCE TEACHERS SUMMER FELLOWSHIPS

SEC. 211. STATEMENT OF PURPOSE.

The purpose of this part is to provide financial assistance to States to enable the Governor to award, on a competitive basis, to elementary and secondary school teachers of mathematics or science fellowships for summer study so that the elementary and secondary school teachers may improve their teaching skills in the field of mathematics or science.

SEC. 212. ALLOTMENT OF FUNDS.

(a) GENERAL ALLOTMENT.—From the sums available pursuant to section 221(b) to carry out this part in any fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to such sums as the population of the State bears to the population of all States, except that no State shall receive less than one-half of 1 per centum of such sums.

(b) MOST RECENT DATA.—For the purpose of this section, the population of a State and of all States shall be determined by the most recently available data from the United States Census Bureau.

(c) REALLOTMENT.—If any State elects not to receive its allotment under this part, the Secretary shall reallot, among the remaining States, amounts from such State in accordance with subsection (a) of this section.

SEC. 213. SELECTION OF RECIPIENTS.

(a) REVIEW PANEL.—The Governor of each State shall appoint a 7-member selection review panel for the purpose of selecting elementary school teachers, secondary school teachers of mathematics, and secondary school teachers of science in the State who are interested in improving their teaching skills in the field of mathematics or science by taking courses of study during the summer.

(b) SELECTION PROCEDURE.—(1) The Governor shall establish selection procedures to be applied by the review panel appointed pursuant to subsection (a), together with such application procedures as may be necessary.

(2) The application procedures established under paragraph (1) shall include provisions designed to assure that each applicant describe the fellowship proposal for which the applicant is applying under this part.

SEC. 214. STIPENDS.

(a) GENERAL RULE.—Each State shall pay to individuals awarded summer fellowships under this part such stipends (including such allowances for subsistence and other expenses for such individuals and their dependents) as the Secretary may determine to be consistent with prevailing practices under comparable federally supported programs.

(b) MAXIMUM STIPEND.—No stipend may be paid to a single recipient for any single summer institute in excess of $5,000.

SEC. 215. FELLOWSHIP CONDITIONS.

(a) GENERAL REQUIREMENTS.—An individual awarded a summer fellowship under the provisions of this part shall—

(1) use the award for improving the teaching ability of the individual in the field of mathematics or science in the elementary and secondary schools of the local educational agencies of the State or of the public elementary and secondary schools of the State; and

(2)(A) enter into an agreement with the State under which the individual will for a period of not less than 2 years following the award of the summer fellowship under this part teach in an elementary or secondary school of a local educational agency of such State, a public elementary or secondary school of such State or a public educational program in such State; or

(B) repay all of the stipend awarded to the recipient in the event that the conditions of clause (A) are not complied with, except when such conditions are not complied with for reasons beyond a recipient's control.

(b) LIMITATION ON TIME OF FELLOWSHIP.—No elementary or secondary school teacher may receive a summer fellowship under this part in 2 consecutive years.

(c) PROHIBITION.—No grant under this part may be used for the purchase of materials or equipment, including textbooks, for use by any elementary or secondary school.

SEC. 216. APPLICATIONS.

Each State desiring to receive a grant under this part shall submit an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require.

PART C—GENERAL PROVISIONS

SEC. 221. AUTHORIZATION AND ALLOCATION OF FUNDS.

(a) AUTHORIZATION.—From the amounts available in each fiscal year in the National Competitiveness Education Trust Fund under section 9505 of the Internal Revenue Code of 1954, there are authorized to be appropriated such sums as may be necessary in each such fiscal year, but not in excess of the amounts available under such section, to carry out parts A and B of this title.

(b) ALLOCATION OF FUNDS.—Of the amounts available pursuant to subsection (a) of this section—

(1) 75 percent in each fiscal year of the amounts in each such year shall be available to carry out part A; and

(2) 25 percent in each fiscal year of the amounts in each such year shall be available to carry out part B.

SEC. 222. DEFINITIONS.

For the purpose of this title—

(1) the term "elementary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965;

(2) the term "institution of higher education" has same meaning given that term under section 1201(a) of the Higher Education Act of 1965;

(3) the term "local educational agency" has the same meaning given that term under section 198(a)(10) of the Elementary and Secondary Education Act of 1965;

(4) the term "Governor" means the Chief Executive of a State;

(5) the term "secondary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965;

(6) the term "Secretary " means the Secretary of Education;

(7) the term "State " means the several States, and the District of Columbia; and

(8) the term "State agency" means the State agency which administers the program under subpart 3 of part A of title IV of the Higher Education Act of 1965, relating to State student incentive grant, or the State agency with which the Secretary has an agreement under section 428(b) of such Act.

By Mr. HEINZ:

S. 1934. A bill to amend the Bank Export Services Act; to the Committee on Banking, Housing, and Urban Affairs.

EXPORT TRADING COMPANY AMENDMENTS ACT

● Mr. HEINZ. Mr. President, I am today introducing legislation to update and reform the Export Trading Company Act of 1982. Senators, I am sure, will remember that act as one of the major pieces of export promotion legislation the Congress passed during the early years of the Reagan administration. It was also a priority of the Carter administration, and when the bill finally passed it was with overwhelming support from both sides of the aisle. That passage did not, however, come without considerable debate, even haggling, over details. It is a number of those details that the bill I am introducing today addresses.

My reference to details does not imply that either the original bill or today's action is insignificant. In fact, the Export Trading Company Act represented a major step in the evolution of our antitrust and bank regulation laws. With respect to the latter, the act clearly delineated circumstances under which banks could engage in nonbanking businesses, activities which had previously been off limits to banks under the Glass-Steagall Act.

This step opened up an entire sector of international, trade-related activities to banks without prejudicing the safety and soundness concerns that have characterized our bank regulatory policies for the past 50 years.

With respect to antitrust, the act clarified existing antitrust laws and enforcement policies by drawing a clear line, in the form of a certificate, between what export activities were permitted by the law and what were not. This approach provides clear guidance to exporters in a way not previously available in any useful way.

Despite these landmark changes, the act has not turned out to be as big a success as some in the administration had predicted at the time. There are a number of reasons for that, Mr. President, only some of which are dealt with in this legislation. The biggest obstacle to ETC development has been the appreciation of the dollar and the consequent ballooning of our trade deficit, now anticipated to reach $150 billion in 1985. This appreciation occurred at precisely the time the Export Trading Company Act was coming into effect and unquestionably affected ETC development by making it difficult to export under any circumstances. Healthy, growing ETCs no doubt could have survived that kind of challenge, but banks and others new to the exporting business faced with such sharply adverse international economic conditions have been deterred from going into the business or have been unable to grow to the extent necessary.

This is not to say that the number of ETC's created or the number of antitrust review certificates granted has been disappointing. In fact, there are presently 38 approved ETC's, with 59 certificates of review granted and 7 pending. In terms of numbers this is not a particularly disappointing result only 3 years after enactment of the legislation. What has been more disappointing is the limited growth and success these entities have had. Most of them continue to be small, and many have had to limit their initial ambitious plans. I plan shortly to schedule oversight hearings on the act as well as on my new legislation that will go into these problems in greater detail.

Beyond the question of the dollar and the generally difficult climate for exporting over the past 3 years, there are some other problems inherent in the provisions of the act that have retarded ETC development and the issuance of antitrust review certificates. Some of them are unintended results of the original legislation; others were predicted by some of us at the time but were accepted anyway as the price of compromise and obtaining the bill's enactment. Three years of experience have given us a better understanding of exports and exporters, a more realistic view of what ETC's are able to accomplish, and how best to design legislation to enhance those possibilities.

The bill I am introducing today, the Export Trading Company Amendments Act of 1985, makes five changes in current law, all with respect to the banking provisions of the ETC Act. This, of course, is not to imply no changes are needed in the antitrust portion of the law—I am simply not prepared to indicate those changes at this time.

DEFINITION OF EXPORT TRADING COMPANY

When the initial ETC Act was signed into law it required that ETC's approved under it be "organized and operated principally for purposes of exporting goods or services produced in the United States * * *" "Principally" was construed in legislative history and subsequently in regulation to mean that more than 50 percent of the ETC's income must come from exports. This has proved to be a significant constraint on ETC activity because of their need to engage in importing and their desire to enter into third country transactions which involved neither exports nor imports from the United States. It is obvious that no company can engage only in one-way transactions and expect to function successfully over the long term. The very concept of trade implies goods and services flowing in two directions. Thus, some degree of importing activity is inevitable in any successful ETC. At the same time, however, many companies have found that there are opportunities throughout the world for an ETC to facilitate trade between two or more countries outside the United States. For example, the sale of rice from Indonesia to Algeria would be an example of third country trade that does not impact on the U.S. trade balance but provides profit opportunities for American ETC's.

Under the current definition of "principally," however, such transactions effectively count as imports in the Federal Reserve Board's periodic calculation of whether an ETC is meeting this test, since income from exports is effectively measured against—and must exceed—income from all other sources. While I understand that it is our policy—and I believe it should be our policy—that the incentives we provide for ETC's should be for the larger purpose of facilitating exports, it is equally clear that third country transactions have no adverse effect on our trade balance, and we should not effectively constrain ETC's from entering into them.

Accordingly this bill amends the act to provide that "principally" means an excess of export-related income over import-related income, thereby excluding third country transaction income from the test entirely. This will make it easier for ETC's to continue to meet the definition of export trading company, and it will encourage them to enter into these kinds of transactions, which will provide both present income as well as future business opportunities which might well include direct exports from the United States.

Another problem with the definition of export trading company lies in an erroneous interpretation of the 1982 legislation by the Federal Reserve Board relating to the export of services. The Board interpreted the legislation to preclude counting the export of services produced by the ETC itself or an affiliate as export-related income for purposes of the definition. Effectively this prevents an ETC from setting up a division abroad that provides services. This interpretation of the definition of ETC is contrary to our intent when we wrote the law and an unwarranted and unnecessary constraint on ETC activity. The new definition in the bill I am introducing today will correct this problem.

ETC RELATIONS WITH AFFILIATES

Along with limits on bank lending to affiliates, section 23A of the Federal Reserve Act defines collateral requirements that must be met when institutions like ETC's borrow from affiliated banks. These limits vary depending on the type of collateral used, but the nature of ETC's is such that in most cases collateral would consist at least in part of accounts receivable; in which case the requirement is 120 percent of the loan or extension of credit. This has proved to be an unnecessarily onerous requirement, particularly for ETC's in their start-up phase, which at the present time is practcally all of them. With few accounts receivable, at least in the beginning, little financing capital of their own, and limited access to commercial paper, the collateral requirement puts ETC's as a significant disadvantage.

The simplest solution, which is contained in this bill, is to exempt ETC's from the requirements of section 23A. This change would not affect bank safety and soundness, since the quantitative limits on bank extensions of credit to ETC's would remain as in present law.

LEVERAGE AND INVENTORY

The remaining two sections of the bill concern two issues raised in the Federal Reserve Board's regulations, although they are not touched upon directly in the statute as it presently reads. In essence, the Board has rendered an excessively conservative interpretation of the law which is unjustified by any threats to bank safety that ETC's pose, but which has been a significant disincentive to ETC formation over the past 3 years.

The first provision relates to the Board's requirement that ETC's proposing an assets to equity ratio of more than 10 to 1 must have their ap-

plication considered in Washington rather than approved at the regional Federal Reserve Bank. This regulation has had the effect of telling prospective ETC's that a proposed ratio of greater than 10 to 1 will encounter considerably more bureaucratic difficulty, delay, and probably, expense.

While I do not oppose the establishment of a desirable ratio as a guideline to be considered in reviewing ETC applications, I believe that 10 to 1 is unrealistic. A more appropriate level, in view of what is common practice in other countries, would be 25 to 1. That is what this bill proposes in the form of a general specification that the Board may not disapprove an application solely on the basis of a proposed assets to equity ratio, unless that ratio is greater than 25 to 1. This approach would not preclude the proposed ratio from being a factor in the Board's consideration of an application, but it would make clear that an effective limit of 10 to 1 is too low and not sufficient grounds for denying an application.

The second regulatory issue concerns the Board's requirement that proposals that an ETC be permitted to hold inventory in excess of $2 million also be referred to Washington. That requirement, by promising bureaucratic difficulties, sends the same negative signal as the regulation on leverage ratios. It is also particularly burdensome since $2 million is an extraordinarily low amount, particularly as ETC's begin to expand. A better approach, in my judgment is to move away from this kind of arbitrary standard, at least as it is applied across-the-board to all ETC's. In some cases $2 million may be an appropriate limit to adequately protect bank safety; in other cases it may not. The best approach would be to tie such a limit, if it is to be imposed at all, to the circumstances of a particular case, and to the extent that it would effect safety and soundness of the affiliated bank. Therefore, the provision in this bill would prohibit the Board from imposing by regulation a dollar limit on inventories except on a case-by-case basis as just described.

Mr. President, these are not all of the problems with current law that need to be addressed, but they are the ones that have become the most obvious in the 3 years since enactment of the legislation. I would not pretend to suggest that these changes by themselves will lead to the creation of thousands of new ETC's. As I indicated at the beginning of my statement, the biggest disincentive to ETC formation has been the overvalued dollar and the general difficult situation for American exports over the past 3 years. These changes will not correct those problems, which we address in other legislation—notably S. 1860, the Trade Enhancement Act, introduced by 34 Senators on November 20. The changes I am proposing today, however, will remove some built-in disincentives to ETC formation, will clarify current law, and in the process will send a clear signal to the Federal Reserve Board that Congress intends an interpretation of this law that will encourage, rather than discourage ETC formation. Mr. President, I ask that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1934

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Export Trading Company Amendments Act of 1985".

DEFINITION OF EXPORT TRADING COMPANY

SEC. 2. Section 14(c)(14)(F)(i) of the Bank Holding Company Act of 1956 is amended to read as follows:

"(i) the term 'export trading company' means a company which does business under the laws of the United States or any State, which is exclusively engaged in activities related to international trade, and which is organized and operated principally for purposes of exporting goods or services produced in the United States by the company, its affiliates, or unaffiliated persons, or for purposes of providing one or more export trade services to facilitate the exportation of goods or services produced in the United States by unaffiliated persons. A company shall be deemed to be organized and operated principally for such purposes if its revenues from exporting goods or services produced in the United States or from providing export trade services, as defined in clause (ii), exceed its revenues from importing into the United States goods or services produced outside the United States.".

RELATIONS WITH AFFILIATES

SEC. 3. Section 23A(d) of the Federal Reserve Act (12 U.S.C. 371c(d)) is amended—

(1) by striking out "and" at the end of paragraph (6);

(2) by striking out the period at the end of paragraph (7) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(8) transactions with an affiliate which is an export trading company as defined in section 4(c)(14)(F)(i) of the Bank Holding Company Act of 1956.".

LEVERAGE

SEC. 4. Section 4(c)(14)(A)(iv) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(A)(iv)) is amended by adding at the end thereof the following: "The Board may not disapprove a proposed investment solely on the basis of the proposed assets to equity ratio of an export trading company unless the proposed annual average ratio is greater than twenty-five to one.".

INVENTORY

SEC. 5. (a) Section 4(c)(14)(A) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(A)) is amended—

(1) by redesignating subparagraphs (v) and (vi) as subparagraphs (vi) and (vii), respectively; and

(2) by inserting after subparagraph (iv) the following:

"(v) The Board may not impose, by regulation, a dollar limit on the amount of goods which export trading companies may maintain in inventory. However, the Board may impose, by order, a dollar limit on the amount of goods which a particular export trading company may maintain in inventory if, under the particular facts and circumstances, it finds that such limit is necessary to prevent risks that would affect the financial or managerial resources of an investor bank holding company to an extent which is likely to have a materially adverse effect on the safety and soundness of any subsidiary bank of such bank holding company.".●

By Mr. STEVENS:

S. 1935. A bill to direct the Secretary of the department in which the Coast Guard is operating to cause certain vessels to be documented as vessels of the United States so as to be entitled to engage in the domestic coastwise trade, and for other purposes; to the Committee on Commerce, Science, and Transportation.

REVITALIZING THE DOMESTIC CRUISE SHIP INDUSTRY

● Mr. STEVENS. Mr. President, today I am introducing legislation which will permit five foreign-built passenger ships to be documented under the laws of the United States. The purpose of this bill is to promote the development of a domestic cruise ship industry. Our domestic industry is nonexistent, and will remain so without the utilization of foreign-built vessels.

The bill will sustain jobs for Americans in industries which are struggling for survival. American seamen will man these vessels, and all repairs and modifications to meet Coast Guard inspection requirements will be done in U.S. shipyards. The development of a domestic industry will benefit many U.S. ports which might not be included in the routes traveled by foreign cruiseships. My State is a prime example of the impact a cruise industry can have on ports. Foreign cruises make periodic stops in various towns in southeast Alaska. The tourism generated through these cruises is rapidly becoming the mainstay of much of southeast Alaska's economy.

The legislation has been structured in a manner that will allow any U.S. citizen to file an application for documentation. It specifies three criteria designed to bring modern and militarily useful vessels into the trade. The first criterion requires that each vessel have a minimum of 400 passenger cabins with modern facilities. This condition will ensure that any vessel brought into the domestic trade is large enough to make a sound contribution to the Navy's ability to move people or act as a hospital ship during times of emergency.

The second criterion requires that each vessel be capable of being converted into a troop ship.

The last criterion imposes an age limitation on each vessel to ensure modernity, and prohibits potential applicants from contracting for the construction of new passenger vessels in foreign shipyards. The purpose behind the bill is to revitalize a U.S. industry, not encourage the growth of foreign industries.

The criteria are based on the assumption that at least 10 ships can be purchased on the world market by U.S. citizens who wish to engage in the domestic trade, and there is a strong possibility that many more ships will qualify once further data has been collected. If this assumption is proven to be incorrect, I will modify the criteria in a manner which provides U.S. citizens with an equal opportunity to seek out vessels to be reflagged for the domestic trade.●

By Mr. KERRY (for himself, Mr. DODD, Mr. KENNEDY, Mr. PELL, and Mr. SIMON):

S. 1936. A bill to amend title 23, United States Code, to provide for a uniform system for handicapped parking; to the Committee on Environment and Public Works.

HANDICAPPED PARKING ACT

● Mr. KERRY. Mr. President, I rise today to introduce legislation that is long overdue. Across America millions of citizens suffer from physical disabilities which limit their mobility. To assist the more than 6 million individuals who require special parking privileges in order to travel, many States have allocated parking spaces for these citizens and have made available special license plates to identify cars able to access these parking spaces.

Millions of Americans use automobiles every day to conduct their daily lives, but for disabled Americans this is not always an easy task, and in certain States it can, in fact, prove overwhelmingly difficult. The situation dealing with parking for the handicapped is particularly lamentable. At least 25 States in the country lack reciprocity agreements regarding handicapped parking licenses plates. In effect, when a disabled individual travels from one State to another where differing handicapped parking laws exist, and reciprocity does not, then that individual's disability is no longer recognized.

Fortunately, efforts have been made to alleviate some of the problems associated with parking for the handicapped. Tough penalties are issued when nonauthorized vehicles park in special zones; an increasing number of State legislatures are passing uniform policies; and public awareness to recognize and honor the international symbol of access is quickly growing. But these efforts have just begun to address the problem.

A further point to be made, is that transportation is an essential element to achieving one's basic daily human needs. And while I applaud the U.S. Congress for developing and implementing a variety of progressive laws designed to enhance training and the employment of disabled Americans, I regrettably note that the public transportation systems needed to bring these citizens to their jobs has lagged far behind. Consequently, disabled persons must rely on the automobile for transportation or otherwise be forced to forgo employment.

I cannot stress the fact enough that being able to access one's job, one's doctor, or to visit one's family in a neighboring State is not a privilege, Mr. President, but quite frankly it is a necessity; moreover, it is a necessity that most of us take for granted. It is for this purpose that I am introducing today the Handicapped Parking Act of 1985. This act will do several things to alleviate some of the transportation-related burdens placed on our disabled citizens. The act makes the international symbol of access universal and requires that this symbol be put on all handicapped license plates and placards. This will work to ensure that all law enforcement officials are able to recognize handicapped plates regardless of the State in which they are issued. The legislation also mandates reciprocity directing all States to honor handicapped license plates from other States. The Handicapped Parking Act of 1985 will require the Secretary of Transportation to conduct a study 18 months after the bill is enacted to determine the extent of compliance regarding reciprocity by the States. If the Secretary finds overwhelming noncompliance, then the Secretary is mandated to withhold 1 percent of a State's transportation funds.

I urge my colleagues to join with me today in cosponsoring this essential act which will uphold the basic rights of transportation for individuals with disabilities by implementing a national uniform system designed to preserve disabled citizen's rights to personal mobility.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1936

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Handicapped Parking Act of 1985".

SEC. 2. HANDICAPPED PARKING.

(a) ESTABLISHMENT OF UNIFORM SYSTEM FOR HANDICAPPED PARKING.—Chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following new section:

"§ 159. Handicapped parking

"(a) The Secretary shall reduce a State's apportionment of Federal-aid highway funds under each of the sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 1 percent of the amount to be apportioned in any fiscal year for any such State which does not have in effect a uniform system for handicapped parking approved by the Secretary.

"(b)(1) For purposes of this section, a uniform system for handicapped parking is a system which—

"(A) adopts the International Symbol of Access (as adopted by Rehabilitation International in 1969 at its 11th World Congress on Rehabilitation of the Disabled) as the only recognized symbol for the identification of vehicles used for transporting individuals with handicaps which limit or impair the ability to walk;

"(B) provides for the issuance of license plates displaying the International Symbol of Access for vehicles which will be used to transport individuals with handicaps which limit or impair the ability to walk, under criteria determined by the State;

"(C) provides for the issuance of removable windshield placards (displaying the International Symbol of Access) to individuals with handicaps which limit or impair the ability to walk, under criteria determined by the State;

"(D) provides for the same schedule of fees for the licensing or registration of a vehicle used to transport such individuals with handicaps as for other vehicles operated in the State; and

"(E) for purposes of easy access parking, recognizes licenses and placards displaying the International Symbol of Access which have been issued by other States and countries.

"(2) The uniform system for handicapped parking described in paragraph (1) shall be submitted by a State to the Secretary and shall be accompanied by such information as the Secretary considers necessary.".

(b) CONFORMING AMENDMENT.—The analysis of such chapter is amended by adding at the end thereof the following item:

"159. Handicapped parking.".

SEC. 3. STUDY CONCERNING STATE COMPLIANCE.

Beginning not later than 18 months after the effective date of the Act, the Secretary of Transportation shall annually evaluate compliance by the States with the amendments made by this Act. The Secretary shall submit to Congress an annual report on such evaluation on compliance by the States.

SEC. 4. EFFECTIVE DATE.

The provisions of this Act shall take effect October 1, 1988.●

By Mr. HATFIELD (for himself, Mr. ZORINSKY, Mr. BYRD, Mr. NUNN, Mr. INOUYE, Mr. DURENBERGER, Mr. ROCKEFELLER, Mr. ANDREWS, Mr. KERRY, Mrs. HAWKINS, Mr. STENNIS, Mr. DOLE, Mr. HOLLINGS, Mr. MATHIAS, Mr. WEICKER, Mr. PROXMIRE, Mr. THURMOND, Mr. COCHRAN, and Mr. STAFFORD):

S.J. Res. 245. Joint resolution designating "National Epidermolysis Bullosa Awareness Week"; to the Committee on the Judiciary.

NATIONAL EPIDERMOLYSIS BULLOSA AWARENESS WEEK

● Mr. HATFIELD. Mr. President, for the majority of Americans, every morning involves a series of routine tasks in preparation for a new day. This morning I showered, dressed, ate breakfast, and walked to the office. For most of us these tasks are effortless. But for a victim or epidermolysis bullosa [E.B.], accomplishing these tasks is a result of extreme effort and generally requires assistance. Those who suffer from E.B. experience pain from just a touch or an accidental nudge. This pain prevents them from carrying out many of the ordinary tasks which most of us take for granted.

E.B. is a term applied to a group of inherited disorders whose primary feature is the formation of severe skin and tissue blisters. The effects of E.B. on the human body are devastating. It blisters the skin and ruptures old wounds, which create weeping sores that rarely heal. As a result of these wounds anemia, malnutrition, and infection occur. The dystrophic form of E.B. afflicts victims with additional trauma: intestinal erosion, severe pain, scarring, deformities, corneal erosions, and carcinoma.

The exact number of individuals suffering from E.B. in the United States is undetermined. For decades medical practitioners have dealt with E.B. as though it were a skin disorder, and frequent misdiagnoses have made it impossible to get a precise number of E.B. victims in the United States. In my home State several victims of E.B. have sought medical attention. But when I inquired among members of the medical community as to how many people have E.B. in Oregon, I was told that an accurate appraisal would be difficult to gage. There is no reliable statistical information available because E.B. victims remain hidden in the shadows of life and emerge only when their pain becomes too severe to tolerate or when their vital signs diminish to life threatening levels. It is estimated that as many as 15,000 to 20,000 Americans suffer from E.B., and another 25,000 to 30,000 persons in this country may be carriers. Presently, 1 out of every 50,000 infants born in the United States, is born with E.B. The disease is a serious, and presently incurable, defect that casts the lives of thousands of children, adults, and their families into a condition of physical, financial, and emotional torment.

Many of you may remember Cal Larson. Cal is a young man I came to know 3 years ago while he and his parents were traveling from office to office on the Hill. They sought to personally communicate to the Members of Congress the great need for support in identifying victims of E.B. and fighting its tragic symptoms.

It seemed all the more significant that sufferers of E.B. were leading their own crusade. Theirs was, and is, a crusade for increased public awareness, research, and ultimately a cure for those who suffer from E.B.

Six years ago a group of concerned citizens formed "D.E.B.R.A.," the Dystrophic Epidermolysis Bullosa Association of America. Under the energetic leadership of Arlene Pessar, D.E.B.R.A. has labored to increase the public's awareness of E.B. It was 4 years after this organization was founded when Cal brought E.B. to my attention. In the months that followed, I became increasingly aware of the importance of finding a cure and improving the methods of care and treatment for Cal and the many others who are suffering from the devastating effects of this disease.

In the 98th Congress, 27 of my colleagues and I initiated legislation establishing a National Epidermolysis Bullosa Awareness Week. History has indicated that increased public awareness of a rare disease translates into increased research activities to find a cure for that disease. As a result of the passage of last year's E.B. resolution, the level of awareness and concern in the public and in the medical profession has greatly increased.

The Labor-H.H.S. appropriations bill for fiscal year 1985 contained language urging the National Institute of Arthritis, Diabetes, Digestive and Kidney Disease [NIADDK] to increase grants for research dealing with dermal-epidermal interactions, the formation and destruction of collagen, and the mechanisms of blistering skin. In previous years no grants has been issued for research in E.B. In October of this year I received a letter from D.E.B.R.A. informing me that NIADDK has issued nine research grants totaling $750,000 for specific research in E.B. for fiscal year 1985. Already, the progress of this research is impressive. I am hopeful that we will be able to continue, and perhaps increase the amount of research devoted to E.B. for fiscal year 1986.

On behalf of the people who suffer from this debilitating disorder, I ask my colleagues to once again join me in cosponsoring this joint resolution. With continuing interest in this body, the medical community, and the public, I am hopeful that we may soon cross out another name on the list of incurable diseases and leave E.B. to the medical history books. Your cosponsorship is but one small step toward this goal.

Mr. President, I ask that the following article on E.B., be reprinted in the RECORD, and that the text of the joint resolution be reprinted immediately before the article.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S.J. RES. 245

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas the incidence and prevalence of epidermolysis bullosa presents a significant health problem in the United States;

Whereas epidermolysis bullosa is an inherited disorder showing widespread blistering and skin erosions which result in pain, scarring, deformity, contractures, malnutrition, anemia, gastro-intestinal problems, dental problems and carcinoma;

Wheres an estimated ten to fifteen thousand Americans of both sexes are afflicted with the disease, and another twenty to thirty thousand Americans may be carriers of this disease;

Whereas the nation faces a continuing need to support innovative research into the causes, treatment, and cure of epidermolysis bullosa;

Whereas it is appropriate to focus the nation's attention upon the plight of epidermolysis bullosa sufferers and upon continuing peril epidermolysis bullosa poses to humanity:

Now, be it resolved by the Senate and the House of Representatives of the United States of America in congress assembled, that the week of December 1st through December 7th, 1986, is designated "National Epidermolysis Bullosa Awareness Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the citizens of the United States to observe the week with appropriate programs, ceremonies and activities.

RESEARCHERS SEEK CAUSES OF ENIGMATIC BLISTERING DISORDERS

(By Mark Bello)

For children born with a rare and incurable skin disease, a loving hug, an accidental nudge, or just eating can cause excruciating pain. Slight friction causes their fragile skin and mucous membranes to blister, subjecting them to frequent scarring and the almost constant threat of secondary infection. Repeated injury may fuse their fingers or toes, and because protein is lost through open sores and scarring constricts the esophagus, most suffer from chronic malnutrition.

These children, many of whom will die before age 30, suffer from recessive dystrophic epidermolysis bullosa, "a disease that is as devastating as any known to man," according to Dr. Jo-David Fine, director of dermatologic research at the University of Alabama in Birmingham. Beyond the suffering of its victims, the disorder imposes severe burdens on victims families, creating emotional and financial tensions, adds Arlene Pessar, executive director of the Dystrophic Epidermolysis Bullosa Research Association of America (DEBRA). According to Ms. Pessar, whose 14-year-old son is afflicted with the disorder, families of severely affected individuals may spend $10,000 a year just for protective dressings, antibiotics, and high-protein foods. Some families may travel throughout the world searching for a cure, she says, while others, frustrated by the lack of effective treatment, may place their youngsters in institutions.

The disfiguring disease is the most severe form of about 20 skin disorders collectively referred to as epidermolysis bullosa (EB). DEBRA estimates that between 25,000 and 50,000 Americans have one of the forms of EB, all of which are characterized by the

fragile, blister-prone skin of victims. All but one of the incurable, lifelong disorders are hereditary, and even the mildest and most common form—a nonscarring disease called localized EB simplex—can transform walking, typing, and other routine activities into painful ordeals.

The enigmatic disorders have yielded little to scientific investigation. Researchers have yet to identify the fundamental biochemical defects responsible for any one form of EB. Treatment is limited to alleviating patients' symptoms and avoiding the many complications associated with the disorders. But growing interest in the complex biology of human skin and new laboratory techniques have improved the prospects for obtaining critical knowledge.

"We are getting close to the core of the disease," Dr. Lowell A Goldsmith, chief of dermatology at the University of Rochester Medical Center in Rochester, New York, says of research on recessive dystrophic EB, the most intensively studied of the disorders. In separate projects, Dr. Goldsmith's team and scientists at the National Cancer Institute (NCI) have determined that certain yet-to-be characterized components of the dermis, the skin's lower layer, are lacking in patients with the disease. This work also led to the development of monoclonal antibodies for diagnosing the different forms of EB and for conducting basic research. These new probes also promise to be sensitive indicators of how patients respond to experimental treatments.

Applying the findings of earlier studies, scientists at General Clinical Research Centers (GCRC's) and elsewhere are conducting clinical trials of the drug phenytoin (Dilantin), which inhibits production or release of an enzyme known to be abnormally abundant in victims of recessive dystrophic EB. And scientists at the Washington University GCRC in St. Louis, Missouri, are evaluating vitamin A derivatives, which reduce production of the suspect enzyme, as potential treatments.

In patients with recessive dystrophic EB, as well as those with the dominantly inherited and less severe form of dystrophic EB, blistering occurs within the dermis, below the critically important region known as the basement membrane zone. The basement membrane is a thin tissue layer that binds the dermis and the upper skin layer, or epidermis.

On the basis of work that began during the 1960's, scientists have developed two not necessarily exclusive theories to account for the faulty adhesion of the dermis in patients with recessive dystrophic EB. One theory stems partly from work done at the University of North Carolina, Chapel Hill. Scientists found abnormally low numbers of anchoring fibrils in samples of both blistered and healthy-appearing skin of patients with recessive dystrophic EB. These fibrils bind the dermis to the basement membrane in a manner likened to the stitching that holds the leather cover of a baseball to the core. The finding seems to account for the frailty of the patient's skin, but scientists have yet to identify the biochemical cause of the defect in the fibrils.

The other theory is based on studies done by Drs. Arthur Z. Eisen and Eugene A. Bauer of the Washington University Medical School in St. Louis. These researchers discovered that patients with the recessive dystrophic disorder produce abnormally high levels of an altered form of collagenase, accelerating the breakdown of collagen, the protein that is the major constituent of skin and other connective tissue. In the patients studied by Drs. Eisen and Bauer, levels of the enzyme in patients' skin were more than four times higher than the levels in samples taken from healthy control subjects. Collagenase levels in patients with other forms of EB, including dominant dystrophic EB, were comparable to those of the control subjects.

This discovery provides a biochemical explanation for blistering in disease victims, although some researchers suspect that a more fundamental disease mechanism remains to be uncovered. But according to Dr. Bauer, the enzyme abnormality may account for the defect in anchoring fibrils. Researchers still must determine the biochemical composition of the fibrils, but if they are comprised of collagen or if they attach to type I or type III collagen in the dermis, the fibrils may prove to be the targets of excess collagenase. Dr. Bauer says.

Despite these unknowns, the scientists' discovery has spawned efforts to develop the first treatment aimed at a suspected cause of EB. In clinical trials now under way at 20 medical research centers, including several GCRC's scientists are evaluating phenytoin—an anticonvulsant drug that somehow inhibits the activity of collagenase—for its effectiveness in reducing blistering in patients with recessive dystrophic EB.

The trials, which are being sponsored by the Orphan Drug Office of the Food and Drug Administration, evolved from preliminary studies performed by Dr. Bauer and his associates at the Washington University GCRC. In 14 of 22 recessive dystrophic EB patients treated with phenytoin, the number of blisters and skin erosions decreased by an average of 46 percent, and when drug therapy was discontinued, blistering returned to pretreatment levels. The number of blisters decreased by less than 40 percent in eight patients, who were classified as unresponsive to phenytoin therapy.

The results of in vitro studies of fibroblasts, the skin-cell precursors that produce collagenase, were the same as those uncovered during preliminary clinical tests. Dr. Bauer and Dr. Thomas W. Cooper found that collagenase expression was suppressed when the fibroblasts of clinically responsive patients were incubated with phenytoin. In fibroblasts of patients who were unresponsive to therapy, enzyme expression was not inhibited. Based on evidence gathered in the clinical and in vitro studies, Dr. Bauer suggests that differences in responsiveness to phenytoin therapy may have a genetic origin and that responsive and unresponsive patients represent two biologically distinct groups.

Scientists are investigating this possibility in the ongoing multicenter study in which the patients' responses to phenytoin will be compared with their responses to a placebo. Besides monitoring the total number of blisters on a patient's body, the researchers also are measuring the surface areas of blisters and skin erosions, and they are evaluating the treatment's effect on three chronically reinjured areas. In addition, investigators paticipating in the 3-year study will monitor the patients' psychological well-being while undergoing treatment, seeking to establish whether the therapy translates into improvements in the quality of the subjects' lives.

Concurrent with their participation in the phenytoin trials, Dr. Bauer and his colleagues also are evaluating the therapeutic value of vitamin A derivatives, or retinoids. In contrast to phenytoin, whose ability to suppress collagenase needs further delineation, the retinoids have been shown to inhibit collagenase production and to induce the fibroblasts to make an agent that suppresses the enzyme's activity. Also, these compounds inhibit expression of gelatinase, another enzyme involved in collagen degradation. In their evaluation of three retinoids, the Washington University researchers found that 13-cisretinoic acid, at dosages of 0.4 milligrams per kilogram of body weight, significantly reduced the number of blisters in the three patients studied. At dosages exceeding 1 milligram, however, the patients' lesions increased. The researchers also discovered that the compound caused drying of the skin, headaches, and other serious side effects, even at low dosages. According to the researchers, the findings suggest that the retinoids are promising therapeutic agents but that additional study is needed, particularly to establish dosage levels that minimize the potential for side effects.

Though they hold promise for only one form of EB, the drug evaluations are milestones in the fight against a group of disorders that until recently attracted the interest of only a handful of scientists. But even though EB research has intensified during the past few years, scientists concede that their efforts up to this point constitute only the beginning. They also note that progress against other forms of EB is far behind the gains made against the recessive dystrophic disorder. Thus far, scientists have succeeded in characterizing the physical features of the disorders. This knowledge greatly improved diagnosis and refined disease classification, although the symptoms of some EB patients defy diagnostic categories. And during the past decade scientists have begun to fill in the biochemical details, a necessary prelude to the ultimate basic-research goal of identifying the gene defects that cause the various forms of EB.

The key to success in this second phase of research is locating sufficient numbers of patients with the disorders. At a recent conference held in Washington, D.C., Dr. Roger Pearson, a dermatologist at Rush-Presbyterian-St. Luke's Medical Center in Chicago, complained that "there are so many categories of EB, but so few individuals to work with." Dr. Pearson, whose electron microscope studies during the 1960's greatly enhanced understanding of EB, added that the disorders must be classified into even more distinctive categories so that researchers can focus their search for the underlying biochemical defects.

According to Dr. D. Martin Carter, director of the Laboratory for investigative Dermatology at Rockefeller University Hospital, the low incidence of some forms of EB accounts for part of the difficulty in locating patients. But a more serious obstacle, Dr. Carter says, is that many patients are "hidden" from researchers because they do not seek medical attention for their incurable affliction.

Researchers participating in the phenytoin study hope to correct this problem by creating a registry of EB patients and by setting up a network for exchanging information, tissue samples, and other resources among researchers. Dr. Carter, director of the multicenter drug trials, explains. "If we can identify uniform populations of patients in terms of mode of inheritance and clinical and pathologic presentation, our chances for identifying the responsible genes will improve," he says. "This will benefit basic-research efforts, and ultimately the answer to

disorders like EB will come from basic research."

As scientists take aim at the biochemical abnormalities that weaken the integrity of the basement membrane zone, the more complex the situation seems.

For example, researchers once believed there was only one type of collagen, but 11 forms of the connective tissue protein have now been identified, including three forms that were discovered within the past several months, according to Dr. Jouni Uitto, director of dermatology research at the Harbor-UCLA Medical Center in Torrance, California. Moreover, Dr. Uitto notes that each type of collagen is acted upon by a separate form of collagenase.

Another example of the perplexing nature of EB research is the growing number of abnormalities associated with recessive dystrophic EB. While striving to find a link between the deficiency of anchoring fibrils and the excess of collagenase in patients with the disorder, scientists have uncovered other abnormalities. At the Washington conference, Dr. Mark Eisenberg, a research fellow at the University of South Wales in Australia, reported that his in vitro studies indicate that another enzyme abnormality may be present in patients with the recessive dystrophic disorder, as well as those with junctional EB, in which blistering splits the top layer of the basement membrane. Dr. Eisenberg noted that skin fibroblasts manufacture collagenase in a form that must be activated by the enzyme chymase. According to the Australian scientist's studies, the collagenase precursor is activated much more rapidly in the skin samples taken from patients with recessive dystrophic EB than it is in the samples obtained from healthy control subjects. The finding, he said, suggests that chymase plays a role in the disease. Another possibility is that the collagenase is abnormal.

Further study of the enzyme's role may lead researchers to abnormalities in the mast cells, the dermal cells that manufacture chymase and many other physiologically active compounds. Dr. Eisenberg noted that scientists at the University of Pennsylvania have reported finding higher-than-normal numbers of mast cells in the dermis of patients with the recessive and junctional forms of EB. Besides chymase, other compounds produced by these poorly understood cells may be involved in both disorders, he speculated.

To help them sort through the complexities of EB, scientists have utilized a diagnostic technique called immunofluorescence mapping. Without using an electron microscope, which is not available at many hospitals, dermatologists can now establish the distribution of various basement membrane components and thereby determine whether blistering occurs above, within, or below the membrane. The method, which uses fluorescently stained antibodies to specific basement membrane components, yields accurate diagnoses and is more rapid than the use of an electron microscope for diagnostic studies.

Clues that may lead scientists to the fundamental biochemical cause of recessive dystrophic EB have emerged from work done with monoclonal antibodies. With these highly specific probes, researchers have identified several components of the basement membrane, a region of the skin that had been inaccessible with other scientific methods. Besides enhancing knowledge of skin biology, the probes also may refine classification of the recessive dystrophic disorder, which takes several forms.

Using monoclonal antibodies researchers have zeroed in on some still uncharacterized components of the basement membrane that are affected in recessive dystrophic EB. Two of these components may allow researchers to determine whether there is a direct link between excess collagenase and anchoring-fibril deficiencies in patients with the disorder. Working with Dr. Robert A. Briggaman, a professor of dermatology at the University of North Carolina, Dr. Lowell Goldsmith of the University of Rochester produced two new monoclonal antibodies that bind to one or more portions of the anchoring fibrils. The researchers discovered, however, that neither antibody reacts in samples of blistered and healthy-appearing skin obtained from 11 patients with recessive dystrophic EB. In contrast, the antibodies do react in samples taken from patients with other forms of EB, including a dominant dystrophic disorder associated with diminished numbers of anchoring fibrils.

In ongoing research, Dr. Goldsmith is using the two antibodies, which are called AF-1 and AF-2, to isolate and then characterize the anchoring fibrils. The Rochester researcher says some evidence suggests that the fan-shaped structures are composed of a type of collagen, but the fibrils do not react with antibodies to any of the well characterized types of collagen.

"In recessive dystrophic EB," Dr. Goldsmith explains, "anchoring fibrils are deficient or missing. Is this because the fibrils are susceptible to excess collagenase or are there other explanations? We still face detailed biological questions, but our antibodies may give us the means of answering them."

Some of the answers may come from an experiment in which Dr. Goldsmith and his associates are using AF-1 and AF-2 to monitor the development of anchoring fibrils in epidermal, cells grown in culture. According to Dr. Goldsmith, the fibrils are believed to be made in the epidermis and then transported to the dermis. But many important details of the process, including how the dermis is attached to the fibrils, are unknown. By understanding how anchoring fibrils develop in normal skin, the researchers may be able to determine what goes awry in the skin of patients with recessive dystrophic EB.

If the Rochester scientists learn that the fibril components defined by the antibodies play pivotal roles in skin adhesion, EB researchers would have a very sensitive way of quantitating responses to experimental therapies, Dr. Goldsmith says. "And if you can quantitate, you can also start to screen potential therapeutic agents much more rapidly."

At NCI's Dermatology Branch, Dr. Stephen I. Katz and his colleagues, who are credited with identifying or characterizing several basement membrance components, have created a different monoclonal antibody that identifies another previously uncharacterized component of the basement membrance zone. This antibody, called KF-1, binds to a noncollagenous component of the lamina densa, the bottom layer of the basement membrane. Immunofluorescence maping of samples of unblistered skin from six patients with the recessive disorder failed to detect the uncharacterized component in five subjects and barely detected it in the remaining patient. And KF-1 reacted much more weakly with samples from seven patients affected by dominant dystrophic EB than with samples obtained from healthy subjects and from patients with the epidermal or junctinal forms of EB.

"It appears that the component defined by the antibody may play a role in the adhesion of the dermis to the epidermis," says Dr Fine, who was a member of the NCI team before assuming his current position at the University of Alabama in Birmingham, where he also is chief of the dermatology service at the Veterans' Administration Medical Center. "Therefore, the relative diminution or absence of KF-1 antigen in dystrophic EB skin may, at least in part, explain the finding of marked skin fragility in both forms of the disease."

In his current position, Dr. Fine has expanded the scope of his studies to search for biochemical abnormalities in the skin of patients with the simplex form of EB. This disorder, the most common form of EB, is associated with skin fragility and blister formation within the epidermis. In preliminary work he has identified an apparent membrane defect in the epidermal cells of patients with EB simplex, although the clinical significance of this finding remains to be determined. Dr. Fine suggests that these preliminary findings in normal-appearing EB simplex skin indicate that the epidermis is inherently biochemically abnormal, rather than defective secondary to other processes, including enzyme abnormalities. He says considerable work must be done to confirm this hypothesis.

Scientists believe that when the basic biochemical mechanisms of EB are known, recombinant DNA methods will lead them to the genetic errors, which are the ultimate causes of the disorders. And as researchers improve understanding of the many forms of EB, their findings are likely to benefit other areas of dermatologic research, since many other skin disorders are centered in the basement membrane zone. Dr. Kaltz of NCI notes, for example, that this narrow tissue layer "is thought to be very important in skin cancer, because when tumors invade, they have only one place to enter and that's through the basement membrane."

Rockefeller University's Dr. Carter adds, "Because of frequent skin trauma, some EB patients develop skin cancer. By studying these patients, we may be able to indentify the factors related to trauma that influence the transformation to a cancerous state and tumor generation."●

By Mr. DIXON (for himself, Mr. HEINZ, Mr. CRANSTON, Mr. RIEGLE, Mr. CHILES, Mr. NUNN, Mr. PRYOR, Mr. MATTINGLY, Mr. SIMON, Mr. MATSUNAGA, Mr. BUMPERS, Mr. STAFFORD, Mr. MOYNIHAN, Mr. HOLLINGS, Mr. ROCKEFELLER, Mr. EAGLETON, Mr. GLENN, Mr. WEICKER, Mr. KENNEDY, Mr. SPECTER, Mr. HARKIN, and Mrs. HAWKINS):

S.J. Res. 246. Joint resolution to designate May 25, 1986 as "Hands Across America Day" for the purpose of helping people to help themselves, and commending United States Support of Artists for Africa and all participants for their efforts toward combating domestic hunger with a 4,000-mile human chain from coast to coast; to the Committee on the Judiciary.

HANDS ACROSS AMERICA DAY

Mr. DIXON. Mr. President, today we are intorducing a resolution to designate May 25, 1986 as "Hands Across America Day."

This extremely ambitious effort next May, is designed to focus the attention of America on hunger and homelessness in this country. The project is being coordinated by USA for Africa, the group which accomplished the virtually impossible task of raising $33 million for famine relief in Africa.

At 3 o'clock on May 25, over 3 million people across the country, from coast to coast, will join hands, after having contributed between $10 and $35 each, to combat hunger and homelessness in America. The ceremony will include the singing of "America the Beautiful" and "We Are the World," which will be broadcast on radio stations across the country. It is hoped that as much as $100 million will be raised. Ten percent of the funds raised will be used for emergency needs, 50 percent of the funds will be used to support existing programs which feed and house people who are needy, and 40 percent will be used to develop new programs.

There are several corporate sponsors of this project. The Coca-Cola Corp. is underwriting the basic costs. Offices will be set up across the country to organize the human chain, which will begin at the Statue of Liberty and end in Los Angeles. Cochairmen of the project are Bill Cosby, Kenny Rogers, Pete Rose, and Lily Tomlin. Many other entertainers have also signed up to help in the effort.

I hope to be in line in Chicago on May 25 to demonstrate my support for this effort. I commend the organizers for their efforts in involving such a large segment of our population in addressing hunger and homelessness in America.

As we adjourn for the holidays, we cannot help but think of those among us who are less fortunate, and will not have the luxury of a warm place to sleep, or a meal to eat, while we are celebrating with our families and friends. In the richest country in the world, this unfortunate circumstance is a continuing disgrace.

Many of my colleagues may not be aware of how our Government first became involved in nutrition programs. It happened during World War II when thousands of recruits were rejected for the armed services because of physical and mental problems associated with malnutrition. Our Government established the eradication of malnutrition in America as a priority. We developed programs to eliminate this problem and became the best-fed, healthiest people in the world.

Recently, however, a physicians task force on hunger, which I have discussed on several occasions, estimated that at least 20 million American citizens now suffer from hunger, and that hunger is increasing rather than declining. Diseases are being reported by doctors across the country which are usually limited to Third World countries.

Illnesses such as toxemia and material anemia in expectant mothers have been reported. Doctors are seeing more and more infants suffering from low birth weight, the eighth leading cause of death in the United States. Wasting, stunting, marasmas and prosteo-chloasma in infants and children have also been documented. Compared to other industrialized nations, the United States ranks 17th, behind most of Western Europe, Japan, Australia, Singapore, and Hong Kong in its infant mortality rate. Our black infant mortality rate is 19.6 per thousand—comparable to Cuba and Costa Rica.

During a field hearing I held in Chicago last March, Dr. Quentin Young was a witness. Dr. Young is a professor at the University of Illinois Medical School, and president of the Health and Medicine Policy Research Group in Chicago. He made a statement which I will always remember. Thirty-three percent of the children under the age of 2 who are treated at Cook County Hospital are malnourished! One-third of these children are not only hungry, they will have health problems for the rest of their lives because of the epidemic spreading throughout our country.

These facts shock us, because they describe something none of us want to believe is possible in this country. Yet, the situation exists, it is getting worse, and we need to stop it quickly, as we did during World War II.

Homelessness is likewise a tragic problem which is not subsiding. It has been estimated that as many as 3 million people are homeless in the United States of America. There is emergency shelter available for approximately 110,000. The people affected are men, women, and childre ··ho have no address, no shelter, and who often sleep on the streets, under viaducts, on heat grates, and in abandoned buildings. The causes for their plight are as numerous as they are. Many are educated, unemployed, battered or abused by their families. Some are former patients of mental institutions, who have been discharged into communities where essential services are not available. All of them are abandoned, invisible people whom we see but try to ignore. We cannot remain oblivious to their existence. We must try to help them help themselves.

"Hands Across America" is an attempt to bring national attention to the neediest among us. The funds raised will augment the limited efforts which have been made by the Federal, State, and local governments and private organizations. It will be a day of unity and renewed commitment to give everyone in this country the right to be all they can be. This day will not eliminate the problem, but it will provide another important link in the partnership which must exist if we are to eradicate this national disgrace. When even one child goes hungry or one person freezes to death, it is a tragedy. When it occurs in this land of compassion and abundance, we must rededicate ourselves to seeing that it does not happen again.

I thank my colleagues, Senators HEINZ, CRANSTON, RIEGLE, CHILES, NUNN, PRYOR, MATTINGLY, SIMON, MATSUNAGA, BUMPERS, STAFFORD, MOYNIHAN, HOLLINGS, ROCKEFELLER, EAGLETON, GLENN, WEICKER, and KENNEDY for joining me in introducing this resolution. I urge all of my colleagues to join us in this effort to commend those who are involved in this historic effort. A similar resolution was introduced by a bipartisan group in the House, led by Congressman MICKEY LELAND of Texas. I am hopeful that both Houses will act on this measure as soon as possible.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 246

Whereas thousands of recruits were rejected during World War II because of physical and mental problems associated with malnutrition;

Whereas our government committed itself to ending this national problem by successfully devising programs to eliminate malnutrition in America;

Whereas our people became the best-fed, healthiest people in the world;

Whereas a Physicians Task Force on Hunger recently estimated that at least 20 million American citizens now suffer from hunger, and that hunger is increasing rather than declining;

Whereas physicians around the Nation are reporting an increase in nutrition-related health problems among the elderly and children, including diseases which are usually limited to third world countries;

Whereas homelessness is an ever-increasing national problem and more than half the homeless population in the United States is comprised of children and women;

Whereas it has been estimated that there are only enough shelters to house 111,000 men, women and children on a given night, and there are as many as 3,000,000 people in need of shelter;

Whereas the General Accounting Office reports that the principal causes of homelessness in America are: unemployment, a lack of resources for deinstitutionalized mental patients, increases in personal crises, cuts in public assistance programs, reduced availability of low-income housing, and alcohol and drug abuse;

Whereas domestic hunger and homelessness have resulted in part from cutbacks in nutrition, housing, health and social programs;

Whereas participation by all citizens who are interested in helping to address this enormous problem should be encouraged;

Whereas a private fund-raising effort by United Support of Artists for Africa entitled "Hands Across America" is planned for May 25, 1986;

Whereas millions of participants in this effort who will join hands across this country on that day should be commended for asking all Americans to rededicate themselves to fulfilling the most basic needs of our people in this land of compassion and abundance, by expending every effort to eradicate hunger and homelessness in our Nation: Now, therefore be it,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That May 25, 1986, is designated as "Hands Across America Day," and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

● Mr. HEINZ. Mr. President, I am pleased to join with Senator DIXON today as an original cosponsor of a resolution designating May 25, 1986 as "Hands Across America Day"—an occasion on which thousands of Americans will stand up together and join hands across the Nation to fight hunger and homelessness in this country.

Mr. President, we are a nation of wealth, and yet there are many among us who go to sleep at night hungry and homeless and without hope. This week, as many as 3 million Americans would give as their address an abandoned car, a heating grate, or a street corner. America's homeless include welfare mothers and children evicted from tenements; unemployed workers who drift from town to town in search of jobs; and the mentally disabled, turned out on the streets when State institutions were closed. America's homeless are also elderly couples who are no longer able to scratch out a meager living on a fixed income and are forced to abandon their home when the taxes and the cost of living exceed their means. Whatever their personal histories, America's homeless face the same brutal, isolated world.

While no one knows precisely how many Americans are going hungry or are malnourished, institutions involved in providing emergency food assistance have seen dramatic increases in the numbers of people seeking food assistance during the past few years. We do know that chronic malnutrition is a significant public health problem in low-income preschool children, leading to retarded growth, impaired learning ability and increased health problems. Health professionals are becoming increasingly aware that the elderly comprise a group nutritionally at risk and that serious disorders and disease can result from malnutrition.

Over the past few years, the plight of the Nation's homeless and hungry has attracted a great deal of concern and publicity. Private and public resources have been mobilized to attempt to meet the immediate needs for food and shelter. In addition to its other antipoverty programs, for example, the Federal Government provided $110 million nationwide in 1984 for a special emergency program operated through the Federal Emergency Management Agency. Hundreds of citizens have also voluntarily donated time and money to help feed the hungry and house the homeless. But even with these efforts, optimistic statistics show that only one in three homeless individuals will have a bed and a bowl of soup in a public or private shelter this winter. Other figures suggest that only a shocking 1 out of every 20 will be so lucky. Both figures illustrate how much is yet to be done. We must galvanize American citizens, business, and charitable groups to the cause and tap the vast resources of this great Nation to begin to solve this enormous problem.

We are a nation of compassionate people. From this country's beginning, our people have reached out and said give us your tired, your hungry, your poor. When we saw the children of Africa dying in multitudes from hunger and malnutrition, the American people were deeply moved and joined to assist in worldwide efforts to alleviate their plight. We should do no less for our own hungry and helpless.

The Hands Across America event will take place on Sunday, May 25, 1986. An expected, 10 million Americans will contribute between $10 and $35 to participate and join hands in a line stretching 4,000 miles from New York to Los Angeles. Many celebrities, companies, clubs, and churches will take part. Proceeds from Hands Across America will go toward the relief of hunger and homelessness in America. I urge my colleagues to support this resolution to bring national recognition to an effort that will go far in helping to reduce the misery of our less fortunate citizens and to tell them they have not been forgotten.●

● Mr. RIEGLE. Mr. President, I am pleased to join as an original cosponsor of this resolution. "Hands Across America Day" is an event designed to heighten public awareness and raise money for the hungry and the homeless through the joining of hands by volunteers across the country.

As we enter into the winter season, we are reminded of the plight of the homeless and the hungry. The homeless population has been estimated to be as large as 3 million, and continues to increase. The characterization of this population is shifting from the traditional stereotype of the single, middle-aged, white alcoholic male to a much more heterogenous group, including women, families, blacks, Hispanics, and the newly unemployed.

Two major factors that are thought to have contributed to the rise of homelessness are the deinstitutionalization of the Nation's mentally ill and a decline in federally assisted low-income housing programs. With the passage of the 1963 Community Mental Health Centers Act, hundreds of thousands of mental patients were released into communities over the next 20 years. Unfortunately, States and localities lacked the funds to provide shelters, or a plan on how to deal with them. In addition, Federal funds for low-income housing have declined from $30 billion in fiscal 1981 to $10 billion in fiscal 1985.

According to a recent "Hunger Watch U.S.A." survey conducted by Bread for the World, the number of hungry people continues to grow, and is expected to increase further over the next year. Federal food programs have been severely restricted due to funding cuts enacted in 1981. In order to respond adequately to the continuing hunger problem in the United States, these programs must be expanded and improved.

A step in this direction is a bill, S. 739, introduced by Senator DIXON, which I cosponsored, to establish a national endowment for the homeless. S. 739 would authorize up to $160 million a year for the endowment to provide grants to food and shelter organizations which serve the homeless. The endowment would also act as a clearinghouse for gathering and disseminating information about the homeless.

Clearly, designation of the day of May 25 as "Hands Across America Day" will provide an increased awareness of the problem of hunger and the homeless, and will call attention to initiatives such as S. 739 which attempt to provide a permanent national response to this problem. I urge my colleagues to join me in supporting this resolution.●

By Mr. McCLURE (for himself, Mr. MOYNIHAN, Mr. LUGAR, Mr. BURDICK, Mr. SIMON, Mr. BRADLEY, Mr. ROCKEFELLER, Mr. MATSUNAGA, Mr. DIXON, Mr. COCHRAN, Mr. ZORINSKY, Mr. KERRY, Mr. NUNN, Mr. THURMOND, Mr. METZENBAUM, Mr. HATFIELD, Mr. PELL, Mr. D'AMATO, Mr. SYMMS, Mr. GARN, Mr. DURENBERGER, Mr. WARNER, Mr. WILSON, Mr. EAST, Mr. STENNIS, and Mr. DENTON):

S.J. Res. 247. Joint resolution to designate the week of June 1 through June 7, 1986 as "National Theater Week"; to the Committee on the Judiciary.

NATIONAL THEATER WEEK

● Mr. McCLURE. Mr. President, today I have the honor of introducing, along with 25 of my colleagues, a joint resolution designating the week of

June 1 through June 7, 1986 as "National Theater Week."

This country has a rich cultural and artistic heritage. The theater has played an important role in the development of our identity as a people, blending our diverse backgrounds into the international language of the theater. Some people tend to think that the theater only exists along our coasts but that isn't true. Early pioneers brought their love of theater with them and the opening of the railroads brought a steady steam of performers. They may not have had fancy stage productions, but the performing arts have a strong foothold in all parts of the country.

This country is blessed by many professional theater groups performing in large cities. No one who has seen a major theatrical production can doubt that American theater is the best in the world. But, Mr. President, I believe it's important to remember all of the smaller organizations across the country that are bringing the joys of the performing arts to all Americans. I am particularly pleased to be the sponsor of this joint resolution because I wish to make the point that theater is very much alive and well in small town high schools, in community colleges, in universities and in smaller theater companies across the country.

My colleagues might be surprised to learn just how much theater we have in a rural State like Idaho. In Boise, we have the Idaho Shakespeare Festival, the Boise Little Theater, the Stagecoach Theater, New West Productions, and the Idaho Theater for Youth. In Coeur d'Alene, we have the Coeur d'Alene Summer Theater and the Coeur d'Alene Community Theater. The small town of Sandpoint boosts the Unicorn Theater. In Twin Falls, the Dillettantes perform, while the On the Road Theater Co. works out of Pocatello. Laughing Stock theater group serves the Ketchum/Sun Valley area and the Idaho Repertory Theater is in Moscow.

I think that's quite an impressive list.

In addition, all of Idaho's colleges and universities have outstanding theater groups. In 1984 and 1985, the University of Idaho won the regional competition for the prestigious Irene Ryan Acting Award, which is part of the American College Theater Festival held at the Kennedy Center.

Mr. President, theater is not just being performed in great halls with chandeliers. Idaho is not alone in our efforts to bring performances to Americans who will never visit Broadway.

Declaring a week in honor of the theater salutes the tremendously vibrant professional groups we have in major metropolitan areas. It salutes small organizations in small communities. It salutes the dedication of actors and actresses who strive for perfection no matter where the stage is. It salutes those of us in the audience who enjoy this national artistic treasure.

Mr. President, I ask unanimous consent that the text of my joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 247

Whereas many Americans have devoted much time and energy in advancing the cause of theater;

Whereas the theaters of America have pioneered the way for many performers and have given them their start in vaudeville and stage;

Whereas theater is brought to Americans through high schools, colleges, and community theater groups as well as through professional acting companies;

Whereas the citizens of America have been called upon to support the theater arts in the Nation's interest; and

Whereas many individuals and organizations are hailing the strength and vitality of the theaters of America: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of June 1 through June 7, 1986, shall be proclaimed as "National Theater Week" throughout the country and that the President of the United States is authorized to issue a proclamation calling upon the citizens to support this effort with assistance to theaters throughout the country.●

By Mr. WARNER:

S.J. Res. 248. Joint resolution to designate the week of March 2, 1986 through March 8, 1986 as "National Young Writers' Week"; to the Committee on the Judiciary.

NATIONAL YOUNG WRITERS' WEEK

● Mr. WARNER. Mr. President, it is my privilege today to introduce a joint resolution calling for the establishment of "National Young Writers' Week."

The week of March 2 through March 8, 1986 has been selected to coincide with a number of observances taking place within the educational community.

Illiteracy is a critical problem in our country.

At least 20 percent of the adult population is without full literacy skills.

A National Young Writers' Week will focus attention on this problem and provide strong incentives for learning development and creative writing.

In this effort, I am pleased to have the support of the National Education Association, the American Federation of Teachers, the National Committee of Teachers of English, and the National Association of School Principals.

I am hopeful that these groups and others will be working together to encourage wide participation.

Ideally, every classroom in America could in some way contribute.

Congressman MATTHEW MARTINEZ, representing the 30th Congressional District of California, has introduced a companion resolution in the House, and I am pleased to report that he already has 51 cosponsors.

I now urge the Senate to join in this effort and welcome the support of my colleagues.●

ADDITIONAL COSPONSORS

S. 376

At the request of Mr. CHAFEE, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of S. 376, a bill to amend the Internal Revenue Code of 1954 to deny an employer a deduction for group health plan expenses unless such plan includes coverage for pediatric preventive health care.

S. 1156

At the request of Mr. DENTON, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1156, a bill to amend chapter XIV of the Comprehensive Crime Control Act of 1984, relating to victims of crime, to provide funds to encourage States to implement protective reforms regarding the investigation and adjudication of child abuse cases which minimize the additional trauma to the child victim and improve the chances of successful criminal prosecution or legal action.

S. 1209

At the request of Mr. BUMPERS, his name was added as a cosponsor of S. 1209, a bill to establish the National Commission To Prevent Infant Mortality.

At the request of Mr. BIDEN, his name was added as a cosponsor of S. 1209, supra.

S. 1273

At the request of Mr. MCCLURE, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of S. 1273, a bill to authorize the Secretary of the Interior to construct, operate, and maintain the Minidoka powerplant rehabilitation and enlargement, Minidoka project, Idaho-Wyoming.

S. 1526

At the request of Mr. MATHIAS, the name of the Senator from Nevada [Mr. LAXALT] was added as a cosponsor of S. 1526, a bill to amend title 17, United States Code, to clarify the definition of the local service area of a primary transmitter in the case of a low power television station.

S. 1543

At the request of Mr. MATHIAS, the name of the Senator from Vermont [Mr. STAFFORD] was added as a cosponsor of S. 1543, a bill to protect patent owners from importation into the United States of goods made overseas by use of a U.S. patented process.

S. 1574

At the request of Mr. LUGAR, the names of the Senator from Hawaii

[Mr. MATSUNAGA] and the Senator from Maine [Mr. COHEN] were added as cosponsors of S. 1574, a bill to provide for public education concerning the health consequences of using smokeless tobacco products.

S. 1756

At the request of Mr. SIMON, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 1756, a bill to authorize the President to present to Sargent Shriver, on behalf of the Congress, a specially struck medal.

S. 1822

At the request of Mr. THURMOND, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 1822, a bill to amend the Copyright Act in section 601 of title 17, United States Code, to provide for the manufacturing and public distribution of certain copyrighted material.

S. 1874

At the request of Mr. WEICKER, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 1874, a bill to authorize quality educational programs for deaf individuals, to foster improved educational programs for deaf individuals throughout the United States, to reenact and codify certain provisions of law relating to the education of the deaf, and for other purposes.

S. 1889

At the request of Mr. DENTON, the names of the Senator from Arizona [Mr. DECONCINI], the Senator from Pennsylvania [Mr. SPECTER], and the Senator from South Dakota [Mr. ABDNOR] were added as cosponsors of S. 1889, a bill to amend title 11 of the United States Code, relating to bankruptcy, to prevent discharge of administratively ordered support obligations.

At the request of Mr. DENTON, the name of the Senator from Indiana [Mr. QUAYLE] was withdrawn as a cosponsor of S. 1889, supra.

SENATE JOINT RESOLUTION 170

At the request of Mr. SIMON, the names of the Senator from Michigan [Mr. LEVIN], the Senator from South Dakota [Mr. ABDNOR], the Senator from Maine [Mr. MITCHELL], and the Senator from South Dakota [Mr. PRESSLER] were added as cosponsors of Senate Joint Resolution 170, a joint resolution to designate the month of March 1986 as "Music In Our Schools Month."

SENATE JOINT RESOLUTION 205

At the request of Mr. MCCLURE, the name of the Senator from Connecticut [Mr. WEICKER] was added as a cosponsor of Senate Joint Resolution 205, a joint resolution to designate March 21, 1986, as "National Energy Education Day."

SENATE JOINT RESOLUTION 231

At the request of Mr. RIEGLE, the names of the Senator from Utah [Mr. GARN], the Senator from Pennsylvania [Mr. SPECTER], the Senator from North Carolina [Mr. HELMS], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Nevada [Mr. HECHT], the Senator from Maryland [Mr. SARBANES], the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Oklahoma [Mr. BOREN] were added as cosponsors of Senate Joint Resolution 231, a joint resolution to designate the period commencing January 1, 1986, and ending December 31, 1986, as the "Centennial Year of the Gasoline Powered Automobile."

SENATE JOINT RESOLUTION 236

At the request of Mr. GORTON, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Joint Resolution 236, a joint resolution to authorize and request the President to issue a proclamation designating April 20 through 26, 1986, as "National Organ and Tissue Donor Awareness Week."

SENATE JOINT RESOLUTION 237

At the request of Mr. GRAMM, the names of the Senator from South Dakota [Mr. ABDNOR], the Senator from Mississippi [Mr. COCHRAN], the Senator from Kansas [Mr. DOLE], the Senator from Utah [Mr. HATCH], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Indiana [Mr. LUGAR], the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from Georgia [Mr. NUNN] were added as cosponsors of Senate Joint Resolution 237, a joint resolution to designate the month of January 1986 as "United States Savings Bonds Month."

SENATE JOINT RESOLUTION 239

At the request of Mr. DURENBERGER, the names of the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Nebraska [Mr. ZORINSKY], the Senator from California [Mr. WILSON], the Senator from Indiana [Mr. LUGAR], and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of Senate Joint Resolution 239, a joint resolution designating the week beginning on June 1, 1986, as "National Maternal and Child Health Week."

SENATE CONCURRENT RESOLUTION 81

At the request of Mr. SIMON, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of Senate Concurrent Resolution 81, a concurrent resolution requesting the President to begin talks with the Government of the Soviet Union to establish a United States-Soviet Union student exchange for peace program.

SENATE CONCURRENT RESOLUTION 93—ORIGINAL CONCURRENT RESOLUTION REPORTED COMMENDING THE GOVERNMENT OF IRELAND AND THE GOVERNMENT OF THE UNITED KINGDOM

Mr. LUGAR, from the Committee on Foreign Relations, reported the following original concurrent resolution; which was placed on the calendar:

S. CON RES. 93

Whereas all peace-loving people desire a just and lasting solution to the problems of Northern Ireland;

Whereas violence and terrorism in Northern Ireland and all those who support it should be strongly condemned, and the effort to achieve peace and reconciliation through political means should be supported;

Whereas the report of the New Ireland Forum of May 2, 1984, which condemned violence and those who support it, made an important contribution to the Anglo-Irish negotiations over the past year;

Whereas the Prime Ministers of Ireland and the United Kingdom signed an agreement in Hillsborough, Northern Ireland, on November 15, 1985, which provides a basis for progress towards peace, stability, and an end to violence in Northern Ireland;

Whereas this agreement provides for an unprecedented role for the Government of Ireland in relation to Northern Ireland;

Whereas this agreement affirms that any change in the status of Northern Ireland would only come about with the consent of the majority of the people of Northern Ireland;

Whereas this agreement declares that, if in the future a majority of the people of Northern Ireland clearly wish for and formally consent to the establishment of a united Ireland, the Governments of Ireland and the United Kingdom will introduce and support in the respective Parliaments legislation to give effect to that wish;

Whereas the agreement envisages the possibility of securing international support to promote the economic and social development of those areas of both parts of Ireland which have suffered most severely from the consequences of violence of recent years;

Whereas the Parliaments of Ireland and the United Kingdom have given their solemn and respectful approval to this historic agreement;

Whereas on August 30, 1977, President Carter stated that in the event of a peaceful settlement in Northern Ireland, "the U.S. Government would be prepared to join with others to see how additional job-creating investment could be encouraged to the benefit of all the people in Northern Ireland";

Whereas on November 15, President Reagan stated that "I will be working closely with the Congress in a bipartisan effort to find tangible ways for the United States to lend practical support to this important agreement"; and

Whereas this agreement should be supported by all those who seek peace, stability, and an end to violence in Northern Ireland and the reconciliation of the two major traditions in Ireland: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That (a) the Congress commends the Government of Ireland and the Government of the United Kingdom for their achievement in reaching an agreement which charts a way towards peace, stability, and an end to violence in Northern Ireland.

(b) The Congress declares its willingness to work with the President in supporting the Anglo-Irish agreement through appropriate United States assistance, including economic and financial support, to promote the economic and social development of those areas of both parts of Ireland which

have suffered most severely from the consequences of the violence of recent years.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President.

SENATE RESOLUTION 271—ORIGINAL RESOLUTION REPORTED REGARDING ASSISTANCE FOR LIBERIA

Mrs. KASSEBAUM, from the Committee on Foreign Relations, reported the following original resolution; which was placed on the calendar:

S. RES. 271

Whereas the Republic of Liberia and the United States are bound by ties of mutual respect and friendship;

Whereas the Government of Liberia has undertaken since 1981 to restore civilian rule and establish a genuinely democratic government which will provide all citizens with an equal voice in the governance of their country;

Whereas the Government of Liberia made a public commitment to hold a free and fair election in 1985 and to install a civilian government based on the results of that election by 1986;

Whereas the United States has provided the Republic of Liberia with $375,000,000 in economic and military assistance since 1981 on the basis of the Government of Liberia's commitment to hold free and fair elections;

Whereas the election that took place in the Republic of Liberia on October 15, 1985, has been characterized by improperties, including the denial of the right to participate by significant opposition parties and candidates and restrictions of the freedom to campaign;

Whereas the results of the election, as announced on October 29, 1985, giving 50.9 percent of the vote to General Doe, were tallied in secret by an ad hoc committee appointed by the military government after an earlier tabulation in the presence of opposition party representatives gave the election to another candidate;

Whereas several opposition political leaders have been arrested and held in detention without charge, allegedly on the grounds that they participated in the attempted coup d'etat of November 14, 1985;

Whereas the Congress, in the International Security and Development Cooperation Act of 1985, expressed the need for free and fair elections in the Republic of Liberia; and

Whereas it is the desire of the Congress that the people of Liberia enjoy the full fruits of democracy as well as the respect of the international community: Now, therefore, be it

Resolved, That (a) it is the sense of the Senate that—

(1) the October 15, 1985, election and vote tally in the Republic of Liberia do not meet the requirements of section 807 of the International Security and Development Cooperation Act of 1985;

(2) the President should channel, to the maximum extent possible, future economic assistance to the Republic of Liberia through nongovernmental organizations; and

(3) the President should suspend military assistance to the Republic of Liberia until the Government of Liberia has released all political prisoners, provided for free and fair elections, and established a civilian government chosen through such election.

(b) The Senate hereby expresses to the people of Liberia the friendship of the people of the United States and the earnest desire of the people of the United States for the establishment of a genuine democracy in Liberia.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

SENATE RESOLUTION 272—RELATING TO THE USE OF PAINT CONTAINING TRIBUTYLTIN

Mr. COHEN (for himself and Mr. TRIBLE) submitted the following resolution; which was referred to the Committee on Environment and Public Works:

S. RES. 272

Whereas the American people derive incalculable benefit from our Nation's marine resources;

Whereas there is growing public concern regarding the impact that the use of marine paints containing tributyltin has on the Nation's aquatic assets;

Whereas it is essential to obtain more data regarding the potential consequences to the environment of using tributyltin paints;

Whereas the Senate has agreed to prohibit the use of tributyltin paint by the Navy until such time as the Environmental Protection Agency determines that such paint does not pose an unacceptable risk to the environment;

Whereas the majority of the Nation's commercial vessels and pleasure craft are painted with paint containing tributyltin;

Whereas the Environmental Protection Agency has initiated a special review to determine the environmental consequences of using paints containing tributyltin; and

Whereas it is essential that Congress, Federal agencies, the States, and the American people fully understand the environmental consequences that may result from the continued use of marine paint containing tributyltin: Now, therefore, be it

Resolved, That it is the sense of the Senate—

(1) that the Senate Committee on Environment and Public Works should, at the earliest practicable date, commence public hearings on the environmental and health effects of organotin-bearing paints to determine whether further legislative action is warranted with respect to the future use of such compound; and

(2) that the Environmental Protection Agency should, and is hereby urged, to accelerate its investigation into the environmental and health effects of organotin-bearing paints and report its findings to the Congress at the earliest practicable date.

Mr. COHEN. Mr. President, last Monday, the Senate adopted an amendment to the continuing resolution offered by Senators HEINZ, MATHIAS, SARBANES, TRIBLE, WARNER, and myself that would prohibit the use of fiscal year 1986 moneys to carry out any painting project by the Navy using paint known by the trade name of Organotin (tin-based) or with any other paint containing the chemical compound tributyltin.

Organotin is an effective, tin-based antifouling compound used in paint. Tributyltin [TBT] is the active ingredient in organotin-bearing paints. It is used to keep ship hulls free from barnacles, seaweed, and other organisms which can damage or increase friction on the hull and slow a ship's progress. The increased friction requires more power and hence more fuel to maintain ship speed. It is superior to copper-based paints that were used in the past because it has a lower leaching rate which extends the duration of the antifouling action and is far more toxic to marine life than copper-based paints. A majority of the worldwide commercial shipping fleets and an equal proportion of pleasure craft are painted with organotin-bearing paints.

As I stated during the floor debate on December 9, our amendment was not specifically aimed at the Navy. We were not accusing the Navy of any wrongdoing. On the contrary, the Navy has met all Environmental Protection Agency [EPA] regulations. Its paint specifications are far more stringent in terms of toxicity and release rates than any used in the recreational and commercial industry. The Navy has been in the forefront of ongoing efforts to reduce the toxic content of organotin-bearing antifouling paints, and it has researched this matter far more extensively than any other segment of the maritime industry.

Our concerns, instead Mr. President, must, of necessity, be focused on the potentially harmful effects the highly toxic pesticides of the organotin family of compounds may have on marine life and public health. While organotin-bearing paints are registered with the EPA as pesticide antifouling compounds, many of these compounds were registered for use over 25 years ago. Recent studies raise new and very serious questions about the accurate and chronic toxicity of these compounds at extremely low concentrations and their potential transmission into the food chain.

The EPA, the Navy, the Virginia Institute of Marine Science, the States of Maine, Maryland, Virginia, and North Carolina, several environmental groups, and the House Appropriations Committee have voiced such concerns. Others are joining the debate daily. The principal concern is not whether organotin-bearing paints kill the organisms that foul a ship's hull, but rather whether the organotins leach out of the paints into the adjacent waters at rates and toxicity levels that contaminate or kill nontarget aquatic organisms such as clams, shrimp, oysters, crabs, lobsters, and fish.

The EPA's Office of Pesticide Programs has recently taken the initial steps to conduct a special review to reexamine the risks and benefits of organotin antifoulants.

The State of North Carolina recently developed water quality standards for organotin at 2 parts per trillion in salt water and 8 parts per trillion in

51-059 O-87-15 (Pt. 26)

fresh water; levels that I understand very few labs in the country can accurately monitor.

A recently completed study at the University of Maryland found that 15 parts per trillion was toxic to clam larvae.

Biological damage by organotin leaching from boat bottoms has been noted in other countries. In 1982, France banned the use of TBT on boats under 25 meters—80 feet—in length. French scientists noted that oysters in and around boat moorings and marinas were found to have abnormal shell growth, reduced reproduction rates, and mutations in oyster larvae. Instances of these abnormalities ended following the prohibition. England is in the process of implementing a similar ban.

Mr. President, a large part of my strong concern about the dangers involved in this compound relate to Maine, a State with a long coastwise, thousands of boats, and tens of thousands of individuals and families whose livelihood depends on a clean and productive marine environment. Few States would be as affected by any unhealthy side effects of this organotin-bearing paint as Maine, and the interests of my State and all coastal States are clearly at stake here.

Mr. President, we know that marine paints containing tributyltin are highly toxic to man and to our Nation's aquatic life. However, the degree and extent of this toxicity is not fully known. We do not know what level of TBT concentration is dangerous to our Nation's marine resources and public health. We do not know what levels pose an acceptable risk to our environment. We do not know the hazards of human consumption of shellfish contaminated by organotin. We do not know how much TBT is present in our oceans, bays, rivers, and marinas. Scientists at the Virginia Institute of Marine Science have begun to study the environmental effects of organotin-bearing paints. While insufficient data is available to justify a scientific judgment concerning organotin's effects, preliminary findings seem to confirm the suspicion that marinas and shipyards may already have reached contamination levels that are adverse to our marine resources. Any coastal area with recreational, commercial, or naval activities has the potential for being so affected.

William Waldegrave, England's junior environment minister, stated earlier this year that he had "seldom been faced with clearer scientific evidence of the need for environmental action—and fast; that the apparent tendency of organotin-bearing paints to stunt the growth of Britain's Pacific oyster is just the visible top of a potentially massive environmental iceberg."

Mr. President, very serious questions have been raised about the potential risks and effects of organotin-bearing paints on the marine environment and human health. At this time, all we have is uncertainty. While there may be substantial benefits derived from the use of these paints, there are substantial environmental and human risks that must be addressed. We must, without delay, undertake a comprehensive, nationwide inquiry into the effects of these marine paints containing tributyltin. I urge my colleagues to joint Senator TRIBLE and me in supporting a sense of the Senate resolution that calls for such an investigation.

Mr. TRIBLE. Mr. President, along with my colleague from Maine, Senator COHEN, I am introducing legislation calling for a national investigation into the use of marine paints containing tributyltin pending an EPA assessment of the environmental risk.

I hope this legislation will be the start of an intensive discussion of the desirability of continuing the use of TBT-based paints on American commercial and pleasure craft.

Because of its potential hazard to the environment, I offered an amendment to the continuing resolution that bans the Navy from using organotin paint until the Environmental Protection Agency certifies that the Navy's program poses no risk to marine or extuarine life. Despite this action, the potential threat to the environment remains. The vast majority of the Nation's commercial and pleasure vessels is painted with TBT-based paints. Some of these formulations have released rates of tin far in excess of the Navy's formulation.

The reason for our concern is the toxicity of tin; TBT compounds kill barnacles, sea grasses and other marine life. It may well be equally lethal for other species. When tin from aquatic paints is released into the water it degrades very slowly. It remains toxic for extended periods and invades plant and animal tissue. In great enough concentrations it can affect the reproduction and development of oysters and clams.

This concern regarding the effects of TBT has led governments to act. France, for instance, has banned the use of TBT on boats less than 25 meters long. The State of North Carolina has effectively banned organotin use.

There is much more we need to know. We need to ascertain systematically existing levels of tributyltins in the water, what concentrations adversely affect what species, whether TBT's accumulate on the bottom, and we need data on the flow of contaminated water from shipyards.

I believe that Congress should have the benefit of a thorough and systematic discussion of the environmental impact of tributyltin marine paints and it is to that end that I introduce this legislation.

SENATE RESOLUTION 273—EXPRESSING CONDOLENCES TO THE GOLDWATER FAMILY

Mr. PACKWOOD (for Mr. DOLE, for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BAUCUS, Mr. BENTSEN, Mr. BIDEN, Mr. BINGAMAN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. BYRD, Mr. CHAFEE, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DIXON, Mr. DODD, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EAST, Mr. EVANS, Mr. EXON, Mr. FORD, Mr. GARN, Mr. GLENN, Mr. GORE, Mr. GORTON, Mr. GRAMM, Mr. GRASSLEY, Mr. HARKIN, Mr. HART, Mr. HATCH, Mr. HATFIELD, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HEINZ, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. INOUYE, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KASTEN, Mr. KENNEDY, Mr. KERRY, Mr. LAUTENBERG, Mr. LAXALT, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. LUGAR, Mr. MATHIAS, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. MCCLURE, Mr. MCCONNELL, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. PELL, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. QUAYLE, Mr. RIEGLE, Mr. ROCKEFELLER, Mr. ROTH, Mr. RUDMAN, Mr. SARBANES, Mr. SASSER, Mr. SIMON, Mr. SIMPSON, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. STEVENS, Mr. SYMMS, Mr. THURMOND, Mr. TRIBLE, Mr. WALLOP, Mr. WARNER, Mr. WEICKER, Mr. WILSON, and Mr. ZORINSKY) submitted the following resolution; which was considered and agreed to:

S. RES. 273

Whereas, Peggy Goldwater was the much loved and trusted partner of Barry Goldwater for 51 years; and

Whereas, as a leading light in the Republican Party, the support and encouragement of her husband was essential to the pursuit of his public career; and

Whereas, she made significant public service contributions of her own, through volunteer work; and

Whereas, as a devoted wife, mother and grandmother she personified the very best in American life; and

Whereas, the legacy she left not only her family, but the Nation will endure for years to come;

Be it resolved, that the Senate expresses its most sincere condolences to Barry Goldwater and the entire Goldwater family.

AMENDMENTS SUBMITTED

WHITE EARTH INDIAN LEGISLATION

MELCHER AMENDMENT NOS. 1414 THROUGH 1416

Mr. MELCHER proposed three amendments to the bill (S. 1396) to settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation, to remove clouds from the titles to certain lands, and for other purposes; as follows:

AMENDMENT No. 1414

On page 36, line 16, delete the words "one-hundred and eighty days" and insert in lieu thereof the following: "eighteen months".

AMENDMENT No. 1415

On page 38, after line 10, insert the following new subsection:

"(e) On application of any allottee or heir seeking to file a claim under subsection (c) of this section, the United States shall provide legal advice and assistance regarding the merits of the claim if—

(1) the United States determines the claim has legal merit, and

(2) if the allottee or heir elects to proceed with filing a legal claim for title or damages under subsection (c) of this section,

the United States shall, on request, act as attorney for the claimant."

AMEMDMENT No. 1416

On page 44, delete lines 13 through 25 and insert in lieu thereof the following:

"(1) The State of Minnesota shall enter into an agreement with the Secretary providing for the transfer of that amount of land which is determined by the United States Department of Justice to have been acquired by the State of Minnesota within the current exterior boundaries of the White Earth Reservation of Chippewa Indians through tax forfeiture of any lands which fall within any of the transactions described in Sec. 4(a) and (b) as the State's contribution to the settlement provided for by this Act. The Secretary shall not enter into such an agreement until the Secretary determines, or the authorized governing body of the band certifies to the Secretary in writing, that the agreement will result in the transfer of such amount of land which possess reasonable value for the".

AUTHORITY OF SUPREME COURT POLICE

THURMOND AMENDMENT NO. 1417

Mr. PACKWOOD (for Mr. THURMOND) proposed an amendment to the bill (H.R. 3914) to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel; as follows:

Strike all after the enacting clause and insert the following:

That the Act entitled "An Act relating to the policing of the building and grounds of the Supreme Court of the United States", as approved August 18, 1949 (40 U.S.C. § 13f), section 9(c) of such Act as added by the Act of December 29, 1982 (Public Law 97-390; 96 Stat. 1958), is amended to read as follows:

"(c) The authority created under subsection (a)(2) shall expire one year after the date of enactment of this subsection.

The Marshal of the Supreme Court shall report annually to the Congress on March 1 regarding the administrative cost of carrying out his duties under such subsection. Duties under subsection (a)(2)(A) of this section with respect to an official guest of the Supreme Court in any part of the United States (other than the District of Columbia, Maryland, and Virginia) shall be authorized in writing by the Chief Justice of the United States or an Associate Justice of the Supreme Court, if such duties require the carrying of firearms under subsection (a)(5) of this section."

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee will be holding two field hearings in South Dakota on the cost and availability of liability insurance for small business. The first hearing will take place on December 23, 1985 at 10 a.m. at the Holiday Inn in Sioux Falls. The second hearing will be on December 30, 1985 at the Hotel Alex Johnson in Rapid City. It will commence at 10 a.m. For further informaton, please call Bob Wilson of the committee staff at 224-5175, or Kevin Schieffer of Senator LARRY PRESSLER's staff at 224-5842.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, December 12, to hold a closed hearing on financial matters relating to Chapman Cox.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, December 12, to hold a hearing on the nomination of Sylvester R. Foley, to be Assistant Secretary of Energy—Defense Programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, December 12, 1985, in order to conduct a hearing on the nomination of Chapman B. Cox, to be Assistant Secretary of Defense for Force Management and Personnel and various routine military nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, December 12, to conduct a hearing, to consider the nominations of Donna R. Fitzpatrick to be an Assistant Secretary of Energy—Conservation and Renewable Energy; Mary L. Walker, to be an Assistant Secretary of Energy—Environment, Safety, and Health; James R. Richards to be inspector general, Department of the Interior; Gerald Ralph Riso, to be an Assistant Secretary of the Interior—Policy, Budget, and Administration; and C. Dale Duvall, to be Commissioner of Reclamation.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON TOXIC SUBSTANCES AND ENVIRONMENTAL OVERSIGHT

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Toxic Substances and Environmental Oversight, of the Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Thursday, December 12, 1985, in order to conduct an oversight hearing on the problem of ground water pollution caused by nutrient applications.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

UNITED STATES/CANADA TRADE RELATIONS

● Mr. SIMON. Mr. President, recently, I was invited to speak to the Canadian Club in Toronto and planned to do so, and then an important vote was scheduled in the Senate for that day and I had to cancel the speech at the last minute.

Our relations with Canada are extremely important to both of our countries. And we all know that those relations are basically good. But we have to improve them.

I ask to insert into the RECORD my planned statement to the Canadian Club on United States/Canada trade relations.

The statement follows.

UNITED STATES/CANADIAN TRADE RELATIONS

(By Senator Paul Simon)

I am honored to be invited to participate in this United States-Canadian Exchange Lecture Series. I regret that the important vote calling for an extension of the U.S. debt limit prevents my being there personally with you.

I have been to Toronto on at least two occasions through the years and in Canada many times, from Nova Scotia to a family

trip up the Alaska Highway in the Yukon Territory when it was still 1,200 miles of gravel road.

It is not only the unparallelled peaceful border between our two countries that tells of the good relations between our two countries. In yesterday's New York Times, columnist James Reston described Canadians as "our best and closest friends." I know of no one in a leadership position in the United States who has any differing view. Recently, I was at a meeting where foreign students were asked to identify themselves. When among them were two from Canada, the Moderator said, "Not Canadian students. Just foreign students." There is a two-edged message there. It is important that we maintain close ties so that we do not view each other as foreign. But it is also important that we not take each other for granted. Where problems arise, let us work together for their solution.

Sometimes foolish things impair our good relationship, like our denying entrance into the United States of Farley Mowat, the author of "Never Cry Wolf," because some years ago he objected to B-52's flying over his timbered land. Free countries like the United States and Canada not only can tolerate diversity of viewpoints, we thrive on them. We only embarrass ourselves when we imitate those who attempt to suppress opposing or differing viewpoints. One of the ways each of us can enrich the other is through exchanges of ideas, in the arts, and in so many other ways that enrich the culture in both our countries.

In many fields—education and defense are good examples—there is a strong, effective, mutually-enriching relationship between our two countries. Over the years, our two countries have shared a host of experiences. Canada plays a vital role in reinforcing NATO's northern flank. On the North American continent, Canada's participation in the North American Aerospace Defense Command and the installation of the new North Warning System which replaces the old DEW line is crucial. The 39 stations in Alaska and Canada, with costs shared by each nation, will set up a string of advanced phased-array radar units for tracking incoming bombers and cruise missiles.

But there remain problems on which both of our nations must work. Let me briefly discuss two—both of which have a significant impact on my home State of Illinois.

Acid rain is a source of trouble but probably not major controversy in Canada. In the United States, it is also a source of trouble, and in my coal-producing State, a matter of controversy.

While I favor additional research, the call for research should not be a substitute for action. The reality is that the high smokestacks we have built protect the immediate environment but endanger the more distant environment. We have to face our problems, and do it in a way that safeguards the coal industry of the Midwest at the same time it protects our air and our lakes more effectively. It can be done, but it will not be accomplished by pretending a problem does not exist.

There is an analogy in trade, also important to my State and Nation. We should not pretend that problems do not exist; they do. And the sooner we face them in a realistic way, both Canada and the United States will benefit.

By political philosophy, I am a free trader, but you should be aware that protectionist sentiment is rising in the United States, particularly in areas of high unemployment like Illinois. During the month of August, I conducted 57 town meetings in my State at which citizens could ask questions about anything. Without exception, there were questions or demands that we do something about the loss of jobs due to imports. The questions and demands were often simplistic, but there is no question about the sentiment. Protectionist sentiment is so thick you can cut it. There is some danger that if we do not find sensible answers, action will be taken that will do harm to the United States and to Canada as well as to other nations.

That is why I welcome the House of Commons statement of Prime Minister Brian Mulroney. He calls for negotiations on this complex issue, an issue that U.S. administrations historically have viewed as a matter of secondary importance. Your Prime Minister said, "Today more than ever, our prosperity and that of our partners depend on an expanding world trade and a growing world economy." That realistic assessment I hope will cause much close scrutiny to the trade issue by the United States.

Our trade deficit in 1984 was $123 billion and will be close to $150 billion in 1985. Our trade deficit with Canada was close to $20 billion last year. A major part of the U.S. problem is self-inflicted, by our failure to come to grips with our budget deficit, causing an overvalued dollar, which in turn causes excesive imports and a reduction in exports.

But let me be candid. Getting our fiscal house in order will help, but the United States is going to have to become a tougher negotiator. After the President announced that the United States would not ask for a quota on Japanese cars, becoming the only major automobile market in the world without a quota on Japanese cars, I called a friend in the White House and asked what we got in return. He replied, "Good will."

I like good will, but increasingly automobile workers and business leaders and farmers are finding that answer unsatisfactory. Their bankers do not credit their accounts with good will. It does not feed a family or pay for college tuition or fuel a car. And ultimately that kind of good will does not secure firm friendships.

Eighty percent of Canada's exports to the United States come to us duty-free, while only 65 percent of our sales enter your country with that status. Nails are made in Peoria, Sterling, and Rock Falls in my State, and enter Canada with a 50 cents per hundredweight tariff. Nails from Canada come to us at 5 cents per hundredweight. Steel tubing comes into your country with a tariff 22 times higher than the charge we make. R.R. Donnelly in my State prints catalogs. Catalogs shipped into Canada have a heavy duty. But a U.S. firm can contract with a Canadian firm for catalogs and other printing and bring them into the United States without a duty being imposed. Advertising and printing face not only tariff barriers, but postal and income tax barriers. Pharmaceutical firms in my State complain of unfair barriers.

There are too many other examples. The unemployed in my State, the businesses that are failing or struggling for survival in an increasing crescendo are asking those of us in Congress to do something.

And do something we will.

But whether it will be responsible, sensible action is less certain. The United States and Canada are each other's major trading partner. It is important to both nations that we act to encourage trade, not discourage it, but the days of generous unilateral concessions by the United States are coming to an end.

One-fifth of the U.S. exports go to Canada; three-fourths of your exports come to the United States. That trade is important to both of us.

Let us accept the suggestion of Prime Minister Mulroney that we create a new era of improved trade by tackling the complex issues, eliminating the minor irritants, and candidly confronting the major problems so that both countries can experience growth. It can be done and should be done. President John F. Kennedy spoke of our special relationship:

"Geography has made us neighbors. History has made us friends. Economics has made us partners. And necessity has made us allies. Those whom nature hath so joined together, let no man put asunder. What unites us is far greater that what divides us."

And let me add a special invitation. St. Louis borders Illinois and in that area of my State we have strong St. Louis Cardinal fans. If, in the next few days, Toronto and St. Louis prevail in the baseball playoffs—and simple justice requires that they do—then I invite you to St. Louis to the first genuine World Series in baseball history. I hope to see you there, and in your fine city of Toronto on another occasion.●

AMERICA'S TRADE POLICY

● Mr. ROTH. Mr. President, I submit for the RECORD a copy of the speech I gave yesterday at the U.S. Chamber of Commerce International Forum, on America's trade policy.

SPEECH BY WILLIAM V. ROTH, JR., U.S. CHAMBER OF COMMERCE, INTERNATIONAL FORUM

It is certainly a pleasure to be with you this morning to discuss what has to be one of the most timely and volatile issues of today—America's trade policy.

I know I am not giving away any national secrets when I tell you that the Congress is caught up in a frenzy about what our approach to trade should be. Hundreds of issue-specific trade bills have been introduced in both Houses and, in the past month, there has been a proliferation of omnibus trade proposals by Democrats, by Republicans and even, in the Senate, by a bipartisan group of Members.

The mood in the Congress has changed fast. Until recently there existed a broad-based bipartisan feeling that liberal trade policies were in the best interests of this country, and that once we began moving down the protectionist path for any one industry, it would be difficult to turn back.

Now this broad-based bipartisanship is tearing at the seams.

Despite the economic recovery since 1982, protectionism in the 99th Congress has taken on a new strength.

Before this protectionist movement gets way out of hand, we need to figure out how to right our tremendous trade imbalance while—at the same time—keeping America strong and competitive.

The answer lies not in short-term fixes, but rather in a long-term remedy.

In my judgment, from the Government's standpoint three key elements must be a part of the long-term cure:

(1) A major reduction in the growth of Federal spending;

(2) The enactment of major tax reforms; and

(3) The establishment of a trade policy and organization which complements rather than counteracts American strength.

We need to seriously reduce the growth of our Federal spending.

Regardless of the components, the key necessity is to reach a consensus on the need to cut spending drastically, and move toward a balanced budget. By doing so, we will help solve our current problems with the dollar, and not burden future generations with a level of debt that will sap any chance of prosperity from our economy.

And we need major tax reform. The Nation is now familiar with the details of both the President's tax reform package and the proposal being considered by the House. At this point in time, there are serious political and economic deficiencies with both proposals. Neither enjoys broad support from the middle class or the business community. Neither provides an environment for long-term economic growth which is essential to enhance our competitive condition. As presently constituted, neither plan would be beneficial to the country.

The President's plan could, however, be modified to be a pro-growth proposal that would enjoy broad middle class and business support.

Let me describe now—in broad outline—how the President's plan could be perfected.

First of all, to get a major tax package enacted you are going to have to have broad support from America's middle class. But, the middle class today does not see themselves as benefiting from the President's proposal. As a matter of fact, Treasury admits that one out of three middle Americans faces a tax increase.

What I am proposing instead (S. 411) is to reduce the marginal rates so that not a single American—or maybe a few who have some tax shelters—would end up paying higher taxes.

A second change I would make with respect to individuals would be to promote savings.

Now, as you're probably well aware, the Japanese save between 20 to 24 percent of their earnings. And it is those earnings that are used by the Japanese to buy the best technology in the world—many times, American technology—and incorporate it in their plants.

Of course, a lot of people say, "Well, that's Japanese culture." That not true! Their savings developed following World War II. It's a new practice for them to put so much money aside. So it's not a matter of culture. As a matter of fact, they have built incentives into their tax picture that promotes savings.

Now as you well know, it is just the opposite in this country. What we have then is a disincentive against saving. And we've got to change that.

So what I'm proposing is the establishment of super savings accounts. SUSA's would function much like IRA's except that the saving could be used for any purpose. Current contributions to SUSA's would be tax deductible and savings would be taxed only when withdrawn. There would be no additional tax penalty for early withdrawal.

This proposal is not only good for the family and the individual. It's also good for the country because this would bring a constant new infusion of capital for the private sector, and I think that's critically important.

On the corporate side, I would make two changes, among others.

First of all, I would lower even further the corporate rate of taxation from 33 percent as proposed by the President to 30 percent. That would, of course, work very much in the interest of those companies with effective high interest rates of taxation.

But I'm also very much concerned about our basic industries. I don't happen to believe that this Nation can permit its basic industries to deteriorate and fade away.

So here I want to make some very significant changes in the area of depreciation.

I would adopt expensing for 50 percent of the cost. The other 50 percent I would depreciate as is proposed in the President's package. This gives basic industries, capital-intensive industries, a much deserved break.

Now, obviously, the modifications I have made in the President's plan will have to be financed. Here I have introduced the business transfer tax [BTT] (S. 1102).

Now what is the business transfer tax? Well, it's a net receipts tax on all domestic business. A business would add up all its revenues and then substract all its costs, except for dividends, interest and salaries. The tax would be imposed on the difference. And we're now talking about a tax range of roughly seven to 10 percent.

That will bring a tremendous amount of new revenue into the Federal coffers, possibly over $100 billion.

Now it is most important to note that, from the standpoint of trade, this proposal is valid under the GATT.

We would let business deduct the BTT from their income taxes and these taxes would be imposed on imports, exactly the same as many European countries and Japan are doing today.

One of the most important features of the BTT is that it evens the playing field between American manufacturers and importers as far as the American market is concerned.

But it works the other way as well. And this is critically important. What we want to learn to do is to sell abroad, to compete in foreign markets.

Now under the BTT when our American-made products or agriculture leaves this country the BTT tax will be rebated. In a sense, then, we're meeting our competition. We're giving our business people the same kind of break that our foreign competitors enjoy.

There are enormous benefits to the BTT. It will bring in tremendous new revenues. It will help us with trade. It will enable us to do some things for business so that they can better become competitive. In short, the BTT can fuel growth in our economy.

Turning to the third prong of my long-term remedy to our trade imbalance, we need to put together a trade policy and organization which complements rather than counteracts America's economic strength.

I believe that we must establish a Department of Trade for the United States. It is very difficult for this country to compete with nations like Japan and their M.I.T.I. when our own trade apparatus is disjointed, archaic, and confusing—even to the people who are in it.

The management flaws of our current trade structure are mind-boggling.

Someone told me of one such example just the other day. At USTR there is one staffer to handle trade relations with a major country. He has piles of congressional and other mail to answer, data to collect, policy positions to develop. At commerce, meanwhile, there are about six people assigned to the same country literally looking for work. But turf considerations preclude sharing many of the tasks. Meanwhile the USTR staffer is sent off for 2 weeks management training, the work piles up, and the question remains: training to manage whom?

My office hears a steady stream of these kinds of tales.

For more than 10 years now, I've been pushing for the establishment of a Department of Trade. I was encouraged that recently the President's Commission on Industrial Competitiveness (chaired by John Young, C.E.O. of Hewlett-Packard) called for the establishment of such a cabinet-level department.

In June I reintroduced this Trade Department bill (S. 1365) with the full support of Senator Eagleton, the ranking minority member of the Governmental Affairs Committee.

But organizational change is not enough, we must—once and for all—fashion a constructive and comprehensive trade policy.

To that end, last January, I introduced—along with Senators Chafee and Symms—"the Trade Expansion Act of 1985" (S. 234).

This act presents a positive trade agenda for action by the 99th Congress. It is based on the view that the United States has a stake in both equitable and expanding trade. These are the twin standards against which all trade policy proposals should be measured.

I believe that our preoccupation with the "free and fair" theme has rightly raised the red flag on the fairness or equity issue, but it unfortunately has also tended to camouflage the link between our future national prosperity, and growing trade.

If we must enunciate our complex trade objectives in a short phase, I suggest we substitute "equitable and expanding" trade for "free and fair" trade. Under this new banner, we can start off on the right foot as we explore the multitude of trade policy proposals.

Let me briefly describe now the four major proposals to promote equitable and expanding trade in this legislation.

MULTILATERAL TRADE NEGOTIATIONS

To begin with, this bill was the first in the Congress to endorse a new round of multilateral trade negotiations.

Recently support for a new trade round has been growing on Capitol Hill, and now we have international agreement to begin the preparatory process.

This is good because effective multilateral trade rules are the most efficient means of promoting equitable and expanding trade. Other possibilities—bilateral, plurilateral or unilateral approaches—are clearly second-best.

But, while I have been leading the effort to get new multilateral negotiations underway, I must add some words of caution.

As far as I am concerned, these negotiations represent the last chance for the GATT. Other countries should be on notice that proponents of the multilateral approach like myself are not pressing this view as a simple means of sidetracking protectionism. Our goal instead is to transform the GATT into a credible facilitator of trade among nations.

What does this mean? Two things.

First, that unlike previous rounds of multilateral trade negotiations, this one should not be about lowering tariffs, but rather about increasing fairness. It is the fairness issue, after all, which is tearing the trading system apart.

Second, it will not be enough to concentrate on adding new trade areas like services, intellectual property rights of trade-related investment problems to the basic agreement. Nor will it be sufficient to tighten up the array of non-tariff barrier codes negotiated in the Tokyo round. These efforts will, of course, be important. But, it is also time to go back to the core provisions of the GATT and bring the whole system and the institutional mechanisms that have developed to implement it up-to-date. You cannot keep building new structures on top of an increasingly shaky foundation.

It is time to open our minds to a fresh examination of the basic principles of the GATT. For instance, does non-discrimination make sense in today's world? Non-discrimination means that if we lower a barrier with one country, we must provide the same treatment to imports from every other country, whether the other country has provided us reciprocal concessions or not. In the past these other countries—the so-called free riders—were not a serious problem. The free riders were not key traders of the product under consideration, nor would they ever be. Today, however, production can move swiftly around the globe. Non-discrimination may no longer be an acceptable guiding principle for an effective and fair international trading system.

Closely linked to this issue, is another basic principle of the GATT which merits review—the principle of reciprocity. Perhaps it is time to consider new ways to measure reciprocity in trade negotiations. Today and in the future, the product mix of our exports is changing more rapidly than in the past. But when we conclude trade negotiations we accept a list of reductions of foreign trade barriers on specific U.S. exports that we discern to be of importance to us at the time. With production patterns changing more rapidly than in the past, we could easily trade off American concessions for foreign concessions which turn out to be of limited value to us. We need a way to rebalance trade concessions over time.

A more obvious problem with the core of GATT is the tax provision I discussed earlier.

The GATT will continue to flounder so long as it does not support American trade interests. This may sound exceedingly chauvinistic or exceedingly harsh, but the simple fact is that unless we have an international trade agreement that strongly supports American trade interests, the whole world will be losers. Without an international framework for trade that is credible in American eyes, this country will turn increasingly toward protectionism, retaliation and recrimination. This is the path we are already on today.

It is clear that multilateral negotiations of this importance and complexity will take time. So what do we do in the meanwhile. That is what the other major provisions of my proposal for a comprehensive trade policy deal with.

TRADE ADJUSTMENT ASSISTANCE

The second provision calls for the reform of the trade adjustment assistance program, the program established in 1962 to help workers who lose their jobs due to imports. We cannot hope to define a responsible trade policy for the 80's and 90's if we do not provide meaningful help to those hurt by trade.

Support for trade adjustment assistance has been floundering. Why? Because of the costs and because the current program does not have a good record in promoting adjustment.

The issues of money and adjustment are the focus of the reforms of this provision. Adjustment would be encouraged because participation in retraining would be a requirement for receipt of additional unemployment compensation. Also, workers would receive a new benefit, a $4,000 voucher to be used to finance this retraining.

Funding would be handled through a small fee on imports. This fee would be a small price for those who benefit from trade to pay to help those hurt by trade.

Very broad support has emerged from all quarters in the Senate for this approach. So, in July I introduced it as a separate bill, cosponsored by 11 members of the Finance Committee and last month it passed the Senate as a part of the budget reconciliation bill (S. 1730).

UNFAIR TRADE

Third, my legislation provides for vigorous enforcement of U.S. trade laws against unfair trade. We cannot let our attention to unfair trade slip during a new trade round. Particularly where we can do so without breaking our existing international obligations, the Congress should strengthen U.S. enforcement efforts.

One area that I believe falls clearly into this category is better enforcement against imports which infringe U.S. intellectual property rights. This is a growing problem for U.S. industry and one which puts our greatest comparative advantage—our inventiveness—at risk. I have introduced separate legislation (S. 1869) that would greatly strengthen the ability of U.S. owners of intellectual property to protect their rights.

FAIR TRADE

The last area addressed in my proposal is our fair trade laws.

I would change existing law only to assure that when we give temporary import protection to an industry under our fair trade laws, the industry and the workers provide a "quid pro quo"—in other words that they use the period of protection to take actions that will make them competitive when the protection ends.

Beyond this quid pro issue, I do not believe the time is right for more extensive changes to our laws on fairly traded imports. In today's charged trade environment, we are likely to do more damage than good.

Already there is a dangerous tendency on Capitol Hill to blur the distinction between fair and unfair trade. This translates not only into a tough and aggressive posture by the Congress on unfair trade, but also into an increasing tendency toward toughness and aggressiveness on fair trade as well.

Make no mistake, I have no quarrel with a tough stand on unfair trade, but as far as I am concerned, toughness on fair trade is synonymous with protectionism.

Some in the Congress, however, are pushing the fair trade debate this year. They contend that we must rewrite our fair trade statute—section 201—because the President's decision not to provide import protection to the footwear industry proves that this statute is obsolete, that no industry can use the established administrative process to get temporary protection from imports.

It amazes me that such a view could be offered given this administration's record in section 201 decisions. Of 11 section 201 cases brought since 1980, in five instances the International Trade Commission recommended that the President provide temporary protection. In three of these five cases, the majority, the President has provided significant import protection following a 201 investigation. (Motorcyles, specialty steel and carbon steel)

How would the detractors of section 201 rewrite the law? It's simple—they would tie the President's hands. When he receives an affirmative recommendation for relief from the ITC, he would be required to put it or something substantially equivalent to it in place. This would be the basic procedure—and only if the Congress passes a bill that allows the President to take a different action would the national interest come into play.

What does this mean—that the national interest would be the exception, the special interest the rule.

I believe that the national interest must not be relegated to a backseat where fair trade is concerned.

In sum, we will do better to concentrate our efforts in trade policy on worker adjustment, new trade negotiations and enforcement against unfair trade than to change our basic policies on fair trade.

Today, I have suggested a long-term remedy for our severe trade imbalance. The three-pronged program that I have outlined—reducing the growth in Federal spending, enacting major tax reforms and creating a constructive trade policy and organization—will, in my judgment, keep America strong and competitive.

The hour of decision is here. We are at a crossroads in world trade and in our relationships with our trading partners.

One path leads to mutual recriminations, trade wars and a lowering of all our standards of living. The other path leads to true dialogue, a new fairness in trade, and an expansion in global prosperity.

I firmly believe that the difficulties of the present can become the springboard to the future. I hope that each of you will do your part to insure that it is the latter path that we follow.

Thank you.●

VOCATIONAL REHABILITATION

● Mr. SIMON. Mr. President, as a former chairman of the House Subcommittee on Select Education, I was pleased to read a speech that the current chairman, PAT WILLIAMS of Montana, recently gave to the members of the National Rehabilitation Association.

Vocational rehabilitation for persons with disabilities represents one of the oldest and most successful of State/Federal partnerships. I share Chairman WILLIAMS' enthusiasm and hopes for the Rehabilitation Act and what it represents for the future of handicapped individuals. His remarks deserve our attention, and I ask that they be printed in the RECORD.

SPEECH OF CONGRESSMAN PAT WILLIAMS

Vocational Rehabilitation is the cornerstone of our efforts for those Americans with disabilities. Its cost effectiveness and contribution to the overall strength of our economy has it a strong and successful program. For every dollar spent on vocational rehabilitation $10.80 is returned to the Treasury in taxes.

However, despite its successes and its strengths the effort is not sufficiently

broad. Last year the state grant program served 936,000 handicapped individuals. 226,000 persons completed services and were rehabilitated in 1984. Estimates are that only 1 in 20 people who need services can be reached by the program. Furthermore the RSA annual report in 1983 showed a significant increase in the number of persons applying for and becoming clients of state vocational rehabilitation agencies and an increase in the proportion of severely disabled persons among the total case load. After substantial declines in the percentage of successful rehabilitations in the program, in part due to changes in the targeted population but also in part due to real budget reductions, this year we saw the first increase (4.4%) in the number of rehabilitations. Workrelated disabilities affect a sizable portion of our adult population and is a significant contributor to poverty.

One major issue the federal government faces is how to prioritize limited federal dollars. As a member of the Budget Committee, I worked to ensure that there is allowance for increased funding for the rehabilitation programs in the Budget and there is. However, realistically, the federal financial contribution to rehabilitation is unlikely to grow substantially in the next few years. As you know, the current match for the state programs is 80% federal dollars to 20% state dollars. By the way, fortyfive of the fiftyeight states or territories in the rehabilitation system do overmatch. Certainly, as the demand for expanded services increases, one thing we must consider is which jurisdictions can best pay for those services.

As Chairman of the Subcommittee charged with reauthorizing the Act, I have been holding a series of hearings to examine the performance and future directions of the rehabilitation program. Issues that have surfaced and which are of particular concern to address in the reauthorization are: technology and rehabilitation; leadership, direction, assistance at the federal level for the state efforts; and unmet needs in transition and postemployment services.

Technology has tremendous potential to increase the employment opportunities and the independence of disabled people, including improving communication, mobility, and control of one's environment. Technology can provide important job opportunities for physically disabled persons through adaptation of work sites. As we approach the twenty-first century further advances in micro-computers, electronics, and materials development can only further expand the frontiers of what we even consider possible today.

However, it is clear that many disabled people lack access to the existing technology which could dramatically increase their well-being and productivity. This problem was addressed by the 1982 study of the Office of Technology Assessment, the 1977 White House Conference on the Handicapped, studies by the Urban Institute, and two conferences on the technological needs of the rural handicapped.

Today, we spend $66 million on research for the disabled. Research for other health care is $7.1 billion. Perhaps more important, spending on transfer payments for the disabled is $35.6 billion. Thus, research and development for technology which would ultimately produce revenue in taxes from employed, disabled persons and a reduction in the need for transfer payments represents only two hundredths of a percent of the budget for transfer payments. We must reconsider policies that appear to be shortsighted and not meeting the needs of people to be independent and productive.

For the last couple of years, Congress has been interested in the question of how rehabilitation programs directly or indirectly develop technologies and support their use and dissemination. Four major categories of problems have been identified: problems in targeting, developing, and actually manufacturing technological aids; problems related to the use and modification of existing technology; problems resulting from the lack of knowledge and training about existing resources; and lack of access to affordable technology including matching rehabilitation clients with the most appropriate technology.

NIHR and NASA have already made important strides in addressing the issues of technology development and transfer. NIHR and HHS have addressed the needs of access to technology through database development. My Subcommittee will be exploring the financing of technological transfer in both the public and private sector and better ways of providing technical assistance to rehabilitation personnel about new technology. We will be looking at solutions that include broad-based participation of the medical, manufacturing, communication, government, and rehabilitation sectors.

During the hearings we have heard about the problems of rehabilitation leadership at the federal level. In the past 48 months 35 percent of the staff have been cut. There have been dramatic reductions in travel funds and technical assistance which have made it very difficult—some have told me—impossible to access the expertise which still exists at the regional and national level. The federal government must act as a catalyst and give strong, knowledgeable, and consistent direction to this important national effort. And a major way to accomplish those goals is through meaningful technical assistance.

Ironically, that assistance has decreased as we have required the system to serve the more severely disabled. The technical assistance which has been provided has been inconsistent in focus and delivery. New technology, the need for transition between school and work, and the recognition of the need to serve new and more complex groups of disabled persons such as those with cystic fibrosis and the head injured point us to the need for more not less technical assistance to be provided in a variety of formats. We need to have more interaction between the states and the regional offices, as well as in-service and short course training.

Finally, we are increasingly aware that while the goal of rehabilitation is to provide services for work placement when possible, we must continually work toward a sophisticated and realistic approach. For instance, increasingly, rehabilitation clients may need to come back into the system for job advancement and follow-up services. Estimates are that more than half of our current work force will need retraining to keep pace with our changing economy. Certainly, rehabilitation clients will require no less.

We are poised at a critical threshold in determining federal policy in this matter of a pulsating economy. Our society is in the midst of a series of changes to which the rehabilitation system must respond. The technological resolution has the potential to significantly redefine what is possible in rehabilitation. Technology and improvements in health care are also changing the characteristics of the population of persons with disabilities in ways which provide new challenges for rehabilitation services. The technological demands in jobs are increasing for all workers, which provides new opportunities as well as challenges for the disabled worker. Rehabilitation is embedded in a general workforce whose contours are dramatically shifting with the increase of women in the workforce, the aging of the workforce, and the shift to information and technological sector jobs.

We have already recognized in previous amendments to the Rehabilitation Act, the need to provide more comprehensive services and the need to serve the more severely disabled. Those changes required some reshaping of the rehabilitation system.

We are not passing out of the first generation of students who have benefitted from the full Education for the Handicapped Act. However, while we provide individualized, comprehensive services for children—we must come to full terms with what will be needed after high school for further education and job training. As we design such services, we must also consider what is best provided by the unique focus of rehabilitation services, what is better provided by other programs, how services should be coordinated.

You all face tremendous challenges in your positions within the rehabilitation system. In the Congress we face equal legislation challenges, particularly in this era of great need and limited will. Members of your association have already been tremendously helpful in identifying the challenges that face the rehabilitation system and its current successes and problems. I appreciate your good counsel and I look forward to working closely with you throughout the reauthorization process.

Finally, let me close with this thought—this question: What is it about America, the Americans, that allows us—or perhaps encourages us to share our freedom the way we do? What is it about our system that creates such neighborliness in our citizens? How is it that we have been able to merge the glitter of our wealth with the spendors of our ideals? Whatever it is, it involves the secret of America's success.

Perhaps the answer was in the message of a movie that many of you may have seen. It was named "The Defiant Ones" and starred Sidney Poitier and Tony Curtis. It was the story of two men, one black, one white, prisoners. Despising one another they were none the less partners for they were chained together, each to the other's ankle.

They escaped and were running across the fields when dusk came and in their headlong effort to be away from their confinement they fell into a deep pit. In their struggle to get out they quickly discovered that to reach the top of the pit one must stand on the other's shoulders. Pulling himself over the edge he must pull his despised partner out if either was to be free.

Perhaps that is it. America's secret: none of us can be free until each of us is free. We are bound inexorably together. The genius and the slow, the swift and the hesitant, rich to poor, black to white. None of us to reach the full promise of America until all of us reach it together.

It is important work that you are about at this convention here in Iowa. I am pleased to be part of it with you.●

ANTISMOKING CAMPAIGN

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD:)

● Mr. EAST. Mr. President, in recent years, the Great American Smokeout has been staged every November 21. I have always wondered who the people are that orchestrate the Great American Smokeout and now, according to an Associated Press dispatch, a public opinion poll provides the answer.

A great deal of information is contained in a survey that recently compared the attitudes of antismokers and members of the general public. I ask to have this enlightening poll printed in the RECORD so that all Members of Congress may know where the antitobacco agitation is coming from.

The material follows:

FINGERHUT/GRANADOS
OPINION RESEARCH CO.,
Washington, DC, November 14, 1985.

Re: Comparison of attitudes and general characteristics of general public and anti-smoking activists.
To: Tobacco Institute.
From: Vic Fingerhut.

SAMPLE SELECTION

The sample was drawn from 400 persons randomly selected from among those who responded to a widely publicized appeal from the CAB for public comment on its proposal to prohibit smoking on most commercial flights, and who encouraged such restrictions. (The CAB decided last year against the proposal.)

The other 400 were adults selected randomly from the general population.

The interviews were conducted between November 6, 1985 and November 9, 1985.

SUMMARY OF FINDINGS

The just-completed surveys of the *general public* and of *anti-smoking activists* reveal *strong differences* of opinion between them, and show remarkable *dissimilarities* in demographic composition.

The people who wrote to the CAB (whom we call "anti-smoking activists") to demand more strict government regulation of smoking tend to be people who *differ strongly* with the general public's beliefs, and think that:

1. *people lack consideration* for others, and, therefore, the government should regulate their personal behavior;

2. the government should pass laws to regulate the *private, personal behavior* of the public, and of their *co-workers*, both in public places and in private establishments;

3. *tax laws* should be used to *force other people to change* their private behavior;

4. the government's *scarce human and tax resources*, even if needed to fight more serious crimes, should be spent on enforcing smoking regulations of *private businesses*.

Just as striking as the differences in beliefs, which set the "anti-smoking activists" apart from the general public, are the demographic characteristics which further differentiate them from the "average" citizen.

The "anti-smoking activists" are, as a group, *older*, concentrated in *managerial* and *professional* occupations, earning an *upper income*, with over two-thirds considering themselves to be *"upper class"*, or "upper middle class", and virtually all of them have gone to college (64 percent either have a college degree, or have done graduate work).

MAJOR FINDINGS

Perhaps the *most surprising* finding from the "anti-smoking activists" survey is the response to a question probing beliefs about the role of government regulations in general, *not* tied specifically to controlling smoking.

Seventy-six percent of these "activists" do *not* believe *"most people"* are considerate of others in public situations, and believe in the need for *"government regulations to keep them from bothering others."* This represents a *75-point* "spread" swing from how the general public responds to the same question:

"Most people in places like restaurants and airplanes are usually considerate and don't need government regulations to keep them from bothering others."

SUMMARY OF FINDINGS

[In percent]

	Agree a lot	Agree a little	Disagree a little	Disagree a lot	Don't know
Activists	9	13	19	57	2
General public	32	27	20	18	3

[In percent]

Total who—	Antismoking activists	General public
Agree	22	59
Disagree	76	38
Difference, agree/disagree [1]	−54	+21

[1] 75 point spread.

Significantly, this difference of viewpoint on the propriety of *governmental intervention in personal behavior* between "anti-smoking activists" and the general public *widens* when the question specifically includes smoking.

When asked to "agree or disagree' with the statement that the "government should *not* be in the business of regulating *private, personal behavior*, such as smoking", *67 percent of the general public agrees* with the statement, while *68 percent* of the *"activists" disagree.*

That amounts to a "swing" in attitudes between the general public and the "anti-smoking activists" of *78 points.*

"Government should not be in the business of regulating private, personal behavior, such as smoking."

[In percent]

	Agree a lot	Agree a little	Disagree a little	Disagree a lot	Don't know
Activists	15	11	21	47	6
General public	46	21	13	18	3

[In percent]

Total who—	Antismoking activists	General public
Agree	26	67
Disagree	68	31
Difference, agree/disagree [1]	−42	+36

[1] 78 point spread.

The opinions of those "anti-smoking activists" surveyed also differ *drastically* from those of the general public when it comes to their views of the role local government should play in regulating personal behavior.

Unlike their neighbors, "activists" want their local governments to pass a law "restricting or prohibiting smoking in *all local businesses,"* and by a margin of *nearly five to one* over the general public.

Clearly, the "activists" want the government to push *their* viewpoint, over that of the average citizen, in *private* as well as public places:

"Which of the following statements comes closest to your opinion about restricting smoking where people work?"

[In percent]

Statement	Attitude of the— Activists	General public
Local government should:		
Pass law restricting/prohibiting smoking in all local businesses	50	11
Rely on all local businesses to establish smoking sections, based on employers'/employees' needs	28	37
Should not pass law on this subject, because employers/employees should determine company's internal policies, not the government	17	50

While the *general public favors self-determination* in private affairs, the *"activists" want the government to intervene*, and by a wide margin.

When respondents were asked about problems related to smoking at work, again, there were *significant differences* between the "anti-smoking activists" and the general public.

Sixty-nine percent of the *general public* agreed that, "where I work, there's not much of a problem with smokers bothering non-smokers." Having the government, they felt, regulating smoking "is just unnecessary." However, *66 percent* of the *"anti-smoking activists" disagreed*, and want the government to "enforce detailed, new rules on smoking" where they work.

"Where I work, there's not much of a problem with smokers bothering non-smokers. Having the government try to enforce detailed, new rules on smoking, is just unnecessary. Do you agree a lot, a little, disagree a little or disagree a lot with this statement?"

[In percent]

	Agree a lot	Agree a little	Disagree a little	Disagree a lot
Activists	26	8	25	41
General public	49	20	16	14

[In percent]

Total who—	Antismoking activists	General public
Agree	34	69
Disagree	66	30
Difference, agree/disagree [1]	−32	+39

[1] 71 point spread.

Indeed, 56 percent of the general public agree that, "with all the problems of crime and law enforcement, *wasting* money and

scarce resources" on "enforcing smoking regulations in *private* businesses is very foolish."

However, *77 percent* of the "anti-smoking activists" *disagree*, apparently thinking government taxes and personnel should be used to regulate smoking in *private* places.

"With all the problems of crime and law enforcement in America, wasting money and scarce resources on adopting and enforcing smoking regulations in private businesses is very foolish."

[In percent]

Total who—	Antismoking activists	General public
Agree	22	56
Disagree	77	41
Difference, agree/disagree [1]	−55	+15

[1] 70 point spread.

In fact, the "anti-smoking activists," unlike the general public, think that tax policy (50 percent agree), should be used to "stamp out" smoking, *not* just raise revenues (37 percent agree).

Again, the general public sees it the other way around: taxes should be imposed to raise revenue for the government (46 percent), and not be levied just to alter the personal habits of ordinary people (34 percent).

"There is disagreement over what the purpose of taxes on cigaretts should be. Do you think taxes should be set to raise revenues for local, state, and federal governments, or set at a level so high that it will help stamp out smoking."

[In percent]

Total who say—	Activists	General public
Raise government revenues	37	46
Help stamp out smoking	50	34
Not sure	13	20

Interestingly, not only are there drastic differences in the attitudes and opinions of all segments of both groups, there are also significant variances between the "former smokers" and "non-smokers" who are "anti-smoking activists," and the same two subgroups of the general public.

As can be expected, "former smokers" and "non-smokers" comprise some *93 percent* of the "anti-smoking activists" respondents. In the survey of the general public, *71 percent* were "former smokers" or "non-smokers."

One could anticipate that these subgroups of both samples would respond with similar frequencies to a question about how often they have asked other people *not* to smoke.

In point of fact, they don't. "Former smokers" and "non-smokers" among the "anti-smoking activists" are far more likely to raise the issue than are the same subgroups among the general public.

"During the past three months, how often have you asked someone not to smoke? (asked of former smokers or non-smokers only)

[In percent]

Total who say—	Activists	General public
Frequently	17	15
Occasionally	25	16
Rarely	23	17
Never	33	52
Not sure	2	0

Probably the major reason for the differences in attitudes between the "anti-smoking activists" and the general public rests with *whom* these "activists" are.

As previously mentioned, the demographic characteristics of the "anti-smoking activists" are such that, as a group, they cannot be considered as representative of the great preponderance of U.S. society.

The following categories demonstrate just how different the "activists" are:

[In percent]

	Activists	General public
Occupation:		
Professional/white collar managerial	48	20
White collar clerical/service/government/blue collar	12	29
Housewife	11	11
Retired	20	23
Student	2	5
Self-employed	4	5
Unemployed	1	5
Income:		
Less than $20,000	12	36
$20,000 to $29,999	13	18
$30,000 to $39,999	15	12
$40,000 or more	37	16
Education:		
Less than high school graduate	2	16
High school graduate	11	36
Some college	20	21
College graduate	30	17
Post graduate work	34	8
Other/won't say	4	2
Class (self-identified):		
Upper class	7	3
Upper middle class	61	36
Lower middle class	12	27
Working class	8	23
Other/not sure/won't say	12	11
Age:		
18 to 30	12	28
31 to 45	27	25
46 to 60	28	20
Over 60	31	27

THE ARKANSAS WRITING PROJECT

● Mr. BUMPERS. Mr. President, I am pleased to have the opportunity to bring to the attention of my colleagues an outstanding educational program, the Arkansas writing project. This project, an affiliate of the national writing project, was initiated in the summer of 1985 on the campus of Westark Community College in Fort Smith, AR.

The goal of the national writing project is to improve student writing by improving the teaching of writing. The project has already provided training to 300,000 teachers nationwide. Twenty-three Arkansas classroom teachers participated in a 5-week seminar at Westark last summer.

During the 5-week session, which is only the first phase of the program, the teachers submerged themselves in writing exercises. During the school year they will have the opportunity to continue to learn through teacher demonstrations, shared personal writing, and participation in ongoing professional support groups. They will focus on objectives such as keeping ideas fresh and will become teacher/consultants, working with colleagues in their own districts. Not only does the project improve teachers' writing skills, but also their skills in teaching students to write.

The enthusiasm and positive evaluations by the participants are the best testament to the effectiveness of the program. The Arkansas writing project would be worthwhile if it benefited only the 23 teachers who are lucky enough to participate. However, the benefits are enjoyed and shared for months and years to come because teachers return to their classrooms with a new enthusiasm and a commitment to work with other teachers to improve the teaching of writing.

In recent years we have sounded alarms about the decline of American public education. Keeping good teachers in our schools and recruiting quality candidates are two means of upgrading the quality of our schools. Teachers as well as students need positive reinforcement, and the Arkansas writing project told 23 teachers that their work, skill, and dedication do not go unnoticed. High quality inservice training provides teachers an incentive to stay in the classroom.

I would especially like to acknowledge the hard work and dedication of Meta Potts, who served as instructor and project director for the summer program.●

ADDRESS OF THE RT. REV. ARTHUR E. WALMSLEY

● Mr. WEICKER. Mr. President, the great issues of the U.S. Congress, as with many of the great issues of society, are often portrayed to the Nation and the world in terms of extremes. We seem determined more often than not to confer legitimacy only to those matters where polarization of ideas has already been achieved.

The task we face, the job of political leadership, is to modify extremes; to produce results where others produce only rhetoric.

In that task, we have come to respect the value of spiritual counsel from many of the Nation's religious leaders, even as we abhor tests that seek to measure political success by religious sufficiency.

Included in that valued counsel is a recent address by the Rt. Rev. Arthur E. Walmsley, bishiop of Connecticut, to a recent diocesan convention in Chicago. It is a model of spiritual understanding and secular insight, and I commend it to my colleagues.

I ask to have printed in the RECORD the address of Reverend Walmsley.

The address follows:

THE WAY OF THE CROSS AT THE END OF THE 20TH CENTURY

(The Rt. Rev. Arthur E. Walmsley, bishop of Connecticut)

Elie Wiesel came to Connecticut last June to receive an honorary degree from the University of Hartford. He spoke at a special convocation which coincided with the opening of an exhibit at the Atheneum, our art museum. The exhibit at the museum was titled "The Precious Legacy", and was a record of the religious and home life of the Jews of Czechoslovakia.

During World War II, some 75,000 men, women, and children were removed from their homes, sent to a camp at Terezin. Later, the majority of them would go on to other places with more familiar names, Buchenwald and Auschwitz. With incredible perversity, the Nazis had the Jews take with them their most precious belongings: vessels for the Seder, prayer shawls, family portraits, Torah scrolls from synagogues. Altogether more than 140,000 artifacts were assembled and stored in warehouses in the lovely medieval city of Prague. The Nazis intended, after they had won the war, to establish a museum dedicated to an extinct people.

Elie Wiesel is one of the survivors. Himself an eastern European, he is one of those few who passed through the dealth camps and lived to tell the tale. He has been telling it ever since in a series of novels, in the recovery and relating of Hasidic and other stories of Jewish folk and religious history. He writes with eloquence and passion. You will recognize him as the chairman of the National Holocaust Commission who confronted President Reagan in the White House during the tense debate over the latter's decision to visit a German military cemetery at Bitburg. In receiving his doctorate from the University of Hartford, Wiesel once again challenged us to look at the moral dilemma posed for the world by the holocaust, an assault on a people:

"Forty years after the event I confess to you that I still don't know why it happened nor do I know how it happened. I still do not understand how it was possible—from the viewpoint of God, from the viewpoint of human beings, society, history, civilization.

"All the questions that I had then are still open today. Not one has been solved and yet God knows I tried to write—a few books (not too many) and to teach (not enough). I tried to tell the tale. For years and years and years I have been trying to do that and yet I am no closer to truth, whatever truth may be, than I was in 1944 and 1945.

"What was it? What was it in human nature that overnight turned a people—a people of culture, a people of the arts, a people of music, a people of philosophy—into worshipers of brutality, worshipers of dictatorship, worshipers of death? What was it that turned the "outsiders," so many of them good people—liberals, friends of the human race—into spectators?

"(Only) one attitude is possible. One response is valid. I have not found any theological answer to the event. Nor have I found any artistic answer. There is only one answer that is valid, and that is the ethical answer."

Wiesel speaks to this moral dilemma with eloquence because he is a survivor who has been plunged by his own experience into the pain of the question. He is right that the answer has to be sought at the level of ethics. The trouble, as Alasdair MacIntyre has written—and he is the most widely read moral philosopher of our time—is that the debate on all of the great ethical questions is interminable. Not just in the sense that the debate itself seems to be endless, but because the various positions on the great question proceed from what appear to be mutually exclusive starting points.

I want later in these remarks to consider two issues: abortion and South Africa. On the first, abortion, this society is deeply divided. Unless I miss my guess we have not begun to see the degree to which that division has the potential to shatter the social fabric of many communities. One of our cities, Bristol, is the first in the nation to have the matter placed on a local referendum. The potential for mischief in that is enormous. In South Africa, where apartheid stands as the insidious descendant of Nazi illusions of aryan superiority, civilized people—Wiesel's phrase is "friends of the human race"—once again confront the dilemma of how and when and where to intervene. I do so with no illusion that we will go out of this banquet armed with solutions to vexing moral issues which anguish and divide people of good will. Rather that we see in them a dimension of the calling of Christians to walk the way of the Cross in the only arena in which it can be lived, amid the issues of a society locked in an embrace with the forces of death.

I find myself, when I go to Washington, DC., gravitating to the Vietnam War Memorial. That solemn location is no monument to Rambo nationalism, but an American Wailing Wall. There is invariably a hush as people look for names, caressing the black marble. It is a parable in stone of the agony of a generation in which those who fought have lived as pariahs in the nation which sent them, and those who resisted military service are at best ambiguous heroes.

Elie Wiesel is right. This generation cannot escape the issues of theodicy: in a world created by God, how can the righteous seeker after God escape the issue of evil? The Christian response is to add one more death to all the others, and to discover in the way of the Cross a means, a process, a way of life for moving through and living with and addressing with power the pain of the world, our own, or that which is writ large in the issue of violence. I remind you of a simple statistic offered by the Center for Defense Information, an organization which monitors the level of human carnage being waged in regional wars, revolutions, and a procession of terrorist events of all sorts. On this evening, over 4 million people are presently engaged in 42 different wars, rebellions, and civil uprisings.

What the Church has to offer the world is a way of life—I think it is the only way of life—capable of facing that kind of world. Let me offer you, to begin with, a parable of what I mean. Desmond Tutu was the banquet speaker at our Diocesan Convention a year ago. Ten days before the event, he was named Nobel Prize laureate. There followed the endless procession of media events, a hurried weekend trip to Johannesburg, on the day of the address a meeting at the United Nations. Two members of our staff were dispatched to the General Seminary to pick him up.

Would he like to sit in the front seat?

"No thank you. I'm afraid I'm going to be inhospitable and sleep in the back." The party moved off through rainy streets and lower Manhattan traffic.

"Are you comfortable?" "Yes," he replied, half sitting, half lying in the back seat. Only one thing he would like. "May we please stop somewhere along the highway to say Evening Prayer?"

"Later, perhaps, once we're out of the traffic." The driver and his companion gave attention to a Friday afternoon traffic jam. Two hours later, as the car approached an exit on the Merritt Parkway, the driver said to his companion: "Wake Bishop Tutu now, and ask if he'd like to stop." "Oh no," the bishop said, quickly rousing. And, holding up well-thumbed books, "I said the Office long ago, while you were driving out of the city."

The mission of the Church in this as in every century is to prepare martyrs, witnesses to the significance of the Lord's death and resurrection. In a paper written to provide a rationale by which names of notable Christians might be placed on the calendar of lesser feasts and fasts, Thomas Talley of General Seminary reminds us, "The paschal mystery in which Christ the Lord passes through death upon the Cross and the Sabbath of burial to rise in glory and ascend in triumph to the Father constitutes the central idea, what Victor Turner calls the 'root metaphor' of Christianity."

That is the place at which Christians join the issue raised by Elie Wiesel. The Cross is a kind of breaking point in history. It is in the sense that by his complete self-offering, Jesus stretches human consciousness—his own human consciousness—to the very limits. There is no greater sense of abandonment than when perfect love has made itself completely vulnerable as in the Garden and on the day of the crucifixion. Those odd little groups of people who responded to the message of the Cross in the first century of our era did so with a courage and a sense of transformation that enabled them to withstand the most powerful state the world had ever known and transform it. And it remains so.

In a conference last January on seminary education, that little vignette about Desmond Tutu spoke volumes about the process of Christian formation. I used it to illustrate a set of expectations which our diocese has about the formation of people for priestly ministry. We are in a bleak period of human history. Like the people of Israel, we are on a journey into the wilderness and a wilderness people needs a discipline for the journey. We are when we talk about preparing people for ministry—whether as lay people whose lives are lived primarily in the world, or ordained persons who are called to serve and equip that ministry—we are talking about the formation of people who can (1) give a reasonably clear articulation of the faith within themselves, (2) have recognizable and reasonable understandings of their own gifts and ways in which they can be appropriated by the Church, (3) have learned by doing disciplines for expressing their faith—and its shadow of doubt—in prayer, the reflective reading of Scripture, and through making use of mentors and communities of support; all this in light of and informed by the heritage of the Church and expressed through varied cultural and personal backgrounds.

It is just that quality of discipleship which saints and martyrs illustrate. God knows that in the accelerating violence of the late twentieth century, we have had more than our share of those whose witness has been with their lives. Some, Dietrich Bonhoffer, Martin Luther King, Janani Luoum, Oscar Romero, the four Roman Catholic women missionaries in El Salvador, have a place in the annals of human history. Others more anonymous make up a vast company of

clergy and people who have paid with their lives for faith in remote hamlets and barrios, in concentration camps and prisons. Still others—Tutu, Lech Walesa, Dorothy Day, John XXIII—are hailed in the midst of life for their compassion, their humanity, their vision of the human community. Surrounding them is the daily life and witness of men and women who in a variety of ways have said no to the prevailing culture out of faith in Christ. And it is my sense that those who are most orthodox, most steeped in the tradition of prayer and Scripture study, corporate worship and the struggle in community to discern God's will are best prepared to influence the Church in its corporate witness against the forces of death in the contemporary world.

To be a Christian is to walk in the way of the Cross, and the way of the Cross leads through the pain of the world to victory. The poet Mark Van Doren, one of Thomas Merton's mentors during the latter's years at Columbia University, visited Merton after he had entered Gethsemani:

He, once, my merry friend
Came to the stone door,
And the only difference in the smiling was,
it sorrowed more,
No change in him, except
His merriment was graver,
As if it knew now where it started from;
And what was the flavor.

Those words were written shortly after Merton became a Cistercian Monk. I suspect that the fascination with this extraordinary man is that while his outward vocation led him to seek withdrawal from a potentially brilliant career in literature to the remoteness of a monastery and toward the end to the hermitage. And yet the further he withdrew into the life of prayer and an encounter with his own spiritual hunger, the more drawn he was to the universal issues and the more accessible he became to people not only in the West, but in the great religions of the Orient. In a paper given in Bangkok just before his death in 1968, he rephrased once and for all for me the question posed by Elie Wiesel.

"Are monks and hippies and poets relevant? No, we are deliberately irrelevant. We live with an ingrained irrelevance which is proper to every human being. The marginal man accepts the basic irrelevance of the human condition, and irrelevance which is manifested above all by the fact of death. The marginal person, the monk, the displaced person, the prisoner, all these people live in the presence of death, which calls into question the meaning of life. He struggles with the fact of death in himself, trying to seek something deeper than death; because there is something deeper than death, and the office of the monk or the marginal person, the meditative person or the poet is to go beyond death even in this life, to go beyond the dichotomy of life and death and to be, therefore, a witness to life.

This requires, of course, faith, but as soon as you say faith in terms of this . . . marginal existence you run into another problem. Faith means doubt. Faith is not the suppression of doubt. It is the overcoming of doubt, and you overcome doubt by going through it. The man of faith who has never experienced doubt is not a man of faith.

Consequently, the monk is one who has to struggle in the depths of his being with the presence of doubt, and to go through what some religious call the Great Doubt, to break through beyond doubt into a servitude which is very, very deep because it is not his own personal servitude, it is the servitude of God Himself, in us. The only ultimate reality is God. God lives and dwells in us. We are not justified by any action of our own, but we are called by the voice of God, by the voice of that ultimate being, to pierce through the irrelevance of our life, while accepting and admitting that our life is totally irrelevant, in order to find relevance in Him. And this relevance in Him is not something we can grasp or possess. It is something that can only be received as a gift. Consequently, the kind of life that I represent is a life that is openness to gift; gift from God and gift from others.

Lest that seem like pious abstraction, I ask you to plunge into the issue of abortion. We are confronted with a situation in which absolutist voices on both sides have staked out lofty moral ground for their positions. On the basis of a kind of natural law ethic about the nature of fetal life, pro-life forces declare that abortion is murder. Pro-choice forces argue that family and societal considerations, the moral weight of individuals making responsible decisions in the loneliness of their own existence take precedence over potential human life. I submit that most choices by human beings confronting the possibility of an abortion are not made on such lofty heights, but in the valley of confusion in the face of what sensitive people realize are competing ethical and moral values. The action of the General Convention in Anaheim, California not to tinker with the Episcopal Church's position on these matters, which is rooted in a pastoral concern for that dilemma instead asked us to bring it out into the open by urging at every level of church life further study in which persons holding with conviction and passion the polarities on this vexing subject engage each other. Many of us who have tried to do so find ourselves savaged by those who disagree as if we were moral lepers. Last October I had the temerity to make a public comment in response to remarks made by various of the Roman Catholic hierarchy which suggested that no "logical or theological" position could be taken on this matter which disagreed with the magisterium of the Roman Church. The burden of what I said is that some Christians, equally serious in their moral sensibilities and concern for human life disagree with that position. In some quarters, my statement was hailed as a corrective in the debate. In others, it was attacked as one critic put it, as not in keeping with the "positive ecumenical spirit." I doubt whether our posturing on these issues in public is particularly edifying to people; I'm very clear that it is not helpful to those who are living out the anguish of making choices or to those in public life whose responsibility is to produce the social concensus on which life in an ordered society depends.

Finally there is the issue of South Africa. One reads the daily reports from South Africa with the sense that the clock there is fast approaching midnight. The Rev. Leon Sullivan, hailed as the architect of the so-called Sullivan Principles by which American firms investing in South Africa have sought to exercise social responsibility in the personnel and other practices, has now himself called for disinvestment by American corporations by 1987 if significant change has not happened. You are familiar with the fact that the General Convention and an increasing number of Church-related institutions in the Episcopal Church and in other communions have voted for divestiture of stocks in companies doing business in South Africa.

My reason tells me that it may be possible to make one last effort to bolster those economic forces, American and South African, which today are pressing for dismantling of the policy of apartheid. I mean the sort of effort represented in the advertisement in the October 18th New York Times in which companies in the United States support the public action for political change of their South African counterparts. But my heart tells me that any action we take is symbolic. Decisions by relatively conservative bodies such as Episcopal dioceses to proceed with the orderly divestiture of all holdings in companies doing business in South Africa and Namibia would signal to the world around us—and to American corporations, some of which are headquarted in Connecticut—the extent to which religious and moral condemnation of apartheid now compels us. We are not condemning the efforts companies are making to accomplish change, or impuning the moral seriousness of anyone who has not yet reached this position. We have no illusion that this symbolic action by itself will bring change. But we are incarnational Christians who believe that God acts in history, and that as God's people we must act within the limited choices open to us.

That brings me full circle to the issues raised by Elie Wiesel. The situation in South Africa confronts the world with a moment of truth, what the New Testament would call kairos, a time of testing. Not since Nazi Germany has there been an ideology which has attempted to justify on religious and philosophical grounds the denial of a whole people solely on the basis of race. For Christians in the world, the death and resurrection of Jesus once for all declares the inauguration of the kingdom of God. Our action here in some small measure is a way to proclaim the sign of the kingdom in the face of the denial of human community. It is a way to signal human solidarity with brothers and sisters who are in the midst of persecution that they are we and we are bound together in a movement over which none of the forces of death can prevail.●

SPORTS FRANCHISE LEGISLATION

● Mr. EVANS. Mr. President, pending on the Senate Calendar is legislation to clarify the antitrust laws as they regard professional sports. I speak of S. 259, the Danforth-Eagleton bill, which was reported by the Commerce Committee in the spring, and later was reviewed by the Judiciary Committee. I understand agreement was reached recently among the concerned parties which will be reflected in a consensus amendment to be offered to S. 259. I support this effort and commend consideration of the legislation to the Senate for action early next year.

This remedial measure is rooted in the problem of sports franchise instability. Recent court decisions raise serious questions about the capacity of sports leagues to promote such stability—either by checking unreasonable franchise moves or providing the economic wherewithal to relieve economic pressures in smaller markets.

Sports leagues are a unique form of joint venture. Not only do its members

not compete against each other economically, they do not exist outside the framework of their joint enterprise. For example, the Seattle Seahawks have no predatory economic interests against the San Francisco 49ers, or any other professional football team. Every club's goal is not only furthering their own financial health, but enhancing the fiscal well-being of the entire enterprise.

As Judge Bork has written:

> The members of a league cannot compete in the way that members of other industries can. It is neither in the interests of the members of the league nor of the public generally that the more efficient teams should drive out the less efficient. If one team goes out of business, all are endangered.

To foster overall financial strength, sports leagues commonly engage in some form of revenue sharing. Teams in larger and more lucrative cities share in certain revenues with teams in smaller markets.

Superficially, this appears unfair to teams which play in large cities. If league revenues were divided according to the relative size of media markets, such teams would receive more money than they do from an even split. But to what end? Under such an arrangement, a league would be dominated by a handful of "have" teams. Grave economic pressures would arise for the "have nots." The overall quality of league play would deteriorate. Fan interest would diminish. The economic gains of a few clubs would be true Pyrrhic victories as the enterprise, as a whole, suffered. Pressures for franchise relocation or even consolidation would occur in response.

Revenue sharing is an enlightened policy which protects the league overall by avoiding these pitfalls. It promotes highly competitive teams in a wide range of markets. It fosters broad geographic distribution of the league's product.

In no league is revenue sharing more fully utilized than in the National Football League. As each team equally coproduces NFL football, so does each team derive equitable benefits from their participation in the league broadcast package. Through revenue sharing the league is able to maintain teams in cities such as Seattle, Green Bay, Buffalo, and St. Louis—and make them competitive with teams from New York, Chicago, and Los Angeles.

Particularly in football, revenue sharing is an essential part of sound economic planning. Due to the paucity of home playing dates, teams in smaller markets could never generate sufficient gate receipts to compensate for low broadcast revenues. Without revenue sharing in football, teams in large cities would move into a position of natural economic dominance and the competitive balance of the league would suffer markedly.

Mr. President, sports franchise stability is a matter of substantial concern to many American communities. For several years, Congress has struggled to arrive at a formula which addresses these concerns without getting Government excessively involved in the business of sports. The Danforth-Eagleton bill, and the consensus amendment which will be offered, refines a number of legislative overtures into a product which is comprehensive without overreaching.

This legislation promotes legal and economic stability in professional sports. I hope the Senate will act upon it in short order upon our return in January.●

COST-OF-LIVING ALLOWANCES FOR FEDERAL ANNUITANTS

● Mr. SARBANES. Mr. President, yesterday the Senate passed the so-called balanced budget—Gramm-Rudman—bill, which would eliminate cost-of-living allowances [COLA] for Federal annuitants, and I want to indicate my strong opposition to these provisions.

As one who regards public service as an honorable profession, I have personally seen time and again the dedicated service and high quality of performance of our public employees on whom we depend to keep our Government operating. I feel the current and future Federal annuitants have been the sacrificial lambs too often over the last several years for the purpose of reducing the Federal deficit. It is increasingly difficult to attract and to keep qualified, talented, and experienced individuals in private service if we are constantly restructuring and threatening the future benefits of civil servants.

The provision of Gramm-Rudman denying the COLA to Federal retirees is more of the same—an attack on those now working in Federal service and those who have retired. It is unwarranted. I oppose Gramm-Rudman because its concept is basically flawed. It, too, is also anti-Government in its approach. The Federal retiree provisions of this bill are simply unacceptable, and I strongly oppose them.●

MARSHALL ISLANDS

● Mr. SIMON. Mr. President, I do not claim to be an expert on the problems of the Marshall Islands. I have some small insights, and I have an appreciation for what they have gone through.

We recently passed legislation that deals with the problems of the Marshall Islands, the Compact of Free Association.

But I have seen the statement by Senator Jeton Anjain of the Rongelap Atoll of the Marshall Islands. It is a moving statement of one person's view.

Since we are all involved in this, I thought it worth entering into the RECORD.

During the debate on the issue of the compact, Senator METZENBAUM and I registered our objections that the Espousal clause is an unfair position for the United States to take, and is probably unconstitutional. I also expressed my concern for those afflicted by health problems as a result of exposure to nuclear radiation.

I urge my colleagues to read Senator Anjain's statement, which I submit for the RECORD.

The statement follows:

STATEMENT OF SENATOR JETON ANJAIN, RONGELAP ATOLL, REPUBLIC OF THE MARSHALL ISLANDS, TRUST TERRITORY OF THE PACIFIC ISLANDS

Mr. Chairman and distinguished delegates, I greatly appreciate this opportunity to address the Fourth Committee of the United Nations, and I wish to congratulate the new chairman on his recent election.

My name is Jeton Anjain and I am the Senator from Rongelap Atoll in the Marshall Islands in Micronesia. Having been trained as a dentist, I practiced dentistry for twenty-five years in the Marshall Islands, and in 1982 I was appointed as the Minister of Health for the Marshall Islands. I now serve as senator for my people on Rongelap and devote all of my time and energy to that task.

At the end of World War II, the United States took control of the more than 2,000 islands that make up the island group called Micronesia in the Central Pacific Ocean. In 1947, Micronesia became a territory of the United States under the United Nations trusteeship system, and of the eleven trust territories created after the Second World War, it was the only one designated as a "strategic trust."

Under article VI of the trusteeship agreement, the United States made a promise to the international community that it would "protect the inhabitants against the loss of their lands and resources," and that it would "protect the health of the inhabitants" of the trust territory.

In July of 1946, the United States selected Bikini Atoll as the site to explode two atomic bombs in an experiment known as "operation crossroads." It should be pointed out that the "Able" and "Baker" atomic bombs of "Operation Crossroads" were detonated the year before the signing of the 1947 trust agreement, and we now view that fact of history as evidence of how the United States would administer its "Trust" in the Pacific. Under a United Nations trust agreement, the United States exploded 66 atomic and hydrogen bombs in our islands, and even as I speak to you today, my people are continuing to suffer from the radioactive legacy of these barbaric nuclear weapons tests. In my traditional language there is no word for "Enemy," but yet, we now consider it an act of war that the United States came to our islands for only one purpose: To explode nuclear weapons in the name of United States national security.

In the early hours of a still day on March 1, 1954, a bright flash of light steaked across the morning sky. Several of my people on Rongelap were confused, as they thought they saw the light coming from the West instead of a normal sunrise in the East. Minutes later, several loud sounds, like claps of

thunder, pierced the morning air. A little while later, the bright morning sky turned grey, and a gritty ash fell out of the sky and covered our island. Little did we know then that our lives would be forever changed by that gritty ash that fell out of the sky 31 years ago. And little did my people know that we were the world's first victims of radioactive fallout from a hydrogen bomb.

After several days, my people—and the people of Utirik several hundred miles away—were evacuated to Kwajalein Atoll to the south of Rongelap. The people began to feel very sick and weak, and many began to have burns on their bodies. Hair began falling out of their heads, and the United States doctors told us that their blood counts went down 50 percent the normal level. Many people thought that they were going to die from this new sickness, and in fact, we have been slowly dying ever since that tragic day in 1954. Mysteriously, most of the pregnant women at the time either had miscarriages, or else gave birth to creatures that did not resemble human beings. After 31 years, the women of Rongelap continued to have these problems with reproduction, and we believe that lingering radiation is the cause of this.

Because our home Islands were so contaminated, we were forced to abandon our home of Rongelap. For three years we became refugees, and lived on Ejit Island in Majuro Atoll. Then, in 1957, the Atomic Energy Commission told us that we could return home. Packing up our belongings, we made the happy journey back to our ancestral home of Rongelap.

After several years back home on Rongelap, we thought that things were slowly getting better, and that perhaps our lives would return to a normal state. How wrong we were.

In 1963, the United States doctors discovered a thyroid tumor in the neck of a Rongelap woman. The next year a few more thyroid tumors were discovered. We began to see that with every passing year, more and more of our people were being stricken with thyroid disease, and one by one my people were taken to the United States where major surgery was performed to remove their thyroid glands. Beginning in 1969, the people of Utirik—who were 300 miles downwind of the hydrogen bomb at Bikini—began to experience the same problem with thyroid tumors. The thyroid disease among my people has reached epidemic levels, and several children suffered from stunted growth because of their injured thyroid glands.

In 1972, a nephew of mine named Lekoj Anjain died of leukemia when he was 19 years old: Lekoj was one-year old during the "Bravo" hydrogen bomb test of 1954 when he played in the snow-like fallout on the ground. Not long afterwards, my brother John—the father of Lekoj—and his wife Mijjua both developed thyroid tumors. And I have had a cancerous tumor removed from my body. The radiation from the 1954 "Bravo" fallout has not only killed and maimed the people of my island, but it has taken a personal toll on the lives of my family members. Mr. Chairman and distinguished delegates, I do not think this radioactive legacy is what the international community had in mind when it turned our islands over to the United States under a sacred trust agreement in 1947!

As health problems continued to proliferate many years after our original exposure to high-level radioactive fallout, we found it odd when the United States doctors and scientists kept telling us that things were getting better, and that the radiation in our islands was going away. We also began to wonder who was realy benefitting from the annual medical surveys conducted by the United States Government. It is funny that although many U.S. agencies have come out to our islands with supposedly the "best" doctors in the world, we still have never been taught even the most basic facts about our unique exposure to radioactive fallout. First the Atomic Energy Commission came to our islands, then came the Energy Research and Development Administration, and now we have the Department of Energy. They keep changing the names of these agencies, but they never change the people in the agencies.

In 1978, the Department of Energy conducted a radiological survey of the Northern Marshall Islands. At the conclusion of their survey, it was revealed that in addition to Rongelap and Utirik, 12 other Atolls and islands were contaminated with dangerous levels of fallout from the hydrogen bomb test program. In other words, our worst fears were realized when the U.S. Government admitted for the first time in 1978 that literally thousands more Marshallese had been exposed to fallout and were continuing to live in a radioactive environment. Yet, despite this very important admission, only Rongelap and Utirik are receiving U.S. medical surveys. This fact makes a simple mockery of article VI of the trust agreement whereby the United States pledged to "protect the health of the inhabitants."

Following the 1978 DOE survey, the people of Rongelap were told to abandon the northern half of their atoll because of dangerous radiation levels. You can imagine the great fears and anxieties this caused my people when they realized that since their return after "Bravo" in 1957 that they had been eating foods and living on islands in an area now under quarantine! And it is likewise easy to imagine why my people began accusing the United States Government of using them as "Guinea pigs" in an ongoing human experiment to study the long-term effects of how radiation enters the human foodchain. I have often thought that those Americans who allowed my people to be exposed to radioactive fallout, and subsequently used as human Guinea pigs, should face a Nuremburg-like tribunal for the callous disregard for human life.

Following the 1978 Department of Energy survey, the DOE produced a bilingual booklet about radiation in the Northern Marshall Islands. When we compared the radiation levels of Bikini—where 23 atomic and hydrogen bomb tests occurred—and Rongelap, we found very little difference. And yet, as this committee knows, Bikini is off-limits for at least the next 100 years while the people of Rongelap have been allowed to remain in a very dangerous situation since our return in 1957 after the fallout came to our islands.

It was after we were told that one-half of our Atoll was under quarantine, and after we saw in the Department of Energy's own words that many islands on Rongelap were as contaminated as islands at Bikini, that we decided to take some action. In 1983, President Amata Kabua and I introduced a resolution into our Parliament calling for the evacuation of the Rongelap people. That resolution passed unanimously.

In May of this year, the people of Rongelap finally decided to take appropriate action. With the help of the Environmental group Greenpeace, the people of Rongelap took the drastic step of moving away from the dangerous situation on Rongelap. With th kind assistance of Greenpeace's flagship, the Rainbow Warrior—which the French saw fit to blow up in Auckland Harbor—we moved our entire community to Mejato Island at Kwajalein Atoll. I am currently helping to organize an international independent radiological and health survey of Rongelap in the next year so that we may—at long last—make an intelligent and informed decision about whether to return to Rongelap, or whether to abandon our home islands.

At present, the United States Congress is about to terminate the strategic trust agreement with the United Nations. Under a questionable legal document known as the Compact of Free Associations, we will enter into an ambiguous relationship with the United States that is neither independence nor complete annexation. However, the one certain fact under the compact is that the United States will maintain a military grip on Kwajalein for at least the next 30 years.

Perhaps the most troubling part of the compact concerns the radiation victims in the Marshall Islands. At the moment, more than four thousand Marshallese have filed lawsuits in United States Courts for radiation-induced damages to property and health. Under the so-called "Espousal" clause of section 177 of the compact, all of these lawsuits will become null and void, and all future lawsuits for latent radiation disease will be cancelled. Because we have never had the benefit of a truly independent and non-governmental health study of our contaminated islands, we still do not know just how extensive the radiation damage really is. Furthermore, we have no idea about the future outlook for our unborn generations who will be exposed to radioactivity on many islands in the Marshalls.

Therefore, we find it rather peculiar that the United States is so eager to prevent us from all judicial proceedings stemming from the nuclear tests, and we honestly fear that the United States may know something about our future health that they do not want us to know about. Certainly, this violates both the letter and the spirit of the 1947 trust agreement.

Recently a research arm of the U.S. Congress known as the Congressional Research Service did an analysis of the Espousal clause in the compact. According to this analysis by CRS, it has been determined that espousal is unconstitutional and violates U.S. law. The reason given by CRS is that because the Government of the Marshall Islands does not have sufficient sovereignty either under the trust agreement or under the compact, that it could not legally enact the espousal provision of the compact. I have attached a copy of this 5-page CRS analysis to my statement.

In conclusion, I must confess my deep-felt disappointment with the nearly forty year history of United States Administration of our once-peaceful and unpolluted islands. My people continue to ask me why the United Nations has never really helped us. In fact, under the watchful eyes of the Trusteeship Council, the United States exploded nuclear bombs in our islands, caused irreversible destruction to our health and environment, and has tampered with our culture in a way that has divided us into opposing camps. In the aftermath of U.S. administration, suicide—unknown among the Micronesian people before the period of

American rule—has one of the highest rates in the world in our once-peaceful land.

In closing, I formally request that the decolonization committee send a special visiting mission to our islands to see firsthand what 40 years of U.S. rule has done to my people and to our islands. Surely, on this 40th anniversary of the United Nations, it would seem most appropriate for the de-colonization committee to directly observe the last remaining trust territory before the termination of the trust agreement.

Last August, the members of the South Pacific Forum signed a treaty calling on the French Government to stop its nuclear testing in the Pacific. The reason the forum nations are demanding an end to nuclear testing in their backyard is that they fear the possible adverse health effects associated with exposure to radiation. When you think about it, these nations are trying to prevent what has already happened to my people. If nothing else, my people serve as a warning to all of humanity about what nuclear weapons do to human beings. Please, for the sake of our children and our children's children, let us heed the warning by replacing an unchecked nuclear arms race with international cooperation and a sane world order.

Thank you.

COMMEMORATING THE NEW PITTSBURGH COURIER ON ITS 75TH ANNIVERSARY

● Mr. HEINZ. Mr. President, I would like to call the Senate's attention to a significant milestone in American journalistic history. This week the New Pittsburgh Courier celebrates its 75th anniversary. The Courier has served as a newspaper of record and a voice for progress in Pittsburgh's black community since 1910.

The Courier enjoys the distinction of being the only newspaper in the city published under the same banner for so many years. In a time when established, local newspapers are gradually losing readership to national publications, it is gratifying to see the continued success of one of Pittsburgh's historic news leaders.

The paper's longevity is clearly due to the detailed, accurate and reliable local coverage that thousands of Pittsburghers have come to depend upon. The Courier's steady growth is a result of the management and staff's commitment to the community and serves as a testament to the service it provides to readers and the vital resource it has been for the entire community.

On behalf of my fellow Pittsburghers, I commend the Courier for three-quarters of a century as one of the focal points for dissemination of news and exchange of opinions. We all look forward to many more years of excellent news coverage and stimulating editorials.●

STAR WARS—STRATEGY FOR WINNING A NUCLEAR WAR?

● Mr. KERRY. Mr. President, I wish to call the attention of this body to an article which appeared in today's Boston Globe, headlined "Official Says Missile-Defense Plan Would Tilt Nuclear Balance to United States."

In that article, Globe reporter Fred Kaplan quotes a senior official in the Pentagon's Strategic Defense Initiative Office as saying that the Star Wars Program would enable the United States to have an advantage over the Soviet Union in a nuclear war.

According to the article, John L. Gardner, Assistant Director for Systems in the SDI Office, said that one consequence of the United States deploying star wars systems would be a tilt in the nuclear balance "fairly sharply in favor of the United States."

As Mr. Kaplan observes, "this observation contradicts public statements made by President Reagan and other administration officials, who insist that SDI is a purely defensive system and that it would wind down the arms race and reduce the chances of war."

Rather, according to Mr. Gardner, if there were a nuclear war and both sides had star wars defenses, "the net result of this exchange is fairly sharply in favor of the United States," because the United States has more bombers and cruise missiles than the Soviet Union.

Mr. President, these kind of statements, coming from those who have direct responsibility for developing the SDI Program, are extremely disturbing, to say the least. Mr. Gardner appears to believe that is is possible for the United States to fight a nuclear war and win it—a proposition directly opposed to the oft repeated statement by President Reagan that "a nuclear war can never be won and must never be fought."

It is one more example of the many differences between what President Reagan says about the SDI Program and what other officials in the Reagan administration say about it.

For example, President Reagan has said on 17 different occasions that the SDI Program is nonnuclear. Yet the SDI Program contains funding for the development and testing of the x-ray laser, which is a new kind of nuclear device which relies on a nuclear explosion for its power.

President Reagan has said that the SDI Program's goal is to make nuclear weapons impotent and obsolete, enabling our population to survive a nuclear attack. Yet the head of the SDI Program, Lt. Gen. James A. Abrahamson, admits that a perfect astrodome defense is not a realistic thing, and Under Secretary of Defense Fred Ikle says that the initial capability of SDI will be used not to replace nuclear weapons, but to defend them.

President Reagan says the SDI Program is a research program only, to enable a future President to decide whether to deploy star wars defenses. But his Secretary of Defense, Caspar Weinberger, has said he favors deployment, and General Abrahamson has said it is not a matter of if, but when.

A few weeks ago, I asked Under Secretary of Defense, Richard Perle, who is responsible for arms control in the Reagan administration what the phrase "mutually assured survival" meant. He said the word was "just a slogan"—it didn't mean that if we built star wars that our people would survive a nuclear war. He admitted that even with star wars in place, we would still have to rely on our nuclear weapons to prevent a war. He agreed that star wars would not make nuclear weapons impotent and obsolete.

Yet, the President and Secretary Weinberger continue to sell the SDI Program to the American people as if the program will allow the United States to save lives, rather than avenge them. President Ford's Secretary of Defense, James Schlesinger, has said that it is reckless to pretend that star wars can end our need to deter war with offensive nuclear weapons, when we know that just isn't true.

The fact is, while this administration talks glibly about mutually assured survival, if we put star wars into place, no one knows how many millions would die in a nuclear attack. We never will know, because among other things we could never test the system under realistic wartime conditions ahead of time. It would all be one roll of the dice. Maybe the defenses would work—maybe they would not, and millions of us would die.

The reality is that with or without star wars, we cannot protect ourselves and our children from nuclear weapons except by ending the nuclear arms race. You can not do that by building more weapons, even ones sold as a defensive shield.

Our children's future is too important for us to play games with the fantasy of a peace shield that will neither provide a shield from nuclear weapons nor bring peace. You can only end the arms race with arms control.

If both sides put up star wars systems, each will have an incentive in a time of crisis to strike the other side first. This is because in theory the attacker could shoot down the other side's defenses and attack its offensive nuclear missiles, and then survive the retaliation by the few weapons that survived.

That is an incredibly dangerous situation, which is why we signed the ABM Treaty in the first place, so that both sides would continue to have the ability to deter one another from ever even thinking about winning a nuclear war with a first strike.

Former President Nixon and Soviet dissident nuclear physicist Andrei Sakharov are among the many people who have recognized that star wars could increase the risk of a nuclear war by

providing a partial shield so that you could use the sword of offensive nuclear weapons. As Dr. Sakharov has said, "a 'shield' could create the illusion of invulnerability. For the 'hawks' and the 'madmen,' a shield would increase the lure of nuclear backmail. It would strengthen their attraction to the idea of a preventive thermonuclear strike."

Star wars might give both sides the illusion of invulnerability—an illusion that could make people think that it is possible for us to fight a nuclear war and win.

The nuclear age is dangerous enough without anyone talking about winning a nuclear war—yet that is exactly what Mr. Gardner and the SDI Office are now talking about.

We have a choice—we can either build star wars or have arms control, not both.

Even the Reagan administration admits that it cannot put star wars into place without violating the ABM Treaty or withdrawing from it. For 13 years, the ABM Treaty has stopped both sides from star wars-type defenses into place. If we decide to go ahead with star wars, that treaty no longer exists.

Every Secretary of Defense from President Kennedy's administration up through and including the Secretaries of Defense in the Johnson, Nixon, Ford, and Carter administrations, has said that the ABM Treaty should be protected and preserved, because it is in the interests of U.S. national security.

The ABM Treaty prevents either the United States or the Soviet Union from testing or developing or deploying star wars systems. It does not stop either side from deploying limited ABM systems around their nation's capital or one missile site. While the Soviet Union has built one ABM system as permitted by the treaty, the treaty continues to prevent it from putting star wars systems up in space.

If we go ahead with star wars and kill the ABM Treaty, arms control is dead. That is because the Soviets inevitably will respond in three ways. First, they will put their own star wars systems up in space. Second, they will develop countermeasures to make our star wars systems not work. Third, they will build as many nuclear weapons as it will take to punch a hole through any defense we build. And we will do exactly the same thing—build star wars, develop countermeasures, and build hundreds of more nuclear weapons.

After all that, nuclear escalation we will be right back where we started—with both sides still threatening each other, only with thousands of additional offensive and defensive weapons on both sides.

We will have built star wars and changed nothing except to waste a lot money that could have been spent on educating our children and cleaning up our environment and building our economy. If anything, we will have only made the world more dangerous by putting up so many more weapons on both sides.

It is natural for Americans to want a defense against nuclear weapons. But as Albert Einstein said after the bomb destroyed Hiroshima, "the nuclear age has changed everything, except our ways of thinking." As the head of the Star Wars Program says, we are not talking about an astrodome over the United States. A leakproof shield is not a realistic thing.

This has been true throughout human history. The Great Wall of China is still standing, but it didn't keep the hordes of Mongol barbarians from invading the ancient civilization of China. The Maginot line built against the Germans after World War I did not keep them out of France in World War II. Even the Miami Dolphins during the greatest season in NFL history had points scored against them.

If we build a trillion dollar defense against Soviet ICBM's and it is 99-percent effective, 100 nuclear weapons will still strike our soil and no one can say who of us would survive. Even if we assume what those in charge of Star Wars say is impossible, a defense that is 100-percent effective against ICBM's, the Soviets will still figure out a way to maintain their ability to retaliate. Our military already has told us how they would do this—with low-flying cruise missiles launched from submarines off our shores, with other air-breathing systems, or by building miniature nuclear bombs and putting them in terrorist suitcases.

If we build a Great Wall of China or Maginot Line in space, the Soviets will go around it, just as aggressive nations have always gone around defenses. Rather than star wars, we need arms-control agreements that will provide us with the security that no one can win a nuclear war. Because if no one can win a nuclear war, no one will ever start one.

Our Government got us into Vietnam before there was public debate about whether or not it was a mistake. As someone who fought and was wounded in that war, I learned first-hand the consequences of that mistake.

The Vietnam war cost thousands of lives. Star wars puts millions of lives at risk, by giving people the illusion that we could survive a nuclear war. No one can win a nuclear war. Star wars does nothing to change that.

The Vietnam war led to enormous inflation and nearly bankrupted this country. Star wars will be far more expensive, without protecting millions from dying in a nuclear attack.

It is an illusion to believe, as Mr. Gardner appears to believe, that star wars can enable us to win a nuclear war.

Star wars, rather than making nuclear weapons impotent and obsolete, is merely the latest form of the nuclear escalation that has made our world so dangerous, and so fragile.

I ask that the article in the Boston Globe by Fred Kaplan be printed in the RECORD.

The article follows:

[From the Boston Globe, Dec. 12, 1985]

OFFICIAL SAY MISSILE-DEFENSE PLAN WOULD TILT NUCLEAR BALANCE TO UNITED STATES

(By Fred Kaplan)

WASHINGTON.—A senior official in the Pentagon's Strategic Defense Initiative Office told a conference of engineers Tuesday that one consequence of having a missile-defense system would be a tilt in the nuclear balance "fairly sharply in favor of the U.S."

The official further said this would be the result even if the United States and the Soviet Union were each to deploy such a system.

This observation contradicts public statements made by President Reagan and other administration officials, who insist that SDI is a purely defensive system and that it would wind down the arms race and reduce the chances of war. Reagan has also said he would offer to give or sell SDI technology to the Soviets after it has been perfected, so both sides could settle down to a world in which nuclear weapons were "impotent and obsolete."

"FIRST-STRIKE" STRATEGY

Reagan most recently emphasized these points in Geneva to the Soviet leader, Mikhail S. Gorbachev, in reply to charges that SDI was a plot for gaining US strategic superiority and creating a "first-strike" strategy.

The official who stated Tuesday that SDI would create a US advantage was John L. Gardner, assistant director for systems in the SDI office. In that position, Gardner is responsible for designing the overall structure of an SDI system, for issuing technical requirements of the various parts of the system, and for evaluating the system's strategic utility.

Before the SDI office was created in 1983, Gardner was the chief Pentagon civilian in charge of all US strategic defense research.

Critics of SDI have argued that a hidden motive behind the program may be to give the United States a new edge in the arms race. Gardner's speech was a rare instance in which a high-ranking official has lent credence to the claims.

He made his comments in a speech before the 2d Annual SDI Conference of the American Society of Mechanical Engineers, held in a hotel near the Pentagon Tuesday.

Cassette tapes of the speech were placed on sale shortly afterward. The Globe obtained a copy purchased by someone who attended the conference.

In the speech, Gardner explained the logic of his conclusion as follows. Suppose both superpowers had a ballistic-missile-defense system such as that envisioned in the SDI program. Suppose there is a nuclear war—or, as Gardner put it in defense parlance, a "two-sided nuclear exchange." Each side's SDI system would shoot down most of the other side's ballistic missiles. However, most bombers and cruise missiles would make it to their targets. Since the United States has many more bombers and cruise

missiles than the Soviet Union, Gardner concluded, "the net result of this exchange is fairly sharply in favor of the US."

ELECTRONIC SPOOFING DEVICES

Gardner said one "intriguing" aspect of this analysis is the need to keep improving the ability of bombers and cruise missiles to evade Soviet antiaircraft weapons. The US military has already moved in this direction, with electronic spoofing devices for the B-52 and B-1 bombers and, more recently, the development of the Stealth bomber—which incorporates special materials and aerodynamic shapes to make an airplane less visible to radar—and cruise missiles utilizing Stealth technology.

Gardner said most US bombers and cruise missiles today could reach their targets untouched, despite the Soviet Union's massive investment in antiaircraft defenses—either because the Soviet air defenses are ineffective or because the improvements in US bombers have been very effective.

In outlining his hypothetical "nuclear exchange," Gardner assumed that only 10 percent of ballistic missiles could make it through an SDI defense but that 90 percent of bombers and cruise missiles could make it throught an antiaircraft defense.●

UNIVERSITY OF UTAH HAS LOWEST DEFAULT RATE ON STUDENT LOANS

● Mr. HATCH. Mr. President, in the coming weeks the Congress will be considering legislation to reauthorize the Higher Education Act of 1980. Paramount in those considerations will be new safeguards to protect the Government from loss from students who default on loans made to them, and particularly the National Direct Student Loan [NSDL] Program administered by eligible institutions.

I have just reviewed the report of the Secretary of Education on these campus based loans and was appalled to find the default rate as high as 80 percent in some schools with a projected recovery rate no better.

Mr. President, I am proud of the track record on loan administration by the institutions in my great State of Utah. Although all of our public institutions have done a commendable job of administering the NDSL Program, the University of Utah in Salt Lake City has the enviable distinction of being not only the lowest in the State, but one of the lowest of the low in the country with a default rate of only 2.19 percent on a loan volume of almost $23 million, and 248 borrowers.

As a matter of fact, Mr. President, of the colleges and universities with 200 or more students taking advantage of the NDSL, the University of Utah has the lowest default rate of any eligible institution in the Nation.

This is further evidence to me that the closer we can get the administration of federally funded programs to the State and local institutions benefiting from them, the better the administration will be.●

SOVIETS ADVANCE CUBANS ON AFRICAN CHESSBOARD

● Mr. WALLOP. Mr. President, I ask to have printed in the RECORD an article from Insight Magazine of the Washington Times entitled "Soviets Advance Cubans on African Chessboard" regarding the current crisis in Africa and the importance the Soviets attach to the advancement of their global power there by any and all means at their disposal, including the deployment of Soviet national assets. I urge my Senate colleagues and the U.S. foreign and national security policy establishment to take immediate steps to protect U.S. interests in the African crisis described therein. The critical need and urgency for U.S. action in Angola at this juncture cannot be overstated. Words are no substitute for real action in the face of the Angola emergency and the whole East-West power crisis in Africa.

The article follows:

SOVIETS ADVANCE CUBANS ON AFRICAN CHESSBOARD

(By John Rees and Yossef Bodansky)

(Summary: While the West pays Africa little attention, the Soviets put it at the top of their agenda. Their short-term goal is the destablization and acquisition of South Africa and its military bases. Their long-term goal is a clean sweep of the West's southern flank on that side of the Atlantic Ocean. Numerous southern African rulers have been meeting with Soviet and Cuban leaders lately, and the continued deployment of Cuban troops in Africa suggests Soviet-allied forces may soon be capable of controlling the continent.)

The Soviet Union now considers Africa, with its strategic location and vast mineral resources, to be a main theater in which it will actively confront Western interests during the next decade.

New Soviet political initiatives launched this autumn toward Angola, Zimbabwe, Mozambique and other souther African states received little attention in the West. Diverted by summitry and preoccupied with South Africa's apartheid-created internal problems, the West ranks sub-Sharan African affairs low in foreign policy priorities.

Western intelligence sources say that central to General Secretary Mikhail Gorbachev's Africa initiative, with Cuba playing the key supporting role, is a diplomatic effort now under way to strengthen links of Africa's so-called "frontline" states with the Soviet Union against South Africa. The effort is laying the groundwork for large Soviet military aid packages which entail the presence of Soviet bloc and Cuban military technicians and advisers.

The short-term target is South Africa. The military aid packages which are being planned with Zimbabwe and the other frontline states include heavy air defense systems, including sophisticated radars. These would be useful in the near future against South African air strikes on bases in those countries made available to the terrorits forces of the Marxist-led African National Congress (ANC) and South West Africa People's Organization (SWAPO).

Longer-term, the intelligence sources say, the air defense systems fit the Kremlin's strategy for protecting Soviet installations in Africa positioned against the South Atlantic and Indian Ocean. At the same time, there has been an enormous qualitative increase in the arms and training being given the military forces of Cuba and Angola. These are of a type that indicate that the Soviet leaders are in the preliminary stages of orchestrating an armed invasion of South Africa that would be preceded by long-range air-strikes from Angola and spearheaded on the ground by Cuban troops, led by Soviet commanders and supported by Warsaw Pact technicians.

One scenario that military leaders in the West are evaluating might be played out very soon. This would involve a new offensive by a strong combined force of units of the Soviet-backed Angolan government forces and Cubans to eradicate Jonas Savimbi's South African-backed UNITA guerrillas.

With heavy air support, the Angolan-Cuban force would engage in hot pursuit of Savimbi's retreating guerrillas into northern Namibia. This would be the signal for the Soviet-backed SWAPO guerrillas based in southwestern Angola to attack Nambibia's northernmost province, Ovamboland, where most of SWAPO's supporters are located. The Angolan-Cuban force would engage the South African and Namibian forces and "liberate" Ovamboland for SWAPO.

Should the South African forces crumble, or there be no effective counterthrust, and if the Western powers, particularly the United States, hesitated or indicated they would take a hands-off policy, the Soviets would send the invaders on to attack Windhoek and the South African naval base at Walvis Bay.

The "People's Republic of Namibia" would then be consolidated as a base for an eventual final offensive against South Africa.

The Soviets produced a number of reports and studies on conditions in sub-Saharan Africa outlining their interests and hinting at intentions before the initiative was launched this fall. One of the most significant of these recent studied available to Western intelligence sources was produced in Moscow at the KGB-affiliated African Institute by Soviet Nikolai Kosukhin, a senior African specialist.

Kosukhin wrote that "today, the main problems of the global struggle against imperialism . . . are centered in Africa." And he concluded that "national and social liberation" in Africa is "uneven but inevitable."

Zimbabwean Prime Minister Robert Mugabe's December visit to Moscow was the latest in an intense drive undertaken by Moscow and Havana since October to expand their political and military involvement in the southern African states.

Soviet and Cuban leaders have met with the heads of State, senior government or ruling party officials and military commander of Zambia, Angola, Mozambique and Zimbabwe—the so-called frontline states—in addition to holding talks with Madagascar, Ethopia and the guerrilla client groups, ANC and SWAPO. The result appears to be Soviet success in reasserting their influence in African affairs and in laying the groundwork for a major escalation in their military involvements.

The Soviet Union's growing interest in southern Africa ws demonstrated early this autumn when Moscow's chief regional clients—Angola, Mozambique and Zimbabwe—combined to battle the pro-Western guerrilla fighters operating on their soil—UNITA in southeastern Angola and the Mozam-

bique National Resistance (RENAMO) on Mozambique's border with Zimbabwe.

The Angolan offensive was preceded by a concentrated effort by Soviet and Cuban military advisers to train and drill government forces in tactics and in the use of recently supplied Soviet-made weapons.

In the largest of these offensives, Soviet and Cuban senior commanders actually directed combat operations in the field by Angolan government troops and armor. Technicians and mechanics drawn from the Warsaw Pac forces fulfilled essential support missions. And as local intelligence sources reported, Cuban military units and Portuguese mercenaries contributed the military decisive "quality edge" component to the communist-backed forces.

In Mozambique, Zimbabwean troops trained by North Korea spearheaded the drive against RENAMO.

Because of the Kremlin's growing interest in Africa, the Soviet and the Cuban military have become directly involved in the region. As affective as their interference has been so far, military and political indicators suggest there will be even greater Communist involvement in the future.

The Soviets consider the military aspect to be the decisive factor in the realization and success of their drive for supremacy in Africa.

Despite Cuba's role as a Soviet surrogate and the magnitude and diversity of its existing military commitments in Angola, Ethiopa and elsewhere in Africa, it is still perceived by the majority of African states as a "non-aligned" leader. Thus Fidel Castro's Cuba has been promoted by the Soviets as the most effective source of what they term "fraternal military aid."

Cuba's role, wrote Kosukhin, would be "provision . . . of assistance in the strengthening of [the frontline states'] defensive capabilities; the building of their armed forces, the dispatch of military-internationalist advisers, sending of weapons, military equipment, and the provision of other assistance for the objective of protecting the national interests of African states which are under armed invasion by forces of imperialism."

In other words, the Cubans would be asked to prevent South African strikes against terrorist camps or invasions forces and their supply dumps in Angola, Zimbabwe, Mozambique and other countries.

South Africa is likely to continue its sporadic preemptive and retalatory raids against ANC and SWAPO bases into Angola, Mozambique, Zimbabwe and Tanznia.

Several days before Mugabe went to Moscow, South African Defense Minister Magnus Malan charged that an ANC unit that had planted land mines near the border with Zimbabwe was based in that country, and said that members of the Zimbabwean government were seeking a confrontation with South Africa "to force South Africa to retaliate."

However, the South African army is a ground army with limited mobility. South Africa's small navy would be no match for a Soviet blockade. Likewise, South Africa's air defense is nearly nonexistent, and its short-range, small and obsolecent air force is very vulnerable.

The stage for the Soviet Africa initiative was set with the October visit to Moscow of Didier Ratsiraka, president of Madagascar. Soviet President Andrei Gromyko used the occasion to explain the significance of Madagascar and all of southern Africa to the Kremlin.

Gromyko was lavish with his flattery of "the anti-imperialist policy of the Democratic Republic of Madagascar and its activé, consistent struggle to strengthen African unity, peace and the security in Africa and throughout the world" and said he was confident that Madagascar would "make a tangible contribution to the common struggle of the peoples."

Madagascar's president then went to North Korea, which has a significant military presence in his country and which trained Mugabe's notoriously brutal brigade used to decimate supporters of the Zimbabwean leader's political rival, Joshua Nkomo. Ratsiraka reported back to Moscow on the results of his North Korean meetings before returning home.

The roster of subsequent African and Cuban military visits to Moscow includes the following:

A Tanzanian delegation of military commissars was familiarized with Soviet indoctrination methods and visited political-military schools in the Leningrad military district in October.

Military commissars of Cuba's Revolutionary Armed Forces (FAR) under the command of Col. Gustavo Milian Rivero visited Moscow in October for "a thorough exchange of experience" on indoctrination methods. More significant was their visit to the Transcaucasian military district, which is oriented toward power-projection toward the Middle East and southwestern Asia.

The Soviets later acknowledged that a "Soviet-Cuban combat collaboration" took place that served as "a vivid demonstration of the unity and cohesion of the servicemen of the fraternal armies." In other words, the Cuban officers, trained to be integrated as components of the Soviet forces, practiced commanding Soviet forces.

Foreign Minister Joaquim Chissano of Mozambique, accompanied by Deputy Defense Minister A. Panguene, who is the chief political commissar of the Mozambican armed forces, met with Gorbachev and Soviet Foreign Minister Eduard Shevardnadze. The topic was "further development" based on the friendship and cooperation treaty between Moscow and Maputo, and an agreement that "tension in that region is continuing to intensify as a result of the aggressive policy of Pretoria, which is encouraged by imperialist circles in the West."

The official communiqué had all the usual diplomatic code words indicating that Mozambique regarded the Nkomati accord with South Africa as an arrangement to buy time—time in which South Africa would agree to withdraw its support from RENAMO.

Mozambique and the Soviet Union said they placed "special importance" on unity and cohesion, support for ANC and SWAPO and the "need to deliver a decisive rebuff against all attempts to introduce dissent in the general anti-imperialist and antiracist front." Within a few weeks, a Mozambican military delegation was on its way to Moscow.

An ANC delegation headed by Tabo Mbeki also went to Moscow, where they met with the Soviet Committee for Solidarity with Asian and African Countries, a covert conduit for Soviet arms and equipment to Third World insurgents. The Soviets "stressed total support" for ANC and placed their full political support behind it as "a decisive factor" in any political settlement in southern Africa, according to Soviet commentary.

A Botswana delegation of trade unionists in November was greated with Soviet pledges of "unwavering solidarity with the courageous struggle waged by the democratic public and patriots in the south of Africa and by the frontline states for eradicating the disgraceful apartheid system and colonial oppression in Africa."

The visit of Ethiopia's Lt. Col. Mengistu Haile Mariam and a large delegation of senior Ethiopian officials to Moscow in November may have been the most important one dealing with a military buildup. Although the visit was announced as concerning economic assistance, Soviet Defense Minister Marshal Sergei Sokolov participated in the discussions.

After his meetings with the Soviets, Mengistu indicated Ethiopia's virtual commitment to the destruction of South Africa. Mengistu then went on to North Korea, as had Madagascar's leader. But he left behind in Moscow a major portion of his delegation for additional talks on defense and foreign affairs.

Intelligence sources say it is not coincidental that in November, in the middle of this flood of African delegations in Moscow, Shevardnadze went to Havana for meetings with Castro, after which a joint communiqué said the two sides expressed mutual satisfaction" with the "dynamic development of many-sided fraternal Soviet-Cuban relations and the shared determination . . . to continue steadily deepening and extending cooperation between the Soviet Union and the Republic of Cuba in all fields on the basis of the principles of Marxism-Leninism and socialist internationalism."

"Socialist internationalism" is what brought 40,000 Cuban soldiers to Angola and Ethiopia and another 6,000 to "fraternal" Nicaragua, where they are flying combat missions against the democratic resistance guerrillas and also perform many critical services for the Sandinista army.

Military observers take as a direct threat the communique's statement that "it was resolutely stressed by the two sides that the criminal acts of aggression by South Africa against the People's Republic of Angola must be ended without delay" and that the "system of apartheid should be eliminated completely."

The Moscow meetings were preceded by Cuban visits. During this short period, Cuba played host to the leaders of four African states, India and Sri Lanka. Soviet political analyst Yevgeny Bay outlined the official Soviet analysis of these visits in the Nov. 21 issue of the Soviet government papr Izvestia where he wrote: "The bilateral talks reaffirmed the firm bonds of solidarity linking the Caribbean island with African states which are constant targets of aggression actions by the racist regime of South Africa and by imperialist mercenaries. The leaders of Tanzania, Zambia, Zimbabwe, and Angola assessed highly Cuba's international support for and solidarity with people on the African continent."

The growing significance of Cuba and southern Africa to the Soviet Union has to be considerd in the context of Soviet global strategy, Western military sources say. Soviet military strategists believe that in order to secure the occupation of Europe in a nonnuclear initial period of war, they must be able to conduct strategic military operations throughout the entire depth of the enemy rear on a global scale. The Soviets regard such operations as essential to prevent the West from effectively reacting to the main Soviet advance via available forces and weapons or by mobilizing its rear.

Thus, their objective is to render the Western powers militarily ineffective through a combination of deep strikes and the effective isolation of the main theater from reinforcements and long-range fire strikes.

Consequently, Soviet ability to conduct strategic military operations in the southern Atlantic Ocean and the western Indian Ocean at the onset of hostilities is growing more critical because it would facilitate the isolation of Europe and the surrounding regions from American reinforcements and supplies. In addition, these areas could serve as launching spots for the active containment of pro-West activities in their rearguard areas.

Soviet strategists have been emphasizing two overriding trends of increasing importance in contemporary warfare: First, that the spatial scope of a theater in which a war or a major confrontation is waged will grow very rapidly as a direct outcome of increased maneuverability, range and speed of key weapons systems; and second, that the time frame in which any war or major confrontation would be decided is decreasing rapidly because the enhanced destructiveness and accuracy of the major weapons systems—conventional as well as nuclear—are rapidly reducing the military effectiveness of beligerents before they can mobilze and replenish their losses.

In other words, the attrition rate at the onset of conflict is so severe that there is no time to bring up reinforcements. The side with the greater readiness wins. Obviously, this situation favors the aggressor in a first-strike situation.

Soviet military strategists also are emphasizing the crucial role in conflicts of land-based airpower and naval task forces. The Soviets are actively seeking access to air and naval bases in the vicinity of the expected theaters of military operations.

The Soviet base at Da Nang in Vietnam would be greatly enhanced if Moscow had Walvis Bay on the southern Atlantic, and particularly South Africa's Simonstown naval base on the Cape of Good Hope.

There are significant, ominous lessons to be learned from the Soviet Union's efforts preparatory to launching the Angolan forces, steeled by a major Cuban presence, against Savimbi's UNITA guerrillas, according to western military and intelligence officials. Moscow increased the supply of improved weapons and quality training, established new airfields and resupply depots and authorized the direct involvement of Soviet commanders and Cuban crews in combat fighting.

Similarly, the quality of the training and support provided to ANC and SWAPO also has increased considerably. Moscow and Havana have intensified the flow of military supplies, improved the training of troops and increased their direct involvement in combat operations against the guerrillas operating in Nicaragua.

Nonetheless, the quantitative and qualitative size of the Soviet-Cuban buildup, especially in Angola, clearly reflects that southern Africa is their field of primary focus, not Central America. This is particularly visible in the buildup in Angola of air defense weapon systems and related C3I [Command, Control, Communication and Intelligence] assets.

The Soviets always pay special attention to the establishment of a balanced and saturated air defense deployment capable of engaging aerial forces far larger and more sophisticated than the immediate threats facing the regional countries.

This deployment is especially clear in the case of Angola, where the Soviet radars and SAMs far outnumber anything the South African air force can master. Yet the Soviets are not satisfied. In the past seven weeks, they have further increased their provision of air defense assets to Angola with both MiG-21 and MiG-23 fighters. Larger numbers of Cuban and Soviet experts, including pilots, have been sent there, and they are taking part in routine combat operations.

Military observers conclude that Moscow's goal in undertaking this buildup of highly sophisticated air defense and fighter aircraft in Angola, as well as Cuba and Nicaragua, is the protection of Soviet strategic air and naval bases.

The growing significance of southern Africa to the Soviet-Cuban global strategy is reflected in the Soviet Union's willingness to get directly involved in the fighting in Angola, including the commitment of assets to local combat operations. Since early October, the Soviets have been running a massive airlift in support of the Angolan government forces. Several II-76 transports were deployed to Angola to conduct the airlift.

By mid-November, the Soviets further escalated the sortie and tonnage rates of the airlift, deploying a few An-22 transports to Angola. The An-22s belong to the centralized assets of the Soviet Union at the national level. The commitment and risking of a substantial component of the An-22 fleet to airlift operations in Angola clearly reflects the high-level significance these operations have to Gorbachev and his colleagues.

In total, the Soviets and their allies flew more than 500 sorties in October and nearly 100 in early November from Luanda and Lobango for the support and buildup of Angolan and Cuban forces in the far south in the area around the towns of Menongue and Cuito Cuanavale.

The increased strategic significance of Ethiopia's role in the Soviet buildup in southern Africa rests in its geographical position, which makes Addis Ababa a key stopover point for Soviet transports. Moreover, the Soviets and the Cubans have stocks of weapons and equipment prepositioned there. Ethiopia and South Yemen together can be used for the rapid reinforcement of Soviet, Cuban and allied forces in central and southern Africa.

Moscow and Havana seem determined to "stabilize" the situation on the extreme fringes of their new strategic axis to their liking, so that they can establish credible capabilities from these installations to launch strategic military operations in the Western Hemisphere.

The Nov. 8 issue of the Soviet military publication Krasnya Zvezda indicated the significance of Angola to the Soviet defense establishment. It said, "The Soviet Union, Cuba, and other socialist countries, loyal to their international duty, are rendering Angola assistance in strengthening its national army and defending the sovereignty and territorial integrity of the country."

In the pursuit of their global strategy interests, the Soviets and the Cubans have not only generated the illusion of "selfness commitment" to the "freedom and national liberation" of southern Africa, but are also maneuvering the frontline states into creating a coordination mechanism whose actual goal is to further Soviet-Cuban regional interests at a great cost to those states themselves.●

DR. JOSEPH COHEN AND CARE OF THE HOMELESS

● Mr. DURENBERGER. Mr. President, the plight of the homeless is a concern throughout this country. You can pick up a newspaper and read a story about a man or woman who walks the streets during the day, sleeps on heating grates at night, and rummages through garbage cans to find something to eat. Or you can turn on the TV and watch Lucille Ball playing a bag lady in New York City. Or you can just take a stroll down the nearest street and see for yourself.

It is estimated that there are as many as 3 million homeless people in the United States, yet there are shelters for only about 10,000 of them—10,000 spaces for the fortunate few so they do not have to sleep on heating grates on freezing nights.

When I was in Boston recently, I read a story in the Boston Globe about a physician, Dr. Joseph Cohen, who has done extraordinary work to ease the plight of the homeless. The article which follows my statement describes Dr. Cohen's work and the shelter he opened in Boston which offers meals, a bed, counseling, and, thanks to his personal efforts, medical attention to 100 homeless individuals.

I believe Dr. Cohen's tireless efforts deserve recognition by this body, not only because he is a true public servant to the homeless in Boston, but also because he represents countless other physicians who are also concerned about the indigent and uninsured and work hard to meet the health care needs of this vulnerable population.

Dr. Cohen and similar physicians practice good preventive medicine when they care for the needs of these less fortunate Americans. Improving their health and well-being enhances the health and well-being of the rest of our society and we are all the better for it.

Mr. President I ask that the text of the article describing the work of Dr. Cohen be printed in the RECORD.

The article follows:

[From the Boston Globe, Dec. 9, 1985]

WHEN HOMELESS NEED A FRIEND, THE DOCTOR IS ALWAYS IN

(By Marvin Pane)

Dr. Joseph Cohen, chief of medicine at the Lemuel Shattuck Hospital, was listening to his car radio nearly three years ago when Gov. Dukakis delivered his inauguration speech.

"When the governor said that the homeless would be a priority of his administration, a light went on in my head. I felt that the Shattuck, being a state-funded hospital, would be the ideal place for a homeless shelter," Cohen recalled last week. The shelter opened a few weeks later, after Cohen helped mobilize efforts to gain the governor's backing.

The Shattuck Shelter has since moved from an open auditorium to a refurbished

facility where some 100 homeless individuals receive a bed, a meal, counseling and, thanks to the efforts of Cohen, the medical attention that many needed but sometimes never received.

Tomorrow night at the Park Plaza, Cohen will receive the Manuel Carballo Award for excellence in public service. On Jan. 12, he is scheduled to be presented a community service award from the Massachusetts Coalition for the Homeless at the Parker House.

Chairman of the Governance Board of the Boston Health Care for the Homeless Project—a four-year, $1.4 million program funded by the Robert Wood Johnson Foundation—Cohen is described by close associates as the leading advocate for the homeless in the Department of Public Health. They say he is an innovator who works within the system but doesn't let bureaucracy stand in his way, and a man who effects change with little antagonism, fanfare or self-promotion.

Two years ago, when he wasn't satisfied with the department's budget request, Cohen went to the Legislature to plead—and win—his case for an additional $1 million for new equipment: he also won the increased funding for the Shattuck Shelter 18 months ago when he started a letter-writing campaign.

"He's a tenacious guy, but in a quiet way," said Robert Richards, the shelter's director. "One shouldn't mistake his even temperament for passivity. He sets goals and, while it may take him some time to work out the details, he usually reaches them."

BREAKING DOWN BARRIERS

Cohen, a young-looking 52, is credited with helping to abate fear and mistrust between health care providers and Boston's estimated 6,000 to 10,000 homeless.

"When we started working on the Johnson Grant proposal in early 1984, Joe was instrumental in holding the coalition of health-care providers and homeless advocates together," recalled Randy Bailey, assistant director at Boston's Pine Street Inn and board member of the project.

"We from the shelter world were generally paranoid about the medical community because of a feeling of resistance on the part of hospitals in terms of access." Bailey said. "Joe has really helped break down those barriers."

Cohen, who sometimes jogs the 8 miles from his Beacon Street home to the hospital in Jamaica Plain, was born in Worcester but grew up in Marlbourough. He and his father, a Benny Goodman fan, both played clarinet in a local band at political rallies.

"We did it from the back of a truck," he laughingly recalled. Today, Cohen rallies political support in other ways.

According to Public Health Commissioner Bailus Walker, Cohen is "a strong advocate that government has a responsibility to help those who can't help themselves, and he's able to articulate that feeling." Walker recalled that at a public health forum recently, "Joe made one of the most moving presentations I've even heard on the problems of the homeless."

The Johnson Grant proposal, which was prepared on the medical end by Cohen and Dr. George (Sandy) Lamb of Boston City Hospital, went into effect in July and includes two medical teams out of BCH and the Shattuck, with a third team headed by a nurse practitioner.

The first team provides care at Boston City Hospital, Long Island Shelter and the Pine Street Inn. The second team works at the Shattuck, Parker Street Shelter and the St. Francis House. The third team works with homeless families at several small shelters in the Boston area.

BEYOND THE GRANT

But Cohen has gone beyond the mandate of the grant by giving Shattuck clients access to the hospital's dental clinic and podiatrist as well as easing referrals to specialists.

In addition, Cohen introduced the concept of respite care, with 20 beds at the Shattuck for those who cannot leave the shelter because of illness.

The pilot program began two weeks ago and, although some public health officials privately worry that it may become a "dumping ground" for homeless patients from other hospitals, Cohen said the concept makes sense and will be brought along slowly.

"The best time to rehabilitate is when somebody is flat on their back and introspective," he said, glancing at a 25-year-old alcoholic man who had been in respite care for nearly two weeks.

Dr. Naomi Bock, who heads the medical team that visits the Shattuck Shelter, said that Cohen—who admittedly could earn at least double his salary as an oncologist in the private sector—is "inspiring." He didn't disappear into the research community and he's stayed in the public health field during an era when people aren't entering it.

Cohen, the son of a haberdasher who worked in his late father's store in Marlborough, graduated at the top of his high school class but said he "never wanted to be a doctor anyplace but in a public health setting." He is married and has four grown children.

He is quick to point out the contributions of others, rather than his own. Said Barbara Blakeney, nursing coordinator for adult services at Boston City Hospital and also a Governance Board member, "I found out about his upcoming awards through Randy Bailey. But that's Joe. He's quietly effective and likes to work behind the scenes."

COLORADO UPLIFT

● Mr. ARMSTRONG. Mr. President, private sector initiatives to assist society's disadvantaged are becoming more and more successful in stark contrast to the massive Federal programs of the past. One particular success story, Colorado Uplift, dramatizes this progress.

Colorado Uplift was started in 1982 by a group of Denver businessmen seeking to reduce unemployment of disadvantaged youth in the inner city by providing opportunities to these young men and women. These businessmen recognized the void created by years of unsuccessful Government welfare programs.

Helping kids to help themselves, Colorado Uplift seeks to develop a sense of self-worth and positive values in culturally and economically disadvantaged youth.

I bring Colorado Uplift to the attention of my colleagues because the private sector has been able to do with dimes and nickels what it takes billions for the Federal Government do to—and most of the time to do very poorly.

Few Government programs have been able to break the cycle of poverty. In fact, the poverty industry of huge Government programs serves its own continued existence and self-interest through the continued existence of the disadvantaged. Private sector initiatives such as Colorado Uplift seek to move people into the economic mainstream and off the sandbanks of despair and hopelessness.

It is literally a choice between programs that encourage joblessness and a welfare state on the one hand, versus a prosperous, positive private sector effort that works on the other.

Private sector programs such as Colorado Uplift have a genuine human concern unmotivated by self-financial gain. You cannot be paid to love your neighbor, such concern must come truly from the heart. Colorado Uplift calls upon the resources and enthusiasm of hundreds of volunteers rather than attempting to build a bloated bureaucracy.

Programs such as the Interfaith Task Force, Alcoholics Anonymous, and the Salvation Army, have long distinguished records of successfully breaking the welfare cycle.

The president of Colorado Uplift, J. Kent Hutcheson, and his colleagues, have enlisted the support of hundreds of Coloradans and business firms to write this latest success story in private initiatives. Their story serves as an inspiration in the fight to help America's disadvantaged and unemployed. Colorado Uplift should also serve as a lesson for those of us who serve in Government.●

TRIBUTE TO DR. CHARLES BRADFORD

● Mr. ABDNOR. Mr. President, it is with extreme regret that I inform the U.S. Congress of the departure of a most valued economic resource. Dr. Charles Bradford, assistant director of the Joint Economic Committee, will be leaving the committee in January to assume his new position as chief economist for the National Credit Union Administration.

During his 10 years with the committee, Dr. Bradford has provided personal economic counsel to literally hundreds of Members of Congress. During the last 10 years there has not been a Member of Congress who has not directly or indirectly benefited from Dr. Bradford's professionalism and his commitment to accurate, objective, and timely economic analysis.

I am sure my colleagues join me in wishing Dr. Charles Bradford the best in his new position. He has served the Congress and his country with distinction.●

NOMINATION OF FRANCIS A. KEATING, ASSISTANT SECRETARY OF THE TREASURY FOR ENFORCEMENT AND OPERATIONS

● Mr. ARMSTRONG. Mr. President, it is my great pleasure to support the nomination of Frank Keating as Assistant Secretary of the Treasury for Enforcement and Operations.

As many of my colleagues know, I have long been interested in the issue of prohibiting the importation of products made by forced labor. Therefore, I am particularly interested in who will serve as the Assistant Secretary for Enforcement since that individual will have a significant role in enforcing the ban against forced labor-made products.

Mr. President, section 307 of the 1930 Smoot-Hawley Tariff Act contained a provision which states that all goods mined, produced, or manufactured in any country in whole or in part by forced labor shall not be allowed entry into the United States. Regulations enforcing this law state that if the Commissioner of Customs finds at any time that information available to him reasonably but not conclusively indicates that goods being imported are made with forced labor, he will advise his personnel to hold the goods until an investigation is completed.

In 1983, the State Department issued a report stating forced labor is used "to produce large amounts of primary and manufactured goods for both domestic and Western export markets." It further documented the fact that the U.S.S.R. operates the largest forced labor system in the world, comprising some 1,100 forced labor camps and 4 million prisoners, and that this system "gravely infringes internationally recognized fundamental human rights."

Also in 1983, the Central Intelligence Agency released a report indentifying some 36 products in which forced labor "is used extensively." Accordingly, the Commissioner of Customs issued a finding with respect to the 36 products, but that is where enforcement stopped.

Since that time, numerous attempts have been made by Congress to have the law enforced including an unopposed Senate resolution, a House resolution which passed on a vote of 402 to 0, a petition by 85 Members of Congress, a lawsuit filed by more than 3 dozen Congressmen and 2 Senators and repeated congressional hearings.

Yet to date, enforcement has stalled out somewhere between the Customs Service and the Department of the Treasury.

Should Mr. Keating be confirmed as I believe he will, his duties will place him squarely between Customs activities and Treasury policies. Therefore, his views on enforcement, and his interest in the issue of forced labor specifically, is of utmost importance to me and many of my colleagues in the Congress.

During his recent nomination hearings, Mr. Keating graciously answered detailed questions over a period of 3 hours regarding law enforcement, the various legal aspects of current forced labor law and regulation, and his expected role in carrying out the provisions.

I was very impressed with Mr. Keating's candor, sense of integrity, and responsiveness to my questions. He could have been evasive. Instead, he studied an issue that was clearly new to him and gave his best opinion on how he believed the law should be enforced. Throughout his testimony, Mr. Keating proved to be thoughtful and sincerely interested in my concerns about the issue.

Mr. Keating also informed me he had spoken with Secretary Baker about enforcing the forced labor statute, stating "he (Baker) indicated to me that he shared your view and my view, and was examining the evidence to date, requesting and reexamining evidence which had not been thoroughly examined or examined at all."

I am greatly encouraged by Mr. Keating's testimony and by the Secretary's message through Mr. Keating of a commitment to review the evidence. My colleagues in the Congress and many others who have a deep interest in barring the entry of forced labor-made goods have no question that the evidence exists and that it is abundant. Therefore, administration interest is very encouraging at this time.

Mr. President, I am very pleased to lend my support to the confirmation of Frank Keating as Assistant Secretary of the Treasury for Enforcement and Operations. Certainly, he will face many challenges in his new role, but I believe he will serve with honor and integrity.●

ORDERS FOR FRIDAY

RECESS UNTIL 10:30 A.M.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that once the Senate completes its business today, it stand in recess until the hour of 10:30 a.m., on Friday, December 13, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. PACKWOOD. Mr. President, I further ask unanimous consent that following the recognition of the two leaders under the Standing Order, there be a period for the transaction of routine morning business not to extend beyond 11:15 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. PACKWOOD. Mr. President, following routine morning business it will be the intention of the majority leader to resume consideration of the White Earth Indian bill, under a time agreement; 3 votes can be expected in relation to that bill.

Also, the Senate can be asked to turn to:

S. 1915, the counter terrorism bill, hopefully under a time agreement;

S. 104, armor piercing bullets;

Any conference reports available that accompany the so-called "must items";

And other Legislative or Executive Calendar items that can be cleared.

Rollcall votes can be expected during the day on Friday.

RECESS UNTIL TOMORROW AT 10:30 A.M.

Mr. PACKWOOD. Mr. President, I move that the Senate stand in recess in accordance with the previous order.

The motion was agreed to, and at 8:15 p.m., the Senate recessed until Friday, December 13, 1985, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate December 12, 1985:

DEPARTMENT OF STATE

Morton I. Abramowitz, of Massachusetts, a career member of the senior Foreign Service, class of career Minister, to be an Assistant Secretary of State, new position.

H. Allen Holmes, of the District of Columbia, a career member of the senior Foreign Service, class of career Minister, to be an Assistant Secretary of State, new position.;

Larry K. Mellinger, of California, to be U.S. Alternate Executive Director of the Inter-American Development Bank, vice Hugh W. Foster.

IN THE AIR FORCE

The following officers for appointment in the U.S. Air Force to the grade of brigadier general under the provisions of section 625, title 10 of the United States Code:

Col. Robert M. Alexander, [redacted] FR, Regular Air Force.

Col. James S. Allen, [redacted] FR, Regular Air Force.

Col. John R. Allen, Jr., [redacted] FR, Regular Air Force.

Col. Edgar R. Anderson, Jr., [redacted] FR, Regular Air Force.

Col. James G. Andrus, [redacted] FR, Regular Air Force.

Col. Malcolm B. Armstrong, [redacted] FR, Regular Air Force.

Col. Lester P. Brown, Jr., [redacted] FR, Regular Air Force.

Col. Robert A. Buethe, Jr., [redacted] FR, Regular Air Force.

Col. Gerald A. Daniels, [redacted] FR, Regular Air Force.

Col. Thomas E. Eggers, [redacted] FR, Regular Air Force.

Col. James W. Evatt, [redacted] FR, Regular Air Force.

Col. Frederick A. Fiedler, [redacted] FR, Regular Air Force.

Col. Paul D. Gleason, [redacted] FR, Regular Air Force.
Col. Joel T. Hall, [redacted] FR, Regular Air Force.
Col. William P. Hallin, [redacted] FR, Regular Air Force.
Col. Floyd E. Hargrove, [redacted] FR, Regular Air Force.
Col. George B. Harrison, [redacted] FR, Regular Air Force.
Col. John R. Harty, [redacted] FR, Regular Air Force.
Col. Richard E. Hawley, [redacted] FR, Regular Air Force.
Col. Harald G. Hermes, [redacted] FR, Regular Air Force.
Col. Thomas W. Honeywill, [redacted] FR, Regular Air Force.
Col. John R. Hullender, [redacted] FR, Regular Air Force.
Col. Grover E. Jackson, [redacted] FR, Regular Air Force.
Col. John E. Jackson, Jr., [redacted] FR, Regular Air Force.
Col. Arlen D. Jameson, [redacted] FR, Regular Air Force.
Col. Jeffery D. Kahla, [redacted] FR, Regular Air Force.
Col. Donald L. Kaufman, [redacted] FR, Regular Air Force.
Col. Vernon J. Kondra, [redacted] FR, Regular Air Force.
Col. Paul E. Landers, Jr., [redacted] FR, Regular Air Force.
Col. James J. LeCleir, [redacted] FR, Regular Air Force.
Col. Orthus K. Lewis, Jr., [redacted] FR, Regular Air Force.
Col. Nathan J. Lindsay, [redacted] FR, Regular Air Force.
Col. John D. Logeman, Jr., [redacted] FR, Regular Air Force.
Col. Charles F. Luigs, [redacted] FR, Regular Air Force.
Col. Billy G. McCoy, [redacted] FR, Regular Air Force.
Col. Michael P. McRaney, [redacted] FR, Regular Air Force.
Col. Philip L. Metzler, Jr., [redacted] FR, Regular Air Force.
Col. Kenneth V. Meyer, [redacted] FR, Regular Air Force.
Col. John M. Nowak, [redacted] FR, Regular Air Force.
Col. Carl G. O'Berry, [redacted] FR, Regular Air Force.
Col. Richard J. O'Lear, [redacted] FR, Regular Air Force.
Col. David C. Reed, [redacted] FR, Regular Air Force.
Col. Jon A. Reynolds, [redacted] FR, Regular Air Force.
Col. Paul L. Roberson, [redacted] FR, Regular Air Force.
Col. Alan V. Rogers, [redacted] FR, Regular Air Force.
Col. Richard M. Scofield, [redacted] FR, Regular Air Force.
Col. John F. Sievertson, [redacted] FR, Regular Air Force.
Col. Victor S. Stachelczyk, [redacted] FR, Regular Air Force.
Col. Kenneth E. Staten, [redacted] FR, Regular Air Force.
Col. Robert F. Swarts, [redacted] FR, Regular Air Force.
Col. Dale W. Thompson, Jr., [redacted] FR, Regular Air Force.
Col. Denis L. Walsh, [redacted] FR, Regular Air Force.
Col. Sam W. Westbrook III, [redacted] FR, Regular Air Force.
Col. Robert V. Woods, [redacted] FR, Regular Air Force.

CONFIRMATION

Executive nomination confirmed by the Senate December 12, 1985:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Otis R. Bowen, of Indiana, to be Secretary of Health and Human Services.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

TRIBUTE TO BOONE MAJORS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. HUBBARD. Mr. Speaker, today I would like to pay tribute to Boone Majors, a longtime friend of mine who died on October 14, 1985, at the age of 89 years.

Oliver Boone Majors, Sr., was a lifelong resident of Wingo, KY, a small rural community in Graves County and the extreme southwestern corner of Kentucky. The son of Will and Nora Majors of Wingo, he was born on September 16, 1896. Like his father, Boone farmed until the mid 1930's. However, he took time out to serve his country in the U.S. Army, a veteran of World War I.

From 1937 to 1960, he owned and operated the Boone Majors General Store in Wingo. In 1960, Boone, in partnership with his son James, formed Majors Insurance Agency in Wingo. Boone was an active partner in that business until the early 1970's, at which time he retired and began devoting his time to oversight of his farming interests.

Throughout his 89 years in Wingo, KY, Boone Majors was always very successful in all that he chose to do. In addition to his farming and business endeavors, he was also a man of civic duty and achievement. He served as president of the Wingo Lions Club in 1947–48 and was the club's secretary for many years following. He was also active in the local political process, and, for example, was always anxious to help out in the precinct polling place during elections.

Boone Majors was a religious man and a longtime active member of the Wingo Church of Christ. He is survived by two sons, James Majors of Wingo, KY, and Oliver Boone Majors, Jr., of Wytheville, VA, and a sister, Ruth Goodgion of Pryorsburg, KY. His late wife Bessie predeceased him in 1968.

Boone Majors was a great asset to Wingo, Graves County, and western Kentucky, and I have always considered it an honor to call him my friend.

I join with the many friends of this outstanding Kentuckian in extending my sympathy to the family of Boone Majors.

ANNUAL SUMMIT MEETINGS BETWEEN THE UNITED STATES PRESIDENT AND THE LEADER OF THE SOVIET UNION

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. LANTOS. Mr. Speaker, we in the Congress followed with great interest the recent Geneva summit between President Ronald Reagan and Soviet Leader Mikhail Gorbachev. Although there is hope that the summit will set the stage for future concrete progress in the relations between our two countries, it is clear that little was accomplished in either arms control or human rights—the two most critical issues that divide us.

Mr. Speaker, the one solid accomplishment of the Geneva summit was the agreement of the two leaders to meet again in 1986 and 1987. I welcome this decision to hold annual summit meetings between the leaders of our two countries.

Annual meetings make all of us breathe a little bit easier. Such meetings by themselves will not, of course, guarantee progress in the vital area of arms control or on any of the other issues that divide us. But the ability of our two countries to destroy each other many times over makes it mandatory that we pursue all avenues that might reduce tensions between the Soviet Union and the United States.

Recently I introduced House Concurrent Resolution 242 expressing the sense of the Congress that the President should exert every effort to schedule annual summit meetings between the President of the United States and the leader of the Soviet Union. The resolution commends the President for the agreement of the two world leaders to meet again in 1986 and 1987 and urges them to institutionalize the practice of annual summits.

Last year, I introduced legislation urging the President to arrange a summit meeting with his Soviet counterpart. At that time the President was reluctant to make any commitment to hold such a meeting. In the spirit of bipartisanship in foreign policy I joined the Republican leader of the Senate, Senator Howard Baker and the Republican Chairman of the Senate Foreign Relations Committee, Senator Charles Percy, in calling upon the President to hold a summit meeting with the leader of the Soviet Union.

My legislation in the last Congress—which is very similar to House Concurrent Resolution 242 this year—was linked to the 40th anniversary of the convergence of American and Soviet troops on the Elbe River in Germany—an unforgettable moment of victory over the bloody tryanny of Hitler and his Nazi regime. The Elbe Resolution, which I introduced, called upon the President to initiate a serious, well-prepared summit on the 40th anniversary of the Elbe River linkup and to inaugurate annual summit meetings with the leaders of the Soviet Union.

Mr. Speaker, annual summits are surely no panacea, but they are a prudent first step toward a more sane and less dangerous world in this nuclear age. The lack of significant progress at the recent Geneva summit is a reminder both of the deep-seated differences between the Soviets and ourselves and of the need to increase our resolve to assure regular, on-going, high-level contacts. I invite my colleagues in the Congress to join me in cosponsoring this legislation urging our President to meet annually with the leader of the Soviet Union.

HOW INTERNATIONAL HUMAN RIGHTS DAY IS COMMEMORATED IN THE SOVIET UNION

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GILMAN. Mr. Speaker, yesterday was the 37th anniversary of the signing of the Universal Declaration on Human Rights and many commemoration activities took place across the globe. Celebrated as "International Human Rights Day," many of our colleagues participated in a special order on the House floor on Monday. On Tuesday, President Reagan spoke before a large group commemorating this important event, and by so doing maintained the prominence of fundamental human freedoms as a major feature of our foreign policy.

Attempts to celebrate International Human Rights Day in the Soviet Union, however, were received in an entirely different manner by Soviet officials. Quiet activities were repelled, and a number of participants arrested.

Celestine Bohlen, of the Washington Post foreign service reported the details most clearly, a narration which I believe will be of great assistance to our colleagues in gauging Soviet human rights policy during this post-summit period. I therefore request that the Post article be reprinted in full at this point in the CONGRESSIONAL RECORD for review and consideration by my colleagues.

[From the Washington Post, Dec. 11, 1985]

A GATHERING AT PUSHKIN'S STATUE—PROTESTERS, POLICE PLAY OUT SILENT RITUAL ON HUMAN RIGHTS DAY

(By Celestine Bohlen)

Moscow, Dec. 10.—A light snow was drifting across Pushkin Square early this evening when a curious crowd gathered at the foot of a statue to Russia's beloved poet to watch a demonstration.

The demonstration, however, did not take place.

In the space of an hour, a gang of burly men, operating under the eyes of uniformed police, had whisked away, one after another, at least eight Soviet citizens, kicked a lens off a CBS television camera, pounced on a cluster of leaflets dropped in the snow and thrown the weight of a human wall against anyone who tried to get close enough to watch.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

All the while, about a hundred people stood around the base of the statue, watching passively, their faces showing neither approval nor disgust. Even the man who appeared to act as coordinator of the police action asked an onlooker at one point: "What are you watching? This isn't a film."

The demonstrators were at the Pushkin monument to protest human rights violations in their country.

The occasion was U.N. Human Rights Day, which a group of Soviet dissidents first chose to mark five years ago by simply standing by the Moscow landmark and silently taking off their hats.

It was a token gesture, publicly inoffensive, but one that hinted at the determination of those who want to speak out somehow against the policies of the Soviet government.

As soon as the tradition started, the police, in and out of uniform, moved in to stop it.

By 6 p.m. this evening, the small park around the Pushkin statue in the heart of Moscow—and a traditional meeting place—had all the signs of a stakeout. Militiamen, or Soviet police, stood in groups of threes. A sense of expectancy was almost palpable.

On Gorki Street, in front of the statue and near the subway stop, groups of men and women lingered, chatting, smoking, looking very much like other people standing around waiting to meet friends, but with one difference: no one came to meet these people, and so over time the snow gradually piled up on their hats and shoulders, setting them apart.

In another corner of the park, a group of western reporters, mostly European and American, huddled together also waiting, shifting from foot to foot to battle the cold.

The first scuffle came shortly before 7 p.m. Someone had scattered what appeared to be handwritten pages at the foot of the statue. In seconds, the burly men dove to the ground, snatching up the pieces of paper and demanding that others hand over their copies.

One man found half of a ripped page on the ground; another leapt to grab him when the two recognized each other and laughed. They apparently were there on the same mission.

Outnumbered on all sides, by the press and the police, the people who apparently came to protest drifted into the crowd singly, talking to no one. As one couple was nabbed and walked off, a young woman said firmly, but quietly: "There—that's human rights." Then she was led off.

After hanging around the edges of the crowd for half an hour, another man walked up the steps of the statue, took off his hat and said he wanted to recite poetry. He also was grabbed and escorted away.

The people were driven off in cars and buses. According to those picked up in previous years, they are taken to local police stations and questioned for three hours before being let go.

Back at the statue, the ritualistic game of cat and mouse played itself out, and the crowd began to drift away. The uniformed police moved in, establishing order, urging onlookers to back away from the monument steps.

"Please step back," said one officer to an old lady, who had come early and stayed in the cold to watch, "This is our monument and we should respect it."

GRIDIRON VICTORY TO DAYTON HIGH SCHOOL

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. AUCOIN. Mr. Speaker, as the late football coach Vince Lombardi would say, "Winning isn't the most important thing, it's the only thing."

Coach Lombardi was a little tough. But a group of high school footballers in my Oregon district are probably thinking the same thing right now.

Dayton High School has captured the Oregon State class A high school football championship. The last time the Pirates took home the State champ cup was 21 seasons ago.

I recently met several of these rising football stars. And I believe they represent a new breed of high school athlete. Their performance on the gridiron and in the classroom is proof that athletics and academics really do mix.

Last week, Dayton played its best in what could only be described as an Oregon "ice bowl." Neither snow, subfreezing temperatures, nor the rock-hard, frozen turf prevented the Pirates from sliding to victory. Vince Lombardi would have been proud.

Neah-Kah-Nie High School put up a valiant fight—but Dayton persevered, and rolled, 38–20, to victory. Lead by Butch Jumalson and the best offensive line in Oregon class A ball—Dayton chalked up a win that will be remembered in Yamill County, and around the State, for years to come.

I grew up in a small town, and attended a small town high school. I know how hard it is to make the grade in statewide competition, let alone come out on top. And I know how important this victory is to the coaching staff, the parents, and especially the Dayton students who worked so hard to achieve their goal.

Coach Dewey Sullivan and his team went 13–0 this season—that's an envious record, whether you live in Dayton, OR, or Washington, DC. Those of us who spend a lot of time in the Nation's Capital can only wish the Redskins could post such outstanding statistics.

NEW YORK TIMES SUPPORTS SEAT BELTS ON SCHOOL BUSES

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. SMITH of Florida. Mr. Speaker, as a sponsor of H.R. 3305, the National School-bus Safety Act of 1985, that provides mandatory seat belts on all new school buses, I would like to bring the following December 11, 1985, New York Times editorial to the attention of my colleagues.

WHY NO BELTS ON SCHOOL BUSES?

Seat belts have been standard equipment in automobiles for so long that most children can't remember when cars came without them. Not so with school buses, in which many children spend more travel time than in the family car. The inconsistency demands correction.

Neither state nor Federal regulations require seat belts in school buses. The rare locality that requires them can thank an independent school board.

School buses already offer the safest surface travel, owing to special traffic regulations and to the Federal design standards to which they have been built since 1977. Of the 21 million children who ride school buses every day nationwide, fewer than a dozen died in crashes last year. The average number killed between 1981 and 1983 was 11. Mile for mile, only scheduled airlines are comparably safe.

Even so, there are unnecessary bus deaths, like that of Paul Goodrow, an 11-year-old from Mahopac, N.Y., last month. He was tossed into the air when his school bus went out of control and hit a boulder, and fatally injured when he landed on his abdomen on the seat back of the row ahead. A seat belt probably would have saved his life.

The current argument against school bus seat belts relies on a recent Canadian Government crash test study that showed belted passengers suffering more severe head injuries than unbelted passenger. But the study dealt only with head-on collisions and also showed belted passengers suffering less-severe chest injuries. The U.S. National Highway Traffic Safety Administration recently reported that half of all school bus fatalities occur in rollover accidents and 15 percent in side-impact accidents. It said safety belts "might be most likely to provide additional safety" in such accidents.

But what happens, opponents ask, if a group of belted kindergarten pupils had to flee a burning bus? The record suggests that fire is not a leading danger. Besides, learning how to unbuckle a seat belt and evacuate a bus ought to be as routine as a fire drill in school.

The main argument concerns cost—$2,000 more for a new bus with belts. Federal officials appear set against requiring them because they lack clear proof that safety would be enhanced. But it is hard to maintain that safety would be reduced. State legislators could serve both safety and education for adult driving by ordering school districts to insist on seat belts in all new school buses.

SERVICE STATION OPERATORS BURDENED BY SALE OF ARCO

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. FLORIO. Mr. Speaker, I wanted to underscore for my colleagues the ramifications of the sale of ARCO's east coast operation to Shell Oil Co., earlier this summer and the effects that this sale has subsequently had on the individual service station operator. The following article appeared in the November 17 issue of the Philadelphia Inquirer highlighting the dif-

ficulties one ARCO service station operator has had throughout this process and stressing that this situation is representative of a number of other dealers in similar circumstances.

Walter Emond had been leasing Walt's ARCO in Pitman, NJ, for the past 20 years when, this summer, he learned, through a customer, that ARCO had sold their east coast operation and that Shell would be the new owner of his station. In September, he was dismayed to learn that one of the stipulations made by Shell in agreeing to a new 3-year lease with Emond would be that he remain open on a 24-hour basis. Despite the fact that there would be little demand for services between the hours of midnight and 7 a.m. and Mr. Emond would spend $1,500 a week just to keep open during those hours, and despite the increased threat of crime, Shell seemed to have given Walter Emond and other service station dealers very little choice in the matter.

As a sponsor of legislation, H.R. 3338, to amend the Petroleum Marketing Practices Act and improve the position service station operators or franchisees have in such situations, I am concerned about the undue burden placed on Walter Emond and others like him all in the name of higher profits for the parent company. I commend this article to my colleagues' attention:

NEW SHELL 24-HOUR LEASES DISMAY EX-ARCO DEALERS

(By Virginia M. Resnik)

Walter Emond first learned that the Shell Oil Co. had bought all of the ARCO gas stations on the East Coast when a customer stopped into his Pitman station this summer and asked him if he would be going out of business now that his station was sold.

"I said, "What are you talking about?" Emond recalled last week. "My customer said, 'Didn't you know you were sold? ARCO sold its whole East Coast operation.' "

For Emond, who had leased Walt's ARCO on Woodbury-Glassboro Road in Pitman for 20 years, a bigger shock came in September when he went to a hotel in Cherry Hill to sign his new three-year lease with Shell.

"When I went to the meeting to sign the lease, they told me I had to be open 24 hours," Emond said. "I almost fell off the chair."

Emond, who did not have an attorney with him, said he had no choice. "It was either sign the lease or go out of business in December." He had previously set his own daily hours.

Last week Emond stood by his pumps and watched the huge ARCO sign come down and a red Shell sign go up in its place on the corner of his station.

ARCO gas station operators up and down the East Coast who lease their stations have faced the same decision in the last few months. Locally, service station tenants in Woodbury, Voorhees, Pitman, Somerdale, Stratford and Mullica Hill are in the same situation.

In Voorhees, the township committee unanimously passed an ordinance Tuesday that prohibits gas stations from being open between midnight and 6 a.m. No one spoke during the public hearing on the ordinance.

In Pitman, the borough council heard Emond's concerns about the 24-hour mandate and took no action. Emond said representatives of a 7-Eleven store in Pitman opposed limitations on business hours, and the borough council agreed with them.

Pitman Mayor Michael Hannum said that while he "sympathized" with Emond's situation, the borough council was advised by its solicitor "that it would be discriminatory to pick out only gas stations" and pass a law limiting their hours.

Hannum pointed out that Pitman has the 7-Eleven and two laundromats open around the clock.

"Southland [the parent company of 7-Eleven] expressed concern that their stores might be restricted. They argued very convincingly that they perform a service to the community by being open between midnight and 7 a.m.," Hannum said. He said Southland's representatives told the council that 7-Elevens do 20 percent of their business during those hours.

One operator, who asked not to be identified, said he refused to sign the 24-hour lease and told Shell officials that his station is in a residential area and that they would have to seek a zoning variance to operate after midnight. He said the lease was then changed.

Several service station operators covered under the open-all-night edict expressed concern for the safety of their employees because the stations would be more likely targets for robbers.

"Am I going to have to worry about coming in here one morning and finding the night man in a puddle of blood?" Emond asked. His station has been robbed twice in 20 years.

Ron Seig, the operator of a Shell station on North Broad Street in Woodbury, said he told his employees "just give them the money and don't argue. They [employees] don't carry much money anyway."

Seig finds humor in the 24-hour plan, which was supposed to take effect as soon as station operators signed new leases. "If you know Woodbury, you know that after 11 you could play tennis in the middle of Broad Street on most nights and not get hit by a car."

Emond said, "They roll up the sidewalks around here at 9 o'clock. This is going to cost me money. I have to pay two men, plus the insurance and electric. I'm not going to make it [at night] on the gas, so I'll end up working three hours [repairing cars] in the morning to catch up on what it costs me to be open at night."

Two station owners estimated it would cost them about $1,500 a week to remain open from midnight to 7 a.m.

One Camden County Shell operator, who said he didn't want to be identified because he feared retaliation from Shell officials, said he knew of several Shell stations that had not begun to operate 24 hours, even though their leases required them to do so.

"You can't make money in those hours [midnight to 7 a.m.]," he said. "I talk to truck drivers coming from North Jersey and New York. They say Shell stations up there aren't open, either, and they have the same leases. If it's enforced many places, [Shell stations] will go under."

John Macguire, the Shell Oil Co. territory manager in Wilmington, Del., who handles the South Jersey area, declined to discuss the issue.

Norman Altstedter, a Shell spokesman in New York, denied that any operators were forced to sign the contracts stipulating stations remain open 24 hours. "Certainly our contracts are negotiable," he said. "The reason we try to have stations stay open for 24 hours is it's good for business for the dealer and for us.

"We have the most extensive [24-hour] program among the oil companies. We certainly encourage dealers to remain open 24 hours. We're doing it all over the country," Alstedter said.

He also said Shell has a security and safety program that includes sales for service stations, rewards for information that leads to arrests and bullet-proof booths for attendants at some stations.

Altstedter said he did not know why dealers are claiming they had no choice but to sign the leases or go out of business.

"Our experience has shown that a dealer [open 24 hours] makes more money over a period of time if they stick with it. It does work out," he said.

FATHER HORACE B. McKENNA, S.J., PRIEST OF THE POOR

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. MAZZOLI. Mr. Speaker, the Society of Jesus is world renowned for its rich tradition of theological and academic scholarship and of teaching excellence in the classroom.

Less renowned but just as rich is the Jesuit tradition of service to the least among us.

One of the priests who most, in his life, reflected the highest Jesuit tradition of service to the needy and the unfortunate was Father Horace B. McKenna, S.J.

While Father McKenna died 3 years ago, his memory still surrounds and infuses St. Aloysius Parish, the site of his mission to Washington's street people, and Gonzaga College High School which is located on the same grounds. Father Horace's spirit of caring concern has inspired a generation of Gonzaga students to live out their school's motto and to become: Men for Others.

One of the keepers of Father Horace McKenna's special flame—and fame—is our former colleague, John S. Monagan, who served his congressional district, Connecticut and the Nation with distinction during his seven terms here in this House.

John has written a book about Father McKenna called—simply and appropriately enough—"Horace, Priest of the Poor." John's book is published by the Georgetown University Press.

Mr. Speaker, I ask permission to place in the RECORD, at this point, an article by Congressman Monagan entitled "Saint Horace," which appeared in the fall 1985 issue of the Georgetown magazine describing an uncommonly virtuous, sometimes cantankerous, but always loving and holy man, Father Horace B. McKenna, S.J.

SAINT HORACE

(By John S. Monagan)

When Father Horace B. McKenna, S.J., died three years ago at the age of 83, the highest officials of church and state joined spontaneously in praising his life-long efforts on behalf of the destitute and the oppressed. A New Yorker by birth, he had chosen to work with the rural poor and had spent over two decades in a black parish in

Southern Maryland. When this assignment was completed, he passed the remainder of his life in the inner city providing material and spiritual aid to people at the bottom of the social ladder. It was then that many from the Hilltop came to know and love him.

Throughout his career, Horace, as he was affectionately known, cherished his close links with Georgetown. In his wide-ranging social activities, he regarded the University as a reservoir of service and her undergraduates and alumni responded generously to his calls for help. Members of the faculty frequently visited his church, St. Peter Claver, at St. Inigoes in southern Maryland, to preach or perform other priestly functions. With the help of Eugene L. Stewart (C'48, L'51) and the support of the University, he created "Sursum Corda," Washington's inner-city housing project. He pressed Washington restaurateur Richard J. McCooey (C'52) into service to create SOME (So Others Might Eat), the highly successful cafeteria for the needy, where scores of socially-minded undergraduates have made their way to perform voluntary services and be educated in the needs of the disadvantaged.

It was at the recommendation of the Rev. Richard McSorley, S.J., that sociology professor Veronica Maz first brought some of her students to Horace's St. Vincent De Paul Society facility on Eye Street to learn the facts of life in the central city. She was so impressed with Horace's dedication that she lent her considerable powers to galvanize his projects, in particular one known as Martha's Table (named by Horace), dedicated to assisting the hungry of Washington, and in sponsoring McKenna's Wagon, a mobile dispenser of soup and sandwiches to the poor.

At least in part due to Horace's urging, the Georgetown Dental School now provides regular, free dental services to the clients of SOME.

Some think Horace McKenna canonizable. Georgetown has recently paid him honor in two particulars. A McKenna section has been established in the Special Collections Division of the Lauinger Library, where all of his papers have been deposited. In complements, the Georgetown University Press has published a McKenna biography, Horace—Priest of the Poor (written by the author of this piece).

Although he loved the literary classics and constantly read the Scriptures in Greek and Latin, Horace was not an academic. His mission was that of a parish priest living in close contact with his parishioners and serving their needs. In particular, it was to the indigent and the blacks that he directed his interest, raising his performance to a unique level with his remarkable persistence and humor.

He dedicated himself to this service at a time when his religious brethren spurned this area of work. He battled to improve the lot of his charges in the worst days of the Depression by obtaining federal, state, archdiocesan, and private aid and, when his efforts to bring equality of opportunity to blacks aroused the violent opposition of reactionary whites and caused him to be removed from the rural scene, he took up the cause of the urban underprivileged. As he said, he became an "alley-whacker" instead of a "bushwhacker" and began his life-long patrol of the downtown streets. Here he created a ministry of his own. "The work is the same—chasing sheep," he said, "—but the ground is harder."

At 19 Eye Street, his daily "line" provided emergency relief for crowds of petitioners, and from this vantage point he sparked a variety of programs calculated to give assistance to the homeless, the incompetents, and the luckless. It is a tribute to his foresight that several of these programs continue with conspicuous success today.

Although he operated in the midst of squalor, poverty, and human depravity that would have floored a weaker man, Horace was blessed with a marvelous sense of humor that helped to lighten his burden and also gave color to his preaching and his conversation. He could reduce complicated concepts to a vivid phrase. Explaining priestly vows, he once said that dedication to chastity meant "you could take a lady to lunch, but not to dinner."

Animating every activity was a devoutness that caused Horace to begin each new undertaking with a prayer, and a sanctity that impelled him to cling to essentials and to eschew the creature comforts sought by his less motivated contemporaries.

Horace was an independent thinker. To the very end of his life, his mind was a penetrating, searching machine. He submitted governmental policies and those of the Church to unrelenting examination. It was this devotion to the dictates of conscience that brought him difficult days in 1968 when he differed publicly with Cardinal O'Boyle on the morality of the encyclical "Humanae Vitae." When he joined forty other priests in opposition to the cardinal's position against birth control, he was disciplined by being deprived of his faculty to hear confession for a period of two-and-a-half years. The issue became a *cause célèbre* when nineteen of the priests, known as the "Washington Nineteen," succeeded in establishing a precedent for processing an appeal in such cases. The result was the creation of a papal commission which produced a formula for agreement by the contending parties.

With this agreement, Horace ended his period of penalty. With a wryness that belied the anuguish he had suffered and the soul-searching he had gone through, he observed, "That's what you get for arguing sex with an Irishman."

The final judgment of the Church, through its prelates and most prominent institutions, was to bestow upon Horace its accolade for his heroic life and his works of mercy. His great contribution was to be a precursor, a stimulator, and an example. He was ahead of his time in favoring greater attention to the poor when his projects were considered "off-beat" and the interest of the average person was directed into other channels. "The poor are all about us," he said. "We will see them if we only look." If there is a greater concern for the destitute today and a greater willingness to help them, much of the reason for this shift in public attitude can be ascribed to the teaching and example of Horace, who is buried in the cemetery below the Ryan Adminstration Building.

When as an infant he was brought to the parish church to be baptized and the officiating priest asked what his name was to be, Dr. Charles Mckenna, his father, said "Horace." The priest demurred. "There is no Saint Horace," he said. "He'll be the first," replied Dr. McKenna.

BANNING THE MEDIA IN SOUTH AFRICA

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. RANGEL. Mr. Speaker, I rise today to comment upon the apparent ignorance of the South African Government about what the root cause is of the continuing unrest in that country.

Pretoria's rulers seem to believe that outside forces are behind the continuing violence. They blame Communists, neighboring countries, and the international antiapartheid movement for inciting discord. Most recently, Pretoria made the astounding claim that the media is to blame for encouraging militant nonwhites to flout authority.

No one in the white hierarchy has considered the possibility that apartheid is to blame. The media has had very little to to with the alienation of an entire generation among blacks. Nor has the media been the catalyst behind the rise of prominent leaders such as Steven Biko, Nelson Mandela, Desmond Tutu, or Allen Boesak. Blaming the media for the prerevolutionary situation in South Africa is at best a dangerous mistake. More likely, it is a calculated attempt to legitimize further repression by the Government.

I would urge my colleagues to protest this latest escalation in the war against freedom in southern Africa. In this vein, I submit the following articles for inclusion in the CONGRESSIONAL RECORD.

[From the New York Daily News, Nov. 20, 1985]

IN SOUTH AFRICA, THE PRESS IS LOOKING THE WRONG WAY

(By Earl Caldwell)

The newspapers have gone back to reporting pieces of the story, a bit here and a bit there. On television there is almost nothing.

In South Africa, they're calling the news media's bluff. Reporters always, say: You get the story, you get it by any means necessary, you do what you have to do. South Africa is saying: Not here, not any more.

Yesterday, in one of the pieces to come back from South Africa, the report was that over the weekend at least 13 more people were killed. The report was that the police, armed with shotguns opened fire on crowds of blacks. The explanation was that some in the crowd had thrown stones and gasoline bombs. This, we're told, happened near East London in a place called Queenstown. There were no other details. The bits and pieces are all we get.

Just a few weeks ago, the story from South Africa was one of the biggest in the world. It was hard to pick up a newspaper or magazines that didn't have a report. And on television, night after night, there was film that told the story in a compelling way.

Then the government in South Africa called the media's bluff. The government told reporters to get the information they needed from the police. They told television to keep its cameras out of Soweto, where 2 million blacks live altogether. And they told them not to take their cameras to any of

the other places where the story they were after was developing.

Nobody tells reporters what to do. Nobody tells television that it can't cover a story it really wants to cover. But the South Africans did. They told the media all that—and then threatened fines (up to $8,000) and prison sentences (up to 10 years) for the ones that didn't obey. So in the papers now, there are only snatches of the story. And on television, almost nothing.

The South Africans are gambling. There is no way in the world they can fill their jails with reporters and photographers and camera crews from around the world. They can't do it; it's as simple as that. But the gamble they're taking is that can call the media's bluff. They believe they can threaten reporters and that just doing it will scare them off. The South Africans don't believe the media is ready to go all out to cover the story.

The tradition of reporters doing what has to be done to get the story goes back a long way. Some news people have been jailed, and others have lost their lives. But the tradition says, You report the story.

The South African government can throw every foreign journalist out of the country. That's easy to do. But the South Africans cannot imprison the media of the world. They know that, and they are not even prepared to try to lock up journalists in a wholesale way.

But they are, as the saying goes, selling wolf tickets. They're playing poker. And while they may not be getting over, they are getting by. For now, that counts. It counts big.

Reporters are not free to report. They are not even free to move about and observe, to just see what is going on. So no matter what happens in South Africa, there is just one version of the story, and that's the one police tell.

Recently, the chiefs of various foreign news bureaus in South Africa were asked how they intended to respond to the restrictions imposed by the government. Most said they would obey the law. But most also said that if something really big were to happen, they would cover the story no matter what.

It was another piece of the evidence that the media has accepted the bluff. Something big is already going down in South Africa. In less than a year, close to 1,000 lives have been lost, and the killing is on the rise. Just the past weekend, another 13 died.

But still, in the newspapers there are only bits and pieces of the story, and on television, almost nothing. For now, the South Africans are calling the news media's bluff.

[From the Washington Post, Thursday, Dec. 5, 1985]

SOUTH AFRICA TRIES TO KEEP IT HIDDEN—BUT THE BRUTALITY, NOT THE REPORTING OF IT, IS THE THREAT

(By William Raspberry)

JOHANNESBURG.—It's easy to get so caught up in the unexpected fights, the political turmoil, the sense that change is finally about to come to this troubled land, that you sometimes need to be reminded of what the turmoil is all about.

My reminder came the other night at the Market Theater, where I saw a portrayal of the (Steve) Biko Inquest.

The makeup of the audience was one of the surprises that one so quickly comes to take for granted; mixed couples and racially integrated parties of theatergoers sipping pre-theater cocktails and exchanging pleasantries in this land of apartheid, without obvious self-consciousness.

But then begins the performance: a powerful, condensed, reputedly quite accurate portrayal of the inquest into Biko's death after 26 days in incommunicado detention. You hear no word from Biko himself—the play is set after his death. What you get, while listening to the official explanations and buck passing, is a reminder of the corruption and the physical and mental brutality required to maintain this awful system.

You know it already, of course. You know it from visits to Soweto, where a significant portion of the huge population lives in utter squalor, where children now on strike from school wander aimlessly about, where the armored personnel carriers called Casspirs are a common, thoroughly detested part of the landscape.

You know it from hearing, at a recent press conference, eyewitnesses to police violence that left 13 people, mostly elderly women, dead after a protest march in the Pretoria township of Mamelodi.

But this knowledge fades surprisingly fast when you return to the somewhat unreal would of the cities, and you begin to understand why the authorities have put such heavy restrictions on journalist forays into the townships. A few print reporters manage to get around the restrictions, but no one takes any outlandish chances for fear of having his newspaper shut down. More telling by far, though, is the absence of television pictures. (Reporters, photographers and TV camermen, when they are lucky enough to obtain permits to enter the townships, are understanding orders to put their notepads and cameras aside when an emergency situation—meaning anything worth recording—arises.)

As in America, there is the sense here that it didn't happen if it's not on television. Even when you know it happened, because you read about it, the absence of pictures keeps it from registering as deeply as it otherwise might. People outside the townships—which is to say white people—got precious little on their state-run TV channels of what was happening in the townships even before the recent press restrictions. Now they get virtually nothing except "talking heads" reports. The violence that they don't see doesn't become a part of their dinner table or cocktail time conversation. It doesn't intrude unbidden into their thoughts. It doesn't quite exist.

In short, from the viewpoint of the authorities, the press restrictions are working. Not perfectly, but well enough for now. They sometimes pay a price when, as in the Mamelodi slaughter, the reporters (and by extension, their audience) are forced to choose between the statements of self-proclaimed eyewitnesses with an interest in making things sound as gruesome as possible and the statements of the authorities, which regularly turn out to have understated the facts by a wide margin. Professional reporters, had they been allowed at the scene, might have provided a fairly realistic picture of what took place.

But even as it works, the government's keep-it-hidden policy contains the seeds of disaster. By masking both the level of official violence and the growing resistance to it, the government may be misleading the ruling white minority into a false sense that there is still plenty of time to work things out.

For if the police and military violence—indeed the violence of apartheid itself—isn't quite real for whites, who don't see it on television, it is terribly real for its victims, who increasingly are demanding relief on pain of rendering the country a bloody and ungovernable mess.

The disparities a visitor sees as he moves about the cities look not much more appalling than ordinary class differences.

And then the Biko play restores context. The deaths in detention neither began nor ended with Biko. The most recent (only a fool would say the last) was recorded in 1985.

Nor have the detentions, more often than not without charges being brought, abated. The 290 detentions of last week brought to more than 6,200 the number of people detained since the emergency regulations went into effect on July 21. The authorities—perhaps again to keep whites from understanding the seriousness of the situation—don't even bother anymore to release the names of the detainees, though it is believed that 1,200 are still being held.

Maybe one day the government will learn that it is not the press reporting of facts but the awful facts themselves that constitute the threat to peace in South Africa.

The program notes include a 1971 Biko speech that ends with this passage: "The tripartite system of fear—that of whites fearing the blacks, blacks fearing whites, and the government fearing blacks and wishing to allay the fear among whites—makes it difficult to establish rapport between the two segments of the community. The fact of living apart adds a different dimension and perhaps a more serious one: it makes the aspirations of the two groups diametrically opposed.

"The white strategy so far has been to systematically break down the resistance of blacks to the point where the latter would accept crumbs from the white table. This we have shown we reject unequivocally. And now the stage is therefore set for a very interesting turn of events."

AN AMERICAN SUCCESS STORY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GARCIA. Mr. Speaker, the New York Times recently ran an article on a friend of mine, a municipal bond officer with Goldman, Sachs & Co., Mr. Robert N. Downey. The article discusses Bob's contributions to his firm and how his hard work turned the firm's fortunes around. I must admit, however, that I'm not at all surprised. Bob Downey is a remarkably hard working and creative individual. He deserves the praise that the Time article affords him. Bob Downey is a credit not only to his firm but to New York City as well. I commend the article to my colleague's attention.

MUNICIPAL BOND OFFICER LEADS GOLDMAN TO TOP

When Robert N. Downey came to Goldman, Sachs & Company in 1969, the firm was not much of a force in the municipal bond business.

"When I came here there were a dozen people in the municipal bond department," Mr. Downey said in a recent interview.

"The first year I was here we did two little issues for colleges and ranked 50th among municipal bond underwriters. We didn't do much business that year, but we generated a lot of ideas."

Times have changed, and those ideas have borne fruit.

This week Mr. Downey's department, which now consists of 132 professionals, acted as lead manager on $1.6 billon worth of municipal bond issues.

The weekly total, a record for any firm on Wall Street, swelled the volume of financings in which Goldman, Sachs has acted as lead manager so far this year to more than $12.8 billion. This week's deals helped to widen the firm's lead over Merrill Lynch as the nation's leading underwriter of municipal bonds.

Mr. Downey, 49, was named a partner at Goldman, Sachs in 1977 and took over management of the municipal bond department three years later.

When he talks about the department's success, the subject he dwells on most are its people.

"That's the No. 1 thing," he said. "We certainly have the people with the brains and the motivation to do deals."

The introduction of new financing twists like growth and income securities has helped attract clients to Goldman, Sachs. But the firm's surge this year has also occurred during a period when the entire municipal bond market is booming.

Issuers, wary of tax legislation being debated in Congress and attracted by a steady decline in interest rates this year, have floated a record $107 billion worth of debt so far in 1985. For all of last year, $101 billion worth of new municipal debt issues went to market.

Some observers predict that an additional $50 billion to $58 billion worth of public debt may be offered in the last two months of the year.

"I don't see that much more coming, but the market is certainly absorbing all that is being issued," Mr. Downey said.

Along with other participants, Mr. Downey seems convinced that the pace of activity will not spill into 1986.

"There will be a big fall off after the first of the year," he said, "if only when it is compared to the last few months of 1985."

Mr. Downey, a graduate of Dartmouth College, began his career in municipal finance with R. W. Pressprich & Company in 1962.

A TRIBUTE TO DR. HAROLD L. SHIRE OF LOS ANGELES

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. WAXMAN. Mr. Speaker, I would like to ask you and our distinguished colleagues to join me in saluting a remarkable man and an outstanding Los Angeles leader, Dr. Harold L. Shire.

On Friday, November 29, on the occasion of his 75th birthday, Dr. Shire was honored by his family and many friends at the Congregation Shaarei Tefila in Los Angeles. Dr. Shire is prominent as a lawyer, industrialist, educator, and philanthropist. As an attorney, he has held positions as assistant U.S. attorney and assistant district attorney in Los Angeles County, as well as practicing privately in Los Angeles and Beverly Hills.

But Dr. Shires' talents and achievements go way beyond the law. He holds degrees of MLA, MBA, and Ph.D. as well as his J.D. His invention of flexible connectors on jet aircraft made a historic contribution to aviation. He founded the General Connectors Corp., and served as president and chairman of the board of that company. He has been a professor and assistant vice president at Pepperdine University in southern California, and has taught at the United States International University in San Diego.

Dr. Shire has also been a tireless and enormously resourceful benefactor of the Los Angeles Jewish community. This commitment extends beyond the Jewish community of today to that of decades from now, as he has devoted himself to such projects as the Yeshiva University of Los Angeles, which will enrich the community long into the future.

Mr. Speaker, I believe this extraordinary American richly deserves the recognition given to him on November 29. I ask that the leadership and the Members of the House of Representatives join me in wishing Dr. Shire, his wife Cecilia Shire, and all of his family good health and many more years of continued contribution to our community and to our Nation.

CARGO PREFERENCE COMPROMISE

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Ms. MIKULSKI. Mr. Speaker, one of the most significant issues currently being debated in the House-Senate conference on the farm bill is cargo preference.

As my colleagues know, cargo preference is an essential element in maintaining our U.S. merchant fleet. Since 1981, we have lost over 18,000 seafaring jobs, a decline of nearly 40 percent in that industry. We have seen a sharp drop in orders of private ship construction, resulting in fewer jobs for cities like Baltimore, MD, and Boston, MA.

Mr. Speaker, earlier this year, representatives from all sectors of the U.S. maritime industry came together with groups from the agricultural community to work toward a compromise on cargo preference. Those of us who support a strong merchant marine would have preferred no compromise on cargo preference.

But after much thought and consideration, we have recognized that the substantial benefits of export promotion programs were being withheld from American farmers because of USDA's shutdown of the Blended Credit Program. They bargained in good faith, despite the fact that the Federal courts had reaffirmed their original position on cargo preference. They recognized, as I do, that two suffering industries like agriculture and the merchant marine should be working together to strengthen, and not weaken, their respective interests.

Last week, the House Merchant Marine Subcommittee, on which I serve, held an oversight hearing on the "Cargo preference compromise." The maritime coalition supporting the compromise appeared before the subcommittee, indicating why they believe the solution they have proposed, and which is before the House-Senate conference, is a good idea for those who serve in the merchant marine and for farmers.

Mr. Speaker, I commend the coalition's statement to my colleagues, and urge them to indicate their support for this compromise to the House Members of the conference committee.

STATEMENT OF THE MARITIME COALITION ON "THE CARGO PREFERENCE COMPROMISE" BEFORE THE HOUSE MERCHANT MARINE SUBCOMMITTEE DECEMBER 5, 1985

Mr. Chairman and members of the subcommittee, we welcome the opportunity to present our views on the cargo preference compromise between the maritime and agriculture industries. The panel appearing this morning was selected to represent the broad spectrum of the American maritime industry which worked to craft the compromise. All of the organizations in our coalition are listed on the covering page of the written statement. Our panel consists of: Bruce J. Carlton, Deputy Executive Director of the Joint Maritime Congress; C. James Patti, President of the Maritime Institute for Research and Industrial Development; Frank Pecquex, Legislative Director of the Seafarers International Union and Maritime Trades Department, AFL-CIO; Albert E. May, Executive Vice President of the Council of American-Flag Ship Operators; and Emanuel Rouvelas of Preston, Thorgrimson, Ellis and Holman, appearing on behalf of the Transportation Institute. Before discussing the cargo preference controversy and eventual compromise, the coalition would like to express its deepest appreciation for the leadership, thoughtfulness and strong support demonstrated by the members and staff of the subcommittee and the full Merchant Marine and Fisheries Committee during the debate and vote on cargo preference provisions in the House farm bill. Indeed, without your leadership and the wide margin of support you developed on this matter, we undoubtedly would not be here today to discuss a compromise.

The compromise on cargo preference drafted by the maritime and agriculture industries was the culmination of a long chain of events associated with the so-called "Blended Credit" controversy. We do not need to describe in detail all of its components but nevertheless, it is useful to recall two key aspects of that episode which in large part helped established the foundation upon which this compromise was built.

In her decision in *Transportation Institute* v. *Dole*, U.S. District Court Judge June Green found unequivocally that the Cargo Preference Act of 1954 applied to the Blended Credit program administered by the U.S. Department of Agriculture. Judge Green further observed that although the court had not been asked to rule on cargo preference applicability in the GSM-102 (loan guarantee) program, she would have concluded that cargo preference applied in that case too. Immediately after her decision, USDA suspended the Blended Credit program to avoid complying with Judge Green's order, thereby abandoning more than one-half billion dollars in export sales of agricultural commodities.

Thus, despite the fact that the federal court had reaffirmed the position of the maritime industry on cargo preference—and

originally that of DOT—the substantial benefits of export promotion programs were being withheld from American farmers by USDA's shutdown of the Blended Credit program.

The maritime community was galvanized by these events and joined ranks to defend the principle of cargo preference and to ensure its equitable and judicious application. Representatives of every affected segment of the industry met together for the first time on March 13 of this year to discuss what was then viewed to be a total impasse on the Blended Credit controversy. It was also perceived that a broad and deep attack on the principle of cargo preference was brewing, and that all cargo preference programs might be jeopardized. That meeting formed the basis of what would become today's unique coalition of labor, management, ship operators, shipbuilders and related groups. I would add at this point that our differences on other important maritime issues are well known and understood by members of this subcommittee. This is not the case with cargo preference. Without reservation, we are bound and determined to see that cargo preference is carried out to the full letter of the law.

Between March 13 and June 4, the maritime cargo preference coalition met frequently to devise and refine a strategy to overcome the obstacles we faced. Our initial efforts were directed to restoring the Blended Credit program and defeating legislation designed to reverse Judge Green's decision. Our attempts began with letters to USDA from the House and Senate—in large measure from this subcommittee—urging Secretary Block to reconsider the decision to terminate the program. We also focused on S. 721, a bill which went far beyond a mere reversal of the District Court decision in that it would have vested total discretionary authority in USDA to determine when cargo preference was to be applied. Our industry quickly determined that enactment of S. 721, or the several similar bills introduced in the House, could foreshadow the total demise of cargo preference, and with it the destruction of our industry.

We were heartened by the strong show of support from members in both houses. Nevertheless, there was no movement to renew the Blended Credit program, thereby shutting off cargoes for the merchant marine and penalizing the farm community. Likewise, anti-cargo preference/anti-maritime language was incorporated into the early drafts of both the Senate and House bills authorizing the farm programs undertaken by USDA. Simultaneously, the government appealed the Blended Credit decision, and we were forced to continue our legal battles. But there was an unexpected benefit arising from the struggle. The hard work of the coalition on cargo preference cemented the maritime industry to a degree which surprised even our most vocal critics.

We should stress, however, that the goals of the coalition at this point did not include a compromise with any other group or industry. Our work was aimed solely at the preservation of the very existence of the U.S.-flag fleet. On June 4, representatives of the maritime coalition met for the first time with those of the agriculture industry to discuss our differences on cargo preference. In our view, this meeting was just another step in the process of preserving cargo preference. Over the course of nearly two months, these same representatives continued to meet in intense, straightforward and vigorous negotiations. We quickly found some common ground: both industries were in deep economic trouble; both were victims of longterm worldwide recession; both suffered precisely the same consequences of an over-valued dollar; both faced stiff foreign competition, which was often heavily subsidized by foreign governments; and both needed immediate relief if their continuing economic difficulties were to be reversed.

Maritime and agriculture recognized that some degree of "give-and-take" would have to take place. Since there was no controversy whatsoever on cargo preference as it applied to the P.L. 480 Food for Peace program, that matter was not examined. Rather, we focused on those various government-assisted export promotion programs that had separated our two industries for many years, culminating in the Blended Credit controversy.

At the outset, both sides laid down guiding principles which were seen as forming the basis of any agreement which we might be able to devise. The maritime industry articulated two such principles: one, we needed additional cargoes on U.S.-flag vessels to promote our economic well-being; and two, the principle of cargo preference was non-negotiable. The representatives from agriculture explained their basic requirements just as succinctly: one, they needed flexibility in designing export promotion programs in order to increase sales abroad and stem the tide of declining exports; and two, they needed to know precisely when cargo preferences was to be applied to government funded programs.

The stage was thus set for the difficult process of negotiation, accommodation, and cooperation. We began with several proposals and counter-proposals from both sides of the table, each structured around our respective interpretations of the other side's "guiding" or "baseline" positions. But in spite of two weeks of serious and good faith efforts, we still were unable to conclude a workable mechanism.

At that point, maritime offered the outline of a proposal which went directly to each side's essential demands and provided the framework of the compromise before you today. Cargo preference would not apply to the commercial-type export programs of the USDA or CCC, such as Blended Credit and Export PIK. Cargo preference requirements on concessional-type programs, such as P.L. 480, administered by USDA, CCC and AID would increase by 25 percentage points, phased-in over 3 years. The principle of cargo preference would be preserved, and agriculture would know precisely when it was to be applied. A further consideration, that cargo preference be administered by DoT in a flexible and efficient manner led to the proposal that a broadly representative national commission be created to examine ways in which the current practices could be improved upon. A key element in the national commission was the direct participation of the Congress, including the Merchant Marine & Fisheries Committee.

The two sides were able to reach an agreement based on this core concept, primarily because there was a recognition that each side's basic demands were preserved, and that such a solution, if enacted into law, could be administered with relative ease when compared with other proposals we had explored.

Before we conclude our statement this morning, we would like to stress again that the entire maritime industry stands united behind this compromise, and we are joined as well by a broad-based coalition of agriculture interests.

This subcommittee and its parent committee took the lead in in fending off the most concerted attack on cargo preference and the U.S.-flag fleet to come before the House of Representatives in many years. The maritime industry is grateful for your solid defense. We would ask this subcommittee to lead the way again in supporting this compromise when the issue is raised during the conference with the Senate on the 1985 farm bill.

This concludes our remarks. We would be pleased to answer your questions.

A SALUTE TO THOMAS B. SHROPSHIRE

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. STOKES. Mr. Speaker, thank you for providing me with this opportunity to salute my good friend, Mr. Thomas B. Shropshire. Recently, Mr. Shropshire retired after 33 years of distinguished service with the Philip Morris Corp. and the Miller Brewing Co. With his retirement, Philip Morris and Miller Brewing have lost an exceptional corporate executive.

Mr. Speaker, Thomas B. Shropshire has been a trailblazer. He was one of the first black Americans to become an officer with a major corporation. He, in turn, has helped other black Americans get started in the corporate sector. For these individuals, Thomas B. Shropshire has been a mentor, motivator and confidant.

Thomas Shropshire began his association with Philip Morris in 1952 as a sales representative. He progressed through the ranks as the export representative to the international division of the Philip Morris Corp. By the mid-1960s, he had held a number of positions with Philip Morris in Africa.

His achievements in Africa were so impressive that in 1972, Thomas Shropshire was appointed by Philip Morris executives to the new management team for the Miller Brewing Co. Largely because of his work and expertise, today, the Miller Brewing Co. has been elevated from the number seven slot to the number two brewer in terms of sales in the United States.

In 1978, Tom was elected vice president of Philip Morris, Inc. and senior vice president of the Miller Brewing Co. He also is a member of the board of the Miller Foundation and the Seven-Up Co.

In addition to his achievements within the corporate sector, Thomas Shropshire has been active with numerous civic, community and charitable organizations. Because of his efforts, the Miller Brewing Co. and Philip Morris have expanded its corporate contributions to include such organizations as the National Urban League, the United Negro College Fund and the Congressional Black Caucus Foundation.

As a result of his tireless efforts with these and other organizations, Thomas Shropshire is the recipient of numerous

awards and honors. He is revered by individuals from all walks of life.

Mr. Speaker, the thing that stands out most in my mind about Thomas Shropshire is that he is an exceptional human being. He has dedicated his life to not only succeeding in the corporate sector, but also helping others to succeed. He is an unselfish individual who has used all of the resources at his disposal to help others.

Although he is retiring from his position with Philip Morris and the Miller Brewing Co. I know that we will continue to hear about his work with various civic organizations. At this time, I ask my colleagues to join with me in saluting Thomas B. Shropshire on his retirement.

Mr. Speaker, I would like to insert in the RECORD an article which appeared in the Cleveland Call and Post on my good friend, Thomas B. Shropshire.

[From the Call and Post, Nov. 7, 1985]

MILLER EXECUTIVE THOMAS SHROPSHIRE CHOOSES EARLY RETIREMENT

MILWAUKEE—Thomas B. Shropshire has elected to take early retirement after 33-years with Philip Morris and the Miller Brewing Company. His retirement became effective November 1.

However, the 60-year-old senior vice president and treasurer will continue his association with the firms by serving as a consultant to the Philip Morris companies.

When he's not consulting, Shropshire will pursue his favorite hobby, golf, "stay involved with my photography and spend a lot more time with my son and daughter." He and his family now live in Mission Viejo, Calif.

Shropshire, whose career spans four decades, is one of a small cadre of Black men and women who helped open the doors for other Blacks by venturing into the corporate world at a time when few companies hired Black professionals. He is also one of very few Blacks who reached the upper echelons of that world.

The foundation for Shropshire's success was laid in Little Rock, Ark., where his widowed mother, a school teacher, worked hard to instill in her three sons the importance of education, a commitment to excellence, full use of their God-given talents and a commitment to helping others. Her efforts were successful. In addition to her son Tom, Mrs. Shropshire's son William (called Bruce by his family) is an oral surgeon in Atlanta, and her son Jackie is a lawyer in Gary, Ind.

After completing his education in Little Rock, Tom Shropshire enrolled in Lincoln University in Jefferson City, Mo., where he majored in business administration. He then attended the graduate school of business at New York University, and served in the U.S. Navy.

With the help of the New York Urban League, Shropshire obtained a job with Philip Morris Incorporated in 1952 as a sales representative in Brooklyn, N.Y. The following year he was named college supervisor, a position he held for seven years.

Shropshire's effectiveness on the domestic front lead to his appointment in 1961 as export representative to Philip Morris' international division. He spent the next decade of his life working in Africa. As export representative, Shropshire was responsible for organizing and supervising distribution and sales of Philip Morris products in 20 different countries.

From 1963-1966, Shropshire served as sales manager for tropical Africa; and, in 1967, he was appointed coordinator for Africa.

His rise up the corporate ladder continued in 1968 when he was named chairman and managing director of Philip Morris Nigeria—responsible for not only marketing, but manufacturing operations as well.

While much of his time in Africa was spent handling company business and advancing his career, Shropshire did not forget an all important tenet of his mother's teaching—a commitment to helping others.

Shropshire served on the Court of Governors of the University of Lagos Medical School, the Nigerian-American Chamber of Commerce, and the Nigerian National Swimming Association. In addition, he served on the All-African Games Committee.

Shropshire's management of Philip Morris operations during his tenure in Africa helped the company's Marlboro brand become the number one selling tobacco product worldwide; and helped firmly establish the viability of product segmentation in the consumer marketplace.

In recognition of his contributions to the company, Philip Morris chose, in 1972, to make Shropshire a member of the new management team sent to Milwaukee to turn the Miller Brewing company into a top beer industry contender.

Shropshire, who was elected to the board of directors of the company, initially served as vice president of market planning for Miller. His leadership helped guide Miller from a modest seventh position in the industry to the number two brewer in the United States.

In 1978, Shropshire was elected a vice president of Philip Morris Incorporated, and senior vice president and treasurer of Miller. He also serves on the board of the Miller Foundation, the Seven-Up Company, Key Banks Incorporation, Athletes for Youth and the Milwaukee Bucks Professional Basketball team.

As he did in Africa, Shropshire has given his time to organizations that benefit others. He formerly served on the advisory council of the W. Paul Stillman School of Business at Seton Hall University in South Orange, N.J., the Business Advisory Council of Milwaukee's Cardinal Stritch College, and as a trustee of Talladega College in Talladega, Ala.

He has been active in the Milwaukee Urban League, the Wisconsin Advisory Committee of the U.S. Commission on Civil Rights, and the National Industrial Advisory Council of Opportunities Industrialization Centers of America (OIC).

He is currently a member of the board of trustees of the National Urban League and Howard University.

Shropshire said he "will probably get involved with community activities in California."

In addition to his person participation in civic, educational and community activities, Shropshire was instrumental in getting Miller involved in fund-rising efforts for such organizations as the United Negro College Fund and the National Urban League.

He has encouraged hiring and promotion of Blacks within the company. One of the most satisfying aspects of his career has been "seeing so many Blacks come into all facets of the corporate world," he said.

He has also encouraged development of programs at Miller that support Black economic development of activities that benefit local Black communities and organizations.

In addition, he has encouraged Miller sponsorship through banking relationships and direct purchases from Black businesses.

Over the years, Shropshire has been a much sought after speaker who carried his no-nonsense message about the need for Black economic development and self-determination to college students and other Black audiences around the country.

His efforts and achievements in the business, education and civic arenas have not gone un-noticed. In 1974, Lincoln University gave him its Distinguished Alumni Award, and in 1980, he was awarded an honorary doctorate of laws degree by his alma mater.

Huston-Tillotson College in Austin, Texas conferred an honorary doctorate of humane letters on Shropshire in 1982, and Miles College in Birmingham, Ala. conferred the same degree on him in 1984.

In 1985, Philander Smith College also conferred an honorary doctorate of humane letters on Shropshire.

The Chicago Conference of Brotherhood named Shropshire Man of the Year in 1975, and he received the same award from Hucksters International in 1976. The following year, Shropshire received the Philadelphia Tribune Charities Humanitarian award.

The string of honors continued in 1979, when Shropshire received the B'rith Human Rights Award, and the Omega Psi Phi Community Award. The same year, Shropshire was given Ebony magazine's American Black Achievement Award in business. The award recipients were selected by men and women on Ebony's 10 most influential Black Americans list. Another honor, the Roberto Clemente Award, was presented to Shropshire in 1981 by the National Association for Puerto Rican Civil Rights.

The Miller distributors in Arkansas established a graduate business scholarship in his name in 1982: and NUABA, an organization of Black beverage retailers he help form, established the Thomas B. Shropshire Business Person's Achievement Award that same year to honor those who demonstrate "the desire and the ability to lead in the world of business."

In recognition of his support of their organization, the Wisconsin Chapter of the United Negro College Fund (UNCF) established the Thomas B. Shropshire Scholarship Fund in 1985. Scholarships will be awarded to Wisconsin students attending UNCF schools.

Miller is an operating company of Philip Morris Incorporated, the wholly owned subsidiary of Philip Morris Companies Inc. Principal beer brands include Miller High Life, Lite, Lowenbrau, Magnum, Meister Brau and Milwaukee's Best.

THE CULTURE AND ANIMALS FOUNDATION

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. LANTOS. Mr. Speaker, at a time when the Congress is beseiged with lobbyists pursuing their own self-serving legislative agendas, it is refreshing and reassuring to find another kind of organization that is pursuing noble and idealistic goals.

I would like to call the attention of my colleagues to the Culture and Animals Foundation [CAF]. This group is a non-

profit, cultural organization committed to fostering the growth of intellectual and artistic endeavors in those individuals who are united by their positive concern for animals.

Unlike so many other animal groups, this organization is not a political or activist group; it employs no lobbyists and has no political agenda. Its purpose is to promote, through education, an understanding and appreciating of our kinship with animals.

The CAF fosters three related programs to foster these goals. First, through its research program, CAF funds scholarly research into the lives and works of intellectuals and artists who have expressed a positive concern for animals.

Second, through its creativity program, the CAF funds original work of artistic, scholars, and creative thinkers who express their concern for animals in an original manner.

Third, through its performance program, CAF funds the performance and presentation of intellectual and artistic work that furthers the aims of the organizations, including the products of its research and creativity programs.

The scope of CAF's three programs is as diverse as artistic and intellectual endeavor will allow. Work ranging from history, legal theory, philosophy, and poetry, to dance, painting, sculpture and music is supported. Grant recipients are chosen by a selection committee comprised of experts appointed by CAF's board of directors. The number and amount of the grants is determined by the availability of supporting funds.

Mr. Speaker, I warmly applaud the aims of the Culture and Animals Foundation to increase our awareness of the delightful animals that share our planet. I urge my colleagues to encourage and support this distinguished group.

BETTER HEARING AND SPEECH MONTH

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GUARINI. Mr. Speaker, today, I am introducing legislation which will promote public awareness of the millions of Americans who are communicatively handicapped. My colleague, Mr. BONIOR of Michigan, is joining me in this effort. With the support of our colleagues in the Senate and the House, we were able to pass a resolution like this one last year. By designating the month of May 1986 as "Better Hearing and Speech Month," we can encourage further attention to the needs of almost 10 percent of our population who fall into this largest of all categories of disability.

Across our Nation, there are approximately 15 million Americans who suffer some form of hearing impairment, ranging from mild hearing loss to profound deafness. More than a quarter of the senior citizen over 65 experience some degree of hearing loss.

Over 10 million people experience speech or language impairments stemming from neuromotor diseases, congenital malformations, orthodontic conditions, vocal cord cancer, strokes and language-based learning disabilities. Every year over 84,000 people lose their ability to grasp word meanings and communicate through verbal speech as a result of strokes or head injuries.

Despite their handicap, people with communication disorders have made significant contributions in virtually every occupational category and profession. Thomas Edison, Beethoven, and Samual Morse overcame their hearing impairments to do work that benefits us still today. President Reagan, Florence Henderson, Nanette Fabray, Patricia Neal, and Lou Ferrigno—the Incredible Hulk—are only a few of the prominent personalities whose professional achievements have continued in spite of hearing or speech difficulties. Nevertheless, many people with communication disorders continue to encounter obstacles which inhibit them from achieving their full potential.

Communicatively impaired citizens face special difficulties in achieving educational parity with their nonimpaired classmates. Young children with hearing imperfections and communication difficulties are often unable to develop language fluency with the ease of others their age. While the academic lag may be small during the primary grades, it often has a cumulative impact.

Unequal opportunity in one area frequently results in a denial of options in other areas. For the vast majority of handicapped Americans, a deficient education severely restricts their employment opportunities. As a result, people with hearing and speech impairments are often undereducated, and later underemployed. While attitudes and laws have changed over the years to provide more job opportunities, this group of disabled Americans still has less access to job advancement than the population as a whole.

Over the past two decades, Congress has passed legislation in response to historic patterns of discrimination against the handicapped. Paralleling these legislative advancements have been technological developments which have augmented the limited abilities of many speech and hearing impaired people. Recent develoments such as closed captioned television, telecommunication devices for the deaf [TDD] and speech synthesizers help to eliminate barriers which prevent those with hearing, speech, or language difficulties from fulfilling their potential. An example of this advanced technology is in use in Congress' TDD phone lines, which allow communicatively impaired citizens to voice their concerns to their elected officials.

Among the most dramatic breakthroughs in modern science is the creation of the cochlear implant. Through the surgical implantation of a minute device, people who are profoundly deaf are now able to hear sounds of varying length and intensity. Further developments may make it possible for the pitch and frequency of sounds to be distinguished also. With such refinements, the cochlear implant promises to provide thousands of previously deal people with the ability to hear human speech for the first time in their lives.

Looking back, we can say that American researchers, scientists and inventors have opened many doors for the communicatively impaired, facilitating their entry into the mainstream of American life. Yet the technological advances I mentioned can be fully utilized only in a society which enforces the basic equal opportunity laws and civil rights protections every citizen deserves.

Across the country, plans are underway to promote awareness of the needs of the communicatively handicapped and to acknowledge their many achievements during Better Hearing and Speech Month. The effort is actively supported by 21 national organizations: A.G. Bell Association for the Deaf, American Academy of Otolaryngology-Head and Neck Surgery, American Hearing Research Foundation, American Speech-Language-Hearing Association, Better Hearing Institute, Boys Town Institute for Communication Disorders in Children, Delta Zeta Sorority and Foundation, Disabled American Veterans, Gallaudet College. Hearing Industries Association. House Ear Institute, National Captioning Institute, National Hearing Aid Society, National Hearing Association, National Technical Institute for the Deaf at Rochester Institute of Technology, New York League for the Hard of Hearing, Psi Iota Xi Sorority, Quota International, Sertoma Foundation, Speech Foundation of America, and the Voice Foundation.

I urge my colleagues to join me in this important and humanitarian endeavor. Together we can diminish the barriers facing these Americans and enhance their opportunities for a brighter and more fulfilling future.

SUPERFUND

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GOODLING. Mr. Speaker, I would like to commend my colleagues in the House for supporting and passing the amendment offered on the floor by Congressman DOWNEY during consideration of Superfund reauthorization. We had to work hard to eliminate from the committee bill, the provision which would have imposed a broad-based, value added (sales) tax on manufacturers who contribute little, if any, to the waste problem we face. Federal environmental law is grounded on the premise that those responsible for pollution pay for its cleanup. A defeat for this amendment would have violated this premise. I believe we can now move forward in cleaning up these hazardous sites on a timely basis without further unnecessary delays.

RAYMOND F. THOMPSON—A LIFETIME OF SERVICE AND ACCOMPLISHMENT

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. DELLUMS. Mr. Speaker, I wish to call your attention to one of the more outstanding members of my constituency. Mr. Raymond F. Thompson, who has distinguished himself and other members of the Eighth Congressional District of California by a lifetime of service and accomplishment, in pursuit of social justice and fair and equitable treatment for people of all races.

Although a native son of San Francisco, Mr. Thompson has been a long-term resident of Berkeley. He was one of the first black men to work in the San Francisco shipyards and he was a powerful leader in the early endeavors to bring about racial equality in the trade unions. He integrated the Boilermaker's Union working on ships in the San Francisco Bay yards. He was a major organizer of the 1934 general strike that established power for organized labor in the San Francisco Bay Area.

His history in Berkeley is equally active and effective; he worked diligently to bring about equitable treatment for ethnic minorities in exercising their rights to fair housing and rights to vote. He was an early leader in racially integrating Berkeley neighborhoods with a long history of segregationist practices.

He has provided leadership to people of all colors by years of service on the board of directors of the Consumers Cooperative of Berkeley which operates supermarkets, and provides goods and services to its over 130,000 member-families. The Berkeley Cooperative has extensive collaborative activities with the national and international cooperative movement, therefore, Mr. Thompson, who served three terms as a member of the Co-op board and two terms as vice president of the Co-op, was responsible foi developing and strengthening the overall cooperative spirit of that time.

Mr. Thompson has been a working man all of his life; he had spent his labor in bettering the lot of all the people in the Eighth Congressional District. As befits a Berkeley resident, he has an extraordinary capacity to quote Shakespeare extensively. Now that he has passed his 80th year of life, I feel that his accomplishments should be noted and honored. Thank you for joining me in this commemoration to a useful and wonderful person.

DON'T JEOPARDIZE IRA AND OTHER RETIREMENT ACCOUNTS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. HUBBARD. Mr. Speaker, I urge my colleagues to read the following letter I received from my constituent, James W. Marvin, Jr., of my hometown of Mayfield, KY.

Indeed, Mr. Marvin's excellent comments to me about his opposition to changing the tax rules for individual retirement accounts (IRA's) and other employer-sponsored retirement programs are timely, especially in light of the fact that the U.S. House of Representatives is today considering and debating tax reform legislation.

I urge my colleagues to read the following letter from James W. Marvin, Jr.:

MAYFIELD, KY, *October 14, 1985.*

Mr. CARROLL HUBBARD,
House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR MR. HUBBARD: Three years ago, with the passage of the Economic Recovery Tax Act, Congress gave the American worker effective ways to take charge of his or her financial destiny by using individual retirement accounts. The beauty of an IRA is, and has always been, its simplicity. However, there now appears to be a cloud of red-tape hovering over the IRA Program.

I am writing to ask that you please not impose contribution restrictions on IRA's by linking them to other types of retirement plans. Please allow those covered by employer-sponsored plans to continue to have a choice in how they invest for their future financial security.

I believe most American workers would agree that IRA's are among the most universally beneficial programs to come out of the Legislature in years. Congress has a major success to its credit. Please do not put it in jeopardy.

Thank you for your consideration.

Respectfully,

JAMES W. MARVIN, JR.

COMMENCEMENT ADDRESS

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. FORD of Tennessee. Mr. Speaker, on December 10 I was privileged to deliver the commencement address before the students and faculty of the University of Tennessee graduating class of 1985.

I am pleased to insert my remarks in the CONGRESSIONAL RECORD, for the benefit of my fellow colleagues.

The remarks are as follows:

UNIVERSITY OF TENNESSEE COMMENCEMENT ADDRESS

Chancellor Reese, deans and administrators, faculty, members of today's graduating class, and your families:

I appreciate the opportunity and the great honor to participate in your commencement exercises.

I was here at the University of Tennessee and in Athens, Tennessee on last September 24 with President Reagan and Congressman John Duncan for this area.

At that time, we were stumping hard for the President's tax proposals and tax reform generally. Recently, the Ways and Means Committee, on which both Mr. Duncan and I serve as senior members, reported a bill from our committee.

The President, who has been the prime mover of tax reform in the country, is still the key factor in whether any tax reform takes place. I believe we will pass a bill for the House, but the President must get behind any bill if it is to pass in the Senate.

It was no accident that the President came to Knoxville. He probably knew that you would beat Vanderbilt and win the Southeast Conference. The President merely wanted to insure his ticket to the Sugar Bowl.

There are several groups of you represented here today to whom I hope to impart a message before I complete my remarks.

First, to you the graduates, particularly the undergraduate class of 1985.

For many of you, one of the most challenging and rewarding experiences of your life is finished.

You have earned good grades and awards, and the life ahead of you holds new opportunities at which you will assuredly excel.

For you, either graduate school or the job market is awaiting your enthusiasm, effort, and energy.

You have accomplished a significant milestone in your lives and you should applaud yourselves.

To the graduate students who have earned masters or doctoral degrees in any range of subjects, the worlds of research and education need your advanced training, new ideas and discipline.

This most challenging world in which we live is revitalized every time one of you steps forward, untainted by the cold realities of life, fresh from the intellectual challenges of the classroom.

Hold on to your ideals. Be bold, and don't be afraid to challenge.

You are the dreamers, the lone voice in the crowded room who dares to ask why. We are all here today to say to you "a job well done."

There is another group among you who didn't challenge your minds and who were satisfied with barely passing grades and few expectations—those of you who were simply along for the ride.

To you I have one simple message: welcome to the real world.

If you are wondering whether I am referring to you, here is a simple test in order to determine to whom I am referring:

Has anyone ever said to you, you are not working up to your potential, or this work is mediocre at best, or if you put as much time into your work as you put into your social life.

If the answer is yes, then I've got news for you—your days of week-night parties, last minute cramming for major projects, and asking for extensions are over or will be short lived. The real world won't wait for you.

Make a commitment to yourself today. Commit that your next effort, be it a job or graduate school, will be your best effort.

"Today is the first day of the rest of your life." This statement has never been more true for anyone as it is for you today.

No one can fault you if you try and don't succeed. But if you barely succeed, with little or no effort, then you have wasted a blessing, a God given opportunity, that in future years, you may realize was not your right to waste.

As chairman of the Subcommittee on Public Assistance and Unemployment Compensation, I see many people who weren't blessed with your opportunities.

They will never have the chance to attend a university like Tennessee.

With the cutbacks in educational programs over the last few years such as finan-

cial aid, student loans, and research grants to colleges and universities, it is my fear that those who have not been able to take advantage of a quality higher education to date, may never have the opportunity to participate in future commencement ceremonies at great institutions such as UT.

Legislators, like myself, recognize these facts and are fighting daily to preserve and expand our educational system.

Currently before us in the Congress is a proposal commonly called Gramm-Rudman. The Gramm-Rudman amendment is an attempt to balance the Federal budget by 1991 and to overcome one of the major problems facing our economy today, the Federal deficit.

Gramm-Rudman would force the President and the Congress to work together to identify more than 50 billion dollars in additional cuts for the coming fiscal year.

If Congress and the President cannot agree as to where the cuts should come, then the President would make the cuts.

You should note that this procedure is radically different from the constitutional authority granted the Congress for authority over the budget of the Federal Government.

As a supporter of a balanced budget, I am pleased that the leadership and the conferees have agreed to exempt programs designed to combat poverty.

I am equally pleased that the Pentagon will be forced to tighten its reins on defense contractors who abuse their relationships with the Federal Government.

I am concerned, however, that given the Federal Government's recent policies and trends toward education the very structural foundation of our educational system is being attacked.

Educational programs have been cut from 10.8 billion dollars in 1981 to 7.9 billion dollars in 1984, a decline in current dollars of more than 25 percent.

Many programs directed at student financial aid such as guaranteed student loans, college work study, and Pell grants upon which many of you relied in order to go to college have already been some of the hardest hit in the last four years.

Education is not one of the protected areas under Gramm-Rudman and will probably be cut again.

If you couple these cuts with the rising costs of private education, the role of State colleges and universities will increase in drastic proportions.

Given the harsh realities of budget cuts and high costs, we cannot allow our public universities to be perceived as a school of last resort for students who cannot afford to attend private schools.

Public universities must be on the cutting edge of research and innovative teaching techniques in order to attract the very best faculty and student body.

The University of Tennessee is making great strides in educational excellence.

I was proud to read that Professor Bill Bass of your anthropology and forensic science department was named "Professor of the Year" by the Council for the Advancement and support of Education.

We need more professors like Dr. Bass, individuals who are committed to their work, and dedicated to the inspiration of their fellow man.

We commend and appreciate you, for we know that your commitment is a result of love and hard work.

But Dr. Bass' commitment must be present not only at this level of education, but at the elementary and secondary school levels as well.

The future educators out there among you, must do more to improve our educational system.

You must help to restore a vigorous curriculum in our secondary schools with an emphasis on English, math and science.

If Tennessee is to compete, you the educators at this level, must provide the leadership and guidance to our lower level schools.

My friends, the State of Tennessee is about to become the beneficiary of the largest single, private capital investment in the history of the industrial world.

I am, of course, referring to General Motors' Saturn Plant.

The benefits, as a result of this plant to the State of Tennessee are tremendous.

However, GM is demanding that the schools and universities in this area provide them with qualified individuals—people who can think logically, intellectually, and analytically.

These abilities can only occur if fundamental skills in English, math, and science are emphasized.

A battle for the future is constantly being waged in the classrooms of the world.

There is an old saying which goes as follows: "If you want one year's prosperity, grow grain. If you want ten year's prosperity, grow men and women."

Our country has succeeded over the years because we have recognized throughout our history the importance of learning. . . .the dignity of hard work, the need to take the initiative, and the good that comes from helping others.

Our country has placed a high value on education and to allow the erosion of our educational system by indiscriminate Federal cutbacks would undermine the tremendous progress we have fought so long to achieve.

Only through quality education can we fortify our national resolve, renew the confidence in our national purpose, and enrich the spirit of our times.

In closing, let me leave you with this simple yet most powerful message that I discovered in a past edition of the Wall Street Journal.

The text reads: "The greatest waste of our natural resources is the number of people who never achieve their potential. Get out of that slow lane. Shift into that fast lane. If you think you can't, you won't. If you think you can, there's a good chance you will. Even making the effort will make you feel like a new person. Reputations are made by searching for things that can't be done and doing them. Aim low: Boring. Aim high: Soaring."

OFFSHORE OIL NEGOTIATIONS BETWEEN MEMBERS OF CONGRESS AND INTERIOR SECRETARY HODEL

HON. RON PACKARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. PACKARD. Mr. Speaker, I rise to address my colleagues about the provision that sets out negotiation guidelines for Interior Secretary Hodel which we have included in the continuing resolution. The negotiations in which we expect to engage Mr. Hodel pertain to the matter of drilling for oil reserves off the California coast. Two very different opinions have evolved on this matter, and our negotiating agenda must be to see if we can bring the two sides close enough together that a sensible plan can be drafted.

Congress originally authorized the Secretary of the Interior in the mid-1950's to lease Outer Continental Shelf [OCS] tracts to oil companies. Three-mile square sites were auctioned off up through the 1960's, as the oil interests sought to develop domestic commercial resources. But these activities took place in the placid days before Americans had heard of Arab oil cartels or OPEC embargoes. Oil was cheap, and no economic incentive existed to prompt mass development of OCS lands.

State waters, within 3 miles of the coast, were part of a different historical process. Certain stretches of the coastline were dotted with scores of offshore rigs where oil was near the ocean floor surface in shallow waters. Sites off of Santa Barbara, Santa Monica and Long Beach emerged as major oil-producing fields in State waters. Until 1969, no significant accidents occurred to raise concerns about the environmental effects of offshore oil drilling.

The massive spill from a rig off of Santa Barbara in the summer of 1969 signalled the end of the oil companies' financial honeymoon. Fifteen thousand square miles of ocean surface were polluted. The cleanup effort consumed $100 million. Californians inland and on the coast wanted more than just verbal assurances that drilling would be done with environmental and aesthetic protection in mind. State and Federal legislators were called upon to enact protective legislation that shielded sensitive marine habitats from potentially damaging development.

Marine sanctuary protection now prevents drilling along major stretches of the coast. While existing wells continue to produce marketable oil, no new wells have been drilled since former secretary James Watt announced that oil companies could bid for any tract they wanted. The California congressional delegation had been successful in imposing moratoria on drilling since 1980. Our success ran out this fall.

Secretary Hodel, who is charged with presiding over our Nation's resources, disagrees with the blanket moratorium strategy we have used. He believes Californians are only one group affected by the development of OCS oil resources. Other Americans who rely on domestic oil, he said, must be consulted before a final agreement is made.

The Secretary could not accept the terms of the preliminary agreement announced last July, and no subsequent talks have taken place.

We in Congress still wish to negotiate. I believe there are areas off the coast that can be developed where commercially valuable oil exists without endangering either water or air quality, without having a negative effect on marine life and without affecting the world-famous California coastal tourist attractions. This is a very sensitive

matter, though, and progress cannot occur without the participation of Californians who will feel the consequences whether or not drilling takes place.

I sought a position on the negotiating team that was authorized in the continuing resolution. Due to the limited number of positions on the team, I was not chosen. This technically will not prevent me from working with my colleagues who share my concern for our beautiful coastline.

My hope for the discussions that will follow enactment of the continuing resolution are many. First, these talks should lead to a concrete settlement to which both sides will agree. Some communities, like Eureka, look forward to the business new oil will bring to them. Others, Oceanside, Carlsbad, San Clemente, and those where tourism is a primary industry, have clearly stated their preferences against OCS drilling. Meeting the differing needs of the various cities and towns along the coast must also occur in talks with the Secretary. The oil companies must identify their best guesses as to where the most recoverable oil is. Environmentalists will have to locate the areas most sensitive to development as well as those parts of the coastline where marine life and water conditions will tolerate exploration.

Only when individuals and groups with opposing views meet can progress be made. The lack of motion in these talks is frustrating. When the moratorium expires tomorrow, the ban on future lease sales will be lifted. I will work with my colleagues who sit on the panel that meets with Mr. Hodel and seek continued protection for the entire coast until an agreement is signed by the participants.

HUMAN RIGHTS VIOLATIONS IN AFGHANISTAN: THE U.N. CALLS SPADE A SPADE FOR A CHANGE

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. BROOMFIELD. Mr. Speaker, I am encouraged by the frankness of a recent U.N. report concerning widespread human rights violations in Afghanistan. The U.N. is now willing to speak the truth about the terrible Soviet atrocities being directed against the Afghani people. This new U.N. frankness in dealing with the Soviets is encouraging. I hope it continues.

The United Nations Commission on Human Rights recently reported that Soviet activities in Afghanistan included mass bombings, killings of civilians, mutilations, routine torture, the forced evacuation of rural areas, the imprisonment without trial of tens of thousands of political prisoners, and religious intolerance.

While the Afghani Government refused to allow the author of the report to enter Afghanistan, he was able to interview Afghani refugees who had fled to Pakistan. Soviet brutality is so extensive in Afghanistan that over 3 million people have escaped to Pakistan. Earlier this year, the U.N. Commission on Human Rights in Geneva voted to urge a halt to the massive human rights abuses in Afghanistan by over 120,000 Soviet soldiers who have occupied that once peaceful country since 1979.

The great irony of this continuing Soviet occupation and brutalization of the poor people of that country is that the Soviets claim that they were invited into Afghanistan to protect that country and its people.

I commend the U.N.'s Human Rights Commission in Geneva for calling the attention of that international body to the ongoing shame of the Soviet occupation of Afghanistan.

I strongly recommend the following New York Times article on human rights violations in Afghanistan to my colleagues in the Congress.

[From the New York Times, Dec. 3, 1985]

REPORT FOR THE U.N. DENOUNCES AFGHANS ON RIGHTS

(By Elaine Sciolino)

UNITED NATIONS, N.Y., Dec. 2—Violations of human rights have become widespread in Afghanistan since Soviet forces joined the fighting there nearly six years ago, according to a report presented today to the United Nations.

The report, prepared for the United Nations Commission on Human Rights, says that violations include indiscriminate mass bombings and killings of civilians; mutilations and routine torture; the forced evacuation of rural areas; the imprisonment without trial of tens of thousands of political prisoners, and religious intolerance.

The report says the actions appear intended not only to destroy opposition to the Afghan Government, but to break the spirit of an independent people and destroy the traditional family and tribal structures.

"Every hour lost is detrimental to the population and to the human rights situation in the country," wrote Felix Ermacora, an Austrian law professor who prepared the report.

WAR CALLED 'INCREASINGLY CRUEL'

It says that the Soviet-backed Afghan Government, "with heavy support from foreign troops, acts with great severity against opponents or suspected opponents of the regime without any respect for human rights violations." It says that the increasingly cruel nature of the war has been endangering entire peoples and tribes.

Mr. Ermacora, who was not allowed by the Afghan Government to visit the Government side in the war, based his report largely on evidence collected from two visits to Pakistan, where he interviewed Afghan refugees and visited hospitals.

The Afghan delegate, Mohammed Farid Zarif, condemned the commission's investigation today as interference in Afghanistan's internal affairs. He called the report a "wild and worthless piece of trash" and labeled its charges "shallow and superfluous hallucinations."

Mr. Zarif accused Professor Ermacora of pro-Nazi activities and tendencies.

The United Nations committee currently debating Mr. Ermacora's report is expected to vote later this week on a resolution introduced by a number of Western countries commending him for his report and expressing "great concern" for the violations of rights in Afghanistan.

COMMISSION APPROVED REPORT

Last February, when Mr. Ermacora presented an earlier version, the United Nations Commission on Human Rights in Geneva voted 26 to 8 to urge a halt to "grave and massive human rights abuses."

Citing Afghan witnesses, the report lists purported abuses committed against civilians since the Soviet intervention, including hostage-taking, the rape of women, the plundering of houses, the wholesale destruction of crops and forced conscription of children.

"Mosques have been desecrated, religious books destroyed and in some cases even used as toilet paper, while members of the Islamic faith have been obliged to eat pork and to drink alcohol," Mr. Ermacora wrote. He added that rural populations suffered from starvation and disease because the Government withholds food and medicine."

The report says that toy bombs shaped like pens, birds, harmonicas, radios or matchboxes were being dropped from helicopters to maim children. Mr. Ermacora calls these actions "totally out of proportion to any military requirement."

Although the report does not specifically mention the estimated 115,000 Soviet troops stationed in Afghanistan, Western diplomats consider it the first major instance in which the United Nations has documented human rights violations committed by the Soviet Union.

The report concludes that international organizations have "an urgent responsibility to find ways and means to insure respect and guarantees of human rights" in Afghanistan, including the right of four million refugees to return home.

CITY OF LOS ANGELES ADOPTS RESOLUTION REGARDING SALVADORANS

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. BERMAN. Mr. Speaker, 170 Members of this body are cosponsors of H.R. 822, a bill which would temporarily suspend the detention and deportation of Salvadorans now in the United States.

Americans in communities throughout the United States have expressed concern about the safety and well-being of Salvadorans who have fled their war-torn homeland. Many Americans have extended a helping hand to Salvadorans in this country, undertaking at great personal risk to offer sanctuary to the Salvadorans when in fact it is our Government that should offer the refugees a haven by granting them extended voluntary departure.

I would like to share with my colleagues the resolution recently adopted by the council of the city of Los Angeles, declaring that Los Angeles is a sanctuary city. I particularly call to the attention of my colleagues the provision reaffirming the support of the city of Los Angeles for H.R. 822/S. 377, the legislation introduced by Representative MOAKLEY and Senator DECONCINI to temporarily suspend detention and deportation of Salvadorans in the United States. I urge prompt action by this

Congress to adopt this urgently needed legislation.

The text of the resolution follows:

RESOLUTION

Whereas, the United States of America has provided an enduring symbol of freedom for generations of people from other countries who fear persecution in their native land on this basis of their political belief; and,

Whereas, the United States Congress reaffirmed this tradition in the provision of the Refugee Act of 1980 which recognized the right to asylum of the refugee, defined as "any person who is unable or unwilling to return to his/her country because of persecution on account of race, religion, nationality, or membership in a particular social group or political opinion"; and,

Whereas, in the definition of refugee employed by the Federal Refugee Act of 1980, Congress specifically intended to include political refugees and exclude economic refugees with respect to the issue of asylum; and,

Whereas, refugee policy is primarily a responsibility of the Federal Government, but local communities and local governments sustain the fiscal and social impact of large numbers of immigrants seeking asylum from persecution, and

Whereas, the climate of fear prevalent among Central American refugees presently living in Los Angeles may potentially impair the efficiency of City government agencies, disturb the efforts of law enforcement agencies to resolve pending cases, and generally contradict the ideals of diversity and tolerance to which the City of Los Angeles subscribes;

Now therefore be it resolved, that the City of Los Angeles reaffirms the traditional American ideal of providing refuge here in the United States for people from other countries who fear persecution in their native land on the basis of their political beliefs; and be it further

Resolved, that the City of Los Angeles, without endorsing any of the contending forces in any country, goes on record in opposition to the deportation of known law-abiding Central American refugees who have fled their homelands for fear of losing their lives; and be it further

Resolved, that the City of Los Angeles reaffirms its support of H.R. 822 (Moakley) and S. 377 (DeConcini), which would establish as official policy the suspension of deportation of certain Salvadoran nationals, provided such is consistent with the Refugee Act of 1980; a position consistent with a previously approved City Council action including such in the City of Los Angeles' 1984-85 Federal Legislative Program; and be it further

Resolved, that the City of Los Angeles appreciates the humanitarian work of private social service and religious institutions such as United University Church, First Unitarian Church of Los Angeles, Sepulveda Unitarian Church, Emerson Unitarian Church, Temple Shir Shalom, and Shir Chadash New Reform Congregation, which have provided assistance to Central American refugees in the Los Angeles area; and be it further

Resolved, that the City Council finds that immigration and refugee policy is a matter of Federal jurisdiction; that Federal employees, not City employees, should be considered responsible for implementation of immigration and refuge policy; and further that the City Council directs City employees to exclude refugee status as a consideration in their daily activities and routine dealings with the public, with the proviso that this directive should not be construed as sanctioning the violation of any law or encouraging interference in law enforcement efforts; and be it further

Resolved, that the City Council commends the Chief of Police and the Los Angeles Police Department for adopting a policy of excluding consideration of the refugee status of crime victims and witnesses who are law-abiding from the Department's routine law enforcement activities; that the City Council urges wider public dissemination of this policy, in English and Spanish; and that the City Council further reaffirms the Department's policy of detaining and arresting suspected criminals, regardless of their citizenship status, and reporting to the U.S. Immigration and Naturalization Service, only those undocumented aliens booked for multiple misdemeanor offenses, high grade misdemeanors, or felony offenses; and be it further

Resolved, that the City of Los Angeles supports, in concept, legislation which would clarify the responsibility of the U.S. Immigration and Naturalization Service to approve asylum for applicants on the basis of the definition of "refugee" in the Refugee Act of 1980 relating to a legitimate fear of persecution in his or her native country, without regard to the political direction of the current government in his or her native country, and without consideration of the relationship between the current Administration in this country and the current government in the refugee's country of origin; and furthermore that this concept be included in next year's Federal Legislative Program; and be it further

Resolved, that the City Council recognizes the many demands placed upon the City's limited fiscal resources by current citizens residing in Los Angeles, and therefore urges the President and Congress to give greater consideration in their deliberations to the fiscal needs of large urban areas such as Los Angeles which have borne a disproportionate share of the cost burden resulting from Federal refugee policies; and be it further

Resolved, that the City Council directs the Human Relations Commission to submit an annual report, commencing in November 1986, on the status and unmet needs of immigrants and refugees residing in the City of Los Angeles; and be it further

Resolved, that the City Council in adopting the policies in this resolution, calls upon the people of the City of Los Angeles to reaffirm the American tradition of providing refuge to law-abiding persons who have fled their native country for fear of persecution on the basis of their political beliefs, and hereby declares that Los Angeles, as part of a national policy of providing refuge to persons seeking asylum from political and not economic persecution, is a City of Sanctuary for such persons.

THE HISTORY OF THE FIRST PRESBYTERIAN CHURCH OF HANOVER, NEW JERSEY

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GALLO. Mr. Speaker, I rise today to bring to the attention of my fellow Members, the history of the First Presbyterian Church of Hanover, NJ. This congregation, which is located in my district, was founded some 277 years ago.

In the ensuing years, this church witnessed the birth of our Nation, its development, and its evolvement into the world's greatest democracy.

Like the history of so many other long-standing institutions, the history of the First Presbyterian Church of Hanover is one that we can all learn from.

For this reason, I would like to ask that the history of the church as presented to me by Pastor Fred Depenbrock be included in today's RECORD.

The history follows:

A BRIEF HISTORY OF THE FIRST PRESBYTERIAN CHURCH OF HANOVER

About the year 1710, several families from Newark and Elizabeth, N.J. and some from East Hampton, L.I. settled at Whippany. This entire region was then a wilderness, but these settlers knew of the abundance of iron ore available and doubtless settled there for the purpose of manufacture.

These early settlers were not mere reckless adventurers, but were persons of substantial character, intelligent, industrious and some of them pious. For the first few years after their settlement, there is no account of religious services among them, but in the year 1718, a building for divine worship was erected on the present site of the cemetery in Whippany. This plot of 3½ acres was given for the purpose of erecting a house of worship by a schoolmaster, John Richards.

The first pastor, Rev. Nathaniel Hubbel, was a Yale graduate and served the church in Westfield as well as Whippany. He lived at first in Whippany, but moved to Westfield when his house in Whippany burned down. He continued to serve the church in Whippany until about 1730. It was during his pastorate that the village of Whippany received the name of Hanover.

Following Rev. Hubbel's ministry, the Rev. John Nutman was ordained pastor of the church at Hanover. He also was a Yale graduate and was a fine scholar. His congregation extended over a wide range of country, embracing the territory now covered by Hanover, Whippany, Chatham, Madison, Parsippany, Morristown, and even beyond these areas. Not long after Rev. Nutman settled in the area, because the meetinghouse was small and dilapidated, the feeling arose among the congregation that a new meetinghouse should be erected, but where it would be built was a matter of grave contention. The people from the Madison area were desirous of having it located nearer them, while those from Morristown were determined that, if the site were changed, it should be in their favor. Strange as it may seem, it was at length determined to decide the matter by "casting a lot"—all parties agreeing to abide by such a decision. When the lot was taken it was in favor of continuing on the old site. However, notwithstanding their previous agreement to stand by the decision, the people from the Morristown area withdrew and formed the First Presbyterian Church of Morristown, at that time known as West Hanover. This separation left the congregation in Whippany with not enough people to be able to pay the pastor's salary. An attempt was made to get the Morristown church and the Whippany church reunited, but it never succeeded. Mr.

Nutman served the church until 1745 having been its minister about fifteen years.

The following year, in 1746 Mr. Jacob Green was installed as pastor. Early in Mr. Green's ministry the question was again agitated whether or not a new meetinghouse should be built. The cite proposed for the new building was where our present church now is located. The South Hanover (or Madison) people left the congregation and in 1747 erected a new meetinghouse in Madison.

No action was taken however on relocating the church building until 1755 when it was at last decided that the old church building should be abandoned. At that time two houses of worship were erected; one of these at Hanover Neck, now part of East Hanover (the building was situated a little east of the present building), and the other was built at Parsippany. Mr. Green preached at both places until 1760 when the Parsippany congregation obtained a minister of its own. Mr. Green continued as pastor at the new meetinghouse in Hanover Neck. Only a small part of the congregation that assembled in the church at Whippany went to Parsippany. All the elders and deacons at that time lived within the boundary of Hanover, and so attended the new building in Hanover Neck.

In 1757 a new parsonage was built which is still standing today, across the street from the present parsonage on Hanover Road.

Completion of the new church building was slow, and as late as 1770 the galleries (or balconies, as we know them) still had no floors. In that year a determined effort was made to raise funds to complete the building.

Between the years 1774 and 1777, there were no parish meetings due to the Revolutionary War. During that period the church building was used as a hospital by the Continental Army!

In 1779 an application was made to the State of New Jersey for a charter to incorporate the First Presbyterian Congregation in Hanover. The following year, before entering upon their office, the trustees were qualified by oath, a practice that is still followed to this day.

Mr. Green died on July 4, 1790, having been pastor of the church for 44 years.

After Mr. Green's passing the church was served by four different pastors until 1834 when Rev. Mandeville was installed as pastor. The important event of Mr. Mandeville's ministry was the erection of the present church edifice. On February 12, 1835, it was decided to tear down the old meetinghouse and build a new one. On the 14th of April that same year, the carpenters began to dismantle the old building that had served for eighty years; and during that period, eight hundred and eighty persons had professed Christ within its walls and one hundred and twenty had been received by letter. Within it some of the most impressive scenes had been witnessed. Wayward members had often stood up with tears of penitence to confess their sins in public and to re-dedicate themselves to God. At one time, nearly an entire aisle was filled with converts, who came to profess faith in Christ.

Some of the timbers of the old building were used in the new one (Mr. Stoll, the Sexton, could show you some of the timbers in the basement).

The first celebration of the Lord's Supper in the new church took place December 13, 1835, which was the first Sabbath the congregation assembled in this building. Mr. Mandeville continued to serve the church until 1838 when he preached his farewell sermon and moved from Hanover to Freedom Plains in New York State.

The church continued through a long period of active evangelism, serving God and the people through the leadership of some very able and devout ministers for the next 74 years.

In January of 1912, the congregation authorized approval of plans to change the lighting in the church from kerosene to electricity, remodeling the front end of the church building so that the choir and organ could be placed behind an enlarged and more attractive pulpit. It also authorized the procurement of a new electrically motivated Moellor organ. Prior to this the choir and a handpumped organ had occupied the gallery over the rear of the church. By the 1st of June the building and organ were ready for service.

Today we should be proud to be worshipping in a congregation that has been in existence for more than two-hundred and sixty years. The church building has been declared a National Historical Site and is entered in the records of the National Historical Society in Washington, DC.

The First Presbyterian Church of Hanover is among the oldest religious organizations of the State, as the village of Hanover is perhaps the oldest inland settlement of the State. Hanover Church is the mother of all the Presbyterian churches in Morris County, including the large congregations of Morristown and Madison.

(This "Brief History" has been condensed from "A History of the First Presbyterian Church of Hanover, 1718-1968," compiled by the Reverend Oliver W. Chapin for the church's 250th anniversary.)

A SALUTE TO ANDREW STOFAN

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. STOKES. Mr. Speaker, on Thursday, President Reagan will present the coveted Presidential Rank Award to several senior executive service employees. I am pleased to announce to my colleagues that Andrew Stofan, Director of the NASA Lewis Research Center in Cleveland, will be one of the recipients of the Distinguished Presidential Rank Award. On behalf of the residents of the 21st Congressional District of Ohio, I salute Director Stofan on this achievement.

The principal criteria for the award is exemplary service with the Federal Government. Mr. Speaker, Andrew Stofan has a 27-year record of service with NASA. Because of his dedication and skills, Mr. Stofan has progressed through the ranks of this Federal agency. In 1958, he began his service with NASA at the Lewis Research Center in Cleveland as a research engineer. Currently, he serves as the Director of the Lewis Research Center.

In fact Mr. Speaker, with the exception of a 4-year stint with NASA here in Washington, Andrew Stofan has been employed at the Lewis Research Center during his entire career with NASA.

During that time, he has been at the forefront of the expansion and development of this NASA facility. Today, I and many Clevelanders point to the Lewis Research Center with pride. Andrew Stofan has been instrumental in making the Lewis Research Center a highly respected and noted scientific facility.

I have had the pleasure of working with Andrew Stofan through the years. I have found him to be particularly helpful to me as a member of the House HUD-Independent Appropriations Subcommittee. Because of this association, I have visited the facility on numerous occasions and have been impressed with the kind and quality of research underway at the Lewis Research Center.

In addition to his demanding schedule with NASA, Director Stofan is an active member of numerous civic and community organizations in the Cleveland metropolitan area. He is a member of the Greater Cleveland Growth Association and serves as a board member of several other groups.

A native of the Cleveland area, Andrew Stofan received degrees from both Hiram College in Ohio and Carnegie Mellon in Pittsburgh.

At this time, Mr. Speaker, I ask my colleagues to join me in congratulating Andrew Stofan, Director of the NASA Lewis Research Center, on his selection for the Distinguished Presidential Rank Award.

THE UKRAINIAN FAMINE

HON. DAN MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. MICA. Mr. Speaker, as chairman of the newly-created Congressional Commission on the Great Ukrainian Famine, I have been eager to receive any information or comments which might be of benefit to our Commission.

Recently, our fellow Commission member, the distinguished colleague from New York [Mr. GILMAN] participated in a forum on this topic in Chicago, IL.

I have found our colleague's remarks to be so appropriate and relevant to the purposes of our Commission that I would now like to share these remarks by inserting them into the CONGRESSIONAL RECORD at this point:

REMARKS BY REPRESENTATIVE BENJAMIN A. GILMAN

Thank you for affording me this opportunity to participate in this luncheon forum with this distinguished panel—James Mace of Harvard University, and Mayorn Kuropas, former Special Assistant for Ethnic Affairs at the White House, to discuss the great Ukrainian famine, and more specifically, the relationship of that crime against humanity to today's world, and what significant contributions can the newly created U.S. Commission on the Ukrainian famine produce.

A distinguished authority on Ukrainian culture, Robert Conquest, the curator of the

Russian and East European collection at the Hoover Institution, soon after the shooting down of Korean Air Line Flight 007, noted that in order to match the numbers slaughtered in the Ukrainian Famine of 1933, the Soviets would have to shoot down a Flight 007 every day for seventy-five years.

The Ukrainian Famine of 1932-33 is one of the great tragedies of history, and until recently, little systematic research had been done on this genocide. It is estimated that some seven million people died during the Soviet-instigated famine of the 1930's. And yet, as Dana Dalrymple, a U.S.D.A. International Agricultural Research Specialist stated:

"The famine was virtually unknown at the time despite the vast mortality and despite the fact that a number of accounts were published. Curiously, general histories of the Soviet Union still make little mention of the famine. In retrospect, the famine certainly represents one of the most efficiently managed news stories in history. It is incredible that Stalin could have pulled off such a feat."

Why, we are often asked, is it so important to focus our attention on a famine over a half a century old? Why, some ask, are we dredging up ancient history? What is to be gained by rehashing an event even now fading in the collective memory of mankind?

The Wall Street Journal answered that question for us in an article published on July 7, 1983, by Adrian Karatnycky, a research director of the A. Philip Randolph Institute. In that article, Mr. Karatnycky wrote:

"There is, of course, our moral obligation to honor the memory of the nameless victims by depicting the truth. Moreover, it is important to understand the forced famine as a pivotal event in Soviet history, whose consequences remain to this day. For the famine created a disastrous situation in Soviet agriculture from which the U.S.S.R. still has not fully recovered. Today—at a time when some would recast Soviet communism in a friendlier mold, the better to negotiate arms reductions with—may once again be an inopportune time to bring up the terrible loss of life and the painful trauma of the brutally scarred Ukrainian nation. Yet 50 years seems too long to remain silent about one of the greatest crimes in mankind's history."

In addition to the reasons cited in that article, the Wall Street Journal printed an editorial several months later, paralelling the events in the Ukraine in the 1930's with the ongoing tragedy in Afghanistan today:

"The Soviet invaders (of Afghanistan) are working hard to centralize the food distribution system and they are now trying to destroy crops they can't buy up. Afghans report Russian bombing of the irrigation system in the rich Shomali plain and napalming of storage bins to destroy the wheat harvest.

The parallel often cited is Stalin's man-made famine in the Ukraine in 1932-33, when communist confiscation of the harvest caused at least five million to seven million deaths and wiped out the entire nationalist strata of that society."

The Wall Street Journal editorial closed with the challenge:

"Will the west sit this one out too?"

The premise of this editorial underscored the adage: "History is destined to repeat itself."

To this adage, I believe, we can add the codicil: "Only if mankind ignores the lessons history has taught us."

This is an appropriate time to bring the Ukrainian famine back into focus. Just a few days ago, President Reagan returned from the first summit meeting with the Soviets in six years. Although we all applaud the necessity of the American and Soviet leaders meeting face to face to seek solutions to the problems facing today's world, such a meeting would indeed be fruitless if the questions of human rights was not addressed.

And, we can not begin to understand the Soviet attitude to human rights if we do not familiarize ourselves with the saga of the Ukrainian famine.

The Ukrainian famine stands out as a watershed event in the history of human rights because of the magnitude of the travesty. An event such as the shooting down of K.A.L. Flight 007 is easy to grasp, because the number of 269 dead is a number we can all comprehend. But the over 7 million who died in the famine is of such magnitude that most of us have difficulty grasping it.

The deliberate attempt to wipe out the identity and the culture of an entire independently minded people is an event which we must understand if our quest for peace in today's world is to have a prayer of success.

That is where the responsibility of our public officials and of our educators becomes clear.

If we allow the Ukrainian famine to be forgotten, to be swept under the rug, it will be repeated . . . in Afghanistan, and in a hundred other places. History has taught us the sad lesson . . . that a crime committed against one people is a crime committed against all. If the world is allowed to forget the Ukrainian famine, then inevitably there will be future atrocities committed against other peoples—and our Ukrainian martyrs will have died in vain.

I was pleased to have co-sponsored and supported the legislation creating a Congressional Commission to investigate the famine in the Ukraine. I believe that such a Ukrainian Famine Commission would go a long way towards focusing the attention of the free world on the human misery that took place over fifty years ago in the Ukraine. I was particularly pleased about my appointment by Speaker O'Neill as a Congressional Member of the Commission.

The Ukrainian Famine Commission is now awaiting an appropriation so that we can commence our work. Once Congress approves our appropriation—which I am assured will take place prior to our adjournment at the end of the year—we will be able to begin our two-year mission to fully investigate and publicize the causes and the effects of this, one of the greatest man-made tragic disasters in history.

Speaker O'Neill appointed, as our Chairman, Congressman Dan Mica of Florida—a concerned and dedicated legislator who I am certain will serve as an outstanding Chairman. The other House Members appointed are: Congressman Dennis Hertel of Michigan and Congressman William Broomfield of Michigan, the Ranking Minority Member of our House Foreign Affairs Committee.

Members of the U.S. Senate appointed to the Commission are: Senators Dennis DeConcini of Arizona and Bob Kasten of Wisconsin.

The President has also appointed Howard E. Douglas, Ambassador-at-Large at the State Department; Gary Dauer, the Undersecretary of Education; and C. Everett Koop, the Surgeon General of the U.S. Public Health Service.

Once our appropriation is approved by Congress, the Urainian community will be recommending six public service commissioners. A full-time staff director will also be named, thus rounding out the full complement of commission members.

I can assure you that we intend to be a hard-working, dedicated group.

It is certainly appropriate that the President has named the Undersecretary of Education as a Member of the Commission, for it is extremely important that our educational community be made fully aware of the magnitude of this historical event, and that our young people be made aware of the extensiveness of this disaster, and are taught that such violations of the basic rights of humans are violations of all our human rights.

Finally, at long last, a literature is arising regarding this tragic episode which for too long was "swept under the rug."

Earlier this year, a book was published by a Ukrainian famine survivor, Miron Dolot. Entitled "Execution by Hunger: The Hidden Holocaust," this fascinating book is one of several major treatments in English, by an eyewitness of the Ukrainian famine.

The author, Miron Dolot, is to be commended for his courage in documenting the horrors of his childhood in the Ukraine, for one of the major hurdles that our commission will have to overcome—quite apart from the fact that survivors are harder and harder to find as the years go by—is that many survivors fear reprisals against family members who are still behind the iron curtain.

Another educational tool, which along with my Congressional colleagues, I am looking forward to seeing is the film, "Harvest of Despair," produced by the Ukrainian famine research committee with assistance from the National Film Board of Canada. This film has received rave reviews through Canada.

The Ukrainian people are admired by free men and women everywhere for their perseverance and their courage in the face of outrages of a shocking nature, just as other ethnic groups behind the iron curtain are courageously fighting for freedom and justice. Just in the past few weeks, I have had the extreme pleasure of welcoming to freedom Dr. Mark Nashpitz, a Soviet prisoner of conscience, and Lydia Staskovitch and her family, a Pentacostal leader. Mark had waited 15 years for his exit visa and Lydia more than 10 years. In speaking with them recently, they both stressed the importance of our speaking out in a decisive, forceful manner, and how important it is to put a human face on our trade negotiations. They also stated that we must never lose sight of the ideals of liberty and justice upon which our country was founded.

The plight of the Ukrainians has to a good measure not captured the attention of very many well meaning people for a variety of reasons. Because those periods of independence of the Ukrainian people has been so brief, many westerners do not think of the Ukrainians as a viable nation, like Poland or Russia, and that has aided the enemies of the Ukrainians who for years have tried to suppress the language, culture, and independent spirit of the Ukrainians.

The obvious intent of the Ukrainian famine was to suppress and break the spirit of Ukrainian independence. Although we are all horrified at the thought of seven million brought to their death, we are even more stricken by the knowledge that the famine was accompanied by an extensive

purge in the cities of the Ukrainian cultural and political elite—the potential leaders of Ukrainian nationalism. The Ukrainian famine was not just a general attack on a people—it was part of a concerted attack on the cultural and spiritual leaders of a nation.

The spirit of Ukrainian nationalism has, however, persevered. Because that spirit of hope remains alive, we can still look forward to the day when Ukrainian culture and independence shall triumph.

Let us all hope with confidence that our House Famine Commission and its activities will contribute towards bringing about the long-awaited day.

In closing, permit me to reflect a moment on the Geneva Summit meetings which have now come and gone.

The Congress and our Nation welcomed back our President and our Secretary of State with a strong outpouring of elation and pride . . . proud that our chief executive has re-opened a line of communication with our principal antagonist.

While it is essential that we fully explore and seek to build on this new opportunity to talk with each other, we must not be lulled into any sense of complacency by the euphoria emanating from all the handshaking and all the good humor and toasting at Geneva.

As we explore a new relationship with the Soviets we must remind ourselves of the character of the policy makers with whom we are communicating—a nation that:

Is involved in regional conflicts throughout the world—in Africa, in Afghanistan, and in Central America;

A nation that has invaded and is conducting a brutal war in its neighboring country, Afghanistan;

A nation that ordered its air force to shoot down an unprotected civilian passenger plane—K.A.L. Flight 007—killing all 269 civilians on board;

A nation that has such a low regard for human rights that it persecutes all those who have the courage to speak up for living up to the Helsinski accords—i.e., Nobel Peace Prize recipient Andrei Sakharov; the Anatoly Shcharanskys; the Orlovs; the Josef Beguns, and all of the other political and ethnic prisoners.

Any accomplishments of this Geneva summit will only be able to be duly assessed in the years to come—and only if it truly contributed to peace, to justice, and to freedom.

And, if Georgi Arbotov is any indicator of any Soviet policy change—then I must be cynical—having heard him respond just hours after the summit meeting when in response to our inquiry concerning any change in the Soviet's human rights policy, he replied in the usual stereotyped, hard-nosed manner . . . that the Soviet's definition of human rights differs from our perception of human rights and that the Soviets are not in violation of any human rights.

Let us hope and pray that Mr. Arbotov's response does not portray the end result of our summit efforts.

Thank you and God bless.

HAL CHRISTENSEN

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. MICHEL. Mr. Speaker, one of the really nice people I have come to know in this business of politics is Hal M. Christensen. Hal has represented the American Dental Association in Washington for 28 years and has directed the office since 1963.

Before I was elected leader and was serving on the Appropriations Committee, I forged a very cordial relationship with Hal because of the community of interests of our work since I was serving on the old Labor, Health, Education and Welfare Subcommittee.

Hal is going to be retiring at the end of this year and I certainly did not want the occasion to slip by without saluting him for first being such a fine representative of his profession and also serving so creditably as a Washington rep for the ADA.

He is an attorney and directed the profession's legislative efforts in the Nation's Capital during the unprecedented expansion of Government health care programs in the 1960's and 1970's, and will continue as a consultant to the association during 1986.

As director of the Washington office and assistant executive director for legislative affairs, he has been responsible for maintaining liaison with the U.S. Congress and executive agencies of the Federal Government.

Under his direction, the ADA's Washington office was expanded from a 1 person operation to a staff of nearly 20 persons. He had a lead role in the association's acquisition last year of the new 12-story downtown office building in which the Washington staff and several related dental organizations are housed.

He was instrumental in the establishment and development of the American Dental Political Action Committee, which has affiliates in all States.

He joined the association in 1957 as assistant secretary of the council on legislation, was appointed secretary to the council in 1960, and in 1961 was named Washington counsel of the ADA.

Thomas J. Ginley, executive director of the 140,000-member association has this to say about Hal: "No professional association has any individual who has so long and successfully represented its members in Washington as has Hal Christensen.

"Hal's efforts are associated with development of the National Institute of Dental Research, Medicaid coverage of dental care for needy children and Medicare reimbursement for covered services provided by dentists, self-employed pension plans, opposition to taxes on health benefits, and so many other pieces of legislation important to the profession and the oral health of Americans which are too numerous to list. In short, he has been dentistry in Washington and this profession is the better for it."

Hal received an honorary Doctor of Science degree in 1983 from Georgetown University where he gave the commencement address to graduates of the dental school. During his tenure, he has spoken at meetings of almost every State dental association.

He is a fellow, American College of Dentists; honorary fellow, International College of Dentists; honorary member, American Association of Oral and Maxillofacial Surgeons, and an honorary member of several State and affiliated dental organizations.

Before joining the association, Mr. Christensen was associate counsel to a subcommittee of the U.S. House of Representatives and was engaged in the private practice of law. A native of Utah, he completed undergraduate training at the University of Utah and received his law degree from the Washington College of Law, American University in Washington, DC. He has been admitted to practice before the U.S. Supreme Court and the courts of Illinois, Utah, and the District of Columbia.

FARM CREDIT SYSTEM ISSUE

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. OXLEY. Mr. Speaker, this week we voted on strengthening the authorities and responsibilities of the Farm Credit System. Their immediate problems need to be addressed if the nearly 1 million borrowers of the system are to be able to continue farming in 1986. I am greatly concerned, however, regarding the ability of local stockholder-borrowers to control their own associations. Association leaders in my district want to retain local control. They know best if farmers in their association will be able to repay the loans they make.

In this regard, Mr. Speaker, I call my colleagues' attention to an excellent discussion on the credit issue and expression of concern by the successful directors of the Production Credit Association of Northern Ohio for continued local control.

FEDERAL LAND BANK ASSOCIATIONS,
PRODUCTION CREDIT ASSOCIATIONS,
Fostoria, OH.

PRODUCTION CREDIT ASSOCIATION OF NORTHERN OHIO

DEAR SIR: We are the directors of Production Credit Association of Northern Ohio, which was chartered by the Governor of the Farm Credit Administration on March 19, 1934. Our headquarters is in Fostoria, Ohio, but our lending business is conducted in Hancock, Wood, Lucas, Ottawa, Sandusky, and Seneca counties, Ohio. We have approximately 2,500 farmers in these counties who own stock in the PCA and are borrowers from it.

The counties in which PCA of Northern Ohio operates are among the state's most productive in a number of different commodities. For example, Wood county ranks first in wheat production, second in soybean production and third in corn production in Ohio. Hancock county is first in soybean and second in wheat production. Sandusky county is first in cucumbers, processing tomatos, and sugar beets. Our lending territory also includes fruit, vegetables, and greenhouse operations as well as beef, dairy cattle, hogs, sheep and poultry.

In the thirty-five year period from 1950 to June 30, 1985, PCA of Northern Ohio loaned more than $1,000,000,000. It has had less than $1,000,000 in cumulative loan

losses from the date it was chartered in 1934 until June 30, 1985. The association has been and continues to be profitable despite what many regard as the most adverse agricultural conditions in fifty years. It has been and is the largest agricultural lender within the six county area. We attribute this to several factors. First, the farmers with which we do business have had a great deal of confidence in the strength of the PCA. When they borrow money they are required to invest an amount equal to eight percent (8%) of the loan and to maintain their investment at that ratio during the life of the loan. They have always been confident that this eight percent (8%) investment can and will be returned to them as the loan is paid. Second, the PCA has historically loaned money at very favorable rates, typically as low as any production credit association in the Fourth Farm Credit District, comprising Ohio, Indiana, Kentucky and Tennessee.

These two factors, confidence and low interest rates, have combined to give the association a very significant market advantage over competing lenders. As a result, the association has been able to attract the best of the agricultural credit risks and to enable these farmers to reduce their interest expenses, which results in a lower overall operating cost, further enhancing the ability of these farmers to operate successfully in a period of difficult economic times. In turn, this has enabled us to operate with minimal credit losses, which, of course, lowers our operating costs.

Each of the factors discussed above is essential in our efforts to provide funds to our farmer-borrowers at the lowest possible costs. Without confidence that they could receive their investment in PCA stock upon payment of their loans, our farmers would borrow elsewhere. Unless our interest rates are competitive, it makes no sense for a farmer to do business with our association. Unless we can continue to operate the association in accordance with our existing credit standards, we cannot maintain a successful loan loss experience.

As a result of fifty years of prudent and successful management, our association has a net worth of an excess of $10,000,000. Computed in the way commercial banks calculate capital for purposes of complying with the banking agencies' six percent (6%) minimums, PCA of Northern Ohio has a capital/asset ratio exceeding fifteen percent (15%), more than two and one-half times that it would be required to maintain if it were a commercial bank. Even if our investment in the stock of the Federal Intermediate Credit Bank of Louisville were to become totally worthless, our resulting capital/asset ratio would be only slightly less than that required of a commercial bank.

THE FARM CREDIT CRISIS AND THE POOLING OF CAPITAL REGULATION

Recently, as agricultural conditions in the United States deteriorated, the quality of agricultural debt began to be called into question. Approximately fifty commercial banks with significant amounts of agricultural loans in their portfolios have now been closed. Also, the Farm Credit Administration revealed similar problems in agricultural debt held by Farm Credit System lenders. As a result, negative accounts in the news media began to include mention of Farm Credit System securities. The yield differential between U.S. Treasury securities and those of the Farm Credit System, which had been almost insignificant, rose to approximately one-fifth of a percentage point.

A Farm Credit Administration regulation (12 C.F.R. § 611.1145) that was designed to calm the credit markets, has had an opposite effect. The regulation purports to give the Farm Credit Administration the authority to transfer assets and equities among Farm Credit System lenders. Immediately after it was adopted the interest rates on Farm Credit System securities increased from approximately one-fifth of a percentage point over the yield on comparable U.S. Treasury securities to approximately nine-tenths of a percentage point over Treasuries. According to accounts in the press, the market fears that the regulation will drive the better credit risks out of the Farm Credit System. Some provisions of H.R. 3792 pose the same threat to the ability of Production Credit Association of Northern Ohio to continue to operate.

H.R. 3792 AND THE FARM CREDIT SYSTEM CAPITAL CORPORATION

Section 4.28L of the Farm Credit Act: As added by section 103 of the bill, this section would grant the Farm Credit Administration unlimited authority to require Farm Credit System institutions such as ours to contribute capital to the Farm Credit System Capital Corporation. This poses a direct and immediate threat to the farmers who have invested in our association. A crisis in confidence could trigger abandonment of our PCA (and other System institutions) by the most creditworthy borrowers. More importantly, even if the initial capitalization of the Capital Corporation does not result in the diversion of capital from our association, another provision in the bill will likely have the same result.

Section 4.28H of the Farm Credit Act of 1971: As added by section 103 of the bill, this section would authorize the Capital Corporation to require System institutions to make funds available to the Capital Corporation. Our PCA, which is certainly the most solvent of any in the Fourth Farm Credit District, has already invested $8,131,000 in the Federal Intermediate Credit Bank of Louisville, including $609,000 invested in the first eight months of this year. Stock in PCA of Northern Ohio held by our borrowers amounted to $6,146,000 as of August 31, 1985. In other words, Production Credit Association has already invested in the FICB more than the amount invested in the PCA by its farmers-borrowers. Our investment in FICB stock has increased from $6,643,000 at year end 1983 to $8,131,000 at the end of August. At the rate we are going, all of our net worth will be tied up in FICB stock by the end of 1986. As a result, it seems probable that the Capital Corporation would very quickly begin to take the stock held by our borrowers. Before that happens we would expect the borrowers to go elsewhere for their credit needs, the most creditworthy going first. Our PCA will then rapidly be left with no customer base. Those farmers who stay with us will find their net worths decreasing as the value of their investment in the PCA declines.

Even if the Capital Corporation were to be financed with debt instruments issued to PCAs rather than with stock, unless PCAs receive a market rate of return, the transfer of funds to the Capital Corporation would quickly bankrupt the association. Our association does not have access to interest free money, nor does it maintain idle balances. For every dollar diverted to the Capital Corporation, our PCA will pay interest. The association already pays approximately $350,000 per year under a loss sharing agreement, in addition to interest on its note to the FICB. Any additional expense not offset by revenue will severely reduce our profitability, requiring that interest rates be increased above those of competing lenders, driving away our better credit risks.

We believe that the Farm Credit System as a whole cannot long survive by bleeding healthy PCAs in an attempt to save those already beyond salvation. The recent action of the Farm Credit Administration in administratively authorizing pooling of capital did not calm the fears of the credit market, but seemed instead to aggravate those fears. We believe that there can be no confidence in Farm Credit System Securities unless the credit markets can be sure that the Farm Credit System retains the confidence of the farmers. Because sections 4.28H and 4.28L would place the farmers' investment in PCA stock at risk, it will not solve the crisis of confidence.

Sincerely,

CARL H. BENSCH,
Chairman of the Board.
DEAN BIERY,
KENNETH HOOT,
RAY MURRAY,
ROBERT BOROUGH,
Directors of Production Credit Association of Northern Ohio.

VOTE AGAINST SENATE JOINT RESOLUTION 238

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. OWENS. Mr. Speaker, I regret that I was not present for the vote on Senate Joint Resolution 238 approving the Nuclear Cooperation Agreement between the United States and the People's Republic of China. Had I been able to, I would have voted against the resolution.

I am deeply concerned about nuclear proliferation. As nuclear technology becomes available to more and more nations, the possibility of nuclear materials, and the know-how to make weapons, falling into the hands of those who might use them and set off a nuclear war increases. The possibilities in highly volatile parts of the world such as the Middle East, are enough to give one pause.

At the time that the nuclear agreement was negotiated with China, the Chinese refused to add the written condition that they would not contribute to the spread of nuclear weapons. A verbal pledge on this key issue was accepted by the administration. Now, the Congress seeks to cure this defect by requiring that the same administration see to it that sufficient safeguards are in place to ensure that nuclear materials, facilities or components are used solely for peaceful purposes. If the original agreement was so important that the lack of safeguards could be accepted, how can one accept that they will now be rigorously enforced? Furthermore, how can we expect that the Chinese Government will be sensitive to a congressional resolution when

they have the agreement that they sought without agreeing in writing to the safeguards?

Today, we have been asked to take a leap of faith which can land the whole world in the abyss of a nuclear winter. I cannot, in good conscience, take that leap of faith and I join with my colleagues who refused to risk the security of our Nation and the continued existence of this world which we must all share.

WILLIAMS HELPS NEW JERSEY CITIZENS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. FLORIO. Mr. Speaker, on September 6, 1985, it was my pleasure to pay tribute to my special assistant, Jack Williams, for 10 years of voluntary service in my Stratford district office.

Before entering the Air Force in May 1942, Mr. Williams apprenticed with Dunlap Printing Company in Philadelphia. During World War II he served in the China-Burma-India theater as a photolithographer with the 20th Bomber Command.

Upon receiving an honorable discharge in December 1945, he returned to Dunlap Printing to resume his apprenticeship. In May 1948 he received his diploma in advertising from the Charles Morris Price School of Advertising and Journalism. From 1950 to 1956 he worked as a compositor at the Government Printing Office in Washington, DC, and subsequently accepted a position as Printing Publication Assistant with the Navy Department.

In 1961 he was transferred to the U.S. Naval Base in Philadelphia working as a printing publication specialist for 6 years at which time he was promoted to the position of Director of the Printing Procurement Department of the Navy Publication Printing Service at the Navy Supply Depot. Mr. Williams held the post until his retirement in July 1974. Recognized for his outstanding administrative capability, Mr. Williams received a recommendation by bodies representing 63 major printing companies for the position of Public Printer of the Government Printing Office in 1970.

Mr. Williams is a life member of the Veterans of Foreign Wars Post 2218 and the Disabled American Veterans (Tampa, Florida). He is a former member of the Washington, DC, Club of Lithographers, the Philadelphia Club of Printing House Craftsmen, and Toastmasters International.

In 1975, Mr. Williams volunteered his services in my Camden County district office specializing in casework related to military matters.

My constituents have recognized the calibre of professional assistance which Mr. Williams provides and have readily expressed their thanks. The following are examples of their appreciation:

"You have cause to be proud of Jack Williams of your staff. He was quick in inquiring about my case and helpful in every way."

"I was very impressed with the service I received from your assistant, Jack Williams. I appreciated his sensitivity to my Veterans' Administration problem."

Without question, Mr. Williams is an outstanding member of that group of retired citizens who continue to unselfishly serve their community and the Nation.

I thank Mr. Williams for his generous contribution of time and expertise. On behalf of my constituency I extend deep appreciation to Mr. Williams for a decade of distinguished service. It is indeed an honor to have Mr. Williams as a volunteer staff member.

FEDERAL REGULATION OF DIRECT INVESTMENTS BY SAVINGS AND LOAN ASSOCIATIONS

HON. TOM DeLAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. DELAY. Mr. Speaker, let me preface my comments by complimenting the members of the Government Operations Committee on the fine job they have done in preparing a report on direct investments by the savings and loan industry. The committee has made a commendable attempt to bring forth both sense and perspective to areas of regulation where even the experts disagree. Aside from the minor suggestions that I am about to make, I believe that this report presents a succinct and cogent summary of the field and makes several sensible proposals for future regulatory action.

A significant portion of the report consists of critiques of the various studies that have been conducted into benefits of direct investments by savings and loan associations. In general, I agree with the committee's assessment of these studies; however, I also believe that the committee has been overly critical of an empirical analysis of direct investments made by Prof. George Benston of the University of Rochester. Since completing the study discussed, Professor Benston has updated his analysis, and his revised study addresses several of the concerns raised by the committee.

I have obtained a copy of Professor Benston's updated study, and suggest that committee members review these materials to see if amendments to the report are in order. In short, the revised study takes into account many of the committee's concerns, and still concludes that direct investments are not a significant cause of savings and loan insolvencies. Second, while I agree with the analysis of the direct investment problem, I cannot wholeheartedly endorse all the conclusions drawn from the analysis. Specifically, the report points out that a general limitation of all the Bank Board staff papers is that they did not examine how direct investments would impact the risk of insolvency, which is the element of risk that is most relevant from a regulatory point of view. Likewise, in examining individual case studies, the report gives detailed explanations of why it is impossible to claim that direct investments caused the collapse of a few troubled thrifts. Yet, despite the fact that the report demonstrates that there is no evidence to justify the Bank Board's interim regulation of direct investments, the report's conclusion does not emphatically state that the rule should be allowed to expire.

While the report intimates that the regulation should be allowed to expire if the FSLIC system is totally revamped, I would prefer that the report explicitly state that the regulation would expire on January 1, 1987, unless the Board can prove that direct investments are harmful to the industry. It is unacceptable for the expiration of this rule to be tied to the recapitalization of the FSLIC insurance fund, which may take many years to complete and is beyond the control of individual institutions.

Furthermore, if, as the report suggests, the largest problem facing the saving and loan industry is lack of recapitalization, it seems absurd to prohibit the industry from using one of the most valuable tools at its disposal, direct investments, to achieve this goal. Recapitalization must come from a combination of retained profits and new investments from outside investors, both of which can be achieved by the use of direct investment.

Third, the report pays lip service to the fact that there is a substantial States' rights issue involved here. While the ultimate insurer of deposits is the FSLIC, we are talking about savings and loan institutions which are chartered and regulated by the various States. I have yet to see a case where regulation can be better achieved by Washington bureaucrats than by local officials who are more aware of the problems faced by their own institutions. When a Federal agency comes out with one rule to apply to 50 States, they run the very real risk of throwing out the baby with the bath water.

Finally, I cannot accept the report's unalloyed enthusiasm for the regulatory structure erected by the Federal Home Loan Bank Board for direct investment. The Bank Board now limits direct investments by requiring associations to obtain approval from the Federal Government before investing more than 10 percent of their assets in direct investments. From reading the final pages of the report, one would think that the Federal bureaucracy should solve all of its problems by inserting Government approval procedures between private enterprise and all controversial business decisions.

I, for one am not so enthusiastic about giving the Federal Government veto power over every important decision made by this country's businessmen and women. I, therefore, disagree with the report's endorsement of the prior approval procedures built into the direct investment regulation.

Similarly, I cannot support a report which commends a regulatory scheme that
